Rheostat shafts are joined by the coupling which is fastened to the shaft of the rear unit. Projections on the coupling fit a recess on the rear of the hub of the front unit.

Three kits are available as follows:

Cat. No. 6532—Mounts Models H or J, also modates Models H, J, G, K or L in rear position.

Cat. No. 6533—Mounts G, K or L units, also modates Models H, J, G, K or L in rear position.

Cat. No. 6591—Mounts Model E units only.

Catalog No.	Max. Panel	Weight
6532	5/8"	.17 lb.
6533	1 1/8"	.41
6591	1 1/4"	.044

*Using No. 5150 Knob.

black bakelite knobs

Catalog No.	Description	Knob Dia.	Hole Dia.	Net 1-2

5152A	Like 5104 but shorter pointer	3 1/4"	1/4"	1.68

*Requires pin and tapped hole in shaft.

rheostat dials

Handsomely finished dials for Ohmite rheostats and other apparatus, feature bright figure lines on etched black background. Divisions marked from 0 to 100 indicate approximate age of rheostat resistance in circuit.

Catalog No.	For Rheostat	Dial Dia.	Recom'd. Knobs*	Net 1-2

5001	P, N, R, T, U	5 1/2"	5104, 5106	.74

*See Bakelite Knobs above

heat control rheostats

A convenient control for regulating the temperature of soldering irons, melting pots (such as those used for solder, wax, potting material) or other heater loads. With soldering irons, it permits quick adjustment of operating heat for the type of job and grade of solder.

430—500	115		SRC500	7 1/2"	3 1/4"	2.25	27.50

Consists of vitreous enameled rheostat housed in a perforated metal cage with knob and dial. Supplied with series plug and six feet of heater cord. The cord from the heater load is plugged into the series plug which is then plugged into a receptacle. Order in accordance with expected maximum wattage load.

high wattage t-pad and l-pad attenuators

Stepless control of speaker volume with essentially constant impedance is provided by Ohmite attenuators. In use, these units are interposed between high power amplifiers and speaker or speakers.

Housed in grey, perforated metal cage 3 1/8" high, 2 5/8" wide and extending 4 1/4" behind panel for L-pads; 6 1/4" for T-pads. Shaft 1/4" and bushing 3/8" diameter; bushing length is for 1/4" maximum panel (specify greater thicknesses). Mounted with two 10/32 screws (supplied) on 2 5/8" vertical centers.

OHMITE molded composition potentiometers

AVAILABLE ONLY FROM OHMITE DISTRIBUTORS

molded composition potentiometers are used in commercial and electronic applications where high quality and dependable performance are important. Type AB is rated 2 watts at 70°C ambient and is available with 7/8" slotted shaft (CMU), 2" unslotted shaft (CU, CA, CB, CCU) locking type bushing with slotted shaft (CLU). Type AS is a miniature potentiometer rated 1/2 watt. It is available with locking type bushing and slotted shaft (Style AS) and standard bushing with longer (slotted) shaft for knob (Style ASM).

Since the resistance element is a thick, solid-molded ring—not a film or paint-type resistor—longer life and smoother operation are obtained. This is due also to the molded composition contact. Units are splash proof, fungus and corrosion resistant and meet the requirements of military specification MIL-R-94. Styles CMU, CLU, AS and ASM respectively to MIL-R-94, Styles RV4N, RV4L, RV6L and RV6N.

Dimensions and tapers are listed in table. Dimensions of all stock units are given below. A SPST switch for single AB controls can be supplied (see table).

"POTS" — MIL Units are Stamped with MIL and Commercial Designations

Unijunction

GE-504A AND GE-509 UNIVERSAL RECTIFIERS

on rectifier with a 100-amp surge rating. Recommended
replacement for all selenium, germanium and silicon rec-
tified in TV receivers. The 100-amp surge rating eliminates
d for the surge limiting resistors normally required when
rectifiers are used.

SILICON INLINE INTEGRATED CIRCUITS

Microelectronic hybrid circuits utilize transistor and diode elements in combination with thin-film resistors and capacitors. Offer optimum performance, reliability and space savings possibilities. Integrated circuits feature planar epitaxial passivated construction, fabricated with diffusion techniques in a single silicon epitaxial monolithic substrate. All MOS devices are p-channel enhance-mode. Inline package except as otherwise noted.

GE Type	Description
PA189*	IF amplifier/discriminator
PA222*	One-watt audio amplifier
PA223	Operational amplifier
PA230	Low level amplifier
PA234*	One-watt audio amplifier
PA237*	Two-watt audio amplifier
PA238	Operation amplifier
PA246*	Five-watt audio amplifier
PA424	Zero voltage switch
PA436	Phase control
PD455	Six-stage bistable frequency divider (MOSFET)
PD460	Eight-stage bistable frequency divider (MOSFET)
PD474	Bistable frequency divider

* With heatsink tab for transferring heat to PC board.

SOLID STATE THYRATRONS

GE Type	Peak Anode Voltage	Cathode Current	May Replace
S26	200 V	1.0 A rms at 30°C	2D21
S27	200 V	1.0 A rms at 30°C	2D50

Max. Temp. $T_A = 125^\circ\text{C}$.

STANDARD TRIAC CIRCUIT ASSEMBLIES

Components are mounted on a printed circuit board and equipped with an extruded aluminum heatsink. All current carrying components electrically isolated from heatsink. Applications include resistance heat control, shaded pole or permanent-split capacitor type motor speed control, series universal type motor speed control, incandescent lamp dimming, etc.

$V_{TMS} = 120\text{ V}$ (suffix 1, 3, 5); 240 V (suffix 2, 4, 6).

GE Type	6 Amp	10 Amp	15 Amp	Description
S100A1	S100A3	S100A5	S100A6	Basic variable voltage control
S100B1	S100B3	S100B5	S100B6	Extended range variable voltage circuit

S100D1	S100D3	S100D5	S100D6	Variable voltage circuit and static switch RFI suppressed
S100E1	S100E3	S100E5	S100E6	Blower motor speed control with set low speed RFI suppressed
S100F1	S100F3	S100F5	S100F6	Basic variable voltage circuit with RFI suppression
S100G1	S100G3	S100G5	S100G6	AC static switch

AC POWER CONTROLLERS

Zero voltage switching provides low RFI levels. All solid state control, including monolithic integrated firing circuit, for long life and high reliability. High input impedance allows use of sensors operating at any point from 5K to 100K ohms.

GE Type	Line Voltage 60Hz Vrms	Peak V	Max. Cur. A	Max. P_D W	V_{T1} Max. V	V_{T2} Typ. V
S200A1	120	200	10	15	10	8

S200A21	277	500	10	17.5	10	8
S200A41	277	500	15	24.2	10	8

* Resistive load of at least 4.2 amps rms rating be connected at all times. Inductive loads cannot be controlled with these modules. $\dagger$ Voltages developed between S_1 and S_2 . Sensor resistance has one side common with AC line (S_1 is common with L_1).

PHASE CONTROL POWER MODULES

All solid-state control, including a monolithic integrated control circuit and a triac power switching device, controls resistive or induction motor loads up to 3600W. Can operate with a wide variety of variable resistance sensors and d-c tachometer signals. High gain trigger circuitry allows wide range of controlled output with small changes in input signal.

GE Type	Line Volts 50/60 Hz Vrms	Peak V	Max. Curr. A	Max. P_D W
S300A1	120	200	6	10.5

S300A5	120	200	15	17.5
S300A6	240	400	15	21.8

Max $V_{T1} = 11.5\text{ V}$, Typ $V_{T1} = 9.4\text{ V}$.

S100 Series

SOLID-STATE FAN-MOTOR SPEED CONTROLS

New line of speed controls that consists of a triac a-c power semiconductor and all necessary control circuitry and heatsinking to afford manual speed control of permanent split capacitor and shaded-pole fan motors. All devices are mounted on a printed circuit board and are designed for direct mounting by means of the potentiometer bushing provided.

GE Type	Description
S400A1	Basic control circuit
S400A1SC	Basic control circuit plus RFI suppression
S400A1SC1	Basic control circuit plus RFI suppression and automatic line-voltage compensation

SILICON GATE-CONTROLLED AC SWITCHES

BI-DIRECTIONAL TRIODES—TRIAC

For gate control of AC power. $P_{GM} = 10\text{ watts}$; $P_{GM(AV)} = 0.5\text{ watt}$. $T_{STG} -40^\circ\text{C}$ to $+125^\circ\text{C}$.

Semiconductor Heat Sinks/Dissipators

THERMAL-LINK RETAINERS — FOR TO-5, TO-18 TYPE TRANSISTORS

Efficient retainers and heat sinks when mounted to P-C boards due to their excellent conductivity and extra mass. Also efficient thermal links between transistor and chassis or heat sink. Beryllium copper spring fingers firmly retain transistors, fit wide case diameter variations; make transistor insertion and removal easy. Available with BeO washer for high frequency applications. Send for Bulletins 141 and 144.

*Separate BeO washer. **BeO washer brazed to dissipator. ***BeO washer brazed between stud and dissipator. †Screw and shouldered nylon washer included. Letter "B" at end of part number denotes black cadmium finish; delete letter "B" for insulube 448 finish; for dull nickel, substitute letters "ND". Contact your IERC representative or the factory regarding other transistor case sizes or finishes. Insulube 448 finish is a 500 volt dielectric coating.

"FAN TOP" SERIES — FOR TO-5, TO-18 TYPE TRANSISTORS

Low cost units give excellent case temperature reductions in natural or forced convection. Design allows location of other components close to transistors; adds virtually nothing to board height. Beryllium copper spring fingers firmly retain transistors, fit wide range of case diameters. Fast, press-fit installation without tools. Send for Bulletin 131.

DISSIPATORS/RETAINERS FOR PLASTIC/CERAMIC TRANSISTORS

New IERC designs help you get maximum efficiency from epoxy semiconductors. Power ratings can be increased from 10% to 33% or more. Additional operating safety margins provided. Send for Bulletin 148.

Spade-Type — Excellent dissipator and retainers. "Stand-off" legs provide positive 0.1" grid location for automatic insertion in P-C board; transistor above solder, eliminating possible thermal damage.

For pricing see "Fan Top" Series

Fan-Top — Provides excellent dissipation with no loss in board area or vertical clearance space.

Clip-Type — Highly efficient dissipator retainer; also used as thermal or radiating device. Space and clip types excellent for RF shielding applications.

Universal-Type — Unique spring clip retainer accommodates variations in case diameters. Both single and dual models accept all popular D-case transistors. Exceptionally efficient. Permits increased power capability, higher operational safety margins, and provides good stability in adverse environments. Legs hold transistor away from solder heat. Dual model ideal for matched-pair applications. Send for Bulletin 150.

*Above items are manufactured from commercial brass, no finish. Parts are also available made from beryllium copper. Available finishes are black oxide and black cadmium. Contact your IERC representative or the factory for information on alternate finishes.

PA AND PB SERIES — FOR FLAT RECTANGULAR PLASTIC CASES

Accommodates flat, rectangular, medium power thyristors, transistors, and SCR's. Staggered fingered design and aluminum construction maximize dissipation. In natural convection a PA will allow a single X-58 case 90 device to be operated with 80% more power. See Bulletin 151.

IES — FOR TO-5, TO-18 TYPE TRANSISTORS

ile transistor cooling devices provide excellent heat dissipation in ations of low to high power transistors of TO-5 and TO-18 configurations. IERC's efficient staggered-finger configuration optimizes con currents and radiating surface area. Available for single and le transistor mounting. Send for Bulletin 135.

mp sections may be used separately as retaining devices; change first two letters of the part number base section LB5A1B or LB5A2B may be used separately for TO-37 transistors such as 2N1172 and delete letter "B" from part number for Insulube 448 finish. Consult your IERC representative or factory for orders.

ATORS FOR CASE MOUNTED SEMICONDUCTORS

ird LB, UP, HP, E1, E2 and E3 Series parts are aluminum with anodize finish. However, all parts are available unplated, or with be® 448 which provides positive insulation up to 500 volts. For be® 448 finish delete letter "B" at end of part number. For un parts delete "B" and add "U".

les — For TO-66 Type Transistor Only — In natural convection the efficient staggered-finger design dissipates 9 watts with case temperature held to less than 150°C. In forced air (1,000 FPM) the LB dissipates 15 watts with case temperature maintained at 90°C. Requires .7 sq. in. of mounting area. Send for Bulletin 146.

ies — For Power Type Transistors and Diodes — Design gives maximum dissipation in medium power applications at lower cost than com-

parable finned extrusions. Staggered finger configuration allows maximum efficiency in both natural convection and forced air at less weight and volume. Increased dissipation achieved by mounting dissipators back-to-back on a bracket. Send for Bulletin 134.

HP Series — For Power Type Transistors and Diodes — Heat dissipating performance of IERC's staggered-finger design is comparable to conventional extrusions up to 3 times as heavy and 30% larger. Two sizes may be used separately or with the smaller unit nested in the larger unit. Send for Bulletin 139.

Extrusions — E1, E2 and E3 Series — Optimized fin design gives the most power dissipation for volume and weight. Standard finish black anodize. Standard units supplied with mounting notches and choice of six popular semiconductor mounting hole patterns. Send for Bulletins 142 (E1 and E2) and 145 (E3).

Semiconductor Heat Sinks/Dissipators and Tube Shields

PRICES SUBJECT TO CHANGE WITHOUT

MICROCIRCUIT PACKAGE DISSIPATORS

Models in this series consist of a retainer and dissipator. Retainer may be used alone to mount the package to a conduction plane, or used with the dissipator in radiation/convection modes. In natural convection, the LBOC2-60B with clamp dissipates 3.6 watts with a case temperature rise of 103°C. The slightly larger LBOC2-61B with clamp dissipates 5 watts with the same case temperature rise. All models incorporate IERC's efficient, patented staggered-finger design. Send for Bulletin 151.

IERC PART NO.	QUANTITY PRICES

Hardware for above Dissipator/Retainer Components					
Group A4*	.20	.18	.16	.14	.12

Retainer is made of beryllium copper and finished with black cadmium. Dissipator is fabricated of aluminum and finished with black anodize.

*Hardware sets consist of 4 screws, 4 nuts and washers. When ordering, specify quantity of sets required. (Example: 100 sets, Group A4 Hardware)

FLUID COOLED HEAT SINKS

Compact, highly efficient aluminum heat sinks for power transistors and diodes. 1000 watts dissipation in less than 45 cu. in. Parallel or series flow; open or closed loop systems. Standard lengths from 6" to 4' in 1½" increments. All standard transistor hole patterns available. Standard ¼" tube fittings. Various finishes. Send for Bulletin 147.

IERC PART NO.	QUANTITY PRICES—PER FOOT			
	1-9	10-49	50-99	100-Over
E4 Series (one foot section) See Note*	14.00	11.60	9.25	8.25

Mounting Hole Pattern Per Pattern	.25	.20	.15	.15

*The above series of heat sinks are manufactured to specific customer requirements. Prices listed include material, saw cutoff, deburring, fluid passage holes tapped and clear anodize finish.

MODULAR FORCED AIR COOLING PACKAGES

IERC's design provides the best use of the output of most available fan types for economical thermal control in multiple semiconductor installations. Two types, each as much as 50% lighter in weight than other assem-

blies with comparable power dissipation. **F-600 Series** units are available with one to four hexagonal banks with six modules each. Cools 24 semiconductors with one muffin fan. Available assembled kit form. **F-400 Series** units have one to four banks of four modules to cool up to 16 semiconductors with one fan. Available assembled kit form. Bulletins 136, 137.

Note: Order through IERC representatives or direct from factory.

INSULUBE® 448 FINISH FOR HEAT DISSIPATORS

Insulube 448 is the only proven finish for positive electrical insulation of electronic equipment that meets the most stringent environmental requirements. Non-hygroscopic. High emissivity surface. Salt Spray resistant. Low thermal resistance. Unaffected by elevated temperature. dielectric strength. High insulation resistance. Send for Bulletin 12

Heat dissipating electron tube shields

Tubes fail primarily because of the heat they generate and the environment in which they operate. If tubes are operated at a lower bulb temperature, their life can be greatly extended.

The simple solution to high tube temperature is IERC's heat dissipating tube shields shown below.

TRN THERMA-REL SERIES HEAT DISSIPATING SHIELDS

Gives you six times longer use of electronic equipment before failure costs only a fraction of that of a replacement tube. Directly replaces obsolete JAN shields. Flexible, black cadmium plated beryllium copper liner adapts to variations in bulb contour and diameter. Positive attachment gives superior retention in shock and vibration environments. Meets or exceeds all military requirements for heat dissipating shields and is qualified to applicable military specifications.

SILICON POWER RECTIFIERS

HY-A-SIL
High - Ampere - Silicon

FEATURES

- High operating temperature, 190°C (Up to 120°C ambient)
- High operating voltage (Up to 600 p.i.v.)
- High efficiency (99% compared to about 75% for selenium)
- Excellent regulation (4% compared to about 15% for selenium)

SO-PH-E	3φ Bridge	220	290	400	800	M	375.00

All above ratings based on 30°C ambient. Fan-cooled ratings based on air velocity of 1000 linear ft/minute. For resistive or inductive loads, as rated. For capacitive or battery loads, derate amperage 20%. Doublers, triplers, 3 phase half wave and 3 phase center-tap also available. Custom-built stacks, 24 hour service.

DIMENSIONS WITH BRACKETS

Size	Length	Height	Width	Weight
B	3"	6"	5"	12 oz.
C	3"	6"	6"	1 lb.
D	4"	8"	7"	2 lbs.
E	4"	9"	8"	6 lbs.
F	6"	5"	5"	1 1/4 lbs.
G	6"	6"	5"	1 1/2 lbs.
H	6"	6"	6"	2 lbs.
J	6"	6"	5"	1 1/2 lbs.
K	7"	8"	7"	4 lbs.
L	8"	9"	8"	6 lbs.
M	8"	11"	10"	6 lbs.
N	8"	6"	5"	4 lbs.

*Not suitable for fan-cooling

OUR MOST COMPLETE SOURCE OF SEMICONDUCTOR COOLERS

Transistor Coolers represent optimum combinations of design and fin spacing giving you maximum heat transfer per ounce of dissipation weight. Made of extruded aluminum with a high conductivity black anodized

SPECIAL REQUIREMENTS

Should you have an unusual requirement that cannot be fully satisfied with a GRI stock cooler, our engineering staff will assist in special design work to meet your specifications. GRI can supply your requirements for a wide variety of heat dissipation units. All of the models listed in this catalog can be obtained in a number of variations. Should you require any deviation from catalog dimensions, please furnish a description and our sales department will supply you with a production drawing for your ordering. When ordering specials, do not refer to catalog numbers.

NOTE: Any GRI extrusion can be ordered in any length up to 6 feet.

To order — State model number, length and whether or not anodizing is desired.

GEORGE RISK INDUSTRIES

SEMICONDUCTOR COOLERS HEAT SINKS

SMALL LIGHT WEIGHT DISSIPATORS

SERIES ST: A small light weight dissipator consisting of six cooling fins. The dissipator is easily assembled over the transistor case without tools and maintains a snug fit over the full tolerance range. It may be used in either printed circuit board or chassis mounting.

SERIES HT: Similar to the "star." Installed in an inverted position—for use in printed circuit board mounting only. Mounting allows components to be located close to the transistor for compact packaging. A special feature of this design is its very small capacitance effect on the electrical circuit.

HIGH POWER MULTI-FIN HEAT SINKS

High Efficiency Cooling—for natural and forced convection applications. Multi-fin design concentrates surface area within minimum volume; reduces conduction travel between semiconductor and radiating fins.

Natural Convection—Series 45 Heat Sinks replace forced convection flat plate assemblies in many applications including those where high power rectifiers and semiconductors are operated near upper limit of maximum current rating.

MODEL 45

Forced Convection—Series 45 Heat Sinks operate at lower flow velocities because of larger surface area. This permits use of smaller, quieter fans with greater mechanical reliability.

Prototypes—Three-foot and six-foot lengths of raw extrusion are available prototypes. Special units are made from these extrusions to your specifications.

UNSURPASSED!

The Reliable SCHAUER[®] 1-Watt Zener is available at the Industry's lowest prices!

No fragile nail heads.

Silicon junction aligned between two parallel, offset tantalum heat sinks . . . great lead tension strength.

All welded and brazed assembly.

High pressure molded package.

Banded and tapered cathode.

SCHAUER 1% tolerance zener diode kit CH51. A \$54.57 value for only \$24.50!

51-piece assortment of 1% tolerance, 1 watt reliable Schauer zener diodes covering the voltage range of 2.7 to 16.0. Three diodes of each voltage are contained in re-usable poly bags which are stored in a handy kit. Data sheet included.

Can be used over and over in laboratory prototypes as well as in precision test equipment. Close tolerances mean low impedances and temperature coefficients and perfect voltage range tests for optimum design.

SCHAUER silicon varistors

Consists of two matched silicon junctions connected in parallel and oppositely poled. The junctions are molded into one small package with axial gold plated nickel leads. Surge: 25 amps peak 1/2 cycle; dissipation: 3/4 watt at 25°C.

SECTION 4800

JEDEC Silicon Avalanche Rectifiers

All of the silicon rectifiers listed below are supplied with avalanche characteristics as standard. They are direct replacements, electrically and physically, for ordinary silicon rectifiers, yet they provide important benefits to you and your products, at no extra cost.

Overvoltage protection is built into the rectifier. Transient voltage induced failures are virtually eliminated because these units avalanche at voltages well below the destruction point. The overvoltage spike is dissipated through the junction at a point below the critical voltage stress across the edge of the junction.

Lower circuit costs are readily achieved. When avalanche rectifiers are

used suppressor and balancing devices, such as resistors, capacitors, R-C networks, etc., are no longer needed. In addition, their elimination improves circuit reliability, due to a reduction in number of components and interconnections.

Dependable performance is assured. Over 20,000,000 of these devices already have been delivered and are in actual use in the field. They now routinely available from high volume production lines.

All Tarzian Silicon Rectifiers are supplied with avalanche protection at no extra cost. For additional types, not necessarily covered by these numbers, see the following pages.

REPLACEMENT KITS See Standard Replacement Types, below, for full specifications.
 Sarkes Tarzian Type M500 Kit—Two Type M rectifiers in volt. doubler circuit dual mounting clip, base and hardware. Net Each.....\$2.12
 Sarkes Tarzian Model F-4 Kit—Two F-4 rectifiers in volt. doubler circuit kit. Net Ea. .93
 Sarkes Tarzian Model F-6 Kit—Two F-6 rectifiers in volt. doubler circuit kit. Net Ea. .93
 Sarkes Tarzian Model 40C Kit—Two 40C rectifiers in volt. doubler circuit kit. Net Ea. \$1.11
 Sarkes Tarzian Model 60C Kit—Two 60C rectifiers in volt. doubler circuit kit. Net Ea. \$1.20

COLOR TV "DIRECT REPLACEMENT" RECTIFIERS

SILICONS

CTV650—Focus Rectifier. Net Ea.....	\$5.00
80C—Voltage Boost Rectifier. Net Ea.....	.81
F8—Voltage Boost Rectifier. Net Ea.....	.69
60C-B+ Rectifier. Net Ea.....	.63
F6-B+ Rectifier. Net Ea.....	.51

SELENIUMS

S-880—Focus Rectifier. Net Ea.....	\$2.95
S-879—Voltage Boost Rectifier. Net Ea.....	1.20
S-855—Convergence Rectifier. Replaces: Emerson 817149; General Electric M128753; Hoffman SR-37; Motorola 48D6653A; Muntz; Packard Bell; RCA 1470990; Philco 34-8058; Satchell Carlson; Sylvania 13-17569; Warwick (Sears) 86-55-3; Wells Gardner 41-001; Westinghouse. Net Ea.....	.84
S-420—Convergence Rectifier. Replaces: Zenith 212-25. Net Ea.....	.84
S-798—Convergence Rectifier. Replaces: Zenith 212-63. Net Ea.....	.96
S-781—Convergence Rectifier. Replaces: Admiral 930-21 and 93C1-21. Net Ea.....	.84

VACUUM TUBE REPLACEMENT SERIES

These silicon rectifier tube replacements are the preferred way to reduce tube replacement costs. Although more expensive than rectifier tubes, they will outlast many times their cost in rectifier tubes.

S-T No.	JEDEC No.	Max. PIV	Max. VRms	Replaces Tube Type	Net Each

*At reduced voltage. †Hermetically sealed. ‡Half-wave circuit; all others full wave. §Derate input voltage 50% for capacitive load.

STANDARD SILICON REPLACEMENT TYPES

Approximate voltage drop for all types listed below is 2 volts. Minimum series resistance required is 5 ohms for F-4, F-6, 40H and 60H; 10 ohms for M150 and 7.5 ohms for M500.

S-T Number	JEDEC Number	PIV	Max. I Rms Volts	DC at 100°C	Recur. Peak	4MS Surge	Size, Inches Lgth. x Dia.	Min. Lead Lgth., In.	Net Each†
F-4	1N2483	400	280	1.0 Amp.	7.5	75	.250 x .200	1 1/4	\$0.51
F-6	1N2484	600	420	1.0 Amp.	7.5	75	.250 x .200	1 1/4	.51

M500	1N1084	400	280	1.0 Amp.	5	30	1 x 1 1/2	1/4 O.D.	.96

*Hermetically sealed. †Available bulk packed or in handy 10-pak, same price.

§Derate 50% for 1/2-wave cap. load #A8T5°C.

LOW CURRENT SILICON AVALANCHE BRIDGE RECTIFIERS

Compact single phase bridge rectifiers. Easy to mount. 2.0-6.0 A., 200-1000 PIV. Single phase units to 400 A. and 3-phase units to 500 A. available upon request.

Super-Sel Rectifiers

and current conditions where "Super-Sel" is preferable to silicon.

Tarzian Super-Sel rectifiers have efficiency, aging, voltage regulation and thermal characteristics comparable to silicon types, yet they are smaller, cheaper and have far longer life than conventional selenium rectifiers.

This is the result of exclusive doping techniques and the elimination of artificial barrier layers. Conductivity exceeds that of ordinary selenium at all current densities and improves further as the current density increases. The inherent self-protection of selenium prevents damage from high voltage transients and overloads, both of which are disastrous to silicon types. Time required for the mass of the plate to reach critical temperature is measured in minutes whereas the same time, with silicon, is measured in microseconds. Pulse loads on these rectifiers can be 10 times the steady rating for a duty cycle of 3 sec. "on" every 4 minutes. Conversely, the overload capacity of silicon rectifiers is severely limited.

Super-Sel units can be used to advantage over both silicon and selenium types at all voltages to 10 ma load currents. They are superior in applications up to 120 ma dc to 200 volts, up to 500 amperes to 35 vdc and to 100,000 amperes at up to 10 volts. They also extend the ambient temperature range of selenium rectifiers to 90°C.

Super-Sel rectifiers are about 1/3 the size of conventional selenium assemblies of the same voltage and current rating while (affording higher) (extending the) maximum operating (temperature.) (temperature to 90°C.) Service life at 85°C. is approximately 100,000 hours — about 10 times as long as conventional selenium. Since output is not affected by aging, output voltage remains stable throughout the life of the unit.

An informative 18-page brochure with product and engineering data in Super-Sel rectifiers is available by writing Sarkes Tarzian.

SEMICONDUCTOR ACCESSORIES

Thermalloy Company

HEAT SINKS

Performance heat sinks. Finish denoted by manufacturer's number (A) Hard per Mil-F-14072, 400 volts insulation (B) Black Anodize per Mil-A-8625 (C) Gold Chromate finish per Mil-C-5541.

Fig.	Fits Case Type	Size, Inches			Typ. RT Natural Convection °C/W	Quantity Pricing

MAFILM INSULATING WASHERS

proved replacement for mica washers. Homogeneous film will not chip, e, peel or break. Has dielectric strength of 7000 volts/mil with a useful ature range of -250°C to +400°C.

Fig.	Fits Case Type	Size, Inches			Quantity Pricing

TOM HEAT SINKS®

Let Thermalloy's wide experience help in your custom heat sink requirements. Thermalloy will evaluate your thermal and mechanical requirements and custom engineer a product to meet your special needs. Our shop specializes in meeting your prototype needs fast. Thermalloy's specialized production equipment designed for the products — results in high quality at a price normally below the cost of in-house fabrications. Contact Thermalloy for obligation estimate.

SEMICONDUCTOR MOUNTING PADS

Low cost Thermalloy color-coded mounting pads provide an economical way to protect transistors and integrated circuits from shock and vibration. Achieve uniform spacing above printed circuit boards. Available in Nylon; DAP denotes Diallyl Phthalate.

CARD GUIDES

Precision circuit board card guides made from nylon per MIL-M-20693 snap into place with snap rivets or rods to provide easy spacing and flexibility in assembling Thermo-Pak modules. Available in a variety of stock sizes or manufactured to specification.

SPRAGUE SEMICONDUCTORS

GERMANIUM & SILICON TRANSISTORS

- Sprague Transistors are Produced by Advanced Equipment and the Latest Manufacturing Techniques.
- Excellent Design Flexibility and Electrical Properties Meet the Most Rigid Performance and Reliability Standards.

- Highest Quality and Outstanding Economy.
- For Complete Technical Data Refer to Latest Issue of the applicable Engineering Bulletin.

Call your Sprague Industrial Distributor for current quantity prices.

SPRAGUE SEMICONDUCTORS

ECONOLINE* PLASTIC-MOLDED SILICON PLANAR TRANSISTORS

*Trademark

- An Improved Low-Cost Line of Transistors Priced for Commercial Applications, Yet Retain the Reliability Required in Industrial Equipment.
- Automated Assembly and Plastic Packaging Bring Prices Substantially Under Those of Comparable Metal-Can Types.
- Broad Line of Small-Signal Amplifiers, Large-Signal Amplifiers, Medium-Speed Switches, High-Frequency Amplifiers, Oscillators, High-Voltage Indicator Drivers, Differential Amplifiers, Complementary Pairs, and Transistors.
- For More Data, See Latest Issue of Catalog IND-851.

PIRGO TRIACS

Triacs are bi-directional triode thyristors which may be switched from an Off-state to an On-state condition either polarity of applied voltage with positive or negative triggering voltages to the gate. They are in-

tended to control AC loads in applications such as motor speed controls, heating controls, lighting controls, and static switching relays.

Contact your local **ELECTRONIC DISTRIBUTOR**
for all your requirements!

You can depend on him for...

- *Instant off-the-shelf delivery*
- *In-depth inventories*
- *Wide varieties*
- *Prompt service*
- *Technical assistance*
- *Availability of the latest products*
- *Speedy purchasing — one order does the job*

If you don't find it here, give us a call.

various Type
PP Heat Sinks

For each compression-mounted SCR or diode, a force indicating clamp and two sinks are used. Black painted sinks are center drilled 1/8" dia. and also have 7/16" dia. holes 1 3/8" above and below center to accept epoxy coated stud bar, rated 5kv. 1 7/8" dia. machined face is flat and has no finish.

SPRING ASSEMBLY:

Type	Leaves	Z"	Max. Force	Approx. Net Price each for 500+ lots
130-2	2	.50	800 lbs.	\$1.06
130-3	3	.61	1200	1.25
130-4	4	.72	1600	1.44
130-5	5	.83	2000	1.62

STUD BAR:

Type	X" min.	X" max.	Approx. Net Price each for 500+ lots
130-A	1.74	2.12	\$1.44
130-B	2.05	2.43	1.44
130-C	2.36	2.74	1.44

*Watts per pair for natural convection temperature rise of 75 C. For complete specifications, request Bulletin 130.

Wakefield Heat Sinks

Highest Power Dissipation per Unit Cost

Approximate NET PRICES per thousand lots are provided. Where a price range is given, this is for small, simple heat sinks up to the larger, more complex units.

SERIES 200 Snap-on Cooler for entire JEDEC Transistor Case Tolerance Range

Price: Aluminum \$ 60 — \$100/M
BeCu \$110 — \$200/M

Available in Aluminum (except Nos. 222, 224) and in Beryllium Copper. Horizontal or vertical orientation for natural or forced convection. NATURAL CONVECTION POWER DISSIPATION, given below, for 50°C case rise above ambient:

Model No.	Model No.	Model No.	Model No.
*201—.7 †205—.8 *202—.6 †211—1.0 †204—.6	*203—.9 †207—1.1 †213—1.2	†209—1.8 †215—1.9	*222—.9 †224—1.2

*For TO-18, etc. with .161/.240 diams.

†For TO-5, etc. with .275/.370 diams.

‡For TO-8, etc. with .440/.554 diams.

Installation Tools for Series 200 Heat Sinks: \$1.50 each. Model 160 is for all sizes except Nos. 211, 213, and 215 which use Model 161 tool.

SERIES 260 ECONOMICAL CUP CLIPS: TO-5 and TO-18.

MODEL NOS.

*For solder joints or with pan head screws: #4 for TO-5 style, #2 for TO-18.

**Thicker base for wider screw length tolerance.

†For mounting with thermally conductive adhesive such as Delta Bond 152ETD.

Installation Tool available.

TYPE 292 Heat Sink for most TO-92 Plastic Transistors

Price: \$15.40/M (Al)

Snap-on units save space on pc board mountings. Fin is .54" high x .60" wide. Material: Aluminum (no finish) or Beryllium Copper with Black Ebonal "C" finish.

TYPE 296 Heat Sink for TO-5s

Price: \$21.40 — \$28.00/M (Al)

Snap-on heat sinks take minimum pc board space. Available in 1.25" fin width with 4 "A" heights: 1/4", 1/2", 3/4", 1". Material: Aluminum (no finish) or Beryllium Copper with Black Ebonal "C" finish.

SERIES 254 Thermal Retainers for TO-5 Case Style Transistors.

Price: \$95 — \$170/M

Preferred mounting of TO-5 units with silicon die attached to the header: heat sink at bottom face of header with No. 254 (4 types) mounted on cooler or chassis, using Type 120 Thermal Joint Compound. Material: Zamak 3 body.

Type 254-S1 electrically isolated and stud-mounted

Type 254-S stud-mounted

Type 254-T tapped hole

Type 254-P plain

SERIES 256 Brass Clips for Plastic Transistors (TI Version of TO-92). For TO-92 use Type 256 DM.

Price: \$16.75/M

Type 256-ST

Type 256-DT

Type 256-D

Single (S) and Double (D) units available for use as an electrostatic shield and/or a thermal retainer. Available with or without shield Tab (T). Skirted end for easy insertion of transistor. Material: 1/2 hard brass for solderability. (Except Type 256-DM is Be Cu).

Price:

\$80/M for "P" to \$250/M for "E" to \$450/M for "B" units.

Non-Insulated Cup Clips: Plain base for soldering or bonding, tapped base, or stud which is soldered to cup clip. Two types of Insulated Cup Clips: (1) Epoxy Insulated (E) for economy, and (2) Beryllium Oxide Insulated (B) mainly for applications requiring low stray capacity.

Material: Beryllium Copper cups and brass bases.

Wakefield Heat Sinks

For Semiconductor Ready Reference, refer to the first of these four pages. Net Prices given below are based

SERIES 300 Optimum Cooling with Radial Fin Coolers

Price: \$.80 — \$1.30 each

The radial fin design, combined with large surface area, provides unusually high natural convection cooling per unit volume. Stud-mounted (up to $1\frac{1}{16}$ " hex case), press-fitted rectifiers and transistors (see first page) are accommodated. A semiconductor can be mounted on each end. Thermal conductivity is improved by using Type 120 Thermal Joint Compound (see last page). Series 300 units are compact: only 2" square and available in three heights... $\frac{3}{4}$ " (Model NC-301), $1\frac{1}{2}$ " (Model 302), or 3" (Model 303). Coolers can be mounted from the bottom or either of two sides. Insulators available. Ideal for compact stacking arrangements.

Material: Aluminum alloy 6063-T-5 per QQ-A-200, black anodize finish.

SERIES 400 Natural Convection Heat Sinks... minimum space

Price: \$.80 — \$3.70 each

Fig. A

Fig. B

This series of heat sinks is for natural convection or forced convection with moderate air flow. Models 401, 403, 413 and 421 have vertical mounting adapters available as seen in Fig. A. Series 100 insulators available.

Material: Aluminum alloy 6063-T5 per QQ-A-200, black anodize finish.

SERIES 500 Forced Convection Coolers permit maximum heat transfer in minimum space

Price: \$4.00 — \$11.00 each

Fig. D

Fig. E

Fig. C

Copper fins and base, with optimized fin spacing, achieves the equivalent cooling performance of much larger aluminum coolers, permitting greater latitude in packaging.

Material: Base copper per QQ-C-504 and Fin Copper per QQ-C-576, black ebonal finish.

SERIES MN King Size Heat Sinks for 240/650 amp rectifiers as large as 3.5" x 3.5" square plate

Price: \$7.50 — \$20.00 ea.
Type 109: 95¢ ea.

Fig. H

109

Models are available with a Model 2159 Heat Sink Insert for increased heat sink dissipation as shown in dotted lines in chart. Mounting of this type cooler: (1) Use four integral mounting lugs on each end with fasteners, or (2) use Type 109 Mounting Brackets with 5000v standoff insulation strength.

Material: Aluminum alloy 6063-T5 per QQ-A-200, black anodize finish.

EXTRUSIONS are available in 3 ft. lengths. See Distributor Products Catalog for other configurations.

Wakefield Thermal Products

For types of semiconductors accommodated, see first page.

SERIES 630

Heat Sinks provide maximum cooling per unit cost.

Price: \$37.80 — \$75/M

These coolers are available with the mounting pattern provided for (1) TO-3 with socket or (2) TO-66 transistor.

Material: Type 1100-H14 aluminum with no finish or black anodize.

MODEL	FIG.	INCHES		
		H	W	D

680-.75	K	.75	1.81	1.81
680-1.00	K	1.00	1.81	1.81
680-1.25	K	1.25	1.81	1.81

SERIES 690 and 695

High power dissipation per unit cost.

Prices: \$250/M for 690 and \$100/M for 695

MODEL 690

MODEL 695

The 690 and 695 units resulted from value analysis studies. In the 10 — 20w range, a flat blank slotted in the direction of heat flow and folded into a well-ventilated form... gives the most power dissipation per unit cost. This is accomplished with automatic tooling. No. 690 is 1.81" square and 1.25" high. No. 695 is 1.330 wide at top and is 31/64" high.

Material: Type 1100-H14 aluminum, no finish or black anodize.

SERIES 170

Insulating Wafers and Washers.

Price: \$105/M

1. Model 170, 171, and 172 Wafers are for TO-3 and TO-66 transistors. The transistor side only has an epoxy coating (DELTA COATE 151H) to provide good thermal conductivity and electrical isolation. HYPOT: 200v d-c for No. 170, 400v d-c for No. 171 and 172.

2. Series 179 are beryllium oxide wafers with thermal conductivity comparable to aluminum but with excellent electrical insulating characteristics.

Thermal data is available on all types in Distributor Products Catalog No. 102.

Thermal data is available on all types in Distributor Products Catalog No. 102.

TYPE 120

Thermal Joint Compound

This compound reduces the high thermal impedance of the air gap otherwise present between the mating surfaces of the semiconductor case and the heat sink. Also recommended for use with Series 170 Wafers. Type 120 thermal conductivity is approximately four times that of silicone grease. Will not harden, dry out, or melt after 1,000 hours at 200°C.

Available sizes: 2 oz., 5 oz. tube, 8 oz., 5 lbs., 20 lbs.

DELTA BOND 152

Thermally Conductive Adhesive

This adhesive is ideal for general cementing, for thermally bonding semiconductors and components to chassis or heat sinks while electrically isolating one from the other, for fabricating heat sinks or thermal links, and for all permanent bonding of assemblies which require thermally conductive interfaces. It produces a rigid high strength bond to porous and non-porous surfaces such as metals, glass, ceramics, and most plastics.

Types and formulations available:

Type 152-T: 2-tube kit with 5 oz. each.

Type 152-1-RTA: 30 gm. (1 oz.) premeasured bi-pax kit.

Type 152-2-RTA: 200 gms resin with 14 gms. of Type RTA.

Type 153-2-RTA Delta Cast: 200 gms. resin with 14 gms RTA.

For complete specifications on epoxy systems from Wakefield, request Epoxy Tech Bulletin.

RF SWITCHES

AMPHENOL
 THE BUNKER-RAMO CORPORATION

Series 303 High Isolation Microwave Switches

Compact coaxial switches, with superior isolation characteristics over entire operating range, particularly suitable where crosstalk interference must be minimized. Other units are also available, please request additional information and specifications.

CHARACTERISTICS

ELECTRICAL: Frequency range: 0 to 12.4 GHz. Characteristic impedance: 50 ohms. Crosstalk (isolation): 60 db min. @ 12.4 GHz. SWR: 1.5:1 max. @ 12.4 GHz. Insertion loss: 0.5 db maximum. Contact resistance: 60.0 milliohms. RF power rating: 100 watts @ 1 GHz (power off during switching). High RF voltage rating: 1000 v peak @ 60 GHz. Switching time: operate: 15 ms max.; release: 10 ms max.

MECHANICAL: Minimum life: 1,000,000 cycles.

ENVIRONMENTAL: Temperature range: -55°C to 55°C. Moisture resistance: 10 day cycle. Shock: operating: 10 g's; non-operating: 100 g's. Vibration: operating: Test Cond. B, 10 to 55 cps; non-operating: 20 g's, 10 to 2000 cps. Altitude and cold: 0 to 70,000 ft.

Coaxial Relays

Precision coax units. Maximum time to operate and release is 20 milliseconds. Gold-plated, fine silver contacts assure reliable low-level operation. Minimum life expectancy is 1,000,000 cycles, when switch is operated at speeds of less than 10 Hz. Switches are impedance matched to 50-ohm cable, though loss

is negligible with 75-ohm cable. Operation is break-before-make. All materials are corrosion resistant.

Units meet applicable portions of military connector specifications follows: BNC — Mil-C-3608 and N — Mil-C-71.

* High frequency electrical characteristics are typical values (not maximum) as measured in a 50 ohm load and may be used for most design analyses. For more exacting applications, maximum values in the frequency range may be obtained upon request. SWR measured to common with a matched 50 ohm termination. For additional specifications request Amphenol RF Switches Catalog SS-1.

ALCOSWITCH

DIV. OF ALCO ELECTRONIC PRODUCTS, INC.

The original Alcoswitch Series of high quality ultra-miniature toggle switches combines high current capacity and long life in a 1/2" case. Slim, bat handle or optional plastic caps(*) are provided. Terminals and contacts are solid silver. Case material is black phenolic resin; 1/4-40 threaded bushing. Rated 5 amps at 115 VAC. SPDT and DPDT types have life cycle of over 80,000 on-off operations. High voltage barriers between terminals and contacts. Rated 5 amps @ 115 VAC.

This new Alcoswitch "MSTA" Series fills a need for those who want the best product possible at an optimum price. Similar in appearance and specs to the Alco "E" Series but without the waterproof feature. Has the important features wanted in a good miniature: turret terminals, extra-wide contacts, heavier current capabilities, low-loss, high heat and high impact case construction. "No Tear" shoulder on bushing. 6A 125V/3A 280 VAC.

The new "E" Series has the most-wanted features in miniature switches. Waterproof 'O' rings are located inside the toggle and on the shoulder. A mechanical shoulder on the bottom of the bushing prevents "tear-offs" when a single mounting nut is employed. High voltage barriers between terminals inside as well as outside. Case has a new, superior plastic material capable of withstanding a higher impact; guards against accidental damage. Low-loss case has extremely high resistance between terminals and case ground, and its high temperature coefficient is ideally suited for prolonged soldering and printed circuits. Turret type terminals are used for simplified wiring or for P.C. Extra-wide, solid silver contacts are bonded, not riveted, on copper-silver plated terminals. Long-life cycle over 100,000 On-Off operations at operating conditions (SPDT). Rated 6 amps @ 125 VAC.

Hardware supplied mounted. Color-coded caps: see "A" Series story above

The Mustang Series is for designers who prefer the feel of a larger toggle switch but have space limitations behind today's compact panel. The familiar ultra-miniature Alcoswitch 1/2" case is utilized, however the Mustang mounting requirements are the same as the larger switches with 1/2" bushings. This new Alcoswitch concept is a behind-the-panel space-saver in all Mustang models and it is especially true in the 3 Pole and 4 Pole Series where non-miniature switches are bulky in size. The Mustang switches have the most-wanted features as itemized in the "E" Series story (at left) with the exception of the waterproof 'O' rings. The case construction is of low-loss, high impact and high temperature materials with turret terminals and silver contacts; 6 amps @ 125 VAC.

MSPE-406

MSP Miniature Pushbutton Switches are of snap-action type capable of handling 5 amps @ 115 VAC. Solid silver contacts and terminals. Bushing size, $\frac{1}{4}$ -.40 with keyway. Black phenolic case. Life cycle well over 20,000 on-off operations.

MSPE Waterproof Pushbutton Switches rated 6 amps resistive and 2 amps inductive @ 125 VAC. Double "O" waterseals, low-loss "E" Series case with turret terminals. All are versatile "double-throw" models.

MSP-103 Economy Pushbutton Switches rated 3 amps @ 125 VAC. Low-pressure. Silverplated brass contacts and terminals. Plastic button plunger travels .098" overall. Depth needed behind panel less than $\frac{3}{4}$ ". One-piece $\frac{1}{4}$ -.40 mounting bushing.

Alco Miniature Power Switches combine a compact size, modern appearance and functional flexibility to meet today's control needs and mount in a 1" hole. Rated to carry 6 amps @ 230 VAC. These switches may be used to control circuits independently or with optional relays. All models supplied with a single (N.O.-N.C.) contact block but have provisions for an additional (Model SU) block thereby convertible to DPDT units.

3-Way Selector Power Switch is the same basic model as above but instead has a bar knob with pointer. Electrical and physical specifications are the same. Available in black only.

Key-Lock Push Button type is an accident-proof power switch that has its own key lock to prevent unwanted operations of machines and controls. The switch functions only when the key disengages the lock. Same specs as the series described above.

ELECTRONIC PRODUCTS, INC.

ALCOSWITCH

DIV. OF ALCO ELECTRONIC PRODUCTS, INC.

MRA Adjustable-Stop Rotary Switches are miniature types rated 500 mA @ 125 VAC. Features: adjustable-stop; non-shorting; 36° spacing; up to 4 poles on single deck; solid silver terminals and contacts. Types with suffix S, 1/8", dia. shaft less knob. Bushing, 1/4-40.

MRA 12-Position Rotary Switches are slightly larger than standard MRA Series has 1/8" shaft and 30° spacing. Other specs similar to MRA Series. Knobs not included. Type MRA-1-12S can be converted to an adjustable-stop switch when used with KCVS-500 knob (see Alco knob listings).

MSRE Waterproof Rotary Switches are non-adjustable. Similar to MRA Series but feature internal and external 'O' rings. One-piece metal case construction, and terminals are epoxy sealed. 1/8" shaft. Ideal for printed circuits. Supplied less knob. Rated 500 mA @ 125 VAC. Can be converted to an adjustable-stop switch when used with KCVS-500 knob (see knob listings).

Conversion Unit For Rotary Switch Operation. Gangs miniature toggle switches (with 1/4" bushings) for controlling multiple circuits simultaneously. Operating as a 2- or 3-position rotary switch, this unit is capable of gangng from 1 to as many as 5 toggle switch combinations that total up to 10 poles. Allows you to have enclosed contacts, and heavier current capabilities. Use with various types of switches to act as a 3-position rotary switch when used with CENTER-OFF or ON-ON-ON type toggle switches, or becomes a 2-position rotary when used with 1- or 2-pole toggle switches.

ELECTRONIC PRODUCTS, INC.

DESIGN YOUR OWN KEYBOARD ASSEMBLIES

REED SWITCH OPERATED KEYBOARD BANKS

Now designers can be assured of highest reliability in data processing equipment. Short strokes provide a smooth operation of the switch plunger resulting in one of the finest keyboard actions obtainable. It is also suitable for test equipment, communication gear, and many other applications.

All details of this new switch line are designed for light pressure (5 ounces), operator's convenience, and positive input of data with long life under heavy office type of usage.

Highly efficient "single-pole open circuit" reed switches are used throughout assuring reliability and extremely long life expectancy. Square light grey buttons (19/32") have an industry standard 0-9 marking and format.

All switch positions contain a "positive lockout" between sections and rows. This feature prevents more than one position from operating at the same time. An extra "decimal" button is also provided to enhance design use.

This particular model shown is our standard SB-033 and is, therefore, available from stock without any design changes.

This basic keyboard system is designed for flexibility and can be customized to meet the special needs of quantity users. Up to 12 switches may be installed in the basic module in any combination including momentary, locking maintained, or lockout design.

PUSH BUTTON MODULES

SB-4C

This modular idea is a simple concept, which allows the design engineer to create his own custom push button layouts. Highly efficient single pole "normally-open" reed switches are used throughout thus assuring reliability and an extremely long life expectancy.

Light pressure (5 ounces) and short strokes result in optimum operators' convenience and positive input of data.

The basic module allows use of one to three switches in either momentary or alternate "push-ON-push-OFF" action. Stacking allows any number of these switch sections to be used in a group by themselves or with our matching keyboard assemblies SB-032, SB-033, SB-034, SB-035.

Standard size switch buttons are available separately in various colors, either single or extended buttons which span 2 or 3 switches. Note: that by use of longer buttons it is also possible to form 2 or 3 pole switch functions.

Buss® and Fusetron® Fuses, Holders

SERIES HLD PANEL-MOUNTING VISUAL INDICATING FUSEHOLDER

For $\frac{1}{4}$ " x $\frac{1}{4}$ " GBA fuse. Transparent knob permits bright red dot to be seen readily if fuse is open. Knob grips fuse tightly; when removed, pulls fuse from holder. Knob also interchangeable with that of HKP fuseholder for easy conversion. Supplied with washer and nut. Locking keys available without charge: $\frac{1}{4}$ " lg. for panels up to $\frac{3}{8}$ " thick; $\frac{3}{8}$ " lg. for thicker panels. Specify length desired.

Buss No.	Description	Net Price For	
		Ten	100
HLD	Complete holder	\$4.50	\$38.00
HLD	Knob only NO. 5487	2.30	19.00

VISUAL INDICATING FUSE

For use with HLD fuseholder. Bright red dot on indicating pin extends from end of fuse when fuse is open even after power is off. Rated 125 V or less, carries 100%, opens at 135% in 1 hour or less. Only $\frac{1}{4}$ " x $\frac{1}{4}$ ".

GBA	$\frac{1}{4}$, 1, 1½, 2, 3, 4, 5	2.00	33.00

PANEL MOUNTED FUSEHOLDERS BAYONET KNOB TYPE

Side terminal held with solder and mechanically. Knob grips fuse tightly; pulls it from holder when knob is removed. Terminals designed to withstand severe service. Molded black phenolic body with flat spot for lock against rotation when used in punched hole; permits use of locking key in drilled holes. May be used in panels up to $\frac{1}{4}$ " thick. Locking keys available; specify $\frac{1}{4}$ " or $\frac{3}{8}$ " length. U/L Approved.

HKP	$\frac{1}{4}$ x $\frac{1}{4}$	15	250	4.10	35.00

SHIELDED FUSEHOLDERS

Prevents RFI from reaching fuse and nearby circuits. Metal cap covers bayonet type knob. To shield and ground holder, a threaded metal collar fits over holder body; metal cap threads on collar. Collar grounds on metal panel when mounting nut is tight. Carrying capacity 30 amps, 250 volts or less. Meets MIL-1-6181D and MIL-F-19207B specifications.

Buss® and Fusetron® Fuses, Holders

INDICATING FUSES

Fiber tube with silver plated indicating pin which extends when fuse is blown. May be used to actuate a signal when used in HKA fuseholder or Signal Fuse Block. Dual tube construction in sizes larger than 5 amps (cannot be used in HKA fuseholder). Voltage, 125 volts, except 8 amp and over which are 32 volts. Size, $\frac{1}{4}$ " x $1\frac{1}{4}$ ".

Buss No.	Amperes	Net Price For	
		Five	100

		2.50	42.00

LAMP-INDICATING BAYONET TYPE

Transparent bayonet knob with indicating light. Molded phenolic body brown for HKR type, black for HKL and HKL-X types. Side terminals held mechanically as well as soldered (also end terminals on HKL and HKL-X). HKR end terminals held mechanically and have $\frac{1}{8}$ " outward movement when fuse is inserted. Locking slugs available on request without extra charge, $\frac{1}{4}$ " size. Models HKL and HKL-X are for Neon Lamps, have voltage rating of 90 to 250 and are rated 220,000 Lamp resistor ohms. Model HKL-X has parallel flat-sided knob for positive finger grip. Model HKR is for use with incandescent lamps, rated 22 to 33 volts, and 330 Lamp resistor ohms. Max. amps, 20.

Buss No.	Fuse Size, Inches	Knob Color	Net Price For	
			Ten	100

HKR	$\frac{1}{4}$ " x $1\frac{1}{4}$ "	Amber	28.00	233.00

LAMP-INDICATING, SIGNAL-ACTIVATING TYPE

When used with GLD fuses in ratings of $\frac{1}{4}$ " to 5 amps, provides simultaneous lamp and external signal indication when the fuse blows. Extension pin of fuse, on blowing, completes a circuit through the knob to indicating lamp of holder and an external signal (to a distant lamp or an audible alarm or relay). Current provided for signaling is 28 volts, .040 ampere. Transparent amber knob. Holder body is molded brown phenolic. Designed for use on circuits where load is 125 volts. Fits panels up to $\frac{1}{4}$ " thick. Flat area on permitted section to prevent rotation, or permit use of a $\frac{1}{4}$ " locking slug in a drilled hole (slug available, free).

Buss No. HKA—Net Each.....\$ 3.73
Lot of 10, Net..... 31.10

IN-THE-LINE FUSEHOLDERS

Bayonet knob with metal holding ears. Center drilled contacts ready to be staked to ends of wire. Designed to take No. 18-22 wire (suffix -A) or 14-16 wire (suffix -B). Max. amps, 15.

FUSETRON DUAL-ELEMENT FUSES

Long time-lag prevents useless shut-downs caused by ordinary fuses opening on starting currents or other harmless overloads, yet protects against short-circuits. On normal installations will guard motors against burnout from overloads or single phasing. U/L Listed for motor running and circuit protection up to 250 volts.

TRON RECTIFIER FUSES

For Protection of Semiconductor Rectifiers and Similar Applications

Especially designed for protection of semiconductor rectifiers, thyristors and other solid state devices. High interrupting capacity and very fast clearing to restrict let-through current and energy to very low values. Give safe short-circuit protection for systems with fault current to 200 kA at 600 volts or less. Carry 100%, open at 1000 secs between 150% and 180% of rating; open within 1 sec at 250% of rating.

C&K SUBMINIATURE SWITCHES

Designed to meet the highest standards of quality and reliability. C & K's subminiature toggle and momentary pushbutton switches successfully combine maximum performance with minimum weight and small size. They are available in one, two, three, and four poles.

All of the switches feature rugged con-

struction, simple mounting, excellent appearance, and long, trouble-free operation!

These subminiature toggle and pushbutton switches adapt to virtually any manual switching requirement in a very wide range of O.E.M. applications where space is at a premium!

TOGGLE SWITCHES

General Specifications

Contact Rating: 5 Amperes resistive load @ 115 VAC — 28 VDC.

Insulation Resistance: 1000 megohms minimum.

Dielectric Strength: 1000 volts rms at sea level.

Electric Life: 100,000 make-and-break cycles minimum on all models ending in

01 only; all other models 40,000 cycles. 115 VAC — 28 VDC resistive load.

Initial Contact Resistance: 10 milliohms maximum at 2-4 VDC, 1 amp.

Contacts and Terminals: Working contacts Coin Silver

Operating Lever: Bright chrome plated brass toggle

Mounting Bushing: Nickel plated brass Housing: Stainless steel

Case Material: General purpose phenolic. **Standard Hardware Supplied:**

- 2 Hex mounting nuts
- 1 Internal tooth lockwasher
- 1 Keyed positioning ring

PUSHBUTTON SWITCHES

General Specifications

Contact Rating: 1 Ampere resistive load @ 115 VAC — 28 VDC. Designed for use in dry (very low energy) circuits.

Insulation Resistance: 1000 megohms minimum.

Dielectric Strength: 1000 volts rms at sea level.

Electric Life: 60,000 cycles minimum at full load.

Mechanical Life: 1,000,000 make or break cycles minimum.

Contacts: Gold

Terminals: Copper Alloy with gold plating. Epoxy sealed terminals standard.

Pushbutton: Nylon plunger and cap.

Mounting Bushing: Nickel plated brass, high torque to withstand 12 in-lb with no distortion or loosening of parts.

Housing: Stainless Steel

Case Material: General purpose phenolic.

Standard Hardware Supplied:

- 2 Hex mounting nuts
- 1 Internal tooth lockwasher

CENTRALAB ROTARY SWITCHES

Consistent with all products within Centralab's overall product line, Centralab rotary switches range from highly miniaturized units to heavy-duty types. Centralab rotary switches are well-engineered and manufactured, precision components that may be depended upon to serve reliably. The detailed specifications given in this catalog will help you accurately specify these switches for your applications. The switches available through your Centralab Distributor are available with machine-assembled "staked" or bolted construction, ceramic or phenolic insulation. Comprehensive coverage of switching arrangements and number of sections per switch add to the total adaptability of this product line. Count on your Centralab Distributor as your source for immediate delivery of the exact switch for your application.

In addition to the thousands of switches available in your Centralab Distributor's stock, parts and kits are available for convenient, quick repair work and prototype assembly applications.

10 & 2500 Series SWITCHES

1400 Series Phenolic and 2500 Series Ceramic rotary switches provide a complete line of switches used primarily for band change general tap switch application where miniaturization is not a necessity. Three types of index assemblies combined with an extensive choice of phenolic or ceramic sections, provide exceptional application versatility.

1400 Series

2500 Series

SPECIFICATIONS

CONSTRUCTION: Bolted

MOUNTING: Single hole, bushing mounted

THREADING: 3/4" - 32NEF-2A thread, 3/4" long, steel*

MOUNTING LUG: Left on 1/2" radius.

SHAFT: 1/4" diameter, full round, 2 1/4" long from mounting surface, steel*

INDEX ANGLE: Positive 30°, adjustable stops, or continuous rotation.

SECTION SPACING: 1/2" spacing between front plate and first section. 1/2" spacing between sections on two section switches; 1" spacing between sections on all 4 section switches.

LAMINATION: 1400 Series: High quality laminated phenolic, type PBE, per MIL-P-100. Voltage breakdown between critical parts 1000 VAC-RMS.

2500 Series: Centralab steatite, grade L-422 or better per MIL-I-10A, Dow-Corning silicone treated to prevent accumulation of surface moisture. Voltage breakdown between critical parts 1500 VAC-RMS. Extremely low frequency loss.

CONTACTS: Phenolic - 1/4" thick; Ceramic - 3/32" thick

CONTACTS AND ROTOR CONTACTS: Brass, silver-plated

WARNING: All other metal parts, except index ball, steel*

CURRENT AND VOLTAGE RATING: Make and break resistive load: 5.5 amp. @ 6 VDC; 2.75 amp. @ 15 VDC; 2.25 amp. @ 28 VDC; 350 MA @ 115 VAC. Based on 100 cycle life test.

CONTACT RESISTANCE: Average initial resistance - 3 milliohms

OPERATIONAL LIFE: 10,000 cycles minimum

PACKAGING: Singly. Includes mounting nut, lockwasher, and 1 1/4" black pointer knob, Cat. No. P-120. Sulphur-free cartons and Nox-Tarnish protective wrap for long shelf life.

Surface plated to resist corrosion.

60 and 90 Degree SWITCHES

Centralab 60 and 90 degree indexing switches are particularly adaptable to industrial instrumentation. Rugged construction throughout and thicker than standard steatite sections provide a voltage breakdown of 2000 VAC-RMS. A two-piece steel and fabric-reinforced phenolic plastic shaft provides high voltage breakdown to ground.

Has wide application in radio ham equipment.

LOCATING LUG: None

SHAFT: 1/4" diameter, full round, steel*, 2 1/4" long from mounting surface

INDEX ANGLE: Positive, adjustable stop. 60° switches have 2 to 6 active positions. 90° switches have 2 to 4 active positions.

SECTION SPACING: 3/8" spacing between front plate and first section. 1/2" spacing between sections.

INSULATION: Centralab steatite, Grade L-422 or better per MIL-I-10A, Dow-Corning 200 silicone treated to prevent accumulation of surface moisture. Voltage breakdown between critical parts 2000 VAC-RMS. Extremely low frequency loss.

SECTIONS: Ceramic-1/8" thick

CLIPS AND ROTOR CONTACTS: Brass, silver-plated

HARDWARE: All other metal parts except index ball, steel*. All switches and separate indexed have phenolic shaft through section rotors which provides high voltage breakdown to ground.

CURRENT AND VOLTAGE RATING: Make and break resistive load: 350 MA @ 115 VAC; 175 MA @ 230 VAC; 5 MA @ 1500 VAC; 2.25 amp. @ 28 VDC, based on 10,000 cycles life test.

CONTACT RESISTANCE: Average initial resistance—3 milliohms

ROTATIONAL LIFE: 10,000 cycles minimum

PACKAGED: Singly. Includes mounting nut and lockwasher and (1) Cat. No. P-120 pointer knob and (1) Cat. No. P-404 dial plate for 60° switches, or (1) Cat. No. P-163 dial plate for 90° switches. Sulphur-free cartons and Nox-Tarnish protective wrap assure long shelf life.

*Suitably plated to resist corrosion.

60° TYPE SWITCHES

Total No. Poles	No. Positions	Poles per Section	No. Sections	Catalog No.
1	2 to 6	1	1	2550
2	2 to 6	1	2	2551
3	2 to 6	1	3	2552
4	2 to 6	1	4	2553
5	2 to 6	1	5	2554

60° Separate Section

1 pole	2-6 position	Non-Shorting	Cat. No. ZZD
(Use with P-273, P-274 and P-275 index assemblies.)			

60° Separate Index Assemblies

Switch Type—60° indexing. Two piece shaft construction, phenolic rear, metal front. Use with ZZD sections. Individually cartoned, including instruction sheet, index, pointer knob and sufficient hardware to assemble one complete switch.

Catalog No.	Rear Shaft	Suggested No. Sections
P-273	2"	1 to 2
P-274	4 1/4"	3 to 4
P-275	7"	5 to 8

90° TYPE SWITCHES

Total No. Poles	No. Positions	Poles per Section	No. Sections	Catalog No.
1	2 to 4	1	1	2542
2	2 to 4	1	2	2543

4	2 to 4	1	4	2545
5	2 to 4	1	5	2546

90° Separate Sections

1 pole	2-4 position	Non-Shorting	Cat. No. XXD
(Use with P-278, P-279 and P-280 index assemblies.)			

90° Separate Index Assemblies

Switch Type—90° indexing. Two piece shaft construction, phenolic rear, metal front. Use with XXD section. Switches using this index will pass 2000 volts AC breakdown to ground test. Individually cartoned including instruction sheet, index, pointer knob and sufficient hardware to assemble one complete switch.

Catalog No.	Rear Shaft	Suggested No. Sections
P-278	2"	1 to 2
P-279	4 1/4"	3 to 4
P-280	7"	5 to 8

General Purpose SWITCHES

These general purpose switches are widely used in phono-radio controls; PA. channel selectors; wave bands; meter reversers; meter selectors; intercom talk-listen; momentary line or remote speaker dual speaker and stereo speaker applications.

SPECIFICATIONS

CONSTRUCTION: Die-cast, one piece frame except 1463, 1464 and 1465 have stamped steel frames with phenolic section eyeleted in place.

MOUNTING: Single hole, bushing mounted

BUSHING: 3/8"-32NEF-2A thd., zinc die-cast 3/8" long

SHAFTS: 1/4" diameter, full round, steel*, 2 1/4" long from mounting surface: 1465-2 1/4" long FMS; 1484-3/8" long FMS; 1486-1 1/8" long FM split knurl end.

INDEX ANGLE: 30°

INSULATION: Electrical grade laminated phenolic. Voltage breakdown between critical parts 1000 VAC-RMS.

SECTIONS: Phenolic-1/8" thick

CLIPS AND ROTOR CONTACTS: Brass, silver-plated

CURRENT AND VOLTAGE RATING: Make and break resistive load; 230 MA VAC-RMS; 1.5 amps @ 28 VDC.

CONTACT RESISTANCE: Average initial resistance—3.5 milliohms

PACKAGED: Singly. Includes mounting nut and lockwasher. Nos. 1484 and 1465 also include (1) Cat. No. P-401 black and chrome push on knob and instruction sheet. Sulphur-free cartons and Nox-Tarnish protective wrap insure long life.

*Suitably plated to resist corrosion.

No. of Poles	No. of Positions	Indexing	Cat. No. Shorting	Cat. No. Non-Shorting
1	2	Positive	1460	
(Can be used as SPST or SPDT. For phono-radio, tone or sensitivity control.)				
1	3	Positive	1461	
(Useful as miniature band change, step-type tone or sensitivity control P.A. channel selector.)				
2	2	Positive	1462	
(Can be used as SPST, SPDT, DPST, DPDT. For meter reversing, P.A., channel switching both lines on phono-radio controls.)				
1	2	Spring Return		1463
(Useful for meter reversing or inexpensive momentary talk switch on intercom systems.)				
2	2	Spring Return		1464
(Use as meter switch and momentary line or remote speaker return intercoms.)				
1	4	Positive	1465	
(Equipped with AC-DPST line switch. Used as replacement for "on-off, step tone control switch in many AM and FM receivers.)				
2	3	Positive		1472
(Change switch for AM, FM, phono to amplifier in custom installations.)				
2	3	Positive	1473	
(Same as 1472)				
1	3	Positive	1483	
(Remote speaker switch for use with dual or auxiliary rear seat auto speakers or monitor-remote speaker set ups. Permits operation of either speaker separately or both simultaneously.)				
1	3	Positive	1484	
(Same as Cat. No. 1483 except with 1/4" bushing and 3/8" split knurl end. Includes P-401 knob and instructions.)				
2	3	Positive	1486	
(Stereo remote speaker switch enables switching "main pair" of speakers to "remote pair" of stereo speakers or for the operation of speakers simultaneously. Includes P-401 knob and instructions.) See switch hardware—page 23.

000 Series SWITCHES

Centralab JV-9000 Series Heavy-Duty Rotary Power Switch was designed to meet today's requirements for high accuracy and long life. The series meets all engineering requirements for use in transmitters, radio controls, laboratory test equipment and many other special applications for commercial products.

IFICATIONS

CONSTRUCTION: Bolted
HOUSING: Single hole, bushing mounted
THREADING: $\frac{3}{4}$ " - 32NEF-2A thread, brass*, $\frac{3}{4}$ " long
ADJUSTMENT: LUG: Adjustment of tie rod lengths will provide either one or two tie rod lengths
ROD: $\frac{1}{4}$ " diameter, double flat, steel*, $2\frac{1}{4}$ " long from mounting surface
ANGLE: Positive 20°, two adjustable stops. Removal of stops provides continuous rotation
SPACING: 1" spacing between front plate and first section and between sections

CAUTION: Centralab steatite, grade L-422 or better per MIL-I-10A, Dow-Corning silicone treated to prevent accumulation of surface moisture. Voltage breakdown between critical parts 3000 VAC-RMS (static) except JV-18 and JVN-18 units which are 2550 VAC-RMS (static). Extremely low frequency loss.

ROTOR RINGS AND CONTACT BUTTONS: Contacting surface is coin silver alloy
WARE: Contact springs silver-plated spring brass; terminals—brass silver-plated; tie-rod nuts, flat washers and adjustable stop nuts brass, plated; front plate, shaft ball holder, adjustable stops, mounting nut and washer—steel cadmium-plated; index spring—steel; index ball and front—stainless steel; tie-rod lockwashers—phosphor bronze*; rotor retaining beryllium copper; spacer washers—nylon.

NT AND VOLTAGE RATING: Make and break resistive load; 9 amp. @ 110 VAC-RMS; 15 MA (0.015 amp.) @ 2500 VAC-RMS; 30 amp. @ 5 VDC; 20 amp. @ 28 VDC; 11 amp. @ 28 VDC except JV-18 and JVN-18 sections which are rated @ 110 VAC-RMS.

CT RESISTANCE: Average initial resistance — 7 milliohms

OPERATIONAL LIFE: 25,000 cycles minimum

GED: Singly, in extra heavy duty carton and Nox-Tarnish protective wrap.
es 2" double set-screw pointer knob, Cat. No. P-168, dial plate, adjustable
in and nut and instruction sheet.

ably plated to resist corrosion.

r Action SWITCHES

units mounted singly or in groups on separate, are adaptable to intercoms, public systems, test instruments, broadcast, interchange, speaker selection, record selection, channel selection, galvanometers and many industrial applications.

ICATIONS

INSTRUCTION: Staked
INSTALLATION: Bracket mounted. Two 6-32 thd. mount-
ings on 1 $\frac{5}{8}$ " centers. Two 6-32 screws fur-

INDEX ANGLE: 30°

INSULATION: High grade laminated phenolic, type PBE, per MIL-P-3115B. Voltage breakdown between critical parts 1000 VAC-RMS.

CLIPS AND ROTOR CONTACTS: Brass, silverplated.
HARDWARE: All metal parts, except index spring steel*.

CURRENT AND VOLTAGE RATING: Make and break resistive load: 1.5 amp. @ 28 VDC; 230 MA @ 115 VAC-RMS. Based on 10,000 cycle life test.

CONTACT RESISTANCE: Average initial resistance 3.5 milliohms.

ROTATIONAL LIFE: 25,000 cycles minimum.

PACKAGES: Singly, in sulphur-free carton and Nox-Tarnish protective wrap to insure long shelf life. Includes black push-on knob Cat. P-193 and two mounting screws.

*Suitably plated to resist corrosion.

15	2-5	3	5	JV-9018	JV-9019

SEPARATE SECTIONS

For use with JV-7 index assembly. Sections 2 $\frac{13}{16}$ " high, 2" wide, 2 $\frac{7}{16}$ " strut centers, $\frac{1}{2}$ " thick.

Poles	Positions	Catalog No. Shorting	Catalog No. Non-Shorting
1	2-17	JVN-8	JVN-8
2	2-8	JV-10	JVN-10
3	2-5	JV-9	JVN-9

SEPARATE MULTIPLE FINGER SECTION

Poles	Positions	Catalog No. Shorting	Catalog No. Non-Shorting
1	2-18	IV-18	IVN-18

(Rotor has 17 silver-plated phosphor bronze fingers, making contact with 17 contacts on stator leaving one contact open.) By cutting off unwanted fingers, this section can be adapted for many special circuits. For example, can be adapted to one off, nine progressively shorting positions, pick up and hold each progressive position.

SEPARATE INDEX ASSEMBLY

Indexing	Shaft Length	Sections No.	Catalog No.
20°	7"	2-6	JV-7

Contains: (1) JV-7W index with 7" rotor shaft, (2) P-5637 7 $\frac{3}{4}$ " tie-rods, (6) P-5363 tie-rod nuts, (6) P-4665 tie-rod lockwashers, (12) P-9410 $\frac{1}{2}$ " spacers, (1) P-168 2" black pointer knob, (24) P-7963 spacer washers, (1) P-21675 adjustable stop pin, (1) P-4088-1 stop pin nut, mounting nut and lockwasher; instruction sheet.

WALL OUTLET TYPE PLATES

For installations where conduit and outlet boxes are used, permits mounting 1 or 2 units in outlet boxes—chrome satin finish.

No. of Switches	Catalog No.	Length	Width
1	P-222	2¾"	4½"
2	P-221	2¾"	4½"

1452 SERIES—LEVER ACTION SWITCHES

4	2	Positive	1459	1458
1	3	Positive		1475*

*(Primarily a replacement part for the ganged switches found in tube testers and other testing equipment.)

2	3	Positive	2815	*****
(Special model railroad reversing switch.)				

1450, 1451, 1488, and 1489 Rotary Action SWITCHES

These $1\frac{1}{8}$ " diameter switches feature various combinations of positive and spring return indexes which are ideally suited for long hard use in test equipment or in P.A. and intercom equipment.

SPECIFICATIONS

CONSTRUCTION: Bolted, except Cat. No. 1450 — staked

MOUNTING: Single hole, bushing mounted

LOCATING LUG: 1488, 1489—one lug on $\frac{1}{32}$ " radius

SHAFTS: $\frac{1}{4}$ " diameter full round, steel*, $2\frac{1}{4}$ " long from mounting surface.

INDEX ANGLE: 1450, 1451, 1488, 1489— 30°

INSULATION: High quality laminated phenolic, type, PBE per MIL-P-3115B. Voltage breakdown between critical parts 1000 VAC-RMS.

SECTIONS: Phenolic— $\frac{1}{16}$ " thick

CLIPS AND ROTOR CONTACTS: Brass, silver-plated

HARDWARE: All other metal parts, except index springs, are steel*

CURRENT AND VOLTAGE RATING: Make and break resistive load: 5.5 amp. @ 6 VDC; 2.75 amp. @ 15 VDC; 1.75 amp. @ 28 VDC; 350 MA @ 115 VAC. Based on 10,000 cycle life test.

CONTACT RESISTANCE: Average initial resistance 3 milliohms

ROTATIONAL LIFE: 10,000 cycles minimum

PACKAGED: Singly: including mounting nut and washer. Nos. 1451, 1488, 1489 include (1) paddle knob. No. 1450 includes (1) P-120 paddle knob. Sulphur-free cartons and Nox-Tarnish protective wrap insure long shelf life.

*Suitably plated to resist corrosion.

1000 Series Miniature Phenolic SWITCHES

Complete line of laminated phenolic insulated rotary switches, filling the requirements for a miniature switch which will meet rigorous commercial or military applications. Clip and contact arrangements assure low inter-circuit capacitance and low contact resistance. The index assemblies and hardware are identical to those of the PA-2000 Series, allowing interchangeability and the availability of separate sections and assemblies provides maximum flexibility.

2000 Series SWITCHES

Complete line of ceramic insulated rotary switches, with greater switching combinations than any previously available unit. The PA-2000 series offers maximum voltage, low loss, high-Q-low-loss steatite body, minimum inter-circuit capacitance, and insulated front clips. The index assemblies and hardware are identical to those of the PA-1000 Series, allowing interchangeability. The availability of separate sections and index assemblies provides maximum flexibility.

SPECIFICATIONS FOR PA-1000 AND PA-2000 SERIES

MOUNTING

CONNECTION: Bolted
TYPE: Single hole, bushing mounted
THREAD: $\frac{3}{16}$ " - 32NEF-2A thread, $\frac{3}{16}$ " long, steel, plated to resist rust and corrosion.
RADIUS: LUG: On $\frac{1}{16}$ " radius
LENGTH: $\frac{1}{4}$ " diameter, full round suitably plated to resist rust and corrosion, steel, $2\frac{1}{4}$ " long from mounting surface
ANGLE: Positive 30°, adjustable stop or counter-rotation, except PA-1035 and PA-1037 in PA-1000, and excepting PA-2043 and PA-2045 in PA-2000 - 60° indexing.
SPACING: $\frac{1}{2}$ " spacing between front plate and section. $\frac{1}{2}$ " spacing between sections
FINISH: (PA-1000) High quality laminated phenolic PBE, per MIL-P-3115B. Voltage breakdown of critical parts 1500 VAC-RMS. (PA-2000)

2	2-6	30°	PA-14#	PA-23#
4	2	30°	PA-15#	PA-24#

Centralab steatite, grade L-422 or better per MIL-I-10A, Dow-Corning 200 silicone treated to prevent accumulation of surface moisture. Voltage breakdown between critical parts 1500 VAC-RMS. Extremely low frequency loss.

SECTIONS: (PA-1000) Phenolic- $\frac{1}{16}$ " thick. (PA-2000) Ceramic (steatite)-100" thick.

CLIPS AND ROTOR CONTACTS: (PA-1000) Brass, silver-plated. (PA-2000) Brass, silver-plated except # which have silver alloy clips and contacts. Silver alloy clips and contacts carry approximately twice the switching current over that for silver plated brass. Silver alloy service-life is from four to eight times that of silver plated brass.

HARDWARE: All other metal parts, except index spring and ball, steel*. For switches to meet military specifications, see "Military Switches".

CURRENT AND VOLTAGE RATING: Make and break resistive load: 5.5 amp. @ 6 VDC; 2.75 amp. @ 15

VDC; 1.5 amp. @ 28 VDC; 230 MA (0.230 amp.) @ 115 VAC; based on 10,000 cycles life test.

CONTACT RESISTANCE: Average initial resistance - 3.5 milliohms

ROTATIONAL LIFE: 25,000 cycles minimum

PACKAGING: Singly. Includes mounting nut, lockwasher, and $\frac{1}{4}$ " black pointer knob, Cat. No. P-120. Sulphur-free cartons and Nox-Tarnish protective wrap insure long shelf life.

*Suitably plated to resist corrosion.

60°	2"	1 to 3	PA-304
60°	4"	4 to 6	PA-305

PA-3000 Series SWITCHES

The PA-3000 Series provides accurate crisp indexing in both single and multiple-section versions through the use of a new hill-and-dale index. Two removable adjustable stops provide a choice of 2 to 17 active positions or removal of the stops for continuous rotation.

PA-4000 Series SWITCHES

The PA-4000 Series of phenolic switches is designed to provide accurate, crisp indexing through the use of all new "hill-and-dale" index. All multiple section switches have new "wing type" rotor drive which minimizes rotation lag. Two removable adjustable stops simplify the choice of 2 to 23 active positions. Removal of both stops provide continuous rotation.

SPECIFICATIONS

CONSTRUCTION: Bolted

MOUNTING: Single hole, bushing mounted

BUSHING: 3/8"-32NEF-2A thd., 3/8" long, steel*

LOCATING LUG: On 1/32" radius

SHAFT: 1/4" diameter, full round, 2 1/4" long from mounting surface, steel*

INDEX ANGLE: Positive 20°, adjustable stops or continuous rotation by removing both stops

SECTION SPACING: 3/8" spacing between front plate and first section; 1/4" spacing between sections

INSULATION: High quality laminated phenolic, type PBE per MIL-P-3115B. Voltage breakdown between critical parts 1000 VAC-RMS.

SECTIONS: Phenolic, 1/8" thick

CLIPS AND CONTACTS: Brass, silver-plated. Double eyelet construction clips.

HARDWARE: Index spring and front plate—stainless steel; index ball, black oxide steel; rotor wings—steel nickel-plate; all other parts, steel*

CURRENT AND VOLTAGE RATING: Make and break resistive load: 0.350 amp. @ 115 VAC; 2.25 amp. @ 28 VDC. Based on 10,000 cycle life test.

CONTACT RESISTANCE: Average initial resistance—5 milliohms.

ROTATIONAL LIFE: 25,000 cycles minimum

PACKAGING: Singly. Includes mounting nut and lockwasher. Sulphur-free cartons and Nox-Tarnish protective wrap insure long shelf life.

*Suitably plated to resist corrosion.

PA-6000 Series MILITARY SWITCHES

PA-6000 series is a complete line of miniature ceramic insulated switches which meet the physical, environmental and test specifications of MIL-S-3786, ESR03.

Items requiring certified test data and government source inspection are available; prices and information supplied upon request.

1/2" in diameter. The availability of separate sections with phenolic, index or ceramic insulation and a separate index assembly, provides maximum flexibility for assembling custom switches for special requirements.

SPECIFICATIONS

CONSTRUCTION: Bolted

MOUNTING: Single hole, bushing mounted

BUSHING: 3/4"-32NEF-2A thread, steel cadmium-chromate finish, 3/4" long

LOCATING LUG: On 1/32" radius

SHAFT: 1/4" diameter, full round, steel, cadmium-chromate finish, 2 1/4" long from mounting surface

INDEX ANGLE: Positive 30°, adjustable stop, or continuous rotation, except * which has fixed (2 pos.) stop

SECTION SPACING: 3/4" spacing between front plate and first section, 3/4" spacing between sections

INSULATION: Centralab steatite, grade L-422 or better per MIL-I-10A, Dow-Corning 200 silicone treated to prevent accumulation of surface moisture. Voltage breakdown between critical parts, 1000 VAC-RMS. Extremely low frequency

INDEX STOP STRENGTH: 10-inch pounds

CLIPS AND ROTOR CONTACTS: Coin silver alloy clips and contacts. Treated for solderability.

INDEX BALL: Index ball, stainless steel; all other metal parts steel cadmium-chromate finish.

CURRENT AND VOLTAGE RATING: Make and break resistive load. 450 milliamperes 5 amperes at 115 VAC; 8 amp. & 6 VDC; 2.6 amp. @ 28 VDC; 5.5 amp. @ 50 VDC; 1.1 amp. @ 50 VDC. Based on 10,000 cycle life test.

CONTACT RESISTANCE: Average initial resistance, 2.0 milliohms

ROTATIONAL LIFE: 25,000 cycles minimum

PACKAGED: Singly, includes mounting nut, lockwasher and 1 1/2" black pointer knob, Cat. No. P-120. Sulphur-free cartons and Nox-Tarnish protective wrap insures long shelf life.

PS Series SUB-MINIATURE ROTARY SWITCHES

Centralab series PS switches are deluxe ceramic insulated ultra-small rotary switches. These switches weigh less than 1 ounce each, and have the same electrical ratings as switches much heavier and larger in diameter. Ideally suited for use in band switching, ultra-small electronic equipment, transistor circuits, aircraft instruments, and guided missiles.

SPECIFICATIONS

CONSTRUCTION: Bolted

MOUNTING: Single hole, bushing mounted

BUSHING: 1/4"-32NEF-2A thread, 1/4" long, brass cadmium-plated

LOCATING LUG: On 3/4" radius

SHAFT: 1/8" diameter, steel, 1 1/4" long from mounting surface

INDEX ANGLE: Positive 30°. Fixed stop.

INDEX STOP STRENGTH: 10-inch pounds

SECTION SPACING: 3/4" ceramic spacing between front plate and first section. 1/4" ceramic spacing between sections.

INSULATION: Ceramic—Centralab steatite, Grade L-422 or better per MIL-I-10A, Dow-Corning 200 silicone treated to prevent accumulation of surface moisture. Voltage breakdown between critical parts 750 VAC-RMS.

INSULATION: Phenolic—High quality laminated phenolic, type PBE, per MIL-P-3115B Voltage breakdown between critical parts 750 VAC-RMS.

SECTIONS: Ceramic—1/4" thick; Phenolic—3/4" thick

CLIPS AND ROTOR CONTACTS: Brass, silver-plated

HARDWARE: Front plate, index plate and shaft—steel; index spring—beryllium copper; index ball—stainless steel; strut screws, nuts—brass, nickel-plated; lock washers—phosphor bronze. For switches to meet military specifications, see "Military Switches."

CURRENT AND VOLTAGE RATING: Make and break, resistive load; .550 amperes at 28 volts VDC; 170 milliamperes at 115 VAC (Based on 10,000 cycles).

CONTACT RESISTANCE: Average initial resistance 5 milliohms

ROTATIONAL LIFE: (Index) 25,000 cycles minimum

PACKAGED: Singly, in sulphur-free cartons and Nox-Tarnish protective wrap insuring long shelf life. Includes mounting nut, lockwasher, and one 1/4" dia. black pointer knob, Cat. No. P-106

† Suitably plated to resist corrosion.

New PSA Sub-Miniature Rotary Switches with Adjustable Stops

These deluxe, sub-miniature switches feature an all-new index mechanism with adjustable stops for extra switching arrangement versatility. Construction is rugged 2-ball starwheel lateral thrust for exceptionally good torque control and feel. Plus extra application versatility for: band switching, ultra-small electronic equipment, transistor circuits, aircraft instruments, industrial and broadcasting equipment.

Each switch weighs less than one ounce, yet has the same electrical rating as switches much heavier and larger in diameter. Furnished with blue colored diallyl phthalate sections. Separate diallyl phthalate, phenolic and ceramic sections also available.

SPECIFICATIONS

MOUNTING: Bushing mounted

BUSHING: $\frac{3}{16}$ "—32 NEF Thread by $\frac{3}{8}$ " long

LOCATING LUG: On $\frac{3}{16}$ " radius

SHAFT: $\frac{1}{4}$ " diam., full round, $1\frac{1}{8}$ " L.F.M.S.

INDEX ANGLE: Positive 30°, w/adjustable stops

INDEX STOP STRENGTH: 10 inch-pounds

SECTION SPACING: $\frac{3}{32}$ " between front plate and clip surface of first section and $\frac{3}{32}$ " spacing between sections (surface-to-surface).

INSULATION: Diallyl Phthalate—(Stator and Rotor). Average surface resistivity: 900,000 megohms. High quality molded thermosetting plastic type SDG per MIL-M-14F. Voltage breakdown between critical parts 750 VAC-RMS.*

SECTION: Diallyl Phthalate .203" $\pm$.005" thick across strut holes and .080" thick across clip surface-to-surface.

CLIPS AND ROTOR CONTACTS: Brass, silver-plated

HARDWARE: Front plate, index plate, bushing, mtg. hdwe., strut nuts and shaft-steel, plated to resist corrosion; index springs, strut screws and lockwashers—stainless steel.

CURRENT AND VOLTAGE RATING: Make and break, resistive load; 0.550 amperes at 28 volts VDC; 170 milliamperes at 115 VAC. (Based on 10,000 cycles load life test.)

CURRENT CARRYING CAPACITY: 7 amperes

CONTACT RESISTANCE: Average initial resistance 5 milliohms

ROTATIONAL LIFE: (Index) 25,000 cycles minimum

PACKAGED: Singly, in sulphur-free cartons and Nox-Tarnish protective wrap insuring long shelf life. Includes mounting nut and lock washer.

*See Catalog 33-I for INSULATION data for Ceramic and Phenolic Sections.

MILITARY SWITCH KITS

Centralab Switch kits afford a convenient, readily available source of switch sections, indexes and hardware for assembling $1\frac{1}{8}$ " or $1\frac{1}{4}$ " diameter phenolic or ceramic switches. All five SWK-810-860 kits are built in rugged heavy gauge steel, shelf size cabinets, $23\frac{1}{4}$ " wide, $9\frac{1}{2}$ " deep and 12" high. All five SWK-400-480 kits are 10" x $11\frac{1}{2}$ " x 10".

SWK-400 KIT

PA-6000 SERIES SUB-MINIATURE CERAMIC SWITCH PARTS

35 Index Assemblies and 25 Dial Plates

Includes all necessary hardware to build 35 MIL switches with up to 4 sections per switch.

PBK-1 — PUSHBUTTON SWITCH KIT

Now you can easily fill small quantity sample requirements for Pushbutton switch from Centralab's new PBK-1 Pushbutton switch kit. The PBK-1 makes 1.5 million different switching combinations. There are enough modules, knobs, and hardware supplied to assemble 66 different switching units of various combinations. Assembly instructions and parts reorder form furnished with each kit.

PK-20-S ROTARY SWITCH KIT

This convenient kit will enable you to construct exact duplicates of Centralab's Series 20 miniature ceramic or phenolic switches plus a variety of special switches. An eyeletting pliers and a contact nibbling pliers are provided to assure you of a custom-made unit with the same precision as a factory built switch. Complete instructions and diagrams on the assembly of the switch and the use of the contact nibbling pliers.

PK-20-S ROTARY SWITCH KIT

42-212R	Switch visualizer

PA-600 SWITCH KIT (Centralab Series 600)

This supplement kit offers three types of section insulation: ceramic, phenolic and Mycalex, plus the sturdy hill and dale index mechanism for construction of PA-600 miniature switches.

PK-21-S SWITCH KIT

CRL Part Number	Description
PS601—003	Index assembly
P23880	Phenolic stator .062 thick
P32516	Ceramic stator .125 thick
P28553	Mycalex stator .125 thick
P30105—51	Intersection shields
PS601—010	60° front plate assembly
P32515	Ceramic rotor
P32162—11	Contact for P32516 stator
P42740—11	Contact for P32516 stator

PK-22-S SWITCH KIT (Centralab Series 30 & 40)

Additional versatility is offered with the use of this supplement kit. It contains all necessary parts for building switch and control combinations and dual concentric switches with multiple switch sections front and rear.

PK-22-S SWITCH KIT

CRL Part Number	Description
P9115—51	Potentiometer mtg. plate
P9375—00	Spring clip
PS028—200	Sleeve shaft index
PS028—201	Inner shaft index
P37463—51	Plain round inner shaft

MILITARY SWITCHES

"As Small As A Dime"

Built To

MIL-S-8834 Specs
Designed for aircraft, missile, electronic application it is extremely compact, highly reliable, power or dry circuit switch, usable as a pre-set switch in aircraft recognition systems, walkie-talkies, instrument and communication systems. Toggle lever seal and panel bushing seal for adverse environmental conditions. Gold plated contacts.

RATINGS: 3 amps., 28V DC;
1 amp., 50V DC
2 amps., 115V AC
WEIGHT: Single pole 5.0 grams, Double pole 6.5 grams

MAGNETIC PROXIMITY SWITCH

For Counting Position Limiting Sequence Control Mounts in Any Position

Precision, fast acting, suitable to sequential control functions on machine tools, packaging, material handling and similar industrial devices.

Strong, encapsulated, assures freedom from contamination by cutting oils, dust, powder, chips, etc. Operates up to hundreds of millions of cycles — temperature range -30°C to +105°C. Speed (Max) 200 cycles/sec repeatability within .005%.

Switch actuates when brought into proximity with ferrous metals or other magnetic materials. No mechanical linkage necessary for operation. Operating sensitivity in nom. 1/8" make, 1/2" break. Switch elements sealed in glass, unit is potted in epoxy resin. Case is impervious to oil, water, gas, all common solvents.

Typical actuators include indexing tables, cams, wheels, push rods, die sets, line objects such as food and beverage cans, components, parts, vehicles, rotating and swinging objects, etc.

1/8" H x 1/8" D x 2 1/8" W

Note: Additional frame operations available. Contact General Control.

OPERATIONS

B12 POSITIVE LOCK-IN LOCK-OUT

Only one button can be depressed at a time. The Momentary Release button must be actuated to release any previously depressed button before any other button can be actuated.

B13 ACCUMULATIVE LOCK

Buttons pushed in remain locked in position until released by pushing reset button.

B14 NO-TWO-INTERLOCK

Only one button can be pushed in at one time, and releases any other button.

B15 LOCK-RELEASE

Any button pushed in releases any previously pushed in button.

B16 NON-LOCK

Has no locking action; returns to normal position on release of finger pressure.

B17 NON-LOCK, NO-TWO-OPERATIVE

The same as B16 except that no two buttons can be operated simultaneously.

B18 PUSH-LOCK, PUSH-RELEASE

Any button depressed remains locked in until that button is depressed again.

B19 PUSH-LOCK, PUSH-RELEASE, (WITH LOCK-OUT)

This is the same as B18 except that only one button can be depressed at a time.

TOGGLE SWITCHES — HEAVY DUTY

J-B-T INSTRUMENTS, INC.

31st Year

WHY IT PAYS TO SPECIFY J-B-T TOGGLE SWITCHES

• **J-B-T** concentrates on trouble-free switches. Among the four groups of toggle switches J-B-T produces more than 170 models made to Government Specifications. Market studies indicate that while these switches are a must in military applications, almost half are produced for non-military use where the principal requirement is dependability. J-B-T apparently is specified because:

Group 1

HEAVY DUTY SINGLE- AND DOUBLE-POLE — MIL, AN, AND JAN TYPE

Series MS35058 and MS35059 to MIL-S-3950C;

Series ST40A-H, ST42A-H, ST50K-T, ST52K-T to

JAN-S-23, MIL-S-21195A (Ships), or DDAX Drawings

• **MIL-S-3950C SERIES** — Single-pole MS35058 with suffix —21 and above, and double-pole MS35059 types with suffix —27 and above are recommended when maximum reliability is required. Temperature, endurance, and altitude requirements exceed earlier MS types (suffix —1 to —19), AN3021 and AN3027 switches to MIL-S-6745, and ST styles to JAN-S-23 and MIL-S-21195A (Ships). All MS switches contain a silicone rubber bushing seal to meet sand and dust and toggle seal tests.

NOMINAL RATINGS: 20 Amp. at 125 VAC, 10 Amp. at 250 VAC. For MIL Requirements on Electrical Ratings ask for Condensed Catalog TS-966A.

SIZE: Single-hole; bushing 15/32" — 32NS-2A by 15/32" high; toggle lever, 11/16" long. Bodies including terminals: **SP:** 1 1/8" x 5/8" x 1-1/16" deep; **DP:** 1-21/64" x 3/4" x 1-1/32" or 1-13/64" deep.

TERMINALS: Series MS35058 and Series MS35059 MIL-S-3950C switches have solderable 6-32 electro-tinned screw terminals; ST42's and ST52's use solder lug.

TOGGLE SWITCHES — MEDIUM DUTY & CROSS-REFERENCE

31st Year

J-B-T INSTRUMENTS, INC.

Group II

SINGLE & DOUBLE POLE — GOVERNMENT QUALITY

Series MS25098 and MS25100 to MIL-S-3950C; Series ST12-27 to

JAN-S-23, MIL-S-21195A (Ships), or DDAX Drawings

MEDIUM DUTY refers to current-carrying capacity rather than to life characteristics of these Group II switches which are widely used for both military and non-military applications. Some models are rated at 6 amp. at 125 VAC-DC, 3 amp. at 250 VAC-DC. Other models are rated 3 amp. at 125 VAC-DC, 1 amp. at 250 VAC-DC, as listed on next page. Self-wiping, heavily silver plated double-grip contacts provide exceptional durability. All MS25098 and MS25100 have case-to-terminal seals and silicone rubber bushing seal to meet sand and dust and toggle seal requirements.

DESIGN IMPROVEMENTS AND NOMINAL RATINGS. Significant internal improvements over earlier designs of MS25098 and MS25100 give faster break, wider gap, and increased insulation values, resulting in a longer useful life. Typical uses are: instruments, data processing, and communications circuits.

Although MIL and J-B-T general-purpose switches are substantially similar in materials and construction, differences in test procedures and test conditions cause nominal ratings for military types to differ considerably from the ratings for UL or other non-military models. (Typical ratings are shown on next page.) For instance, under MIL Specifications, switches are tested at pressures corresponding to altitudes of 65,000 ft., while non-military switches are tested to NEMA and UL procedures at sea level pressures.

SIZE AND TERMINALS — Whether MS series to latest MIL-S-3950C or ST series to Specification JAN-S-23 and MIL-S-21195A (Ships), all have solder terminals. Medium-duty types use $\frac{1}{16}$ " long, toggle lever, bushing $\frac{1}{32}$ " 32NS-2A by $\frac{1}{32}$ " (or $\frac{1}{4}$ "). Bodies including terminals are: $\frac{1}{4}$ " long, $\frac{1}{16}$ " wide, $\frac{29}{32}$ " deep, except ST16A, -16B, -16C, -17A, and -27K are $\frac{1}{4}$ " long by $\frac{29}{32}$ " deep, while ST16D, -17D, -26N are $\frac{1}{4}$ " long by $\frac{29}{32}$ " deep.

§ Same dimensions as MS35059-27.

A: MS and AN types use internal sand and dust toggle seal and other high performance features involving extra cost over ST types. MS to MIL-S-3950C have a silicone rubber bushing seal to meet sand and dust, and toggle seal tests. MIL-S-3950 models are superseded by MIL-S-3950C models.

B: For heavy duty switches in the MS25068, MS35058, and MS35059 Series, MIL-S-3950C calls for SCREW TERMINALS ONLY. These terminals are SOLDERABLE FINISH and may be soldered after removal of screw.

Prices Net, F.O.B. Factory; Individually Boxed, Domestic Packed, Effective November 1, 1969, subject to change.

• There is no mistaking the light brown color and silver printing of these distinctive J-B-T 4-pole heavy-duty switches. The superior molded body, chosen after extensive tests, features high arc resistance and low shrinkage. As a result the switches exceed the rigorous electrical endurance requirements of MS25068.

Equally important, J-B-T uses generous proportions of selected silver alloys in integral construction for contact surface areas—to add overload protection, dissipate heat, and keep contact resistance under .005 ohms. The 8 models listed here have silicone rubber bushing seals and solderable 6-32 screw terminals, the same as other heavy-duty J-B-T MS switches. Dimensions same as MS35059 except bodies including terminals: $1\frac{1}{2}$ " long, $\frac{1}{16}$ " wide, $\frac{1}{32}$ " deep.

DRAWINGS FOR SUB-MINIATURE TOGGLE SWITCHES ON NEXT PAGE

NOTE A: Dimensions shown apply to standard terminals with hole. MPC switches have solid terminals, slightly larger, as shown on second following page

Prices Net, F.O.B. Factory; Individually Boxed, Domestic Packed, Effective November 1, 1969, subject to change.

SUB-MINIATURE TOGGLE SWITCHES

1st Year

J-B-T INSTRUMENTS, INC.

Group IV

Series JMT Toggle Switches
1-, 2-, 3-, and 4-pole DT.

SERIES JMT, SUB-MINIATURE TOGGLE SWITCHES. BROAD LINE MANUFACTURED IN CONNECTICUT BY J-B-T.

MANUFACTURED IN J-B-T's new plant, the subminiature types illustrated on this page make up the firm's fourth and newest group of toggle switches. Series JMT combines drastic reduction in size and weight with the trouble-free construction of standard-size J-B-T switches. Widely used in manually controlled, low-voltage, solid-state devices and miniaturized circuitry of computers, instruments, test equipment, geophysical, and test apparatus, these tiny switches also have application in aircraft, communications, and electronic equipment, and portable products.

Made with a distinctive GREEN BODY, single-pole types are 1/4" thin, double-pole types less than 1/2" square, 3-pole and 4-pole types correspondingly small. All single-hole mounting with 1/4" threaded bushing which will not turn or work loose in the J-B-T surface plate. Stringent in-plant controls assure terminals that are fully staked and will withstand repeated soldering. Terminal holes on JMT Series accept up to three #22 wires. Dimensions are shown on the other side of this page.

SPECIFICATIONS

Terminal Rating: 5 Amp. resistive load, 125 VAC and 24 VDC. **Initial Contact Resistance:** 5 Milliohms max. 3 VDC, 100 Milliamps. **Insulation Resistance:** 10,000 Megohms, min. **Dielectric Strength:** 1,000 volts rms at sea level. **Life Under Load:** 100,000 make-and-break cycles minimum for all suffix-23 models; 60,000 for others. **Weight, including Hardware:** SP, 0.19 oz.; DP, 0.23 oz.; 3-pole, 0.28 oz.; 4-pole, 0.32 oz.

MATERIALS: Switching contacts and rockers are coin silver; center terminal silver-plated. Bat handle is bright chrome-plated brass. Switch bodies are molded of plastic selected for high strength and arc resistance. Bushing, locking ring, and hex nuts are brass nickel-plated. Clamp and lockwasher are made of (cadmium plated) steel, with chromate treatment, or of stainless steel.

HARDWARE AND MOUNTING

Mounting hardware supplied consists of one locking ring RI-12, two hex nuts, W-NU-11, one internal tooth lockwasher, WA-16, knurled nut, W-NU-12 and tapered panel dress nut, W-NU-14 are also available.

SECTION OF MOVEMENT—All JMT switches make continuity terminal OPPOSITE throw of lever.

MOUNTING INFORMATION—When mounting switch with locking ring, use drill procedure illustrated. For push button switches, see next page.

COLOR CAPS—Switches are normally supplied with bat handles. For color coding, tight-grip insulator caps are available for easy attachment before or after switches are mounted. Price, \$10.00 per thousand in bulk; 2c per switch if attached. Specify color and part number:

ite — **W-CAP-10A** Black — **W-CAP-10D** Yellow — **W-CAP-10G** Gray — **W-CAP-10J**
e — **W-CAP-10B** Brown — **W-CAP-10E** Green — **W-CAP-10H**
t — **W-CAP-10C** Orange — **W-CAP-10F** Violet — **W-CAP-10I**

SERIES MPC, PC1 and PC2 Sub-miniature toggle switches are made with terminals for insertion in printed circuit boards; MPC for direct insertion, and PC1 and PC2 for right angle insertion. Terminals are gold plated for ease of solderability. MPC Series includes the same models as the standard JMT Series as well as such modifications as FH (Flat Handle), LL (Lever lock), 15-Series (Large Bushing) and other variations. (Illustrations slightly larger than actual size.)

Prices Net, F.O.B. Factory;

Domestic Packed, Effective April 1, 1969, Subject to change.

Maintained Action Switch PB-123					
Push to Make Contact, and Push Again to Reverse Action.			1.95	1.47	1.30
Momentary Action Switch PB-126					
Normally Open, or Normally Closed. (Determined by how wired.)			1.95	1.47	1.30
See Drawing for Circuitry.					
† These DT switches may also be used as ST by wiring only to applicable terminals. Example: JMT-123 can be connected as an "on and off" switch by using center terminal and terminal on one end only.					
‡ On orders for single switches, add 50c.					
§ Momentary position.					
§ Also available 3- and 4-pole.					

ADDITIONAL SUB-MINIATURE TOGGLE SWITCHES

J-B-T INSTRUMENTS, INC.

31st Year

LFH SERIES with Flat Handles

SERIES LFH — provides a human engineering factor, with flat handles (paddle levers) that are easy to grasp, give good sensing of the direction of throw, and orderly panel appearance. Flatted on two sides, each lever is permanently aligned by a patented construction in its operating plane perpendicular to the flat. Standard finish is satin chrome, with bright nickel and other finishes available on special order.

The LFH Series, with .437" bushing and 22° throw is now cataloged and stocked. The earlier models, known as the FH Series, with flat handles, .352" bushing and 25° throw, are now available on special order. Both LFH and FH Series can be made in configurations corresponding to those in the JMT Series; some models are available with MPC terminals for printed circuits; some with UL listing. Also the 15 Series switches are available with flat handles.

15 SERIES with 15/32" Bushings to Match Standard Size J-B-T Toggle Switches

SERIES 15 — Sub-miniature toggle switches combine the behind-the-panel space saving feature of the standard JMT Series with the front-of-panel appearance of standard size switches. They are used in many applications where circuitry requires switches of different capacities, but good panel design calls for uniformity. Electrical and mechanical characteristics of Series 15 switches are the same as for JMT switches given in Catalog 449, except for the larger (15/32") bushing and slightly greater weight. Mounting and hardware are the same as for standard size J-B-T toggle switches. Circuit identification caps are available in red, white, and black.

PB SERIES Push Button Switches

SPECIFICATIONS

Nominal Rating: 5 Amp. resistive load, 125 VAC and 24 VDC. **Initial Contact Resistance:** 5 Milliohms max., measured at 3 VDC, 100 Milliamps. **Insulation Resistance:** 10,000 Megohms, min. **Dielectric Strength:** 1,000 Volts rms at sea level. **Life Under Load:** 100,000 cycles make-and-break, min. **Force Required To Operate:** Less than 5 lbs. **Rapid break** generates audible click. **Weight, Including Hardware:** Single-pole 0.4 oz.; Double-pole 0.44 oz. **Materials And Construction:** Switching contacts and rocker are coin silver; center terminal silver plated, standard. Available with gold plated current carrying parts where required for dry circuit applications. Bushing and plunger are nickel plated brass; bushing has shoulder for greater strength. Clamp is stainless steel. Body is high-strength plastic, J-B-T green and black. Standard knob (W-KN-10) is anodized natural aluminum. Anodized colors, green, blue, red, black and gold are also available at slight extra cost. Buttons of other shapes, colors, materials or with imprints are also available on substantial production runs at extra cost. **Mounting Hardware** consists of 2 hex nuts, W-WU-11 nickel plated brass, and an internal tooth lockwasher, W-WA-16. A knurled face nickel plated nut (W-WU-12) is also available. Mounting in panel is in 1/4" D-shaped hole. (See drawing below.)

plated, standard. Available with gold plated current carrying parts where required for dry circuit applications. Bushing and plunger are nickel plated brass; bushing has shoulder for greater strength. Clamp is stainless steel. Body is high-strength plastic, J-B-T green and black. Standard knob (W-KN-10) is anodized natural aluminum. Anodized colors, green, blue, red, black and gold are also available at slight extra cost. Buttons of other shapes, colors, materials or with imprints are also available on substantial production runs at extra cost. **Mounting Hardware** consists of 2 hex nuts, W-WU-11 nickel plated brass, and an internal tooth lockwasher, W-WA-16. A knurled face nickel plated nut (W-WU-12) is also available. Mounting in panel is in 1/4" D-shaped hole. (See drawing below.)

(For double pole, see SK-187; 3-pole, SK-188; 4-pole, SK-189)

15-100

LL SERIES with Locking Levers

SERIES LL — Made with spring-loaded locking mechanism to prevent accidental shifting of the lever — a definite advantage on planes, ships, trains, or other vehicles where sudden motion might cause switching errors. Also, for test equipment other instrumentation or computer circuits where cumulated data might be lost through unintentional switching. A human engineering factor, the operator must think about the switch operation before he can complete it.

LL Series switches are normally stocked with natural aluminum caps but for circuit identification caps can be supplied with anodized color (red (danger), black, blue, gold or green).

(For double pole, see SK-193; 3-pole, SK-194; 4-pole, SK-195)

ROTARY SWITCHES — LAMINATED AND MOLDED

J-B-T INSTRUMENTS, INC.

- INSTRUMENT AND TESTER TYPE • 14- AND 20-POSITION
- SINGLE AND MULTI-DECK • MILITARY OR COMMERCIAL

USES — J-B-T Rotary Selector Switches are extensively used in quality test equipment, portable instruments, inspection setups, and other military aerospace and commercial applications where trouble-free, dependable performance is of major importance.

FEATURES — **Extra Contacts** — 14- and 20-position designs provide extra switching capability. **Dependability** — Sturdy rotors and decks with rigid 3-post deck suspension; current-carrying parts heavily silverplated to meet 100 hour salt spray test; sharp detent mechanism to assure positive indexing; insulation resistance above 50,000 megohms. **Low Contact Loss** — Double-grip collector arms, and large area contacts, silver to silver; average contact resistance, .007 ohms or less. **Ample Dielectric** — Conservatively rated at 1 amp., 125 VAC, inductive load; maximum momentary capacity (not make-and-break), 5 amp. AC or DC; maximum voltage between contacts, 1500 VAC, R.M.S.; between decks and ground, 2000 VAC, R.M.S.

MS-14-1 Molded

ed — Molded models have all moving contacts enclosed to minimize dirt and on.

14-Position: 13 circuits and "off" per deck in 2" circle (SS-14) or 2-3/32" circle (KN-14), with 25° 43' angular indexing. Supplied individually boxed with 1-1/4" Bar (KN-14), not on bulk orders unless specified. For details, SS-14, 1 to 6 decks, Print SK-42 Rev. B. MS-14, 1 to 6 decks, Print SK-111 Rev. D, 7 decks and over, K-112 Rev. C.

20-Position: 19 circuits and "off" per deck in 2-23/32" circle (SS-20) or 2-5/8" (MS-20) with 18° angular indexing. Supplied individually boxed with 2" Bar (KN-16), not on bulk orders unless specified. For details, SS-20, 1 to 6 decks, Print SK-116 Rev. A. MS-20, 1 to 6 decks, Print SK-113 Rev. D, 7 decks and over, K-114 Rev. C.

Commercial Variations: Special switches too numerous to list now are made. Typical are: laminated models with 14 or 20 live positions, no off, rated by suffix F as in SS-14-2F or SS-20-1F. Inquiries are invited.

BONDED RUGGEDIZED TYPES As indicated in the table, all molded rotary switches may be ordered with bonded construction as MS-14B or MS-20B types. Cured laminations for ruggedization, shockproofing and further enclosure. Additional dependability factor adds only approx. 1/64" and 35c catalog price deck.

6-POLE DOUBLE-THROW PER DECK —

1 or 2 DECKS (DT Series). Widely used for simultaneous double-throw switching of 6 circuits per deck (18° throw). Fully enclosed — illustration shows protective cover cut-away. Circuit arrangement printed on switch front. If DTS Shorting Type, 1500 VAC R.M.S. between contacts and ground, 1000 VAC R.M.S. between contacts. See MS-20-1-6DT, MS-20-1-6DTS, and MS-20-2-6DT in table.

ETCHED DIAL PLATES

For switches below, also 20M Series. Dull black finish, raised bright numerals, 2 3/4" dia.

NOTES TO TABLES

- * Standard Items, but not regularly stocked; check with your electronic parts distributor.
- (a) 5 positions include 4 "live" and 1 "off."
- (b) 6 positions include 5 "live" and 1 "off."
- (c) Complete shorting — all contacts shorted except one in use.
- (d) Dimensions given are for continuous rotation switches. On Standard SS-14 Models only, adjustable stops are also furnished, and when used, increase depth behind panel 3/32" and decrease effective bushing length 3/32".

Non-Shorting — Break before make Shorting — Make before break

**"F" type decks (14 full live or 20 full live positions, no "off") available on SS-14 and SS-20 Series only. Add 35c per deck to catalog price.

Prices Net, F.O.B. Factory; Individually Boxed, Domestic Packed, Effective April 1, 1968, subject to change.

MULTI-POLE AND LEVER TYPE SWITCHES

J-B-T INSTRUMENTS, INC.

31st Year

IMPROVED MULTI-POLE MOLDED ROTARY SWITCHES, SERIES 20M.

- Superior Molded Material
- All Models Bonded & Ruggedized
- Panel Seal Available

Front View Showing Panel Locator which is Normally at 3 o'clock Position.

Rear View with Back Cover Cut Away to Show 4-Pole Construction with 4 Live Switching Contacts.

Although the new 20M Series is 1/4" longer behind the panel than the 20-position molded switches described on the preceding page, the two styles are otherwise interchangeable in dimensions. Providing 19 live positions and off, the 20M offers these additional features:

1. **Increased Versatility of Circuitry** — up to and including four poles per deck;
2. **Upgraded Insulation Resistance and Dielectric Qualities** — by use of melamine stators and rotors (or other MIL-M-14 molded materials when specially ordered);
3. **Built-in Panel Locator or Non-Turn Device;**
4. **Extended Switch Life** — new contact design with rotor brushes of phosphor bronze heavily silver-plated;
5. **All 20M Models are Bonded and Ruggedized Construction;**
6. **Radial Alignment of Multi-Pole Contact Surfaces** — by means of newly-designed double-ball detent with diaphragm-type springs.

VARIATIONS OF 20M. — Please request SK-142, Revision of March, 1967, or later for full dimensions and circuit diagrams. Besides the condensed listing in the accompanying table, various combinations of **shorting and non-shortng contacts for each deck** may be made. **Fixed stops** are built-in but may be altered for single-pole switches when specially ordered. **Over six decks** can be supplied for a reasonable number of poles; extra decks add 5/16" per deck and 5/16" per switch for rear support SU-3. **Ring-contact** (suffix R) may be specially ordered.

PANEL SEAL PS20M-SERIES — Sealed shaft and bushing meet the requirements of MIL-S-3786C for sealing. For details ask for SK-143, Revision of March, 1967, or later. The seal (prefix PS) adds \$1.75 per switch to catalog price.

SPECIFICATIONS AND TEST DATA — Available on request.

No. of Decks	Depth Behind Panel	Poles per Deck	Model Number	Circuitry Per Pole	Rotation Positions*	Box, Incl. Knob
1	1-3/16"	1	20M-1201N	19 live, 1 off	Continuous	\$4.00
		1	20M-1191NF	19 live, no off	1 thru 19	4.30
		1	20M-1161N	15 live, 1 off	20 thru 15	4.40
		2	20M-2101N	9 live, 1 off	20 thru 9	4.40
2	1-1/2"	3	20M-3051N	4 live, 1 off	20 thru 4	4.80
		4	20M-4051N	4 live, 1 off	20 thru 4	5.15
		1	20M-1202N	19 live, 1 off	Continuous	5.30
		2	20M-2102N	9 live, 1 off	20 thru 9	6.10
3	1-13/16"	3	20M-3052N	4 live, 1 off	20 thru 4	6.90
		4	20M-4052N	4 live, 1 off	20 thru 4	7.65
		1	20M-1203N	19 live, 1 off	Continuous	8.65
		2	20M-2103N	9 live, 1 off	20 thru 9	7.90
4	2-3/16"	3	20M-3053N	4 live, 1 off	20 thru 4	9.00
		4	20M-4053N	4 live, 1 off	20 thru 4	10.15
		1	20M-1204N	19 live, 1 off	Continuous	8.20
		2	20M-2104N	9 live, 1 off	20 thru 9	9.95
6	2-13/16"	3	20M-3054N	4 live, 1 off	20 thru 4	11.35
		4	20M-4054N	4 live, 1 off	20 thru 4	12.85
		4	20M-4044N	3 live, 1 off	20 thru 3	12.85
		1	20M-1206N	19 live, 1 off	Continuous	11.45
2	2-13/16"	1	20M-1166N	15 live, 1 off	20 thru 15	11.45
		2	20M-2106N	9 live, 1 off	20 thru 9	14.00

* See MS-20 drawing on following page for location of positions.

- Notes: (1) For standard switches, knob pointer (active position) is 180° opposite flat on shaft, and off is at position 20.
 (2) **NON-shortng (N) type** — (break-before-make) — is shown. For shorting type (S), add \$.05 per pole per deck to catalog price. Example: 3 pole, 3 deck 20M-3053S is \$8.95.
 (3) All models have 18° angular indexing.
 (4) Maximum **LIVE** positions per single pole, 19; per 2-pole, 9; per 3- and 4-pole, 4.
 (5) Switches (such as 15 or 18 position) with all live or less than maximum live positions can be provided by fixed stops.
 (6) Maximum of 9 decks for 1 pole per deck
 6 decks for 2 poles per deck
 4 decks for 4 poles per deck.
 (7) †Suffix-F denotes all rotation positions shown are live with no off.

LEVER ACTION SWITCHES — 6, 5, 4, 3, and 2-Position — LAMINATED, MOLDED, & SUB-MINIATURE

LAMINATED 3- AND 4-POSITION, POSITIVE INDEXING. These lever switches are derived from the J-B-T SS-14 instrument-type rotaries.

Specified for tube checkers, inspection equipment, communications systems, control consoles, and other uses where quality is important, 4-position types are interchangeable with 3-position except in length of throw (1" slot for 3-position, 1 3/8" for 4-position) — mounting holes for boxed switches come with mounting hardware and KN-17 knob as illustrated; bulk shipments, without knobs. **SINGLE DECK** — spacing between centers: recommended, 3/4"; minimum, 9/16". **TWO DECK** — spacing: recommended, 15/16"; minimum, 13/16". 3/8" between decks matches TV twinlead wires. **SPRING RETURN TYPE** — single deck, 3-position switches may be ordered with spring return. Lever returns to position 11°, giving momentary action at positions 9° and 10°. For dimensions on all SS-14-IL series switches, ask for drawing SK-138.

SS-14-IL4F-2

Molded 5 or 6 Position Lever Switch

MOLDED 5- and 6-POSITION, POSITIVE INDEXING. 5 or 6 live positions two circuits per deck, in enclosure; lustrous black molded construction adapted from the MS-20 series with electrical characteristics as shown on the next page. These models can simplify circuitry for sound systems, control, inspection, test, experimental, and hobby purposes. Individually-boxed switches come with KN-20 threaded black molded knob; bulk shipments, without knobs. For mounting data see SK-64, Rev. H on 3 position and SK-119, Rev. B on 6 position.

MS-20-1L5A-1, 5-position, 2-circuit (1 deck) \$3.45

MS-20-1L6A-1, 6-position, 2-circuits (1 deck) 3.70

2 AND 3 POSITION, 1 TO 4 DECKS, 2 TO 8 POLES PER DECK.

SUB-MINIATURE LEVER SWITCHES — Derived from the high-performance sub-miniature switches described on another page, the VL-7000 and the VL-5000 positive indexing series and the VSRL-7000 and VSRL-5000 spring return types provide excellence in lever switches. MIL materials throughout; crisp 30° indexing. Max. depth behind panel 1.250"; panel slot .962" x .062"; other details to SK-139, Rev. A and Catalog SM-33. Typical switches are:

VL-71031N, single-pole, 3-position, one-deck, non-shortng \$4.80

VSRL-71031N, same as above, with spring return to center position from either side \$8.00

VL-71032N, single-pole, 3-position, two-deck, non-shortng 7.05

Sub-Miniature 1 Dual Duty Knob

Positions Per Circuit	Circ. (Poles) Per Deck	Decks or Gangs	Short. Non-Short	Stand. Contact Pos.	Model	Boxed Incl. Knob
3, no "off"	1	1	N-S	A	SS-14-IL3	\$1.10
3, no "off"	2	1	N-S	B	SS-14-IL3A	1.25
3, no "off"	1	2	N-S	A	SS-14-IL3-2	1.80
3, & "off"	1	1	N-S	C	SS-14-IL4	1.20
4, no "off"	1	1	N-S	D	SS-14-IL4F	1.20
4, no "off"	1	2	N-S	D	SS-14-IL4F-2	2.10

* Numbers correspond to contact positions in MS-14-2 drawing on prior page. A — common at 12, contacts at 9, 10, 11; B — common at 9, 10, contacts at 6, 7, 8, 12, 13, 14; C — common and off at 12, contacts at 9, 10, 11; D — common at 12, contacts at 8, 9, 10, 11.

LEVER KNOBS

- KN-17, black pointed with metal insert \$0.19
- KN-18, walnut, same as KN-19 0.08
- KN-19, black, round, flat-type, push-on 0.08
- KN-20, black, threaded, for MS-20-IL 0.20

TYPE SR31 LEVER-ACTUATED SWITCHES TO MIL-S-3786C, MEDIUM AND HIGH SHOCK

Sub-miniature open construction, lever-actuated switches, similar to the one illustrated above, recently have been added to MIL-S-3786C as SR-31 types. This category covers shorting and non-shortng; 1 to 4 poles per section; 1 to 4 sections per switch; Medium Shock M, as in Model VL-71031N-SR31N30CMGC, will normally be supplied, but High Shock H is available. Typical models are priced on next page.

CAUTION—MIL-S-3786C, a sophisticated specification, spells out more than one performance level for each of several categories such as Temperature-Life, Vibration, Shock, and Altitude. Each level is designated by its own symbol. J-B-T SRO5 models meet an exceptional number of levels.

USES—For test equipment, airborne and translated equipment, geophysical apparatus, and for miniaturized electrical and electronic devices.

BASIC SERIES—Full 12 live switching contacts per deck are available in Series 7000 using a patented wafer design feature where rotor contacts are on the front, and switching contacts are on the rear of the same deck. 1 to 4 poles per deck 1 to 6 decks, standard.

to 8 poles per dual-duty deck are available in Series 5000 which has up to 12 contacts including common on the front, and up to 12 contacts including common on the rear of the same deck. 1 to 4 poles on the side of dual-duty decks; 1 to 4 decks, standard.

THREE ROTARY TYPES—Both Basic Series are made in 3 types: **MILITARY STYLE SRO5**, numbered for specific performance levels of MIL-S-3786B; **V TYPE**, similar construction to SRO5, but not ordinarily subjected to full military test procedures; and **X TYPE**, using the same materials as V type switches, but intended as replacements for previous models or as original components for non-military uses where requirements are similarly exacting.

LEVER SERIES (L Types)—Outstanding design known as VL-7000 or VL-5000 Series, 1 to 4 decks. Illustrated on a preceding page.

OBS—Supplied with individually boxed switches for V and X types; not supplied on SRO5 because of separate military specification applies.

DIFFERENCES BETWEEN SRO5 MILITARY, V, and X—Switches other than X types use extra rugged detent mechanisms and rotor construction.

	8	2	N-S	—	VL-58021N	5.35	VL-58021N-SR31*	6.35

*Typical MIL-S-3786C complete number for rotary switch is V-71121N-SRO5N30C3MGC; for lever-actuated is VL-74031N-SR31N30C3MGC. Unless otherwise ordered, switches will be furnished according to suffix N30C3MGC. Temperature-Life Characteristic C also qualifies for Characteristics A and B; Vibration Grade Symbol 3 also qualifies for Symbols 1 and 2; Shock Type M, medium impact, normally supplied. Shock Type H available at extra cost on some models when so ordered. Altitude C covers up to 70,000 ft., also meets Characteristic O (up to 10,000 ft.)

SPECIFICATIONS & TEST DATA ON SRO5 MILITARY STYLE

NOTE: Most of the values shown here are given in the Specification and do not indicate the extent to which the test results of J-B-T switches were more favorable.

Current-carrying capacity: 5 amps at standard ambient conditions.

Current-breaking capacity: 750 MA at 30 VDC; 300 MA at 120 VDC; 1 AMP at 115 VAC Non-Inductive.

Initial Contact Resistance: .005 ohms max.

Contact Resistance: To MIL-STD-202C, Method 307, which requires Initial — 10 milliohms; After Moisture Resistance Test — 15 milliohms; After Life Test — 20 milliohms.

Materials: Terminals (double-wiping): gold-plated 90% silver alloy. **Rotor Contact:** J-B-T #1800 Silver Alloy. **Shaft & Frame:** Stainless steel, passivated.

Insulation: Water, glass epoxy laminate to MIL-P-18177C Type GEB, NEMA G-11; Rotor, ceramic to MIL-I-10A, Grade L-623.

Life Rotational; Temperature-Life Characteristic C, 25,000 rotational cycles at 10 cpm, Temperature — 65°C to +125°C; 25,000 cycles at 70,000°, room ambient temperature.

Vibration: Grade 3 of Table III MIL-S-3786B, 10 to 2000 cps. Tested in accordance with MIL-STD-202C, Method 204, Test Condition B.

SHOCK: Shock Type M, Medium Impact per Table IV, MIL-S-3786B. Tested in accordance with MIL-STD-202C, Method 205. Mating contacts did not open for more than 10 micro-seconds. Shock Type H, High Impact, Method 207, specifies not more than 5 milliseconds and does not automatically cover Type M impact.

Non-Turn Device			
Other Details	Print SK-135 (E)	Print SK-179	

Normally supplied with suffix N30C3MGC for medium shock. Shock type H available at extra cost.

MODEL VMCS7-1125NF2
5-Deck Non-Shorting Type
Illustrated. (Shorting Type H
Common Deck Adjacent to
Front of Switch)

FEATURES:

(1) Adjustable detent action for variable torque (or factory set for 4 in. lbs. max.) (2) Unusually sturdy molded-in terminals, .032" thick; accommodate two #18 wires. (3) Distinctive color-coded glass alkyl or dial phthalate decks — **gray green** for coin silver alloy contacts and rotor blade **blue** for nickel silver; and **green** for silverplated brass. (4) Husky stainless steel shaft. (5) Permanent identification of positions 0 through 11, cast-in detent housing and molded in rear deck. (6) Integral connections between contacts and terminals — no mechanical joints. (7) Enclosed decks may be stacked for explosion-proof switch, per methods 3 and 4 of MIL-E-527.

**V/M SERIES 12-POSITION ROTARY SWITCHES
REMARKABLE QUALITY WITH ADJUSTABLE
TORQUE DETENT**

This unusually fine family of fully enclosed rotary switches is being produced in J-B-T's new Connecticut plant. Used in precise laboratory test apparatus, test set-ups, telemetering, meter switching, calibration operations, and similar applications where circuit stability and long useful life are essential to accuracy and repeatability.

NOTES:

* Model Number shown is for VMCS7, with coin silver contacts and rotor blades. For nickel silver, model number would be VMNS7; for silver plated brass contacts and nickel silver rotor blades, VMBS7.

** Unlike other J-B-T rotary switches, VM series is normally shorting type; for non-shorting construction add 50c per deck per switch, Net. Made only on special order.

† Includes knob and mounting hardware. Quantity prices on request.

RESONANT REED RELAYS AND OSCILLATOR CONTROLS

Applications: selective-calling mobile communication equipment, remote data transmission, and simultaneous or sequential coding and decoding.

For further data, ask for Bulletins 162-R and D664A. Inquiries are invited on combination relay-oscillator types.

J-B-T frequency-sensitive electro-mechanical relays (decoders) are highly stable control devices. They intermittently make and break contacts when a signal of the same frequency as the tuned reed is received. Although the reed has a high Q, the bandwidth at which the relay responds will be proportional to the input signal level.

Dual-Reed
Oscillator Control
RO-B10B-188.0

Relay
RR-DO2E-250.3
(Vibration-Isolated
in All Planes)

Single-Reed
Oscillator Control
RO-D62E-250.3
(Vibration-Isolated
in All Planes)

RO-B Oscillator Controls (sometimes known as tone generators or encoders) are dual-reed units internally shock mounted and of sealed construction. These units control the frequency of oscillation vacuum tube or transistor oscillator circuits. The RO-B type oscillator control is recommended where accurate and stable AC signals are required.

RR-D types are internally shock-mounted resonant reed relays which are square, sealed units with 7-pin miniature plug. They now are the most widely used J-B-T relays.

RO-D types are single-reed, internally shock mounted oscillator controls for applications where space saving is of importance. Dimensionally they are identical to RR-D relays.

general purpose snap action switches

 TYPE
TYPE

TYPE 10

MEETS THE REQUIREMENTS OF MIL-S-8805/1C

The highly sensitive LICON® Type 10 basic switch provides a combination of flexible features that cope with most switch applications. The Type 10 provides ultra-precision, dimensional stability, and small movement differential with extremely long life. It meets requirements of military specifications. The serpentine snap action switch mechanism assures positive electrical control with high vibration resistance. Dead center and switch teasing have been eliminated. The ammonia free phenolic case is precision molded and provides excellent protection against corrosion. Precise throughout—even the self-lubricating nylon button gives further assurance of performance and long life.

UL LISTED, CSA APPROVED

TYPE 08—FLAT-BASE

U.L. APPROVED

The Type 08 is offered in all styles except 08-2, 08-3, and 08-9 series. Fine silver contacts are standard. This unit is most effective carrying its full 22.5 Amp resistive load to the maximum of 100,000 cycles. Motor load is 1/3 h.p., 125 Volt A.C., or 1/2 h.p., 250 Volt A.C. The 08 uses all of the Type 10 actuators. For information contact Factory.

TYPE 10-122

Highly sensitive basic switch for applications where overtravel and actuators are not required. Used for in-line actuation.

Pretravel030 max.
Overtravel005 min.
Movement Diff.002 max.
Operating Force 10 oz. ±3
Release Force 3 oz. min.

TYPE 10-222

Designed for in-line actuation, sw. features high sensitivity with small overtravel plunger and stand-through-hole mounting.

Pretravel030 max.
Overtravel005 min.
Movement Diff.002 max.
Operating Force 10 oz. ±3
Release Force 3 oz. min.

TYPE 10-322

One hole panel mounting permits mechanical or manual actuation with 1/32 minimum overtravel. Mounting nuts permit adjustment of operating point.

Pretravel030 max.
Overtravel 1/32 min.
Movement Diff.002 max.
Operating Force 10 oz. ±3
Release Force 3 oz. min.

TYPE 10-422

Leaf spring actuator reduces operating force and provides increased overtravel. Used for cam and slide installations.

Pretravel 1/32 min.
Overtravel050 max.
Movement Diff.002 max.
Operating Force 6 oz. min.
Release Force 5 oz. min.

general purpose snap action switches

TYPE 08
TYPE 10

TYPE 10-522

Pretravel $\frac{3}{16}$ max.
Overtravel $\frac{1}{8}$
Movement Diff.050 max.
Operating Force 6 oz. max.
Release Force 5 oz. min.

The smooth operating roller leaf actuator is designed for slow or fast moving cams. Positive electrical control is assured with reduced operating force.

TYPE 10-722

Pretravel $\frac{3}{16}$ max.
Overtravel $\frac{1}{8}$ min.
Movement Diff.045 max.
Operating Force $3\frac{1}{2}$ oz. max.
Release Force 5 oz. min.

Roller lever actuators are designed for fast or slow moving cams and slides. Hinged-pivot provides long lasting, smooth operation with tolerance accuracy and reduced operating force. Available in various lever lengths and/or with pre-loaded actuator.

TYPE 10-922

Pretravel030 max.
Overtravel140 min.
Movement Diff.002 max.
Operating Force 10 oz. $\pm$ 3
Release Force 3 oz. min.

In-line roller actuator for cam or slide applications. Threaded bushing permits one hole panel mounting and adjustment of operating point. Also available with cross-roller actuator.

SPLASH-PROOF SEAL

Sealing against moisture, dirt, dust and other harmful elements can be provided for most models without altering the switch characteristics. A neoprene boot is secured to the actuating member. This permits positive sealing without affecting the switch operation. (See illustrations)

REVERSE ACTION LEVER ACTUATOR

The reverse action provided by this type actuator is designed to provide minimum pretravel and maximum overtravel. Preloading minimizes switch abuse with impact actuation.

TYPE 10-622

Pretravel $\frac{1}{32}$ max.
Overtravel156 min.
Movement Diff.045 max.
Operating Force $3\frac{1}{2}$ oz. max.
Release Force 5 oz. min.

The rigid, hinge-type lever permits exacting repeatability with reduced operating force and additional overtravel. Available in various lever lengths and/or with preloaded actuator. Slightly lighter operating force results when return spring is removed on Type 10-600 and 700 Series.

TYPE 10-822

Pretravel030 max.
Overtravel062 min.
Movement Diff.002 max.
Operating Force 10 oz. $\pm$ 3
Release Force 3 oz. min.

Rugged, compact switch for in-line or cam actuation features oversize button and .062 minimum overtravel. Molded collar guides and protects actuator plunger.

TYPE 10-72207

Pretravel156 max.
Overtravel056 min.
Movement Diff.030 max.
Operating Force 8.5 oz. max.
Release Force 1.5 oz. min.

One way actuator permits electrical control in one direction only. The hinged-pivot allows the actuating member to return without operating the switch.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

high capacity miniature switch

TYPE 23

TYPE 23

The LICON® type 23 Series miniature snap-action switch offers excellent mechanical and electrical life for its class. A unique "heat dam" slot to eliminate the flow of solder and flux inside the switch is provided on models having solder terminals. The type 23 Series is also available with screw or quick connect terminals. Integral type roller and straight lever actuators are available.

LONG LIFE

The type 23 Series has been tested to over 10 million cycles mechanical life, 5 million at pilot duty. Electrical ratings are based on 50,000 cycles at full rated load. At one-half rated load, the expected life of the type 23 increases to 200,000 cycles, nominal.

CHARACTERISTICS

Type 23 Series basic switches are designed for cam operation. A full complement of roller and straight roller actuators are available for other applications. Standard switch case is molded phenolic material. The type 23 is operational to 275°F, ambient.

CIRCUITRY

The type 23 Series is basically a SPDT (Form C) contact arrangement, but SPST-NO (Form A) and SPST-NC (Form B) are also available.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

miniature thin switch

TYPE

The Type 25 Series miniature snap-action thin switch offers considerable uniformity of operating forces because of its unique design. The LICON® Type 25 is a Form C switch using a coil spring as opposed to the stressed blade used by competition. The mechanism is quite similar to the exclusive LICON® Butterfly® double-break mechanism, yet the off-center plunger version allows for extremely light operating force to 27 grams.

Because of its similarity to the Butterfly® mechanism, the Type 25 offers extremely long life and 12 Amp rating. Good contact wiping action, low contact resistance, high shock and vibration resistance are additional features that make this Form C switch a desirable unit.

The thin switch is designed for commercial applications which require utmost reliability at low price. Typical applications include coin and vending machines, timers and counters.

ELECTRICAL RATING (U.L. Listed)

Dependent on location of actuating plunger and operating force.

SPDT—Form C	ON CENTER	OFF CENTER
125/250 VAC	12 Amps	6 Amps

*The 25-103 (on center—60 gm. max. oper. force) is rated at 6A, 125/250 VAC.

RELIABILITY

Pilot Duty Life:
Up to 20 million cycles

Mechanical Life:
On-Center 20 million cycles
Off-Center 50 million cycles

ORDERING GUIDE

It is important to note that the Licon type 25 on-center and off-center versions are available in two case widths; $\frac{3}{32}$ " and $\frac{1}{4}$ ". This does not mean the ratings are affected, but the problem of interchangeability is lessened.

ON CENTER—25-100

OFF CENTER—25-205

BUTTERFLY®
double-break switches**

TYPE 11

E 11-104

UL LISTED
CSA APPROVED

MEETS THE REQUIREMENTS OF MIL-S-8805/11

LICON® Type 11 switch is a general purpose switch for factory and industrial applications. It combines long life and high electrical rating into one compact package that exceeds standard requirements of precision snap-action control. It is specially adaptable for direct actuation by moving cams.

ammonia-free switch case provides protection against contact corrosion even at extremely high temperatures . . . positive actuator button alignment . . . and a sturdy base for minimal stability. The two circuit switching mechanism, consisting of beryllium copper switch blades and stainless steel rating spring, prevents dead-center for high overload capacity. The knife-edge pivot design eliminates "flickering" "teasing" and assures ammonia-free switch operation even when the plunger is within .010 of trip point vibration resistance of 10's up to 500 cps and 10's up to 2000 cps. The Type 11 series has been tested to over 20 million cycles of mechanical life. Rated at 10 amps. 250 VAC, 28 VDC Ind.

Variations in operating characteristics, terminal types and actuators give added flexibility. End terminals are available in screw or solder type; side terminals in solder only. Custom terminal designs can be provided for special applications. Variations in operating and reset forces are available from 70 grams to 40 ounces. Movement differentials are available from .010 to .030 with a maximum of .040 for special switch designs. Overtravel dimensions can be varied to meet specific requirements. Switches can be used with or without actuators.

SPDT, Two Circuit

- U.L. Listed—10 Amps @ 125/250 V.A.C.
- 1/2 HP @ 125 V.A.C.
- 3/4 HP @ 250 V.A.C.

• 28 V.D.C.	Ratings	Sea Level
Form X or Y	Res.	15 Amps
	Ind.	10 Amps

Reset switches are excellent for use as a float level control, two-way limiting action, over pressure devices, or other similar installations. The switch maintains contact after the operating force has been removed and until the reset button is actuated. With the exception of the reset action, these switches are identical to the momentary basic switches. Actuators may be used with reset

heavy-duty BUTTERFLY® double-break switches

TYPE 14

TYPE 14

LICON® Type 14 basic switch features long electrical and mechanical life. It is best adapted to industrial applications where dependability and precision is required. The case, made of non-flammable plastic, provides mounting variations with offset terminal design for easy wiring. The actuator button is made of nylon, permitting direct cam applications without auxiliary actuators.

100,000 CYCLES —

LICON Type 14 series has been tested to over 20 million cycles of mechanical life. The Type 14 is specially designed for heavy duty use on high current applications. Now reliable switch performance is available in a compact design rated at 20 amps, 250 VAC.

- Positive wiping action of the large silver contacts eliminates contact welding.
- Case design forms a double bearing around the spring guide for positive switch alignment even for direct cam applications.
- Stainless steel springs are heat-treated to prevent hydrogen embrittlement.
- Mounting holes for single or multiple gang mounting. Optional flange for panel mounting.
- Offset terminal design permits easy wiring, and provides excellent insulation barrier.

- 1 Large Silver Contacts
- 2 Nylon operating button
- 3 Stainless steel spring
- 4 Wide insulation barriers

CSA APPROVED

- 20,000,000 Mechanical Cycles LIFE
- Twice-for-the-size ratings
- Hi Shock & Vibration Resistance
- Two Circuit Control
- Direct cam operation with double bearing guided button

HIGH RELIABILITY

Mechanical Life

The LICON® Type 16 series has been tested to over 20 million cycles of mechanical life, even with extreme over-travel. The unique Licon "butterfly" mechanism uses dual non-stressed blades and low-rate simple coil springs that put life in the snap-action.

Electrical Life

Minimum switch life is 100,000 cycles at a full 10 Amps, or 750,000 cycles at conventional 5 Amps. Wiping action, inherent in the "butterfly" mechanism, results from the movable contacts sliding horizontally before lift off to shear most contact welds and penetrate surface film on the fixed contacts, assuring a reliable electrical connection.

Simultaneity

No "teasing" or "dead break" conditions can occur due to the Type 16's unique butterfly design. Simultaneity of transfer is insured by the precise location of notches in the spring guides and knife-sharp ends of the beryllium copper contact blades.

Low Contact Bounce

Four millisecond transfer time, including one millisecond of bounce (2-4 discernible bounces) is nominal for the Type 16. This short rebound time is the result of high overcenter force, low mass contacts, and short blade lengths.

Shock and Vibration

The Type 16's miniature "butterfly," with its low mass and short length pivoted members enables excellent shock and vibration resistance. Tests show no contact chatter at 25 G's, 10-2000 cps, even with actuator depressed to within .0025" of trip point. Meets MIL-S-901A high shock requirement.

Versatility

- The widest choice of terminal styles (solder, screw, taper tab and end, bottom or side locations) are offered in the Type 16 switch.
- Hi-temp case offered for applications with ambient temperatures to 400°F. For 500°F. switches—consult factory.
- Actuators are non-integral with a wide choice of standard pushbuttons, levers, and toggle actions.

16-104

BIG ELECTRICAL RATING

Double-break versions of the LICON Type 16 offer twice electrical rating of most conventional sub-miniatures, a big amps @ 28 V.D.C. resistive. Twice as many contact surface, twice as many air gaps, as conventional sub-miniatures, and the heat dissipation factor and the current interrupting ability for "big switch" service.

Two Circuit Control

The Type 16 double-break design also permits control of isolated electrical circuits with a single switch. A SPDT configuration exists at each side of the butterfly, providing N.O., two N.C. contacts. Electrical rating may be reduced with the dual circuit option is exercised. Consult factory for ratings and expected life data if mixed voltages are to be used.

Low Contact Resistance

Due to high contact pressures, the Licon Type 16 has low contact resistance—required of "dry" circuit applications. Special contact materials and manufacturing techniques provide extremely low values for special applications.

ELECTRICAL RATING

U.L. Listed—10 Amps @ 125/250 VAC
28 VDC L/R = .026

		SEA LEVEL	60,000 F
Form X or Y Single Circuit	Res.	10 Amps	10 Amps

sub-miniature BUTTERFLY® double-break switches

TYPE

TYPE 16 ACTUATORS

76-2220

(Actuator Only)

Single pole panel mounted push button for installation where space is restricted. A tab on the actuator bracket provides positive panel alignment. Supplied with standard white button unless color is specified. Also available with $\frac{3}{8}$ " over-travel as Type 76-2260.

PART NUMBER INFORMATION

No. of Poles	Act. No.	"A" Dim.	Over- travel	"B" Dim.
1	76-2220	.500	$\frac{1}{4}$ min.	$\frac{3}{8}$
1	76-2260	.666	$\frac{5}{32}$ min.	$\frac{3}{8}$
2	76-2190	.500	$\frac{1}{4}$ min.	$\frac{5}{8}$

76-2230 (Actuator Only)

Multiple pole push button allows a variety of circuit possibilities. A nonturn washer assures positive panel location. Supplied with standard white button unless color is specified.

PART NUMBER INFORMATION

No. of Poles	Act No.	"A" Dim.	Oper. Force
1	76-2350	$2\frac{1}{32}$	9 oz. max.
2	76-2230	$2\frac{1}{32}$	18 oz. max.
3	76-2250	$2\frac{9}{32}$	27 oz. max.
4	76-2240	$1\frac{11}{64}$	36 oz. max.

76-2100 (Actuator Only)

Maintained Contact actuator requires one push to actuate switches, a second push to release. Long life mechanism provides positive lock, high shock/vibration resistance. White button standard unless otherwise specified.

76-4210 (Actuator Only)

Two position toggle actuator for maximum circuitry in minimum space. High quality pivoted toggle mechanism assures long actuator life.

PART NUMBER INFORMATION

No. Poles	Maintained	"A" Dim.
2	76-4210	$3\frac{9}{64}$
3	76-4220	$5\frac{9}{64}$
4	76-4260	$1\frac{3}{6}$
5	76-4270	$1\frac{29}{64}$

76-1200 (Actuator Only)

Roller lever actuator for cam and slide operation. Pivot assures smooth operation with reduced forces. Available without roller as 76-1210. Various lever lengths can be supplied either style.

ACTUATOR ORDERING INFORMATION

ACTUATOR ONLY: Order as per part numbers listed above.

ACTUATOR AND BASIC SWITCH ASSEMBLED: All pushbutton and toggle actuators are assembled at factory with basic switch(es). Specify basic by dropping series code and adding to actuator number. (EXAMPLE: 76-2230 with 2 Type 16-403's assembled = 76-2230/403.)

COLOR CODE:

Specify color of button by altering last digit of actuator part number.

Order as per 76 actuator part number.

ACTUATOR & BASIC SWITCH ASSEMBLED:
Specify basic switch for actuator by dropping series code and adding to actuator number. (EXAMPLE: 76-1200 with Type 36-604 = 76-1200/604.)

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

illuminated pushbutton switches

TYPE

MEETS REQUIREMENTS OF MIL-S-22885/27

LICON® Type 01 Series of lighted pushbutton switches cut control console costs by combining indicating and manual switching functions in a single compact package. The pushbutton serves as the color and/or legend coded panel indicator and actuates one or more subminiature snap-action switches. The single component LICON Type 01 replaces conventional systems of separate panel lights and pushbutton or toggle switches, thus reducing panel size requirements and installation time. The LICON Type 01 Series is designed for commercial and military electronics requiring highly reliable precision switching and where spaceweight requirements are critical. The LICON Type 01 Series is designed to meet the requirements of MIL-S-22885.

		SEA LEVEL	60,000 Ft.
Form X or Y Single Circuit	Res. Ind. Lamp	10 Amps 7.5 Amps 4 Amps	10 Amps 3.5 Amps —
Form Z Two Circuit	Res. Ind. Lamp	10 Amps 5 Amps 3 Amps	10 Amps 2 Amps —

PRINCIPLE OF OPERATION

The LICON® Type 01 Series comprises a removable lens cap and a switch-lamp socket assembly. For greater reliability, the lamp socket remains stationary when the pushbutton is actuated. The basic switch is the LICON Type 16 subminiature double-break long life switch rated up to 10 amps.

THE BASIC SWITCH

LICON® Type 01 Series are available in one and two pole switch units, as standard. Multipole units are available on special order. The LICON® Type 16 double-break switch is installed as the basic switch to provide long life and high electrical switching load. Standard contact arrangements are Form C (SPDT) and Form Z (SPDT, double-break), per pole.

CHARACTERISTICS

BASIC SWITCH: (APPLIES TO TYPE 16 ONLY)

LIFE: 20 million mechanical cycles, 100,000 electrical cycles at rated load, or 750,000 cycles at 1/2 rated load.

TRANSFER TIME: 4 millisecond, including 1 millisecond of bounce discernible bounces), nominal.

VIBRATION: No contact chatter at 25 G's, 10 to 2000 cps.

SHOCK: Designed to meet MIL-S-901A high shock requirements.

CASE MATERIAL: Phenolic as standard (−65° to 275° F ambient). Diallyl as hi-temp (−65° to 400° F ambient).

THE LENS CAP

LENS CAP: The lens cap serves as indicator screen and pushbutton on all manually operated LICON® Type 01 switches. Positive lens cap positioning and orientation is insured by snap on, snap-off fastener and keying tab. The tough plastic lens caps may be engraved with any legend as outlined in: Engraving Information.

LAMP SOCKET: The lamp socket is located high in the plunger to enable lamp servicing without tools. Screw base, groove base or flange base T-1 1/4 lamp sockets are offered as standard.

DISPLAY: Wide selection of lens cap shapes, sizes, and colors are available. Standard lens cap styles are available in white, red, green, blue, and yellow. Special sizes and colors can be produced to order. The 3/8", 1/2" and 1 1/8" dia. round lens cap are designed to meet MIL-S-22885 requirements. Choose from two methods of illuminated display.

Solid Color: Opaque solid colored lens cap, where color is illuminated with brilliant hue. Solid color visible in unlit condition.

Projected Color: White frosted lens cap, where screen is illuminated with hue projected thru a permanently fixed color filter. Color not visible in unlit condition.

illuminated pushbutton switches

TYPE 01

MOMENTARY CONTACT

pushbutton to actuate switches. Release pushbutton and switch resets immediately. Positive feel of switches being actuated is provided to meet specifications set by Human Factors Engineers. Switching and timing functions may be kept separate on all models. Switches are serviced from front panel. Momentary contact switches are used to turn on a piece of equipment for test-to-test functions or to set up stages for further testing.

3/32 BUSHING

illuminated pushbutton switches

TYPE

INDICATOR - ONLY

Indicator-Only units are designed to complement the LICON® Type 01 indicator-switch units to provide identical panel appearance. Operating button cannot be depressed. Lamps are serviced from front of panel.

LAMP SOCKET TYPES

DIVISION ILLINOIS TOOL WORKS INC.

01-375 SERIES SLIDE BASE ONE-LITE PUSHBUTTON SWITCHES

The LICON® Type 01-375 Series is similar in appearance, characteristics, and circuitry to the regular 01 Series. The main difference, however, is that it will operate with the increasingly popular slide-base lamps. Slide base lamps are noted for their extremely long life, high light output, and high reliability. An average life of 5000 hours is common. The LICON® Type 01-375 is $\frac{5}{16}$ " bushing mounted and will accept the Type 01-9XX lens caps.

IP INFORMATION

LICON® Type 01 Series uses one T-1 $\frac{3}{4}$ screw, groove, or flange incandescent lamp. Flange base lamps are available in $\frac{5}{16}$ " - 24 thread models only.

Lamps are not included in the switch part number or price and are not supplied with the unit unless specified. For your convenience, LICON® lists lamps in limited quantities.

ENGRAVING INFORMATION

LICON® Type 01 Series lens caps can be permanently engraved on exterior of screen, in New Gothic extra condensed, black or white filled. Engraving is available in .106 to .300 inches high characters. It is recommended that the type height be $\frac{1}{16}$ inch (approximately 9 pts.) minimum. Abbreviations should be in accord with MIL-STD-12 for standardization. Contact factory for layout suggestions and prices.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

low-cost one-lite push-button switches

TYPE 01-

This low cost momentary one-lite switch combines the long life Type 16 double-break switch and the lamp base in one plastic housing. The 01-700 Series retains the stationary bulb feature of the standard 01's, but the housing is a one piece Lexan molding incorporating two Type 16 switches. Available with cylindrical translucent lens caps or regular 01 Series square and round caps. Regular 01 Series cap 01-9XX are listed in Type 01 section. Caps are ordered with a standard white converter, see coding below. Panel or sub-panel pal nut mounting.

The same front-of-panel bulb replacement feature, the same positive feel and the same high quality light diffusion make this lower cost unit a fine complement to LICON®'s complete line of one-lites.

*Note that 01-700 Series is available in unlighted version.
Refer to Type 16 section.

CIRCUITRY

One and two pole momentary switch configuration plus compatible indicator only styles provide a wide range of control possibilities. Each switch SPDT-DB (Form Z) contact arrangement, rate 10 Amps. Popular T 1¾ screw base lamp socket standard.

Minimum expected basic switch life is 100,000 cycles at full rated load; 750,000 cycles at one-half rated load.

MOMENTARY ACTION PUSHBUTTON

The Round and Square lens cap series of low cost one lite must be ordered with converter only. Converter is extended plunger with lens cap attachment. This switch is ideal for panel applications where space, low cost and appearance are factors. Front-of-panel bulb replacement. Uses standard 01-91 and 01-83 series lens caps as shown in Type 01 section.

BEZEL ADAPTOR

The bezel adaptor accessory provides quality panel appearance with polished aluminum face. Lens cap protrusion is adjustable. For cylindrical caps only. Front-of-panel bulb replacement.

Part No. 70-2150 (Bezel Only)

ALTERNATE ACTION PUSHBUTTON

The alternate action low cost one light mate with the 01-700 series, comes in tubular lens cap or with Plunger converter for square and round caps. Uses standard 01-91 and 01-93 series lens caps as shown in Type 01 section.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

snap-in illuminated pushbutton switch

TYPE 01-800

single-lamp indicator/pushbutton switch is designed to provide the ultimate in function and appearance. Combination bezel-barrier enhances panel appearance and eliminates mis-actuation. Choice of five screen colors and solid or projected color illumination. Engraved and black filled legends available.

INSTALLATION

Installation from front of panel with no tools saves time. Back-of-panel protrusion only 1.81 inches for momentary style; 2.25 inches for maintained action style. The 01-800 series is designed for panels $\frac{1}{8}$ inch thick, as standard.

CHOICE OF CIRCUITRY

Two, three and four pole, momentary or maintained (push "on," "off") switch configurations plus compatible indicator-only units provide wide range of control possibilities. Each switch SPDT-Form Z contact arrangement, rated 10 amps. Separate lamp terminals for a wide variety of indicating functions. Popular T-1 $\frac{1}{4}$ base lamp socket standard.

CHARACTERISTICS

	Momentary	Maintained
Acting Force	18 oz. max.	96 oz. max.
Travel	.093 max.	.187 max.
Rebound	.012 max.	.005 min.

ILLUMINATION

Projected Color—White translucent screen where screen is illuminated hue projected thru a permanently fixed color filter. Color not visible in unlit condition.

Solid Color—Translucent solid colored screen where color is illuminated brilliant hue. Solid color visible in unlit condition.

SPDT SWITCH: LICON Type 01-800 series are available in one and two switch units, as standard. Multi-pole units are available on special order. The LICON Type 16 double-break switch is installed as the basic switch to provide long life and high electrical switching load. Standard contact arrangements are Form C (SPDT) and Form Z (SPDT, double-break), per pole.

STAMPING

In cases where $\frac{1}{8}$ inch characters are specified, LICON® will provide legends with hot stamping unless notified otherwise at the time of order. Available as standard type is $\frac{1}{16}$ inch extra condensed News type characters. Contact factory for any exceptions such as larger let-symbols, concave or convex stamping, etc. Hot stamping colors available in black, red, and white.

ENGRAVING CHARACTERISTICS

square four lite illuminated pushbutton switches

TYPE 04

 DESIGNED TO MEET REQUIREMENTS OF
MIL-S-22885/72

FLANGE MOUNT

BARRIER MOUNT

BEZEL

BEZEL BARRIER

EL MOUNTING VERSATILITY

LICON® offers a complete line of square four lite switches. A mounting style for every need and the convenience of LICON's front-of-panel bulb replacement and snap-on modules the problems of service, appearance and utility are appeased.

The mounting styles vary as the light modules and snap-on switch modules fit all four styles. Lamps, engraving or hot-stamping, electrical ratings, operating and physical characteristics are identical.

Three different panel appearances in 3 mounting styles are offered in this series. Flush panel appearance with flange mounting, the plastic barrier with screw mounting, and the added bezel and bezel barriers with front-of-panel push-in mounting. All units are designed for panel thickness up to 1/8" thick and for panel cutouts .890" square except the plastic barrier mounting which is .890" x 1.265" and push-in is .890" x 1.000". Terminal extenders, insert legends and solenoid modules are offered with all four styles.

INDICATING FUNCTION

Four miniature incandescent bulbs, housed in the indicator module, project their light through color filters onto the 04's display screen. Two bulbs, located in opposite quadrants, are normally used to project a single color on the screen, but a different color may be displayed in each quadrant of the screen if desired. The color, color pattern or legend appearing on the display screen gives the operator an instantaneous indication of conditions in monitored circuits or equipment. It is recommended that the number of lamps for indication be limited to four.

ACTUATING FUNCTION

The display screen, when pushed, actuates one or more subminiature switches. Each switch controls a single circuit or a combination of isolated circuits. Actuation force passes directly through the center of the light module and does not move the indicator bulbs.

Actuating and indicating functions may be kept separate. 04 switches are also available without switches as indicators only.

ILLUMINATED DISPLAY

The color display meets all Human Factors Engineering standards for intensity and evenness of color distribution, even under conditions of high ambient light. No "hot spots" of color, darkened corners, no light leakage at the edges of the screen. The 3/4" square shape of the display screen is ideal for vertical or horizontal ganging of the 04 units and is large enough for optimum readability of engraved legends or symbols.

SIMPLIFIES CONTROL DESIGN

The 04 Indicator/switch replaces conventional systems of separate panel lights and pushbutton or toggle switches. A single 04 unit can replace up to four separate panel lights and four toggle switches in as little as one fourth the panel surface area. This single component ends panel congestion, cuts installation and wiring time in half. Operator response time is considerably reduced where 04 switches are used since there is no need to relate a signal light to a separate switch.

COMPACTNESS

The extremely short length of the 04 Series results in substantial "behind-the-panel" space savings over conventional four bulb units.

SWITCH VERSATILITY AND CAPACITY

The Licon Type 16 switches used in the 04 series are rated 10 Amps @ 28 VDC and 125/250 VAC for single circuit control . . . twice the capacity of conventional subminiatures. The double break principle also allows control of two independent circuits. The double circuit rating of basic Type 16's is 5 Amps, 28 VDC, 10 Amps, 250 VAC. Switch circuitry choices include SPDT, SPNC, and SPNO in one through four poles. Special 04 indicator/switches may contain as many as five or six basic switches.

DISPLAY VERSATILITY

The 04's illuminated display may be projected through color filters to a translucent white screen, or translucent red, green, blue, or yellow screens. These colored screens do not require internal filters for display and are used in control systems where the indicating signal is either "color-on" (lit) or "color-off" (unlit).

Split screens, i.e. one color on half the surface, a different color on the other half, are available in both display methods. Screens split vertically or horizontally show no color bleed at the divider, or light leakage at the edges.

Legend or symbols may be engraved on all screen styles. A special capped screen for inserting or changing legends "on the job" is also available.

EASY BULB SERVICING

Licon's 04 Series features replacement of light bulbs from the front of the panel without special tools or skills. The light module containing display screen, color filters, and miniature bulbs is easily removable intact from the indicator housing by inserting a pointed object, or finger nail, under the small tabs. Lamp bulbs may then be changed without disturbing screen, filters, or wiring, and the complete light module slipped back in the housing.

A standard key slot assures proper repositioning of the module. Special key slot locations will allow the fool-proof matching of up to 455 combinations of light modules to individual housings.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

TYPE 04

product features

LAMP INFORMATION

The Licon® Type 04 Series lighted pushbutton switches use four T-1 ¼, flange base incandescent lamps in each light module. Lamps are not supplied with the unit, unless specified. Refer to lamp information in Type 01 section for details. The total lamp wattage should not exceed 2.5 watts. (2 bulbs at rated voltage or 4 bulbs at 2/3 rated voltage.)

ENGRAVING INFORMATION

Permanent, black or white filled engraving on solid screen styles is available in extra condensed News Gothic type. Engraving is available in .106" to .300" high characters. It is recommended that the type height be ⅛" (approx. 9 pts.) minimum. Abbreviations should be in accord with MIL-STD-12. The following table shows typical variations of engraving characteristics.

Height of Character	Max. Char./Line (Nominal)	Max. No. Lines
⅛	8	4
⅜	5	2
¼	3	2

Contact factory for prices and layout suggestions.

ELECTRICAL RATING (Applies to Type 16 Basic Switch)

U.L. Listed—10 Amps @ 125/250 VAC
28 VDC L/R = .026

		SEA LEVEL	60,000 Feet
Form X or Y Single Circuit	Res.	10 Amps	10 Amps
	Ind.	7.5 Amps	3.5 Amps
	Lamp	4 Amps	—
Form Z Two Circuit	Res.	10 Amps	10 Amps
	Ind.	5 Amps	2 Amps
	Lamp	3 Amps	—

Minimum expected basic switch life is 100,000 cycles at full rated load; 750,000 cycles at one-half rated load.

CHARACTERISTICS

Operating Force	1 - 2 Poles 3 - 4 Poles	Momentary 60 oz. max. 75 oz. max.	Maintained 96 oz. max. 96 oz. max.
Pretravel		.125 ± .060	.125 ± .060
Overtravel		.12 min.	.005 min.
Movement Diff.		.020 ± .010	

FLANGE MOUNTING

Flange mounted Type 04 units may be bolted to panels up to ⅝" thick. Usually used in sub-panel mounting applications. Matrix type is mounted with standard flanges.

INDIVIDUAL MOUNTING

MATRIX MOUNTING

BARRIER MOUNTING

Licon's unique barrier design permits the removal of one or more switches without disturbing neighboring units. Acts as safety separators between ganged switches. Adds quality appearance.

Aluminum matrix barriers use standard barrier mounting clips and screws.

INDIVIDUAL MOUNTING

MATRIX MOUNTING

HOT STAMPING

In all cases where ⅛" characters specified, LICON® will provide with hot stamping unless notified otherwise at the time of order placed. Available as standard type is ⅛" condensed News Gothic characters. Contact factory for any exceptions such as large letters, symbols, concave or vex stamping, etc. Hot stamping is available in black, red, and white.

FOUR DISPLAY SCREEN STYLE

Full, vertically split, horizontally and quad split screens are shown below. Designated desired filter colors by quantities in sequence shown.

Example: Vertically split, green at red at right—order GRRG.

INSERTABLE LEGENDS

For applications requiring frequent end changes, or "on-the-job" revision, insertable legend modules are recommended. Print or letter legend on acetate, mylar, etc. Place legend on screen surface. Snap on clear plastic screen cover.

TERMINAL EXTENDERS

For closely ganged Type 04 switch terminal extenders simplify wiring placing bulb and switch terminals in same plane. Leads from bulb terminals are completely insulated. Terminal extenders are available with all switch modules. Not available with solenoid held units.

square four lite illuminated
pushbutton switches

TYPE 04

Solenoid Held 04's

Operator actuates switches. Switches remain actuated while the solenoid coil is energized from a separate station. Switches reset when de-energized. Switch action is momentary when coil is not energized. Standard coil voltages are 6 VDC and 28 VDC. Coil cannot accidentally actuate switches.

Indicators

Indicators offer four bulb re-
placement, full range of colors and
display screen styles. The dis-
play screen cannot be depressed,
the module is replaced with a
plastic plug. Indicator-only
units are identical to Indicator/
switch units when viewed from
the front.

04 Indicator/Switches

Both momentary and maintained
contact switch actions are avail-
able. In momentary contact units,
switches reset when the de-
pressed display screen is re-
leased. Maintained contact units
require one push to actuate
switches, a second push to re-
set. Positive feel is standard on
both switch actions, meeting
standards set by Human Factors
Engineers.

EXTRUDED
BEZEL

Push-in mounted four lite illuminated
pushbutton switch with a one piece ex-
truded aluminum housing. This unit
provides the maximum in front-of-panel
appearance with flat bezel. Simple
push-in mounting and front-of-panel
bulb service make this a desirable unit.
Available in Black or Clear anodized
aluminum as standard.

Panel cutout 1.000" (across Latches) x .890"
Add 1.035" for each additional Switch.

	"A" dim.	"B" dim.
Momentary action	2 7/8 max.	1 1/4
Maintained action	3 3/8 max.	1 3/2

EXTRUDED BEZEL
BARRIER

Mate to the flat bezel is extruded bezel
barrier which gives fine panel appear-
ance while providing protection against
accidental actuation. Same push-in
mounting, bulb replacement, and switch
modules. Available in Black or Clear
anodized aluminum as standard.

Panel cutout 1.000" (across Latches) x .890"
Add 1.035" for each additional Switch.

	"A" dim.	"B" dim.
Momentary action	2 7/8 max.	1 1/4
Maintained action	3 3/8 max.	1 3/2

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

square four lite illuminated pushbutton switches

TYPE 04

SOME POINTS TO CONSIDER WHEN ORDERING A LIGHTED SWITCH

• **INVISIBLE LEGENDS** (i.e. Legend visible only when lamps are energized) are becoming popular for usage in airborne equipment. LICON® produces this special style of display with a button face that is black — the legend lights up against the black background in the color that is projected from filters located between the button face and the lamp.

• The panel should be of a matte, non reflecting finish to reduce glare and improve contrast.

• The ambient light plays an important part in console design. Lower ambient light improves contrast and increases monitoring interpretation.

• The individual Lighted Pushbutton switch should be specified to use the same lamp to reduce stocking problems for spare parts.

• The system should be designed to include a master lamp tester to determine burned out lamps before the system is activated.

• The panel should be designed with consistency in color coding, layout, hardware, lettering, etc.

ORDERING INFORMATION FOR TYPE 04 LIGHTED SWITCHES, INDICATORS OR COMPONENTS

Licon Type 04 lighted pushbutton switches can be ordered as completely assembled units, indicator only or components can be ordered separately. Please refer to order guide below, then follow step by step procedure outlined, to determine correct part number for ordering. On matrix mounted assemblies consult factory.

TO ORDER COMPLETE SWITCH...

Refer to charts below and select proper code numbers following the step by step procedure to determine correct part number.

STEP 1	STEP 2A	STEP 3A	STEP 4	STEP 5	STEP 3B
04-5 Prefix	Select Housing Code from Chart I	Select Light Module Code from Chart II	Select Switch Module Code from Chart III	Select Solenoid Module (if required)	Select Filter Colors By Quadrant

ORDERING GUIDE

Item	Consists of	Follow Steps
Complete Switch	Housing, Light Module, Switch Module, Solenoid Module*	1, 2A, 3A, 3B, 4, 5
Indicator	Housing, Light Module	1, 2A, 3A, 3B
Individual Components Only	—	1, 2B

*Note: If required, order individual barrier mount hardware separately. Barriers are not included in switch or indicator part number.

TO ORDER INDICATOR ONLY...

Refer to Charts I and II below for proper code numbers following step by step procedure to determine correct part number.

STEP 1	STEP 2A	STEP 3A	STEP 3B
04-5 Use Prefix Above	Select Housing Code from Chart I	Select Light Module Code from Chart II	Select Filter Colors By Quadrant

STEP 1 (P/N Prefix)—Select proper part prefix code.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

sealed illuminated pushbutton switches

TYPE 44

New round four lamp pushbutton switch designed to conserve panel space by combining one to four color indication with multipole switch control, all in one package. Available with panel seal feature providing a splashproof seal at panel. Unmatched display intensity, reliability and electrical capacity enable the type 44 series to meet and surpass the most rigid commercial and military job requirements.

CONTROL VERSATILITY

Indicating Function: Four miniature incandescent bulbs, housed in the light module, project their light through color filters or colored screen. Normally, two bulbs, located in opposite quadrants, are used to project a single color on the screen, but a different color may be displayed in each quadrant of the screen, if desired. The color, color pattern, or engraved legend appearing on the display screen gives the operator an instantaneous indication of conditions in monitored circuits or equipment.

Switching Function: When pushed, the display screen actuates one or more subminiature switches. Each double-break switch controls a single circuit or a pair of isolated circuits. Actuation force passes directly through the center of the light module, thereby allowing the bulbs to remain stationary to effect longer bulb life. Type 44 illuminated pushbutton switches are available as standards in one and two pole momentary or maintained (push "on", push "off") contact arrangements, solenoid held styles, and also in compatible indicator-only styles to match indicator-switch styles.

Switching and indicating functions may be combined or kept separate. In addition, two isolated commons are provided on the light module to increase the variety of indicating functions desired. Solenoid hold down units can be energized either at the switch or remotely, but will not operate basic switches.

EASY MOUNTING

Clamp-on mounting from front of panel provides positive positioning of the type 44. Tighten two screws located in housing from front of panel and the unit is ready for wiring. Design for panels 1/4 thru 1/2 inch thick, as standard.

For individual mounting, punch out holes 1.140 in. diameter. To save time and effort, prewire snap-on switch modules and install after housing is mounted in panel.

EASY LAMP SERVICING

Pull light module straight out from panel without special tools and service lamps with fingers. Snap light module in place. Accepts four T 1 1/4 size flange base lamps.

ILLUMINATION

Projected Color — White translucent screen where screen is illuminated with hue projected thru a permanently fixed color filter. Color not visible in unit condition.

Solid Color — Translucent solid colored screen where color is illuminated with brilliant hue. Solid color visible in unit condition.

Basic Switch: LICON type 44 illuminated switches are available in one and two pole switch units, as standard. Multipole units are available on special order. The basic switch used is the LICON type 16 double-break switch to provide long life and high electrical switching capability. Standard contact arrangements are Form C (SPDT) and Form Z (SPDT, double-break) per pole.

ELECTRICAL RATING

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

aircraft toggle switches

TYPE

The LICON Type 51 heavy duty toggle switch is designed to meet the sealed switch requirements of MIL-S-3950. The Type 51's are designed to meet military approvals MS24523, for the one pole version; MS24524, for the two pole version; and MS24525, for the four pole version. The Type 51's are designed and constructed for use in heavy duty industrial and aircraft applications.

For sealing, a molded silicone rubber seal is bonded around the toggle lever and to the inside of the bushing. A diallyl phthalate case assures dependable operation in a temperature range of -85° to $+250^{\circ}$ F. The Type 51 is designed with contacts that are larger than competitive units for higher load capacities and better heat dissipation.

For special applications or test data, contact the factory.

DIVISION ILLINOIS TOOL WORKS INC.

**hermetically
sealed switches****TYPE 62**

LICON® Type 62 Series is a hermetically sealed environment-free snap-action switch with maximum leak rate of 1×10^{-8} sec. The Series is designed to perform limit switch functions in hydraulic fluids, moisture, and other contaminating environments.

hermetically sealed sub-assembly composed of a metal bellows, welded to a glass terminal head, evacuated, and back filled with inert gas, is installed in a welded one-piece housing.

MOUNTING

Two models offer either bushing mounting or hex-nut coupling. Two corrosion-resistant hex nuts, one keyway washer, and one internal-tooth lockwasher are furnished with each mounting model. The hex-nut coupling has a wire lock provision.

BUSHING MOUNTING

Designed for rugged duty, the type 62-20025 hermetically sealed switch is bushing mounted, for actuation. Other circuitries are available.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

environment-free sealed switches

TYPE

The LICON® Type 63 Series is a environment-free resilient sealed limit switch designed for rugged duty and to conform to the rigid specifications of military standard designs. A one piece housing with ring seals at the plunger and hermetic header at terminal base, provide the true environment-free sealing to comply with immersion requirements of MIL-E-5272, Procedure I.

The Type 63 Series may be used in ambient temperature ranges of -65° to $+185^{\circ}$ F. An ice scraper ring and wiper at plunger insure low temperature performance.

MOUNTING

The Type 63 Series is bushing mounted. Two corrosion resistant hex-nuts, one keyway washer, and one internal-tooth lock-washer, are furnished with each switch to provide positive, non-turn mounting. Roller plunger models with adjustable roller orientation have a positive locking nut in addition to the standard hardware.

TERMINATIONS

The Type 63 Series is available with side or bottom receptacle or plug connectors, wire leads with stripped and tinned ends, or wire leads with receptacle or plug connectors. Wire leads are potted at base of switch unit for insulation and strain relief and are marked with circuit designations.

ROTARY LINKAGE

Featuring the LICON one piece machined aluminum housing for lighter weight and rugged use, the Type 63 rotary linkage lever models are designed to meet MS-24420 specifications. All models incorporate the exclusive LICON® Butterfly® basic switch design for longer life, higher current carrying capacity, and greater circuit versatility.

OPERATING CHARACTERISTICS

Inrush	24 amps

ACTUATORS

The Type 63 Series is available in four actuator styles:

Plunger Actuator: —For inline actuation.

Roller Plunger: —For cam or slide actuation with
than 20° rise.

Rotary Roller Lever: —For cam or slide actuation with more than 30° rise.

Rotary Linkage Lever:—For applications where actual device attaches directly to actuator rod of switch.

BASIC SWITCH

The Type 63 Series employ LICON basic double break switches. Models are available with Type 16 and Type 17 subminiature Form C or Form Z contact arrangements. Type II single pole and Type 22 double pole switches. Type switch ratings are shown below.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

environment-free subminiature sealed switch

TYPE

TYPE 65

Licon's Type 65 Series offers dependable, environment-free snap-action switching with ratings up to 10 Amps, 30 VDC. Type 65's conserve your design space, and deliver the ruggedness and reliability to meet the demands of all industrial and military applications.

The Type 65 consists of a basic Licon® Type 16 subminiature switch enclosed in a seamless, corrosion resistant aluminum housing. A positive "O" ring plunger seal plus epoxy terminal potting provides protection against dust, moisture, oil spray, and corrosive atmospheres. Type 65's meet the immersion requirements of MIL-E-5272 Procedure I. The basic snap action switches conform to military specifications. "O" ring plunger sealing plus an ice scraper ring on the stainless steel plunger assures trouble-free actuation at high altitudes.

VERSATILITY

A wide choice of circuitry, actuators, and mounting methods adapt Type 65's for all types of demanding jobs. Solder, quick-disconnect, and screw terminals, plus potted leads, may be ordered from the Type 65 standard part code. Consult the factory for special requirements in terminals, actuators, or basic switches, including multi-pole configurations.

DURABILITY

Housing and bushing are made of a single piece of aluminum. #4-40 mounting holes pass through solid aluminum case housing, not through the basic switch. This design eliminates the danger of cracking the plastic case of the enclosed switch through rough installation or actuation.

Rugged integral actuators, installed and adjusted at the tory, insure exacting repeatability.

ELECTRICAL RATING

DIVISION ILLINOIS TOOL WORKS INC.

metal enclosed industrial limit switches

TYPE 30

LICON® Type 30 switches feature accurate repeatability, long life and pre-electrical control for limit, safety interlock operations. Advanced design provides durable switch protection, multiple mounting and actuating ability that exceeds the average requirements. The Type 30 is available in Type 10, Type 11, and Type 22 switches.

**Split-Diecast
Easy Wire Type 30
Flange or
Side Mounting
Available**

Switch is accessible for wiring or replacement by removing the bottom plate without disturbance to the actuator. Three mounting methods are provided with each switch package. The single-pole, double-throw basic switch can be wired for normally-open or normally-closed operation.

Ref. Dim. A—Recommended side mounting, two No. 10 screws.

Ref. Dim. B—Flange mounting, two No. 8 screws (extra base plate provided with each package).

Ref. Dim. C—Alternate side mounting.* This method is for interchangeable mounting with other switches, but not recommended for best service. To mount, remove factory installed switch screws and replace with No. 6 through screws.

*Alternate mounting available with Type 10 basics only.

SEALED SWITCHES FOR GENERAL PURPOSE APPLICATIONS

100 OVERTRAVEL PLUNGER SWITCH

General purpose limit or push button switch for limit controls of heavy duty applications. The overtravel plunger provides added switch protection and also permits greater flexibility of location. Since these switches are not sealed, they are recommended to be used for applications where environment is not a troublesome factor.

Basic Switch 10-322

Operating Force	10 oz. ± 4 oz.
Release Force	3 oz. min.
Travel	.030 max.
Overtravel	.219 min.
Movement Differential	.002 max.

300 ROLLER ARM SWITCH

Identical to the dependable performance of the 100 switch. These switches are not sealed, however, and must be used in applications where environment is not a factor. Excellent for both slow and fast moving cams and slides. It is horizontally adjusted, in the field, to accept actuation from eight positions. It is vertically adjusted for desired actuating thru 225°.

Basic Switch 10-322

Operating Force	10-18 oz.
Release Force	6 oz. min.
Travel	.141 max.
Overtravel	.219 min.
Movement Differential	.006 max.

500 ROLLER PLUNGER SWITCH

Designed for horizontal actuation by cams and slides, 360° horizontal actuator adjustment permits direct and cross-roller switch actuation. Rugged construction, and outstanding features provide dependable service for heavy duty use. To adjust actuator, loosen nut and rotate roller to desired position. Tighten nut to secure actuator in place. Available in sealed construction as 30-700.

Basic Switch 10-122

Operating Force	10 oz. ± 4 oz.
Release Force	4 oz. min.
Travel	.015 max.
Overtravel	.140 min.
Movement Differential	.002 max.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

metal enclosed industrial limit switches

TYPE 3

SEALED SWITCHES FOR TROUBLE-FREE ENVIRONMENT APPLICATIONS

30-200 SEALED PLUNGER SWITCH

This sealed switch is excellent for applications using direct line motion actuation. In addition to standard mounting methods, the 30-200 switches can be panel mounted by the 3/4"-18 threaded actuator bushing. Overtravel plunger provides additional application flexibility.

Uses Basic Switch 10-122

Operating Force10 oz. $\pm$ 4 oz.
Release Force3 oz. min.
Pretravel0.030 max.
Overtravel219 min.
Movement Differential002 max.

30-400 SEALED ROLLER ARM SWITCH

Sealed by the exclusive LICON method against normal industrial environment, these switches are ideal for both slow and fast moving cams and slides. The actuator is horizontally adjusted, in the field, to accept actuation from eight positions. It is vertically set for desired actuating positions thru 225°.

Uses Basic Switch 10-122.

Operating Force10-20 oz.
Release Force6 oz. min.
Pretravel172 max.
Overtravel219 min.
Movement Differential006 max.

30-600 SEALED PALM BUTTON SWITCH

This switch is designed for efficiency and ease of manual operation. It is primarily used as a start, stop and safety switch. The large actuating button provides convenient electrical control and is adjustable both vertically and horizontally.

Uses Basic Switch 10-122

Operating Force10-20 oz.
Release Force6 oz. min.

TERMINAL ENCLOSURE

Die cast terminal enclosure to protect type 10 basic switches in hostile environments, provide a rigid mounting either by side mounting or alternate base mounting. The type 30-030 enclosure part number does not include the basic switch. Normally used with cam actuated type 10 basic switches. See "Type 10 - General Purpose Switch" catalog section for ordering information.

TYPE 30-030

For easy installation—
Direct switch to outlet type 30.

P/W 30-730005

Available in other configurations—
consult factory.

ACTUATOR ACCESSORIES

Adjustable 73-1900 actuator permits on-the-job vertical positioning of roller arm through 225°. To adjust, loosen captive screw until internal spring releases lock mechanism. Move roller arm to proper position and tighten screw. Taper lock assures secure positioning of arm. Actuation force tends to tighten lock under operating conditions. Available as 73-1910 with palm button, and 73-1920 one-way roller actuator.

LICON®

DIVISION ILLINOIS TOOL WORKS INC.

solid state proximity switch

TYPE 70-700

The 70-700 Series consists of two basic modules, a control module and a remote potted sensor. The control module contains a 10 amp relay, a transistor oscillator, switch, and power supply, housed in a plastic plug-in case which mates with a terminal heavy duty JIC style socket (supplied). A NEMA Class I metal enclosure is also available for housing both the control module and heavy duty socket. During operation the transistor oscillator sends a radio frequency signal (200Khz) to the remote sensor, which consists of a potted coil in a ferrite core, and develops an RF field directly in front of the sensor. When a conducting material (ferrous or non-ferrous) brought into the RF field at the face of the sensor changes the sensor impedance which reflects as a load change on the control module and triggers the output circuit (relay). This makes possible a highly precise remote control system sensitive to electrically conductive materials without any actual physical contact.

ELECTRICAL RATINGS

Nominal input power requirement is 115V, 60 cycles A.C. with 0.05 amp current draw. Output relay is DPDT, rated 10 amps per contact at 250 VAC.

SPECIFICATIONS

Accuracy — The circuit will actuate, at a given sensor to conductor spacing, within 0.0005".

Sensing Range — For the .750" diameter sensor .110" min. — .261" max.; and for the .440" diameter sensor .048" min. — .148" max.

Speed — Up to 1000 operations per minute possible.

Ambient Temperature Ranges —30° to +250°F for the remote sensor, 0° to +150°F for the control module.

rotary selector switches

TYPE

LICON's Type 45 meets the latest standards for environment-free rotary switches. They are subminiature in size ($\frac{1}{2}$ " diameter by $\frac{7}{16}$ " length) yet they offer a continuous 2 Amp, 30 VDC, 250 VAC rating, thus ideally suited for critical space/weight/function application limitations.

A double-ball spring balanced detent mechanism assures positive feel and positioning in the Type 45 Rotary. Standard models include single pole, ten position; and double pole, five position styles with 360 degree rotation or stops as required. Switch case and input shaft is made of stainless steel, and the Type 45's are explosion proof. A unique seal ring on the input shaft plus epoxy terminal potting enables the Type 45 to meet MIL-E-5272 Procedure I immersion requirements. In addition, $\frac{1}{32}$ " solid silver pin terminals allow Type 45 switches to be mounted directly on printed circuit boards.

The Type 45 is readily adaptable for application in missiles, aircraft, underwater communications equipment. It has been tested and has met rigid standards for temperature, humidity, corrosion, vibration, acceleration, and shock.

SUBMINIATURE PICO FUSES
For computer, micro-electronic and aerospace circuits of 125 V or less where short-circuit currents as high as 300 amps occur. High accuracy in blowing time at 300% of rating and higher is ideal for sequential switching or in circuits requiring redundancy. Blow time 4 hours min. at 100% of rating; 5 secs. max. at 200%. Amperage printed on body; can be color-coded at additional cost. Ceramic body only 1/4" lg. x 3/16" dia.; tin-coated copper leads .025" dia. Order 275 (prefix) for axial leads 1 1/2" long for diode clip or in-circuit mounting; 276 for radial leads 1 1/2" long for use in printed circuits or receptacles. *Avg., cold.

MICROFUSE SUBMINIATURE FUSES

For printed circuits and other minimum space uses. Ultra-fast blowing. Plug-in types use holder (listed on another page); pigtail types for soldering. Short circuit interrupting capacity 125 V, 10,000 amps DC. **Blow Specs:** 100%, 4-hour min.; 200%, 5-sec. max. **Size:** 1/4" dia. x 1 1/2" (fuse body). Plug-in, transparent cap type listed. Use prefix 272 for plug-in, metal cap; prefix 279 for pigtail, transparent cap; prefix 278 for pigtail, metal cap.

HIGH RELIABILITY MICROFUSES

For zero defect programs. Hermetically sealed; gold-plated terminals for soldered or plug-in connections. Fuse rating identified on each fuse. Test data and traceability records are supplied and maintained. Proven performance in the Gemini "critical parts" manned space program. Voltage rating 125 V, blow time same as 273 series; time/current characteristics certified to 1% AQL per MIL-Std-105, Inspection Level II. Short circuit interrupting capacity at 125 V, 10,000 amps DC. **Size:** Fuse cap and body, .290" lg., leads for 262 "plug-in" series, .170". Pigtail on 268 series 1.0". Use prefix 268 for pigtail type (e.g., 268.002).

HIGH RELIABILITY PICO FUSES

For soldering into circuits or insertion into diode type clips and mtgs. Fuses rated at 125 V or less and will interrupt short circuit currents to 300 amps at 125 VDC. Non-hygroscopic ceramic bodies. Withstands 5-lb. axial pull test. Blow time 4 hours min., 100% rating; 5 secs. max., 200% rating. Insulation resistance is 1 meg min. measured with 100 V supply. **Size:** Body 3/4" lg., .078" dia. Leads are .025" dia., 1 1/4" lg., gold-plated copper.

HIGH VOLTAGE FUSES

Designed for use in aircraft radio equipment, transmitting equipment, X-ray apparatus, high voltage rectifiers, etc., for circuits up to 20 kW DC or 30 kVA AC. Fuses are fiber enclosed with cadmium plated end caps. Two principles of arc suppression are employed: (1) Multi-break fuse wire which blows at each half inch of its length; (2) Ceramic baffles break the arc into several parts and quench it. Blow Time: 110%, 4-hour min.; 135%, 0-1 hour; 200% 0-2 minutes.

FUSE PULLER

ASSORTMENT

• Easy removal & Installation

Puller slips over glass body of fuse; metal slide collar holds fuse in locked position. Fuse may then be withdrawn or replaced with ease.

L.F. No. 094091—Net/Assortment.. \$12.00

UNIVERSAL AUTO FUSE ASSORTMENT

Emergency fuse kit with ten popular replacement fuses for any car.

Littelfuse No. 094092—Net per card of 20 \$18.75

FUSE CADDY

Standard fuse caddy for servicemen to carry in tube caddy. Fifteen compartments for 75 fuses; 3 spare compartments. See-thru plastic top for easy identification. Littelfuse No. 094037—Net Ea. \$10.24

LIMITED-CURRENT FUSE CADDY

Handy, all-inclusive limited-current fuse caddy complete with 75 fuses of 15 different types, 3 extra (spare) compartments. Littelfuse No. 094041—Net Each. \$13.60

FUSEMASTER DISPLAY

Fuse wall rack with 60 individual compartments for easy, instant self-service. Holds index card on back of rack. Ideal for servicemen, laboratories, etc.

Littelfuse No. 094047—Complete with 100 assorted fuses. Net Each. \$16.57

Littelfuse No. 094048—Empty rack. Net Each. \$1.10

FUSE HOLDERS, RETAINERS MICROFUSE HOLDERS

For mounting of 273000 Series Microfuse. Type 281002 is front panel mounting; 281001 ideal for printed circuit board mtg.; 284000 Series front panel mtg. with indicator bulb.

OHMITE power tap switches, high current, non-shorting type

Introducing

MODEL 711

Smallest Switch for Its Rating

Ohmite single pole, rotary, multi-position switches have proven their durability over many years in demanding applications. Such applications are found in switchboards, arc welders, spot welders, battery chargers, motor controls, tapped transformers, X-ray equipment, diathermy equipment, radio transmitters, electrical machine tools and many other products. Six sizes, including the new, miniature Model 711, provide a choice of ratings from 7 amperes at 125 volts to 100 amperes at 300 volts AC. A choice of the number of taps is provided up to the maximums indicated. All switches are enclosed except for the Models 711 and 111. All switches feature the slow-break, quick-make action deemed so desirable for switching of AC current.

The five sizes offering ratings from 15 amperes to 100 amperes (Models 111, 212, 312, 412 and 608) feature all ceramic, arc-proof bodies and solid silver alloy, fixed and movable contacts. The large, thick, silver-alloy fixed contact disks are permanently welded to copper studs. These, in turn, are riveted and soldered to sturdy terminal lugs, assuring a permanent mechanical and electrical joint. The rotor (moving) contact, also of solid silver-alloy, is riveted and soldered to the contact arm. Face of the rotor contact is slightly rounded assuring a perfect seating of the contacts with a slight rubbing, self-cleaning motion on every operation.

MODEL 711 TAP SWITCH

Alternating Current Rating **7 Amps. 125 Volts** — Diameter $1\frac{1}{8}$ " — Shaft Diameter $\frac{1}{4}$ " — Standard Mounting: For $\frac{1}{4}$ " panel maximum, by means of $\frac{3}{8}$ "-32 threaded bushing and hex. nut. See mounting illustration "A." Weight, single unit: .047 lb. approximately. Dual-purpose terminals accept $\frac{3}{16}$ " quick-connectors as well as soldering. Non-turn lug can be positioned at "12, 3, 6, and 9 o'clock."

TAP SWITCH MOUNTING DIMENSIONS

CERAMIC OPEN TYPE TAP SWITCHES

used to transfer currents of several amperes in circuits requiring high
 insulation. Ceramic body construction is the same as employed in
 J and K rheostats (see page 19). Monel metal taps; silver-graphite

SHORTING TYPE SWITCH: Moving contact bridges closely spaced taps
 letting a new circuit before breaking the previous one. Switch arm is
 indexed and can be left in any position.

NON-SHORTING SWITCH: Positively indexed, moving contact completely
 connects from one tap before contacting succeeding tap.

Switches up to 8 taps are approximately 3 $\frac{1}{4}$ " diameter including lugs;
 12 tap switches are approximately 4 $\frac{1}{4}$ " diameter. Switches can be
 assembled 2 or 3 in tandem. Single hole mounting by means of
 diameter bushing and hexagon nut accommodates panels up to $\frac{1}{4}$ "
 (maximum). The "non-turn" lug requires a $\frac{3}{8}$ " panel hole $\frac{1}{2}$ " below
 center of the shaft. Shaft diameter is $\frac{1}{4}$ ". Recommended knob,
 No. 5150, see page 20.

Maximum current capacity is 7 amperes but only 3 amperes at 120
 should be interrupted. Current ratings are less for all direct current
 circuits above 20 volts, for inductive circuits and high voltages.

SWITCH DIALS

Dials for Ohmite tap switches are made of alu-
 minum, etched and enameled black. Dial mark-
 ings are bright aluminum. The number of dial
 calibrations or position markings agree with the
 actual number of positions on the switch. Note,
 in the table, that dials for switches Models 212
 and 312 are available in two diameters to suit
 the recommended knob.

POTTER & BRUMFIELD PRECISION SWITCHES

PRECISION GENERAL PURPOSE SWITCHES—TYPES A1 G

Illustration Fig. Nos.—See back page for Drawing Fig. Nos.

PRECISION MINIATURE SWITCHES—TYPES A1 M

PRECISION SUBMINIATURE SWITCHES—TYPES A1 S

SPECIFICATIONS

PRECISION GENERAL PURPOSE SWITCHES—TYPES A1 G

Meet Underwriters' Laboratories and Canadian Standards Association Requirements

For Types A1 G1—Contact arrangement: SPDT. Ratings: 15 amps, 125, 250, or 480 volts AC; 1 amp 125 volts DC; ¼ amp 250 volts DC; ½ amp 125 volts AC; ¼ HP 250 volts AC.

For Types A1 G2—Contact arrangement: SPDT. Ratings: 20 amps, 125, 250, or 480 volts AC; 1 amp 125 volts AC; 2 HP 250 volts AC; 10 amps 125 volts AC when controlling tungsten filament lamp loads AC circuits.

PRECISION MINIATURE SWITCHES—TYPES A1 M

For Types A1 M1—Contact arrangements: SPDT. Ratings: 30 volts DC; inductive: 10 amps at sea level, 6 amps at 50,000 feet; resistive: 10 amps motor load: 6 amps.

Meet Underwriters' Laboratories requirements for 15 amps, 125, or 250 volts AC; ½ HP 125/250 volts AC; ½ amp 125 volts DC; ¼ amp 250 volts DC.

For Types A1 M2 (low operating force)—Contact arrangements: SPDT. Rating: 30 volts DC; inductive: 5 amps at sea level, 5 amps at 50,000 feet; resistive: 5 amps; motor load: 5 amps.

Meet Underwriters' Laboratories requirements for 10 amps, 125 or 250 volts AC; ½ amp 125 volts DC; ¼ amp 250 volts DC; ¼ HP 125 volts AC.

For Type A1 M4 (low differential)—Contact arrangement: SPDT. Ratings: 30 volts DC; inductive: 1 amp at sea level, 1 amp at 50,000 feet; resistive: 2 amps; motor load: 1 amp.

Meet Underwriters' Laboratories requirements for 10 amps, 125 or 250 volts AC.

For Type A1 M5 (gold contacts)—Contact arrangement: SPDT. Rating: 28 volts DC; inductive: 1 amp; resistive: 1 amp; inrush: 2 amps.

PRECISION SUBMINIATURE SWITCHES—TYPES A1 S

For Types A1 S1—Contact arrangement: SPDT. Rating:

Meet Underwriters' Laboratories requirements for 5 amps, 125 or 250 volts AC. The 30 volt DC rating is as follows: inductive: 3 amps at sea level and 2.5 amps at 50,000 feet; resistive: 5 amps at sea level and 50,000 feet; maximum inrush: 24 amps.

For Types A1 S5 (gold contacts)—Contact arrangement: SPDT. Rating: 28 volts DC; inductive: 1 amp; resistive: 1 amp; inrush: 2 amps.

DELIVERY

Delivery is often dependent on availability of raw materials. Check with your distributor for delivery information at the time you place your order.

SPECIFY

FOR REED AND MERCURY-WETTED PUSH BUTTON SWITCHES

FEATURES

Hermetically sealed contacts
Low contact resistance
Life expectancy in the millions
Momentary action

- **Low bounce characteristics**
- **Terminals weldable and solderable**
- **Ideal for dry circuits or higher current applications**

DEVELOPING THE STANDARD LINE

The complete line of GRI switches is the result of several years' work with a number of specialized applications. Requirements have demanded a great amount of development effort and the design of highly specialized production methods.

DESIGN VERSATILITY

GRI Push Button Switches are unique because their reed type contacts are actuated by a permanent magnet anchored to the actuating plunger. This leads to a number of outstanding performance characteristics which can open new doors in system design.

1. Contacts are sealed in inert gas and are isolated from all sources of environment.
2. GRI Switches lend themselves readily to circuit versatility. By using permanent magnets in coordination with many unique contact arrangements, many entire circuit functions are now performed.
3. On all multiple-pole switches, each pole is completely isolated.
4. GRI Switches can be mounted as close together as button centerline will allow.

GENERAL SPECIFICATIONS

ELECTRICAL	
Operating Temperature Range	DRY REED -55° to +150°C
Dielectric Strength	500 VAC
Insulation Resistance	100 Megohms
Contact Bounce	500 Microseconds maximum
Contact Resistance	200 Milliohms maximum
Life Expectancy	20 million operations at full load; 50 million operations at half load (Resistive Load at recommended VDC)

Each Pole Isolated

MECHANICAL	
Mounting Position	Any Plane; Except Series MV and MH
Switch Contact Atmosphere	Inert Gas
Internal Terminal Construction	Welded
External Switch Terminals	"A" Nickel Alloy, weldable or solderable

OPERATION

GRI Push Button Switches utilize magnetic lines of force as the only linkage between the mechanical actuation and the switch contacts. A permanent magnet attached to the plunger provides the force that closes the reed switch contacts, facilitating low push button pressure with high contact pressure.

The Reed Switch consists of two identical ferromagnetic reeds, sealed in a glass tube. When magnetic flux, from the permanent magnet, is sufficient, the reeds flex and make contact. When the magnetic influence is removed the reeds return to their normal positions, opening the circuit.

Mercury-Wetted Reed Switches operate on the same magnetic principles. However, the reed contacts are coated with a film of mercury. A pool of mercury at the base of the glass envelope wets the contact surfaces by capillary action. These units may be operated in vertical or horizontal position according to types.

Mercury coated contacts handle greater electrical loads, eliminate contact bounce, and are superior to dry switches for dry circuits and applications where stable contact resistance is critical. These switches normally have contact resistance within 10% of the initial value during life.

Enclosures resist all sources of environment. Each contact is isolated in a glass envelope unaffected by dust, oxidation or corrosion for a life span of millions of operations. Individual or multi-pole switches are assembled with their permanent magnet in an anodized aluminum or plastic case.

Precautions in selection and application of these switches should be exercised.

Selection—The ampere and voltage ratings given in the selection tables are singular maximum ratings, neither of which is to be exceeded, but never used in combination with each other at the maximum shown. The Volt Amps, and Watts listed in the selection tables are the allowable maximums, reached in any combination of Amps, and Volts, but neither to exceed the maximums listed.

Application—Due to the response of these switches to magnetic forces, heavy magnetic ferric materials around the area of the switches will affect their operation. Extremely high outside magnetic fields near the switches will require shielding. Inductive loads are not recommended.

**MERCURY WETTED

BM	1.460 x 1.087 x .50

Lamp	Voltage
1.35	10.0
2.5	14.0
2.7	18.0
3.0	24.0
6.0	28.0
6.3	—

Operating Pressure	
—01	2.5 oz.

When ordering KB series specify whether "flat base" or "slant base" is desired.

NOTE 1:

Illumination is not evenly dispersed over entire key top due to length. full illumination is required on BM, HM, and JJ, auxiliary external lamp would be required.

*To order non-illuminated switches, indicators and key tops, use applicable areas of the above ordering pattern. For example: KB-01-GM-01. (Non-illuminated Series) KB; .75" x .75" x .50" key top.

GEORGE RISK INDUSTRIES

MOUNTING COLLARS

COLORS: White, Black, Red, Green, Blue **NOTE:** Dimensions shown are $\pm .015$

SNAP-ON PUSHBUTTON

Mounting Collars include -E snap-on pushbutton.

ORDERING INFORMATION

NOTE: For each switch series, the model number listed is supplied with white button unless otherwise specified. For other standard colors, add the following suffix:

- 10 for Black
- 11 for Red
- 12 for Green
- 13 for Blue

Other colors available on request. Buttons are interchangeable in the field with no special tools. Actuating plunger of basic switch is not interchangeable.

Mounting Collars include -E snap-on pushbutton. -EP/N is white; for standard colors, add the following suffix:

- 10 for Black
- 11 for Red

- 12 for Green
- 13 for Blue

Unless otherwise specified, mounting collars are not fastened to the switches at factory. Specify "O" ring seal for Series J and R by adding "OR" to model number.

MOUNTING COLLARS

For Series G, W, MV, J, R = -A, -B, -C, -D
For Series T = -AT, -BT, -CT, -DT

SNAP-ON PUSHBUTTON

For Series G, W, MV = -E
For Series R, J = -EJR
For Series T = -ET

ORDERING EXAMPLES

GC-HA4-C13 = Series G, .5 amp, 8 oz. operating force, 4PST-NO with -C style mounting collar, blue, -E snap-on pushbutton.

GB-HC10 = Series G, .250 amp, 8 oz. operating force, SPDT-Break-Make, black actuating plunger.

RB-HB = Series R, .250 amp, 15 oz. operating force, SPST-NC with white actuating plunger.

RB-HA110R = Series R, .250 amp, 15 oz. operating force, SPST-NO with red actuating plunger and "O" ring seal.

TECHNICAL INFORMATION

CONTACT BOUNCE—Contact vibration measured in Microseconds or Milliseconds until positive contact closure.

PRE-TRAVEL—Distance the plunger travels from free position to operating position.

OVER-TRAVEL—Movement of actuator from operating position to final position at end of actuating stroke after switch is fully depressed.

RELEASE POSITION—Position of actuator when all contacts snap from the operated position to the free position.

DIFFERENTIAL TRAVEL—Distance actuator travels in returning from operating position to release position.

TOTAL TRAVEL—Sum of pre-travel and over-travel.

OPERATING PRESSURE—The force required to depress the switch button.

TYPICAL CIRCUIT DIAGRAMS

FORM A

SPST-NO

contact pair which is open when the switch is in normal position.

DPST-NO

Two contact pairs which are open when the switch is in normal position.

3PST-NO

Three contact pairs which are open when the switch is in normal position.

4PST-NO

Four contact pairs which are open when the switch is in normal position.

FORM B

SPST-NC

contact pair which is closed when the switch is in normal position.

DPST-NC

Two contact pairs which are closed when the switch is in normal position.

3PST-NC

Three contact pairs which are closed when the switch is in normal position.

4PST-NC

Four contact pairs which are closed when the switch is in normal position.

FORM C

SPDT-Break-Make

contact form in which one contact opens its connection to another contact and then closes its connection to a third contact.

DPDT-Break-Make

Two contact forms in which both contacts open their connections to another contact and then close their connection to a third contact.

3PDT-Break-Make

Three contact forms in which three contacts open their connections to another contact and then close their connection to a third contact.

4PDT-Break-Make

Four contact forms in which four contacts open their connections to another contact and then close their connection to a third contact.

5 Amp.

1232
1233

1232-P
1233-P

1232-B

This series is unique and used where other switches cannot be reliably used or have counterpart. Smallest two and three position wiping blade toggle switches at their rating on the market. Bat lever is nickel-plated brass paddle lever is black Nylon standard.

Mechanical life expectancy, 100,000 cycles minimum. Electrical life expectancy, 50,000 cycles minimum at full load. Terminals: combination solder lugs and quick-connect push-on type terminals. Quick connect accepts .110" AMP type connector equal. When wires are soldered, up to two #16 wires or three #20 wires. Weight: double pole 22.5 grams. Bat lever is 3/4" long; paddle lever is 1 1/4" long, both with a 28 degree throw. 1232 225 volts, 2 amp. 250 volts AC. 4 amp. 125 volts, 1 amp. 250 volts DC.

SPEMCO® H & H SWITCHES

MILER LOCK SWITCH

Security type tumbler lock switch, with single hole mounting sleeve. Quick make and break wiping action, and therefore can be considered for both medium power (up to maximum rating) or low energy circuits.

All 6 amp. 125V. AC-DC; 3 amp. 250 V. AC-DC—except 1261 and 1265, which are rated at 6 amp. 125 V. AC-DC, 1 amp 250 V. AC-DC.

SPECIALTIES MANUFACTURING CO.

SPEMCO® H & H SUBMINIATURE SWITCHES

SUBMINIATURE TOGGLE SWITCHES

Meeting requirements of MIL-S-3950
as applicable to SCL-6305

Spemco Subminiature Switches are 1/10 the volume of the standard switch.

Photos are actual size of switches.

OPERATING CHARACTERISTICS

CONTACT RATINGS: Low level to 5 amp. resistive at 29 volts DC or 115 volts AC.
INITIAL CONTACT RESISTANCE: 0.01 ohms maximum.
DIELECTRIC STRENGTH: 1000 volts RMS at sea level.
VIBRATION: 5-28 CPS at 0.5 inches double amplitude, 28-2000 CPS at 20 G.
SHOCK: 50G for 11 milliseconds.
ELECTRICAL LIFE (minimum): 20,000 make-and-break cycles.
SEAL: Low temperature rubber boot for panel is available.
WEIGHT: From 3.0 to 5.0 grams maximum.
TERMINALS: Solder lugs.

SUBMINIATURE PUSH BUTTON SWITCHES, MOMENTARY

Featuring gold plated coin silver contacts and gold plated brass terminals. Ideal for aircraft, missile, electronic and other applications demanding small size and dependability.

Spemco Subminiature Switches are 1/10 the volume of the standard switch.

Photo is actual size of switch.

OPERATING CHARACTERISTICS

CONTACT RATINGS: 2 amp 29 volt. DC resistive; 1 amp 115 volts AC. Minimum rating for dry circuit application 10 micro amps at 50 MV.
ELECTRICAL LIFE EXPECTANCY: At full load min. 20,000 make-and-break cycles pulsed at rate of 100 cycles per minute.
INITIAL CONTACT RESISTANCE: 0.05 ohms maximum.
VIBRATION: Tested per Mil-Std.-202, Method 204, Condition A.
DIELECTRIC STRENGTH: 1000 volts RMS at sea level for one minute.
TEMPERATURE RANGE: -87°F (-65°C to +200°F (+94°C).
PRETRAVEL: .015" maximum.
MOVEMENT DIFFERENTIAL: .002" maximum.
OVERTRAVEL: .010" maximum.
OPERATE FORCE: 6.6 oz. maximum.
When colored buttons are required, specify the color and add 10c each to the list price. Colors: Black, Red, Yellow, Green, Brown.

LIGHTED PUSH-BUTTON SWITCHES

Both the Molex 1175 and 1820 are lighted push button switches that are sturdy, well-designed and offer a wide choice of features. They are available in alternating action; momentary normally open or momentary normally closed models. The switch snaps mount into place and are offered with spade terminals. Many variations are possible. The button comes in blue, red, amber, yellow, white and green.

*Component U.L. Recognized.

Mechanical Life of switches is 25,000 cycles. Many test out at considerably more. Bezels (1175 series only) are all high quality chrome-plated. Housings, 1175, are precision molded of durable phenolic; 1820 housings are of long lasting highest quality nylon — buttons are mar-resistant nylon. Both switches are designed for panel mounting. Minimum panel thickness .031". Mounting clips supplied with 1175-1820 have integrally molded mounting ears. Terminals are standard 1/4 male tab for 1175; 3/8 male tab for 1820. Use WALDOM female Q-D terminal SS-1090 and SS-1187 respectively. Tabs also have solder hole for soldering wire lead if desirable.

NOTES:

1. Pricing includes permanently installed lamp, 6-volt application, Bulb No. 2114; 14-volt application, Bulb No. 2182; 125-volt application, NE 2H, 35K resistor.
2. a. Push-On; Push-Off — add suffix PP to catalog number.

b. Momentary-Normally Open — add suffix MNO to catalog number.

c. Momentary-Normally Closed — add suffix MNC to catalog number.

3. Buttons available in White, Red, Blue, Green, Amber and Yellow. Add first initial of color to suffix after designating switch action and button color.

4. Four standard legends are available. They are OFF, ON, START, STOP. Add actual word to catalog number after designating switch action and button color.

5. Color of hot stamping on button is standardized as follows:

HOT STAMPING COLOR

White
Black

BUTTON COLOR

Red, Blue, Green,
Amber, Yellow, White

Recommended Panel Cutout Dimension:

1175 Switch 1.115" x .915"
1820 Switch 1.215" x .500"

ORDERING EXAMPLES:

(a) To obtain a 6-volt unit, momentary normally open, with red button and no legend—specify Catalog No. 1175 MNO-R for 1175 series or 182010 MNO-R for 1820 series switch.

(b) To obtain a 125-volt unit, push-on, push-off, with yellow button, hot stamp START — Specify Catalog No. 1175 PP-Y START for 1175 series or 1820 PP-Y START for 1820 series switch.

Dimensions of 1820 Switch:

Bezel Dimensions — 1 1/2" x 3/4"
Button Size — 1 1/4" x 3/4"
Depth of Housing — 2 1/4"

These products are manufactured by Molex Products Company, and are available from Electronic/Electrical Distributors through Waldom Electronics, Inc.

DISCOUNTS

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

**INQUIRE ABOUT LATEST
PRICES AND DELIVERY.**

Prices in this MASTER should not be considered as final.

Trade discounts apply in most cases where LIST PRICES are shown.

American Beauty

SOLDERING IRON AND SOLDERING ACCESSORIES

Specify voltage, wattage and other options on each order. If your plug needs differ from standard — plug cap on 2-wire cords, NEMA-type plugs on 3-wire cords — specify plug manufacturer's name and catalog number.

LITTLE DANDY

The economy-priced miniature iron that stands up to production line conditions. Steel cored heating element with non-ceramic insulator. Molded handle, aerated finger grip (impervious to oil, perspiration). Balanced, non-roll design. Plug type tips.

Cat. No.	Wattage Std.	Tip Dia. Spec.	Tip Dia.	Shpg. Wt.	Net
3108	20	25/30	1/8"	1/2 lb.	\$4.70
3110	25	30/35	3/16"	1/2 lb.	4.70
3112	40	50/60	1/4"	1/2 lb.	6.25

NOTES: Three wattage options each model (3108: 20, 25, 30. 3110: 25, 30, 35. 3112: 40, 50, 60.) For 3-wire cord with NEMA plug, add "S3" to catalog number and \$0.70 to price.

BANTAMS

Small irons of traditional American Beauty quality in various inputs and tip diameters.

Cat. No.	Wattage	Tip Dia.	Shpg. Wt.	Net
3114	60	1/4"	1 lb.	\$8.00
3118	30	1/8"	3/4 lb.	6.35
3118-X	50	1/8"	3/4 lb.	7.15
3118-XP	50	1/8"	3/4 lb.	7.15
3118-SC	30	1/8"	3/4 lb.	6.35
3118-SCP	30	1/8"	3/4 lb.	6.35
3120	30	3/16"	3/4 lb.	6.35
3120-X	50	3/16"	3/4 lb.	7.15

3178	300	—	7/8"	4 lbs.	16.75
3178-X	300	400	7/8"	4 lbs.	17.90
3198	550	675	1 1/8"	5 3/4 lbs.	20.75

NOTES: "X" in catalog number means "extra hot, for continuous duty only." For 3-wire cord with NEMA plug, add "S3" to catalog number and \$1.40 to price.

ANGLE TYPE IRONS

Same quality as American Beauty Standard Irons but angled for soldering hard-to-reach connections.

Cat. No.	Wattage Std.	Tip Dia. Spec.	Tip Dia.	Shpg. Wt.	Net
3118-A	30	40	1/8"	3/4 lb.	\$7.20
3118-XA	50	40	1/8"	3/4 lb.	8.00
3120-A	30	40	3/16"	3/4 lb.	7.20
3120-XA	50	40	3/16"	3/4 lb.	8.00
3125-A	60	75	1/4"	1 lb.	8.70
3128-A	60	75	1/4"	1 lb.	8.00
3138-A	100	130/150	3/8"	1 1/4 lb.	11.20

NOTES: "X" in catalog number means "extra hot, for continuous duty only." For 3-wire cord with NEMA plug, add "S3" to catalog number and \$1.40 to price.

TRANSFORMER TYPE IRONS

Use these American Beauties where isolation from line voltage is necessary. Heating elements in tips for quick heat changes. T-6 has variable heat dial. T-12 and T-30, non-variable.

Cat. No.	Wattage Std.	Tip Dia. Spec.	Tip Dia.	Shpg. Wt.	Net
T-6	Variable	3/64"	1 1/2 lbs.	\$22.00	
T-12E/W T-1216	17 20	1/16"	1 1/2 lbs.	15	
T-12E/W T-1218	17 20	1/8"	1 1/2 lbs.	15	
T-12E/W T-1225	17 20	1/4"	1 1/2 lbs.	15	
T-12E/W T-1232	12 —	3/32"	1 1/2 lbs.	15	
T-30E/W T-3016	30 25	3/16"	2 lbs.	17	
T-30E/W T-3018	30 25	1/8"	2 lbs.	17	
T-30E/W T-3025	30 25	1/4"	2 lbs.	17	
T-30E/W T-3032	12 —	3/32"	2 lbs.	17	

V-3000 SYSTEM

New type system dependably dials and maintains any tip temperature from 350° to 750°. High reserve for fast recovery. Iron is 40-watt, uses any 3/4" plug type tip.

Cat. No.	Wattage	Shpg. Wt.	Net
V-3000	Variable	5 lbs.	\$42.00

TEMPERATURE REGULATING STANDS

Maintain soldering iron at preset temperature during idle and intermittent use. Minimizes warmup, prevents over-

American Beauty

SOLDERING IRONS AND SOLDERING ACCESSORIES

ting, saves current. Pilot light. Adjustable to length of iron.

Use	Shpg. Wt.	Net
For 100W-600W irons	3¼ lbs.	\$10.35
For 30W-85W irons	3¼ lbs.	10.35

TES: For perforated guard (as shown) add "SG" to catalog number \$1.40 to price. Standard cord HPD; if you want either 2-wire or 3-wire SJO cord specify on order.

GENERAL PURPOSE SOLDER POTS

ucibles of cast iron, chemically stable keep solder pure. Center tapped for cross skimmer or extra fixturing. Wide open for extra fixture mounting. Allow; 1½" deep. Heat solder to 400° in 15 minutes — 750° in 25 minutes. Adjustable, direct reading thermostat.

Solder Capacity	Shpg. Wt.	Net
1 lb.	6½ lbs.	\$30.40
(Same as NO. 300, with cross skimmer)	6½ lbs.	33.40
2½ lbs.	9 lbs.	31.90
(Same as NO. 600, with cross skimmer)	9 lbs.	34.90

OTES: Standard cords are 2-wire HPD; for 3-wire cord, add "S3" to catalog number and \$1.40 to price.

INFINITELY VARIABLE POWER CONTROL UNIT

Dials and accurately controls soldering iron tip heat. (Also reliably controls small motor speeds.) Wattage: zero to 125W; infinitely variable, stepless. Fused. Pilot lighted.

Cat. No.	Shpg. Wt.	Net
477	3¾ lbs.	\$17.00

ONE-PASS TIP CLEANERS

Cleans all sides of tip in one motion. Eliminates tip damage, linting, stray solder pellets. Rubberized base, bored for mounting.

Cat. No.	Descrip.	Shpg. Wt.	Net
480	Complete set	½ lb.	\$2.25
480-S	Sponges only (ea.)	3 oz.	.16

SAFETY SOLDERING IRON STAND

Gravity controlled. Opens, closes automatically. Operator doesn't look up from work. Accommodates all miniature irons.

Cat. No.	Descrip.	Shpg. Wt.	Net
575	Soldering Stand	1 lb.	\$3.00

PARAGON QUALITY SOLDERING TIPS

Iron clad tips. Outlast unclad tips many times. Pretinned; point retins self as it works. Clad shank does away with pitting, scaling. Overall chrome coat and minute tapering make tip drip-proof, freeze-free.

ORDERING: Use American Beauty Catalog No. TC-2. Or order tips by carefully specifying shank diameter, overall length, and style of point (diamond, chisel, screwdriver, cone).

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

RESISTANCE-TYPE SOLDERING & THERMAL WIRE STRIPPING EQUIPMENT

Complete, single source for newest equipment from simplest to most sophisticated

RESISTANCE-TYPE SOLDERING

Power units, control consoles, handpieces, accessories . . . Basic building blocks for your automated soldering systems

THERMAL WIRE STRIPPING

Combinations of power and control units, handpieces and accessories for fast, nick free stripping of thermoplastics and other heat strippable insulations

Boker In-Dus-Tronic hand tools have a nose for every special electronics application

And if you have a nose for quality, you want Boker In-Dus-Tronic hand tools... top quality, precision tools that are designed specifically for the unique requirements of the electronics industry. Boker In-Dus-Tronic hand tools are drop-forged from special alloy steel. Precision ground to give perfect jaw alignment. Electronically heat-treated and hand honed for sharp, long-lasting cutting edges. 100% inspected to maintain Boker's

high standards for hardness, strength and cutting ability. Cushion-grip handles for comfort and efficient operation. And, best of all, no matter how tight the area, Boker has a nose shaped to do the job from any angle.

There's a wide range of fine quality tools in the Boker line... 487 pliers, nippers, snips, punches, adjustable wrenches, knives, industrial scissors and shears.

All plier patterns with No. 9 as first digit have polished heads and cushion grip handles. For chrome plated heads and cushion grip handles, substitute No. 7 as first digit. (Nos. 96—5", 6", 7½", and 8½" are not available in this finish.)

MODEL 30 CONTROL TRANSFORMER FOR ALL 6 VOLT SOLDERING IRONS

The R30, transformer model has a primary voltage regulator for 110, 125, 150, 220 and 240 volts. The secondary voltage is also variable within the range of 5 to 6.5 volts, thus making it possible to select a temperature range between 240 to 480°C. When not in use, a solder iron may rest on a special nozzle provided on the transformer. This protects against overheating. The R30, permits universal use of all the various 6 volt irons with their different capacities, up to 30 watts.

MODEL R30, rated 30 VA, 5.1#. Price....\$28.00

PYROMETERS INDICATING

Model IPL-500, low temperature, indicating pyrometer, range 0° to +650°F, scale 3 1/2", graduations: 5°F, Dimensions 7" H. x 6" W. x 6" L., 15 feet #20 ga. I/C thermocouple & lead wire. Weight 4 lb. Price.....\$38.00
Extra thermocouple. Price.....\$14.50

Model IPH-500, high temperature, indicating pyrometer, range 0° to +2000°F, scale 3 1/2", graduations: 20°F, Dimensions 7" H. x 6" W. x 6" L., #14 ga. C/A thermocouple 1/4" dia. x 12" long, protected ceramic beads, 3 feet lead wire. Weight 4 lb. Price.....\$40.50
Extra thermocouple. Price.....\$14.50

MINIATURE SOLDERING IRONS

MODEL 040

A sub-miniature soldering needle for minute soldering operations (excellent for use under the microscope).

Capacity: 5 watts at 6 volts

Heat-Up Time: 20 seconds approx.

Weight: Without cord 4.5 grams • With cord 16 grams

Flexible Cord Length: 4 feet. For 6 volt output transformers, battery hook-ups or similar operation.

Tip: Copper-Ironclad Pointed or Slanted (specify).

Tip Temperature: 315°C

Price

\$5.00

MODEL 170

A miniature soldering iron for use on printed circuits, micro soldering operations. Excellent for close work without damaging adjacent components.

Tip: Copper-Plain or Copper Ironclad Pointed or Slanted (specify).

Capacity	Heat-Up Time	Tip Temp.	Weight w/o Cord
8 watts/6 volts or 115 volts	90 sec.	290°C	18 grams
15 watts/6 volts or 115 volts	60 sec.	420°C	20 grams
25 watts/6 volts or 115 volts	60 sec.	430°C	26 grams

All irons have flexible cord approx. 5 feet, pistol grip and table rest spacer (keeps hot tip from touching work surface).

CHANNEL LOCK®

Specially Designed ELECTRONICS PLIERS

Four matched, long-reach pliers with precision matched jaws, hand honed cutting edges. Drop forged of special analysis steel, properly heat treated. Polished finish. Smooth, dipped plastic, blue grips.

No.	Size	Net
718G	8"	\$2.66
728G	7½"	2.94
738G	8"	2.66
748G	8"	2.66

NO. 718G FLAT NOSE PLIERS

Precision-matched jaws give firm grip in hard-to-reach places.

NO. 728G DIAGONAL CUTTER

Patented wire-stripping notch that really works!

NO. 738G ROUND NOSE PLIERS

You can pick up a hair with these precision machined points.

NO. 748G END CUTTER

Fine enough to cut a human hair, sturdy enough to cut 12 gauge copper wire.

TONGUE AND GROOVE PLIERS

The original, genuine tongue and groove plier. Patented, non-slip undercut channels. Patented reinforcing rib for extra strength. Dipped plastic grips optional at slight extra cost.

No.	Size	Adjust	Capacity	Net
420	9½"	5	1½"	\$2.53

NON-MAGNETIC NUT DRIVERS available in HL7 and HS 7 series only. Specify "No-Mag" with the code number — same prices.

INTRODUCING THE DESCO "5" Series of Miniature Tools

Set JD 5 List \$3.50

Set HD 5 List \$4.50

Deeper and more rugged than the "7" Series. Made only in $\frac{1}{64}$, $\frac{1}{32}$, $\frac{1}{16}$, $\frac{1}{8}$ and $\frac{1}{4}$.

Set EW 5 Steel List \$2.50

Set EWN 5 Non-Magnetic List \$2.50

A practical miniature end wrench to fit the smallest nuts made $\frac{1}{64}$ $\frac{1}{32}$ $\frac{1}{16}$ $\frac{1}{8}$ $\frac{1}{4}$.

Set SS 5 List \$1.98

Contains four screw driver blades and a fine scribe.

Set PA 5 List \$2.50

Set PAH 5 List \$3.50

Includes the two smallest Phillips drivers and the three smallest Allen wrenches.

* T. M.

All of the DESCO "5" and "7" Series are complete as shown.

Europe's Choicest Soldering Tool

SOLDAPULLIT DESOLDERING TOOL. A portable hand tool designed for fast removal of molten solder from components. The molten solder is drawn into the receiving chamber with a high-impulse vacuum stroke by simple thumb release of a spring-loaded piston. This tool, when used in conjunction with the equally fast-acting ERSA SOLDERING IRON, will ensure a perfect soldering job.

PLASTIC HANDLES—(TN-22, TN-33, TN-44, TN-55) (M2T, M3T, M4T, M5T) are of Tenite II, hex and will not roll off the work bench. Shock-proof, practically unbreakable and will stand rough use on industrial production lines.

METAL HANDLES—(AL-22, AL-33, AL-44, AL-55) are aluminum alloy 4" x 3/8" hex and won't roll off the work bench. Being metal, are NOT SHOCK-PROOF and hence not recommended for ordinary radio-TV service work, especially on a 'live' unit. However, these handles are practically unbreakable and were designed to take rough use on industrial assembly lines and can be used as PRY BARS in lining up components.

METAL ENDS—(separated from each other) non-magnetic stainless steel, to which solder won't adhere. Are firmly seated in handles and are twist-proof.

FORKED END—straddles the wire and with a slight twist, grips it for easy unwinding and removal, or guides it into another lug for soldering. Since plastic handles act as insulation, there is no danger of shock when working on sets in operation. 1/8" forks are made especially for use on printed circuits and transistors.

SPADE END—is a reamer to clean lug holes of solder.

CURVED END—can be used as a scriber for marking chassis. As a circuit tracer when looking for loose connections. As a dial cord stringer. Hook can be bent to a 90 degree angle if desired.

KNIFE & SCRAPER—for cutting and repairing printed circuits.

WIRE BRUSH—has approx. 200 bristles of stainless wire .0035 in dia. to which solder will not adhere. For use in cleaning connections before soldering, brushing out splattered solder and in repairing printed circuits.

STAINLESS STEEL WIRE BRUSHES

on steel shaft approximately 2" long overall. Can be used in a regular pin vise. .35 net

Packed 25 or 50 per box

ERIKSON SPECIALIZED TOOL COMPANY

A Unit of Ex-Cell-O Corporation

CHASSIS PUNCHES

ROUND, SQUARE, "KEY," AND "D" TYPES

NO. 730 ROUND PUNCH

Swiftly cuts clean, accurate holes in radio chassis for sockets, switches, controls and other equipment. Operates simply with an ordinary wrench for drive power . . . just insert in a small drilled hole and turn drive screw. No reaming or filing . . . hole is smooth, perfect. 29 sizes from 1/2" to 3 1/8" diameter. New Ball-Bearing Drive available for even easier, speedier operation.

NO. 731 SQUARE PUNCH

Cuts square or oblong openings as desired. Available in five sizes for making 1/2", 5/8", 3/4", 7/8", and 1" square holes. Drive screw fits into 1/2" hole, which can be drilled or made with 1/2" No. 730 GREENLEE Round Punch. Operates with an ordinary wrench for drive power. Individually packed.

NO. 731-R KHP RELAY PUNCH

Makes clean, accurate, *finished* holes in up to 16-gauge metal for Potter & Brumfield KHP miniature relay sockets. Makes 1.015" x .859" hole.

NO. 732 "KEY" PUNCH

Quickly, easily cuts holes for keyed radio sockets. Operates on same principle as other GREENLEE Radio Chassis Punches . . . an ordinary wrench supplies the drive power. In five sizes to make openings of 1 1/32", 1 1/16", 1 1/8", 1 1/4", 1 1/2". Drive screw fits into 1/2" hole. Individually packed.

NO. 733 "D" PUNCH

Simplifies and speeds the work of making "D"-shaped openings for high-frequency, miniature tube sockets and other equipment using this type opening. Available in 1/2" and 3/8" sizes. Operates on same principle as other GREENLEE Radio Chassis Punches with an ordinary wrench supplying the drive power. Drive screw fits into 3/8" drilled hole. Individually packed.

NO. 734 DOUBLE "D" PUNCH

Quickly makes standard electrical receptacle openings. Cuts standard hole 1 1/8" dia. across parallel sides, 1 3/8" dia. across rounded ends. Simply insert into a 1/2" hole and turn with an ordinary wrench. Does the work in less than five minutes . . . eliminates all tedious hand filing . . . gives a smooth, perfect opening.

GC 7-PIN MINIATURE TEST SOCKET ADAPTER
Cat. No. 9247 Net 1.65

GC 9-PIN MINIATURE TEST SOCKET ADAPTER
Cat. No. 9249 Net 1.65

GC NE-O-LITE
Electrical circuit tester...easy to use with a Neon Glow Lamp which varies in light intensity according to voltages. Traces all types of trouble, such as grounded lines, open circuits, short circuits, etc.
Cat. No. 5100 Net .50

GC TUBE & PARTS EXTRACTOR
Originally designed by the U.S. Signal Corps, as standard equipment. Skillfully constructed of spring steel, cadmium plated. Has rubber cushion on the prongs.
Cat. No. 5092 Net .98

GC SPEEDEX FUSE PULLERS
Inexpensive...non-slip, fuse puller. Safe and handy for cartridge fuses.
Cat. No. 5525 Midjet size for fuses 1/4" to 1/2" diameter Net .60
Cat. No. 5526 Pocket size for fuses 1/2" to 1-1/2" dia. Voltages to 200 amps at 250 volts and 100 amps at 600 volts. Net 1.30

GC PHONO TURNTABLE STAND
Stand raises the turntable about 15" above the bench for repairs. Easily adjusted to all sizes and types of phono turntables. Sturdily made of steel.
Cat. No. 5205 Net 5.45

GC 8-PIN OCTAL TEST SOCKET ADAPTER
Cat. No. 9248 Net 1.57

GC MINIATURE TUBE PIN STRAIGHTENER
Precision-constructed steel die, for straightening pins on fragile miniature tubes of the 1S5, 6AK5, 9002 variety.
For 7-pin Min. Tubes (red base) Cat. No. 5191 Net 1.00
For 9-pin Jumbo Tubes (blue base) Cat. No. 8105 Net 1.00

GC TV "HIGH-VOLT" SAFETY PROBE & TESTER
Handy tester for quickly checking TV high voltage circuits. Tester will glow when high voltage is okay.
Cat. No. 8836 Net 2.13

GC AMO MINIATURE TUBE PULLER
AMO makes it possible to easily remove or insert miniature tubes such as 6AG5, 50B5, etc. It works on the suction and vacuum principle.
Cat. No. 5093 For 7-pin tubes Net 2.50
Cat. No. 8106 For 9-pin tubes Net 2.50

GC DUPLEX TUBE PIN STRAIGHTENER
The handiest tube pin straightener for both miniature and jumbo miniature tubes of the 7- and 9-pin types.
Cat. No. 8655 Net 2.00

GC 4-IN-1 TUBE GADGET
Four tools in one. Pure rubber, will not break.
Cat. No. 9130 Net 1.65

GC DUAL TUBE PIN STRAIGHTENER
A handy, miniature pin straightener for 7-pin and 9-pin miniature tubes. Metal inserts on either end of the tool body, each of hardened metal for accuracy and long life.
Cat. No. 9092 Net 3.20

GC "QUICK-RIG" RADIO-PHONO CHASSIS REPAIR CRADLE
(Complete 360 degree rotation to lock chassis at best working angle. Clamps security, makeshift setups, all metal.
Cat. No. 5212 Net 7.95

GC NO-JOLT TOOL GRIPS
Modernizes old tools with new safety-grip handles. Grease and oil resistant.

Specially designed for K-TRAN and I.F. transformers. Butyrate material, screwdriver on both ends.

Cat. No. 5097 **Net \$.46**

6" long, 5 32" Delrin tip, 1 8" metal tip

G-C SHORTY ALIGNMENT TOOL

A convenient tool for hard-to-get-at places. 3 16" shaft, 2" length. Overall length of tool 6" long, 5 32" Delrin tip, 1 8" metal tip.

Cat. No. 9298 **Net \$.46**

GC ALIGNMENT TOOLS

GC ALIGNMENT TOOLS

GC ALIGNMENT TOOLS

G-C NEW NYLON TV LONG REACH ALIGNER Long-reach TV aligner with insulated metal shaft and nylon tip. 12-1/4" long overall. .195 Shaft Dia.

Cat. No. 8607 GC **Net \$1.60**
2523 Walsco

G-C CONTACT BURNISHING TOOL KIT A complete kit for the servicing of relays, switches, etc. where critical contact points must be kept clean.

Cat. No. 9339 **Net \$.97**

G-C TV 2-IN-1 LONG-REACH DUPLEX ALIGNER Made of clear, unbreakable plastic material. Ends colored red and blue for size identification. Tips are made of spring steel recessed for easy location of stud.

Cat. No. 8721 9" long, 7/32" Shaft Dia. **Net \$.78**

8722 7" long, 7/32" Shaft Dia. **Net \$.67**

Walsco 2519 7" long, 7/32" Shaft Dia. **Net \$.67**

DELUXE ALIGNMENT TOOL KIT Case is made of durable leatherette for long service. Steel tips are extra thin and of the best grade hardened spring steel. Kit contains one each of 16 tools.

Cat. No. 8280 **Net \$10.30**

NEW G-C K-TRAN TELEVISION ALIGNER Specially made for K-TRAN I.F. Transformer tuner slugs. Precision made of bone fibre.

Cat. No. 8727 6-1/4" long, 5/32" Tip Dia. **Net \$.65**

TV LONG REACH ALIGNMENT SCREWDRIVER Made of bone fibre, extra thin 1/8" diameter screw drivers for adjustment of TV receivers. Screw driver tip on both ends-can be re-ground.

Cat. No. 8728A 1/8" x 7" long. **Net \$.47**

8728 1/8" x 12" long. **Net \$.58**

8729 1/8" x 16" long. **Net \$.78**

G-C LONG ARM TV TOOL PLASTIC SHAFT Extra-long reach alignment tool for Zenith sets and others where adjustments are hard to get at. Tool is 18" long overall. 18" long, 7/32" Shaft Diameter.

Cat. No. 8821 TV Tool (Type A) **Net \$1.00**

8896 TV Tool (Type B) **Net \$1.00**

8897 TV Tool (Type C) **Net \$1.00**

2527 Walsco

ZENITH-RCA ALIGNING TOOL WITH HANDLE For better grip and easier adjustments. Length is 2-1/2" with a 1-1/2" shaft length. 7/32" diameter blade with recessed slot in blade end.

Cat. No. 9051 GC **Net \$.58**

2527 Walsco

G-C STANDARD COIL SLUG TUNER ADJUSTING TOOL A new special slug tuning tool for adjusting Standard Tuners, etc. Completely insulated. 7-1/2" long, 1/4" shaft diameter. shaft ends .170 diameter.

Cat. No. 9087 **Net \$.75**

K-TRAN ALIGNMENT TOOL. This tough, double-use tool is machined at one end to fit the slots on all K-TRAN miniature I.F. transformers.

Cat. No. 2515 **Net \$.60**

G-C ADJUSTABLE SHORTY Recessed tip TV alignment tool. Adjustable from 1-1/4" to 2" in length, for hard-to-get-at places.

Cat. No. 9090 **Net \$.65**

G-C DOUBLE END IRON CORE TOOL All nylon hex tool for cores with .125 hex opening. One end of tool undercut so it can reach the bottom slug in coils without turning the top slug.

Cat. No. 9091 GC 5" long. **Net \$.48**

Walsco 2542

9091-L GC 11" long. **Net \$.70**

G-C PRINT KOTE SOLDER AID PROBE Handy, fine point probe specially designed to aid in probing and soldering printed circuits.

Cat. No. 9093 GC 8" Length. **Net \$1.03**

2530 Walsco

STUBBY STUD DRIVER. The only screwdriver only 2" long overall. Fits No. 6 studs.

Cat. No. 2517 **Net \$.60**

G-C PRINT KOTE BRUSH AND SCRAPER Fine Stainless Steel brush and hardened steel scraper are required to scrape and clean the Silicone Resin from printed circuits.

Cat. No. 9094 8" Length. **Net \$1.03**

G-C SLUG RETRIEVER TOOL A precision made tool with hardened steel tips made for removing lost TV tuner slugs in Standard Coil tuners. Ends ground to fit standard coils.

Cat. No. 9096 12" Retriever. **Net \$2.70**

9097 15" Retriever. **Net \$3.25**

G-C MINI HOLD SCREWDRIVERS Designed with exclusive "Wedge Action" for gripping of tiny screws. (Nos. 0, 1, 2, 3 and No. 8 set screws and smaller) Special short length (27/8" when in use).

Cat. No. 9346 GC 3-1/4" long, 2-7/8" in use **Net \$2.14**

2568 Walsco

9347 GC 7" long, 6-3/4" in use **Net \$2.40**

2569 Walsco

G-C RCA TV ALIGNMENT TOOL Double end nylon tool with a recessed metal tip on one end and a plastic slot on the other end.

Cat. No. 9150 6" Length. **Net \$.93**

(F) "SLUG SAVER" TUNER TOOL. New patent tool for aligning "Standard Coil" front ends. Prevents "loosing" slugs, thru ingenious "step" design.

Cat. No. 2528 7-1/2" long. **Net \$.46**

G-C TV AND AUTO RADIO WRENCH Special female slotted wrench to remove screws at stud screws from auto radios and backs of TV sets, etc.

Cat. No. 9211 **Net \$1.03**

G-C FIBREGLASS SCREWDRIVER Gives full protection on hot chassis when adjusting high potentials. For close-up hard-to-reach places.

Cat. No. 9291 7" long. **Net \$.46**

G-C NYLON HEX TOOLS For adjusting iron cores inside mounted chassis, a tuner adjustment of iron and brass slugs with heads. Has .100" hex and 5/32" handle.

Cat. No. 9295 GC 11" x .100" Hex. **Net \$.46**

2544 Walsco

9296 GC 11" x .075" Hex. **Net \$.46**

2545 Walsco

9297 GC 11" x .075" Hex. **Net \$.46**

2547 Walsco

WRITE FOR CATALOG #FR-69 FOR COMPLETE LISTINGS

Lindstrom® Swedish PLIERS AND NIPPERS

MINIATURE TOOLS for use on the compact electronic circuits, assemblies and components in today's space age technology. The heads easily reach into confined spaces to perform intricate work, while their light weight, perfect balance, and comfortable grip provide fatigue-free use during continuous operations.

FULL-FLUSH EDGES

For cutting soft wires straight and flush... leaves no wire peak

SEMI-FLUSH EDGES

For cutting copper and insulated wires... leaves a very small peak

Relieved Backs allows entry between "flat packs."

NON-JAMMING
Double-leaf
springs

SWEDISH STEEL
for toughness
and wear!

ZONE TEMPERED

- Cutting edges induction hardened for long wear.
- Joint tempered to withstand strain
- Handles tempered to withstand compression

Comfortable VINYL
PLASTISOL cushion
grips

Precision "BOX JOINTS"
Outlast and outperform
all other types, because
they:

- Retain precise alignment even under strain and after considerable use.
- Jaws never develop looseness or wobble, and yet open and close smoothly.

DIAGONAL CUTTERS—Popular type for side cutting. Have relieved backs, and come complete with double-leaf return springs.
No. 36-237S—semi flush
No. 36-238S—full flush

CHAIN NOSE—Popular snipe nose tapers to a $\frac{1}{32}$ " tip—Insides of jaws are smooth, and edges are rounded. Length of jaws $\frac{3}{4}$ ".
No. 36-226

All Supreme Tools are Approximately 4 1/2" Long.

Supreme NIPPERS

All Nippers have vinyl plastisol handles and double-leaf return springs.

OBLIQUE—Head is angled 15°, with tip coming to a point. No. 36-234S semi-flush edges. No. 36-235S full flush edges

OBLIQUE WITH SHORT HEAD—Similar to above except back edge is ground off so head can be fitted into inaccessible areas. No. 36-242S full flush edges

END NIPPERS—Jaws are set straight across with both ends coming to a point. No. 36-231S semi-flush edges. No. 36-232S full flush edges

END WITH NARROW HEAD—Head is only $\frac{1}{8}$ " wide at cutting edge. No. 36-246S flush edges

Supreme PLIERS

All pliers have vinyl Plastisol handles. Double-leaf return springs available

FLAT— $\frac{1}{8}$ " wide at tip. Insides of jaws are smooth and edges are rounded. Length of jaws $\frac{3}{4}$ ". No. 36-221

ROUND—Jaws are smooth and taper to a $\frac{1}{32}$ " tip. Insides of jaws are smooth and edges are rounded. Length of jaws $\frac{3}{4}$ ". No. 36-224

CHAIN—Popular snipe nose tapers to a $\frac{1}{32}$ " diameter at the tip. Length of jaws $\frac{3}{4}$ ". No. 36-226

BENT NOSE CHAIN—Tips are angled at 45° for picking up and manipulating precision wires. Length of jaws $\frac{3}{4}$ ". No. 36-227

LONG NOSE BENT CHAIN—Tips are angled at 60° for picking up and manipulating precision wires. Length of jaws $1\frac{1}{4}$ ". No. 36-229

LONG NOSE CHAIN—Extra length jaws for getting into tight places. Snipe nose tapers to $\frac{1}{32}$ ". Length of jaws $1\frac{1}{4}$ ". No. 36-228

Catalog showing full Lindstrom line on request.

HAMMEL, RIGLANDER & COMPANY, INCORPORATED

SOLDERING IRONS

6 to 240 VOLTS 12 to 140 WATTS

A complete line of high quality soldering irons specifically designed for production-line soldering in the electronic, instrument, and communications industries—including irons for soldering miniature and subminiature components. Also ideally suited for intermittent operations such as repair, maintenance, laboratory work, and electronic kit construction. Irons up to 1250 watts are available.

PENLINE-120 SOLDERING IRONS — 120 VOLTS; 25, 30, 40 AND 45 WATTS

Lowest cost GE iron; ideally suited for light to medium production in electronics, communications, and allied industries, for repair and maintenance operations, and by the "do-it-yourself" electronics kit builder.

Description		Cat. No.	
Handle and 6-foot Cordset			
	Two-conductor	6D400*	
	Three-conductor, with NEMA standard plug	6D400G2	
Tip and Heater Units — Ironclad			
	3/16" Chisel Tip	30 watts	6D410*
	3/32" Chisel Tip	30 watts	6D411*
	3/8" Chisel Tip	45 watts	6D412*
Heater for Threaded Tips			
		25 watts	6D415
		30 watts	6D414
		40 watts	6D413*

Use interchangeable threaded tips listed on next page.

LIGHTWEIGHT SOLDERING IRONS — 120 VOLTS; 40 AND 60 WATTS

Ideal for light and medium production-line soldering and maintenance and repair operations in electronics and communications industries. Tip and heater units can be changed in seconds.

Complete Iron — Includes handle and 6-foot cordset, and tip and heater unit — 60 watts			
	1/4" Ironclad Chisel Tip		6A273*
	3/16" Ironclad Pyramid Tip		6A283*
	3/16" Ironclad Chisel Tip		6A283G23
Handle and 6-foot Cordset			
	Two-conductor		6A273G62
	Three-conductor with NEMA standard plug		6A273G63
Tip and Heater Units — 60 watts			
	1/4" Ironclad Chisel Tip		6A300
	3/16" Ironclad Pyramid Tip		6A301
	3/16" Ironclad Chisel Tip		6A301G4
Heater Units for Threaded Tips			
		40 watts	6A304
		60 watts	6A301G7

Use interchangeable threaded tips listed on next page.

* UL Listed.

PISTOL-GRIP SOLDERING IRONS — 120 VOLTS; 40 AND 60 WATTS

Maneuverable and comfortable, excellent for light to medium production. Unique design gives operator a clear view of work. Complete versatility with choice of three 60-watt tip and heater assemblies or 40- and 60-watt heater assemblies with 20 different interchangeable ironclad copper threaded tips.

Description	Cat. No.
Handle and cordset, three-wire with NEMA plug	6A303

Can be used with Lightweight tip and heater units, or with Lightweight heater units and interchangeable threaded tips listed on next page.

MINIATURE SOLDERING IRONS — 6 VOLTS, 12 WATTS

Ideal for production line soldering of sub-miniature equipment, printed circuits, and instruments. Weighs only 1 1/2 ounces. Integral transformer plugs into any standard 115-volt outlet, makes iron portable for maintenance work.

Complete Iron — Includes tip and heater unit, 6-foot cordset, and transformer with grounded plug.

	1/8" Chisel Tip	3" Shank	6A428G3
	1/8" Chisel Tip	6" Shank	6A428G4
	1/8" Pyramid Tip	3" Shank	6A428G7
	1/8" Pyramid Tip	6" Shank	6A428G8

Complete Iron Less Transformer — Includes tip and heater unit, a 6-foot cordset with terminals

	1/8" Chisel Tip	3" Shank	6A428G5
	1/8" Chisel Tip	6" Shank	6A428G6

Renewal Tip and Heater Units

	1/8" Chisel Tip	3" Shank	6A429G3
	1/8" Chisel Tip	6" Shank	6A429G4
	1/8" Pyramid Tip	3" Shank	6A429G5
	1/8" Pyramid Tip	6" Shank	6A429G6

Handle and Cordset Only

	6-foot Cordset with Terminals	6A428G62
--	-------------------------------	----------

Renewal Transformer — Includes — 6-foot integral cordset

	6-volt Secondary 115-volt Primary	6A430
--	--------------------------------------	-------

MIDGET SOLDERING IRONS — 6 VOLTS; 18 to 45 WATTS (with transformers)

versatile iron for light production in electronics, and communication industries—handles like a pencil, weighs 1 1/4 oz. Tip renewal is easy and fast—complete tip and heater unit can be changed in a few seconds. Heat output can be varied from 18 to 45 watts with standard GE transformers.

Description	Cat. No.
Handle and 6-foot cordset	
For single- and 4-tap transformers	6A203
For transformer with 3-heat switch	6A203G2

Heater Units — All ironclad tips

1/4" Chisel Tip	25 watts	6A211
1/8" Cone Tip	25 watts	6A213
3/16" Pyramid Tip	25 watts	6A215
3/16" Chisel Tip	25 watts	6A217
3/8" Chisel Tip	45 watts	6A211G31

Heater for Threaded Tips

25 watts	6A221
----------	-------

Transformers for Midget Iron — 115-volt Primary†

Single Tap 6.3-volt secondary	6A362G2
Four Tap 5.4/5.7/6.0/6.3-volt secondary	6A364G2
With Three-heat Switch 4.9/6.3/6.9-volt secondary For use only with Handle and Cordset 6A203G2.	6A434

Single- and four-tap transformers are available with 240-volt primary in quantities of 36 or more, specify catalog number desired and note on order, "except with 240-volt primary." Use interchangeable threaded tips.

MIGHTY MIDGET SOLDERING IRON — 12 VOLTS; 100 WATTS

Lightweight iron with high heat capacity for heavy soldering where larger irons, up to 200 watts, prove uneconomical for rapid repetitive soldering, such as production soldering of tuner chassis, tinware, can seams, etc.

Handle and Cordset — Two-conductor

6A210G61	
----------	--

Heater Unit — Ironclad

1/2" Chisel Tip	60 watts	6A211G54
1/2" Chisel Tip	80 watts	6A211G50
1/2" Chisel Tip	100 watts	6A211G33

Transformer for Mighty Midget — 115-volt primary

Four Tap — for 55/70/85/100 watts (115-volt primary, 12-volt secondary)	6A364G7
--	---------

†UL Listed.

6A160 SERIES SOLDERING IRONS — 120 VOLTS§, 75 TO 140 WATTS

Ideal for medium to heavy production, and maintenance and repair operations. Available with any of 12 different tips, calorized or ironclad.

Description	Cat. No.
Complete Iron Less Tip — Includes 6-foot two-conductor cordset	
75 Watts	6A161*
100 Watts	6A162*
110 Watts	6A162G6*
125 Watts	6A162G3*
140 Watts	6A162G12

Tips — Fit all irons listed above

LONG-LIFE SOLDERING TIPS OUTLAST COPPER TIPS UP TO 20 TO 1

DUROTHERM NON-FREEZING TIPS: Iron coated and immunized. Absolutely prevents tips from sticking. Minimum loss of heat delivery. YOUR SPECIAL TIPS QUOTED ON REQUEST FIT ALL MAKES

Note: Also available; XTRADUR Iron-coated Pretinned Tips. Multi-coated for extra long wear which immunizes shank of tip from solder, thus preventing adhering of solder, except on working surface of tip—prevents creeping and spilling of sold

LONGEST WEARING AND BEST PERFORMING TIP EVER PRODUCED

DUROTHERM COATING Bonded to Base Copper A—Heavy Iron Coat
B—Scale-Resistant C—Pretinned Section D—Multi-coated and immunized

HEXACON ELECTRIC COMPANY

YOUR SINGLE SOURCE FOR THE MOST COMPLETE LINE OF PRECISION ELECTRONIC ASSEMBLY TOOLS

LEAD BENDING GAUGE

Fast, accurate lead forming with perfect reliability... no nicks! Up to 1200 component leads per hour may be formed with the simple precise Hunter Gauge offered in 4 standard sizes. All models have 40 lead forming positions. Light-weight, high-impact, Cyclocac plastic.

Stock No.	Description	Price
51KL	¼ watt size, .375 to 1.50"	4.50
51KM	½ watt size, .050 to 1.50"	4.50
51KN	Set of 1 ea. 51KL and 51KM	9.00
51KP	1 watt size, .75 to 2.50"	5.63
51KQ	2 watt size, .875 to 2.50"	5.63
51KR	Set of 1 ea. 51KP and 51KQ	11.21

QUICK ADJUST VISE

Fully positionable, quick action vise, to meet the needs of the electronics/aerospace industry. Combination of vise, positioner, and cast iron base.

62E4 — Price 34.13 Net

Each unit is also available separately.

62E1 — Positioner only. Price — 12.00 Net

62E2-1 vise only. Price 14.40 Net

62E3 — Combination of positioner (62E1) and vise (62E2) only. Price 26.40 Net

62K3 — Cast iron base. Price 7.73 Net

PANA-VISE

Solves holding problems for small complicated assemblies. 62 — Complete with base and vertical head. Unit 8" high, 6" long, 5" wide. Pivots work 360 degrees in any tangent to half a sphere, achieves any compound angle. Price 17.30 Net

CIRCUIT TESTERS

Traces any circuit. 54 — dead or alive — to 600 volts A.C. or D.C. Signal light clearly visible in the tip at point of contact. Sturdy — pocket size — with plated brass parts; shock proof case. Price 4.98 Net

MAGIC TIP SCREWHOLDER

Holds screws tight when inserting or removing. Center pin grips screw tightly at slightest pressure.

"SMITTY" WRENCHES

Convenient, easy to use, gives the right key size when you want it.

1P4	— 6" handle, 5" blades.	⅜, ⅙, ⅝, ⅞, ⅝, ⅙.	Price 2.43 Net
1P5	— 4" handle, 2" blades.	⅜, ⅙, ⅝, ⅞, ⅝, ⅙.	Price 1.20 Net
1P6	— 3" handles, 2" blades.	.050, ⅙, ⅝, ⅞, ⅝, ⅙.	Price 1.16 Net
1P7	— 3" handle, 2" blades.	.050, ⅙, ⅝, ⅞, ⅝, ⅙.	Price 1.20 Net
1P8	— 4" handle, 3" blades.	⅜, ⅙, ⅝, ⅞, ⅝, ⅙.	Price 1.73 Net

THERMAL WIRE STRIPPER

Plier is 8" long, 1½" wide at tip, 2½" wide at handle, ⅞" thick with 36" cord. Plier stripper weighs only 8 oz., total unit weighs only 3 lbs. Ideal for research and development work.

80	— Standard control box, plier-type wire stripper.	Price 81.00 Net
80C	— Same as above but with heavy duty (3-wire) cord and grounds.	Price 85.28 Net
80A	— Replacement filaments for plier-type stripper.	Price 3.00 Net

"PLIKE" 4 IN 1 TOOL

Holds, Crimps, Cuts and Strips solid wire in gauges #12 thru #22 and stranded wire #14 thru #24.

55 — Plike, w/plastic grips and spring. Price 2.24 Net.

HUNTER SUB-MINIATURE TOOLS

K24M — Master set of sub-miniature tools consisting of jewelers handle, red plastic handle, wrench blades ⅜, ⅝, ⅞, ⅝, screwdriver blades .055, .070, .080, .100, Phillips blades #0, #1, awl, spline blades .033-4, .048-4, .048-6, .060-6, .069-4, nut driver blades ⅜, ⅝, ⅞, ⅞, ⅝, and hex key blades .028, .035, .050, ⅙, ⅝.

HUNTER EREMADIUM CUTTERS

These specially tempered eremadium cutting edges are designed for cutting newer wires containing nickel, iron, etc., up to 22 gauge wire. The most popular are the cutters with full flush or semi-flush cutting edges, lasting 3 to 5 times longer.

A95E — Full flush cut plier 4" long, designed to cut 22 gauge wire or less. Price 5.42 Net

A95EL — Same as A95 only with leaf spring. Price 5.72 Net

A97E — Semi-flush cut plier 4" long, designed to cut 22 gauge wire or less. Price 4.55 Net

A97EL — Same as A97E only with leaf spring. Price 4.85 Net

A88E — Tape Jaw Dyke 4¾" long for No. 20-22 gauge wire. Semi-flush cut. Price 5.67 Net

A88EL — Same as an A88E only with leaf spring. Price 5.97 Net

EREMADIUM
CHROME VANADIUM STEEL

HUNTER TIP-O-DYKE

Special precise full flush cutting instruments that will cut flat, soft nickel ribbon wire and increase reliability. Cuts at tip with perfect angle.

A90E — 4¾" overall, 22 gauge AS copper wire. Price 11.16 Net.

A90EL — Same as an A90E only with leaf spring. Price 11.43 Net.

EREMADIUM
CHROME VANADIUM STEEL

HUNTER PLIERS

A11 — 4¾" narrow chain nose. Smooth jaws, radius edges will not mar wire. Price 3.74 Net

A11L — Same as A11 only with leaf spring. Price 4.04 Net

A14-4½" - A14-8" - Extra long needle nose, 4½". Optional: edges will not mar wire. 6". Radius edges. Price 4.20, 6" Price 4.70.

A14L-4½" - A14L-8" - Same as an A14-4½" only with leaf spring. Price 4.62, 6" 5.00

HUNTER NIPPER

CHROME PLATED STEEL

F213 — Straight Blade nipper, 4½" long. Designed to be held in palm of hand and keep fingers free for use. Price 2.63 Net

F213A — Same as an F213 only heavy duty. Price 2.97 Net

F214 — Same as an F213 only with curved blades. Price 2.85 Net

HUNTER SCISSORS

NICKEL PLATED STEEL

F299 — Straight blade electronic shear. 5" long. Price 2.33 Net

HUNTER SCISSOR CLAMPS

STAINLESS STEEL

F35 — Straight end scissor clamp, 5" long. Precision box joint, fine serrated jaws. Lock, opens easily. Cushion-grip handles. Price 4.80 Net

F36 — Same as an F35, only with curved end. Price 4.80 Net

HUNTER SOLDERING IRON & TIPS

S4725 — 720° iron with ⅜" copper tip. Price 3.32 Net

3/16" SCREWDRIVER	1/8" SCREWDRIVER (Heavy Duty)	1/8" PYRAMID
S13C — Screwdriver type ⅜" copper tip.	Price .36 Net	
S14C — Pyramid type ⅜" copper tip.	Price .36	
S25C — Screwdriver type heavy duty ⅜" copper tip.	Price .36 Net	

HUNTER HEAT SINKS

Absorbs and dissipates heat instantly during soldering — protects delicate components.

S16 — Small model for delicate work. 1¼-ins. long. Coated plastic handle. Tweezer nose. Price .56 Net

S1F — Medium Duty Unit. Plastic coated handles. Fed. Stock No. 3439-856-9497. Price .69 Net

S1E — Heavy Duty. Has copper jaw. Plastic covered handle. Fed. Stock No. 3439-856-9496. Price .72 Net

HUNTER SOLDERING AIDS

Blades of non-magnetic steel to which solder won't adhere. Turquoise plastic handle, hex shaped, won't roll off table.

REGULAR MODELS

S1	— Fork & Hook. Overall length 7"; hex handle size ⅝" x 3"; blade size ⅝" x 2".	Price .90
S1A	— Fork & Brush. Overall length 7"; hex handle size ⅝" x 3"; blade size ⅝" x 2".	Price .90
S1B	— Knife & Brush. Overall length 7"; hex handle size ⅝" x 3"; blade size ⅝" x 2".	Price .90
S1C	— Fork & Reamer. Overall length 7"; hex handle size ⅝" x 3"; blade size ⅝" x 2".	Price .90

MICRO MODELS

S1C1	— Fork & Hook. Overall length 6"; hex handle size ⅝" x 3"; blade size ⅝" x 1½".	Price .90
S1C2	— Fork & Reamer. Overall length 6"; hex handle size ⅝" x 3"; blade size ⅝" x 1½".	Price .90

RELAY & ELECTRONIC TOOLS

RELAY SPRING ADJUSTING TOOLS

(H) All tools made of high carbon steel, plated and polished, heat treated and tempered to exact requirements. Insulated handles for work on live equipment.

- (A) SA-2 Offset type, 6½" long, saw slot both ends .032" \$2.98
 (B) SA-6A Cross & lengthwise slots, 5½" long. Slot .030" \$2.95
 (C) SA-7 One end saw slot straight 4½" long. Slot .015" \$1.75
 (D) SA-8 Heavy duty. Round head, 4½" long. Cross slot .045" \$2.98
 (E) SA-16 Offset type 6½" long, saw slot both ends .018" \$3.28
 (F) SA-17 Offset slim type. Saw slot both ends .023" 8" long \$3.84

- (G) SA-20 Opposite-faced thin headed slots. 7" long Slots .022" \$2.98
 (H) SA-24 Crosswise slots. 5½" long, Slots .040 & .028" \$2.98
 (I) SA-25 Angled, 6½" long. Saw slot .032" \$2.98
 (J) SA-143 Bent, 8" long, Saw slot .025" \$2.98
 (K) SA-163 Straight driver type, 5½" long, cross slot .038" \$2.98
 (L) SA-175 Closely set saw slot, 5¼" long, slot .031" \$2.98

RELAY & INSTRUMENT TOOLS

- (M) AB-21 Adjuster, Armature, 4" long, slot width each end .110" \$1.88
 (N) AB-20 Adjuster, Armature, 3 slots .114" \$1.98
 (O) SB-22 Adjuster, Armature stop, 5" long, slots .032" \$1.98
 (P) S-187 Adjuster, double dog, 4" long, slot both ends .3/32" \$2.14
 (Q) S-201 Adjuster, aid spring, 4¼" long, slot both ends .034" \$3.18
 (R) J-34 Adjuster, pole piece, 3" long \$1.68
 (S) FW-24 Hex wrench, double end, with screw driver, 4¾" long, ½" and ¼" hexagon \$3.10

- (T) J-23 Screwdriver, guide pin 4½" long \$2.98
 (U) T-255 Angled thickness gauge, 9 blades .009" to .026" \$2.98
 (V) BC-23 Bank cleaner, abrasive surface 1½" dia. 6" long \$2.98
 (W) S-457 Wire & spring aid, bent 30° opposite ends, 5½" long \$2.98
 (X) PL-8 Spring duck bill plier, 5½" long \$2.98
 (Y) WB-65 Nickel silver wire brush, 9" long \$2.98
 (Z) HB-75 Curved hair brush. Radius 1¾". Length 8" \$2.98

SPRING TENSION GAUGES (YY)

Precision-made to accurately determine the setting, testing and adjusting of relay spring tension and other delicate electronic tensioned movable components.

- | | | | | | |
|------|------------|--------|-------|---------------------|--------|
| G-10 | 0-10 grams | \$7.48 | GP-50 | 0-50 grams (preset) | \$7.48 |

DYNAMOMETERS (ZZ)

- Dial gauges to determine force required to actuate delicate mechanisms.
- | | | | |
|----------------------------------|--------|----------------|---------|
| • Spring tension indicator | GD-5 | 5-50 grams | \$13.00 |
| • Verification of contact blades | GD-15 | 15-150 grams | \$13.00 |
| • Stylus pressure gauge | GD-100 | 100-1000 grams | \$21.00 |

MASTER 15-PIECE RELAY TOOL KIT

Precision-made and professionally-designed group of new tools for adjusting and maintaining relays, contactors, switches, controls, and other components for the telecommunication and electronic industries. Packed in Deluxe zippered leather case for protection of tools.

Kit contains: 2 spring adjusters, tension & thickness gauges, Duck Bill plier, Screw Driver, Tweezer, Mirror, 4-way Tool, Brush, Armature & Stop Benders, Contact Spray, Contact Burnisher. **KIT K-55 \$37.60**

Kit KR-6 Compact Relay Kit, leather case (not illustrated) \$22.00

TOOL KITS

Designed for assembly, service and repair. High quality tools were specially produced for serving, adjusting, trouble-shooting, of complex equipment and assembly work. Kit comes in durable leather zippered case for easy portability. Set contains Chain Nose, Groove Grip and Diagonal cutting pliers. Standard and Phillips screwdrivers, Magnifier, Soldering iron, Straight and Bent Nose tweezers, Solder aid, Alignment tool, 2 Needle files, Pin vise, Solder Core, 3/16" and 1/4" Nut drivers, 2 jewelers screwdrivers, Pen Burnisher with 12 blades. **KIT K-600 Price \$32.90**

Kit KE-7 Compact Electronic Set, vinyl case (not illustrated) \$12.90

MASTER 20-PIECE ELECTRONIC TOOL SET

RELAY & CONTACT BURNISHERS

DIAMOND BURNISHERS

Exclusive Features:

- Strong abrasive power
- Long lasting

Consists of abrasive Diamond particles - Developed for any type contacts: Silver, Platinum, Gold, Palladium, Tungsten, Molybdenum - Length 5/8" - Diamond coated face 1" x ¼" - Nylon Shaft - Three types to meet every application: Type 200 (coarse) for Industrial Relays - Type 300 (medium) for Intermediate and Telephone relays - Type 400 (fine) for Sensitive Relays.

K-234 Set of 3 \$14.85
 Individual spatulas and Kits packaged in rigid plastic boxes.

- | | | |
|-------|-----------------|--------|
| D-200 | Shaft green .. | \$4.95 |
| D-300 | Shaft red .. | \$4.95 |
| D-400 | Shaft blue | \$4.95 |

POCKET-TYPE BURNISHERS

Handy, lightweight tool with replaceable blades, adjustable for length and rigidity. For any type contacts, of any precious metal. Contact burnisher leaves no grit or dust on contact. Hard-tempered steel blades for minimum contact wear. Rust proof, with chrome plated barrel and pocket clip, aluminum chuck. Clear plastic cap for use with "live" contacts. Overall length, 5½". dia. ⅜".

- | | | |
|--|---------------|--------|
| P-4 Pen—With 12 RB4 Blades. | Net Each..... | \$3.90 |
| P-6 Pen—With 12 RB6 Blades. | Net Each..... | 3.90 |

550 Watts	550°	600°	650°	700°	750°	875°	1050°

Model FHT-1 with shield and switch \$89.50.

Model FHT-3 with shield only \$79.00.

Model FHT-2 with switch only \$85.50.

Model FHT-4 with no switch or shield \$75.00.

Weights a mere 1 lb. Handles easily.

Pinpoints heat in small areas at any selected pressure. Lets you hold temperature plus or minus 1°. Works off conventional air compressors, small motor driven compressors or inert gas. Has a molded handle, all stainless steel barrel. Comes with 10' contaminate-proof hose. Welds PVC's, polypropylenes, polyethylenes. Extra welding tips and carrying case available as optional equipment.

Specify heat torch Model No., voltage and 120 or 230 voltage when ordering. Add \$2.00 to price for 230 V Models.

WHY INDUSTRY LEADERS EVERYWHERE SPECIFY MASTER FLAMELESS HEAT TOOLS

The reason is simple. Master Appliance Corporation pioneered flameless heat tool development. So it's natural that they know more about designing and building quality heat tools than any other manufacturer. In short, people who want the best insist on Master capacity, performance and trouble-free dependability. Isn't it time you found out for yourself!

AVAILABLE AT LEADING DISTRIBUTORS

Moody® PRECISION HAND TOOLS

Screw Driver & Awl Set

Contains four interchangeable screw driver blades and an awl. Complete with swivel top, knurled chuck type handle.

Sizes .055", .070", .080",
.100", awl

Cat. No. SC-5 List \$1.75

Socket Wrench Set

Five interchangeable box or socket wrenches that fit the same magnetic handle. Thread sizes #00, #0, #1.

Sizes (all hex) 5/64", 3/32",
7/64", 1/8", 5/32"

Cat. No. BW-5 List \$3.95

Offset Open End Wrench Set

Contains five offset open end wrenches, interchangeable in the chuck handle.

Sizes 5/64", 3/32", 7/64",
1/8", 5/32"

Cat. No. OE-5 List \$2.50

Tap Drill Set

Contains five tap drills. Handle has a solid-locking chuck-nose and swivel-top. A companion piece to the Moody TS-5 Tap Set.

Drill Sizes 3/64", #53, #50,
#47, #43

Cat. No. 70 List \$3.50

Cross Recessed Driver & Allen Type Wrench Set

Contains five interchangeable tools with chuck-type, swivel top handle. A torque hole in the handle enables fastenings to be set up tight.

Cross recessed drivers #0, #1
Allen type wrenches #4, #6, #8

Cat. No. PA-5 List \$2.50

Tap Set

Contains five interchangeable taps and handle for cutting inside threads. Torque hole in handle enables you to maintain a steady firm leverage.

Tap Sizes 0-80, 1-72, 2-56
3-48, 4-40

Cat. No. TS-5 List \$6.95

Utility Screw Driver Set

Consists of a precision screw driver and six interchangeable blades. The screw driver handle is knurled for positive gripping.

Sizes .025", .040", .055",
.070", .080", .100"

Cat. No. 52 List \$2.50

Machinist Scriber

Approximately 8½" overall with a right angle point and a straight point, both properly tapered and swaged into a knurled aluminum finger grip handle.

Cat. No. MS-2

List \$.75

Moody Master Kit

A popular compact kit of six tool sets, stored in a leatherette case. Contains Screw Driver & Awl Set, Cross Recessed Driver & Allen Type Wrench Set, Socket Wrench Set, Offset Open End Wrench Set, Tap Drill Set, Tap Set.

Cat. No. MMK-6 List \$22.95

Moody® MACHINE PRODUCTS CO., INC.

ERSIN**Multicore****5-core wire rosin solder**Available in 1-lb.
and 7-lb. reels**This is no
ordinary
solder!****ONLY ERSIN MULTICORE 5-CORE SOLDER IS MADE THIS WAY**

These illustrations show the construction of ERSIN Multicore 5-Core Solder. Multicore solder is made only from pure virgin metals (1) with 5 cores of exclusive extra-active, non-corrosive ERSIN Flux (2). Multicore's special manufacturing process locates the 5 cores of ERSIN Flux close to each other and at the perim-

eter, so that there is only an ultra-thin wall of solder between the cores of flux and the work (3). This unique core configuration (4) also keeps the flux near the heat source, to melt faster—wet the metal more effectively. This enables ERSIN Multicore solder to produce the consistently reliable joints for which it is known.

Conforms to Federal Specification QQ-S-571

**EXCLUSIVE PACKAGING
IN POLYSTYRENE AND
SKIN-WRAP FOR UTMOST
PROTECTION IN
SHIPPING AND STORAGE**

**STANDARD TIN/LEAD
ALLOYS AND GAUGES**

Available from stock: 63/37; 60/40; 50/50; 40/60; Savbit; Special Alloys—H.M.P. (High Melting Point, 565° F.); L.M.P. (Low Melting Point, 354° F.). Other alloys upon request.

Gauges: 14 s.w.g. (.080") through 24 s.w.g. (.022"). NOTE: Soldering iron tips should always be 108° F. above melting point of alloy.

NEEDLE FINE GAUGES

For microminiaturization, integrated circuits and other similar requirements. Off-the-shelf delivery in alloys 63/37 and 60/40, in even gauges from 28 s.w.g. (.014") through 34 s.w.g. (.009").

**COPPER LOADED
SAVBIT ALLOY**

Copper-loaded SAVBIT stops the wear and erosion of copper soldering iron tips...increases tip life by 1,000%.

Characteristics and specifications: Savbit Alloy is available in ERSIN Multicore 5-core solder containing non-corrosive extra-fast ERSIN Flux in 14, 16, 18, 20, 22 and 24 gauge. Melting point: Virtually the same as standard tin/lead alloys. Excellent conductivity, tensile and shear strength.

HIGH PURITY EXTRUDED BAR SOLDER

The same superior quality solder as in Multicore 5-Core Wire Rosin solder. Highest purity is achieved by advanced quality control, possible only with the Extrusion process. Extreme uniformity and smooth texture, without the cross-graining of cast bars. Virgin metals. Conforms to Federal Specification QQ-S-571d with respect to alloy composition in Sn60 (60/40), Sn63 (63/37), and Sn50 (50/50). Skin wrapped for distributors; bulk-packed for manufacturers. Also, low antimony "EXTRUSOL" Commercial Bar Solder—bulk packed.

ERSIN LIQUID FLUXES

Made to the high quality standards of ERSIN Multicore. Three formulas. No. 5380 meets Military Specification MIL-F-14256C, Type A (Activated). No. 0360 meets Military Specification MIL-F-14256C, Type W (Non-activated). Other commercial liquid fluxes available such as: No. 4370 highly activated commercial flux. Foam, water soluble, protective coatings and cleaners upon request.

**NEW
SOLDERABILITY
TEST MACHINE**

A precision instrument to determine the solderability of component termination wires that operates on a principle entirely different from, and superior to, the immersion method—electronic digital timing. Accurate, positive, totally reliable, yet economical because no technician is needed to operate it, and tests are run with great rapidity. Developed in association with I.E.C. Built in England by Multicore Solders, Ltd. Complies with I.E.C. Publication 68-2 Test T. Descriptive literature available on request.

FREE evaluation test samples, "Modern Solders" technical booklet, and fully detailed information on any of these products will

be sent promptly. Address request, on company letterhead, to: Multicore Sales Corp.

MULTICORE SALES CORP.**Div. British Industries Co.**

ORYX

PRECISION SOLDERING EQUIPMENT

WHY PRODUCTION MANAGERS CHOOSE ORYX SOLDERING IRONS

1. MINIATURE SIZE

ORYX soldering irons are small and easy to handle as pencils. Their miniature size helps to speed any precision soldering operation. Damage to adjacent components is eliminated. If you can see it, you can solder it with ORYX!

2. FEATHER WEIGHT

A standard, utility-type 100 watt soldering iron weighs about 2 lbs. The so-called pencil-type irons typically weigh between 2 and 6 ounces. ORYX soldering irons, by contrast, weigh as little as 1/4 ounce. This true feather weight virtually eliminates hand fatigue. Workers can turn out many more joints per hour with fewer rejects.

3. HIGH EFFICIENCY

All ORYX soldering irons utilize a unique element-in-the-tip design principle. By generating the heat within the tip, far fewer watts are needed to achieve results comparable to much larger irons. This principle also provides quicker heat recovery because the heat path between element and joint is so very short. The need for large insulating handles is eliminated.

LOW-VOLTAGE SOLDERING IRONS

MODEL 5-S—(As shown in photograph). Eyepiece model less than 5" long, for precise finger control. Weighs 7 grams. Nominal temperature 575°F. Furnished with 1/16" S tip. Also takes T tip. 4.5-volts, 4.5-watts (Use 54204-T tapped transformer for 4.5 volts)Net \$5.95

MODEL 6A—The most popular Oryx soldering iron. Designed for printed circuit soldering. Weighs only 1/4 oz. Nominal temperature 690°F. Furnished with 3/32" removable B tip. Also takes other tips listed below. 6-volts, 6-watts. Net \$5.95

MODEL 9-6—Similar to model 6A, but greater heat capacity. Weighs 1/4 ounce. Nominal temperature 750°F. Furnished with 3/32" A tip. Also takes B tip. 6-volts, 3.3 watts\$5.95

MODEL 11-6—Special model for high-temperature solders. Temperature 835°F. Weighs 1/4 oz. Furnished with 3/32" solid nickel E tip. Nickel tip provides long life at high temperatures. 6-volts, 10-wattsNet \$7.45

TRANSFORMER

for low-voltage soldering irons.

TAPPED TRANSFORMER—Output 4 1/2 to 6-volts in 1/2 v. steps. For exact temperature control on all ORYX 6-volt tools. Operates on 115 V. AC—ready to plug in. Model 54204-TNet \$7.80 ea.

ORYX-TELVAC tools available from distributors everywhere. Ask for complete catalog.

TELVAC

LABORATORY TOOLS / APPARATUS

VACUUM TWEEZER SYSTEM

This new parts-handling system positively and precisely lifts parts varying in size from microscopic to those weighing several ounces. Parts are handled without damage or contamination. Defects caused by pinching, scratching, or marring are eliminated. Critical surfaces are protected. Vacuum is turned on and off with forefinger. For 115 V. A.C. Complete system, ready to plug in.

Complete System K-150

Net ea.

\$36.50

"IN-CIRCUIT" TRANSISTOR TESTER

A new test instrument for the circuit designer or test technician. Makes rapid "go-no-go" evaluations of semiconductors while they are still in the circuit. Checks cut-off and conduction on PNP and NPN transistors and diodes without the need for costly unsoldering. To use, the operator sets the selector switch to NPN or PNP. He then presses the tester's sharp spring-loaded pins (arranged in TO-5 configuration) against the transistor's printed circuit connections. Open and shorted transistors are readily identified by noting the condition of the tester's pilot light. Diodes and unsoldered transistors are similarly tested using a set of extending leads and clips. An optional 7-position diode adapter may be used to test diodes in the circuit. Furnished complete with extending leads and alkaline battery, ready to operate.

MODEL SC-4 TESTERNet \$74.50 ea.

MODEL 1330 DIODE ADAPTERNet 19.50 ea.

INSTRUMENT REPAIR KIT

A 35-piece kit of fine precision tools for the instrument shop or laboratory. Includes miniature soldering iron, taper-jaw diagonal cutter, needle-nose plier, precision screwdriver kit, tiny stub-nose scissors, eye loupe, needle-file set, 11-piece knife set, hex wrench set, spline-key set, soldering aid set, and a precision Dumont-type tweezer.

MODEL K-50.....Net \$57.50

NEEDLE FILES

Precision Swiss needle files with vinyl cushion finger grips.

Set of 8 precision Telvac files in plastic case. No. 3 cut.

Cat. No. 2000 (4" styles)Net \$5.95 ea.

Cat. No. 2100 (6 1/4" styles)Net 7.95 ea.

WIRE STRIPPERS

Unique wire-stripping pliers for wires #8 through #24. Just squeeze and pull! T-52 has 11 narrow cutting blades that close in around the wire to automatically provide the correct stripper opening and cutting tension. No operator adjustments required when changing from one wire size to another! T-22 is set to required wire size by operator. Tool steel heads have razor-sharp edges. Both models have red vinyl cushion handle grips.

T-52Net \$7.95 ea.

T-22Net \$4.45 ea.

NEW UNGAR "STANDARD" LINE SOLID STATE SOLDER GUN

Designed for damage-free soldering of sensitive semiconductor devices by servicemen, lab technicians and electronics hobbyists. For replacement purposes, soldering tips are independent of the heat cartridge. Tip is electrically isolated from the heating element with a grounded 3-wire cord set. Heat cartridge locks into the gun barrel by means of a knurled nut; loosening the nut allows rotation of the entire cartridge to orient the threaded-on tips to any desired position. All basic parts are separately replaceable. Unit has a power indicator lamp. A HI-LO dual-heat selector switch allows a choice of 500°F or 900°F tip temperature range. Complete unit comes with heat cartridge, three interchangeable tellurium copper soldering tips, and 3 wire cord with NEMA plug. Weight, 5 oz. less line cord.

*Has .250" diameter.

Soldering Tools

6103
Cord Set

6100 Handle

Interchangeable cord sets, tips and heat cartridges ideal for critical micro-miniature components. Reliable, low wattage, high temperature performance. Perma-Cool handle has double cushion of air combined to 5 heat-transition surfaces for continuous cooling. Components individually packaged on cards; assemble to suit your needs. **Not interchangeable with "Standard Line".**

PERMA-COOL COLORED HANDLES

Available in three, cool, pastel colors (plus black) proven to reduce operator fatigue. Virtually indestructible, handles are made of high strength plastic resin. Diecast heat sink built-in. Pencil type design for easy handling. U/L Listed. Size, 0.8" O.D. at grip; 4.7" lg. Weight, 1 oz.

Ungar No. 6100-1 (Turquoise), 6100-2 (Beige), 6100-3 (Ivory) or 6100-5 (Black)—Handle only. Net Each, 1-9.....\$1.52

RATCHET DRIVERS QUALITY FASTENERS

VACO POW'RIVETS . . . the blind rivet for foolproof fastening every time

Step 1 Step 2 Step 3

THERE IS A DIFFERENCE! Only Vaco Pow'Rivets adapt to hole size variance, and pull up snug regardless of material thickness. That's why 4 sizes do the job of 11 ordinary rivets. Three step illustration at left shows unique "bubble action" sequence which assures positive, goof-proof fastening every time.

Illustration	Stock No.	Dia. "D"	Length "L"	Grip Range	Head Dia. "HD"	Head Ht. "HH"	Hole Size	Drill

QUALITY PROFESSIONAL TOOLS

SERIES "99" SERVICE KITS, BLADES, AND HANDLES

No. 99MP MULTI-PURPOSE TOOL KIT **List \$47.25**
3-piece kit contains 99-1 (Regular) and 99-4 (Tee) handles, ten regular nutdrivers (99-5 thru 99-16), nine Allen Hex type screwdrivers (99-20, 99-21, 99-22, 99-23, 99-24, 99-25, 99-26), nine Bristol Multiple Spline screwdrivers (99-61 thru 99-69), three slotted screwdrivers (99-811, 99-250, 99-312), two Phillips screwdrivers (99-821, 99-822), two reamers (99-38, 99-39), awl/scriber (99-70), extension blade (99-X5).

99MPK, Canvas case only.....List \$5.45

No. 99SM SERVICE MASTER **List \$44.75**
3-piece kit contains 99-1 (Regular) and 99-3 (Stubby) handles, nine regular and three stubby nutdrivers (99-6 thru 99-16), two slotted screwdrivers (99-811, 99-812), one Phillips screwdriver (99-821), two reamers (99-38, 99-39), extension blade (99-X10), 6" long nose cushion grip plier (52CG), 5" diagonal cushion grip plier (55CG), 6" adjustable wrench (46C).

99SMK, Canvas case only.....List \$4.75

ROLL KITS

No. 99PR ROLL KIT **List \$15.70**

Contains nine regular nutdrivers (99-6 thru 99-16), 99-811 and 99-250 (slotted) and 99-821 and Phillips) screwdriver blades, 99-1 handle (Regular).

99PRK, Kit only.....List \$1.75

No. 99JR ROLL KIT **List \$13.80**
Contains seven regular nutdrivers (99-6 thru 99-12), four screwdriver blades 99-811 and 99-812 (Slotted), and 99-821 and 99-822 (Phillips), 99-2 handle (Junior).

99JRK, Kit only.....List \$1.75

No. 99LN ROLL KIT **List \$7.45**

Contains six Allen type screwdriver blades (99-21, 22, 23, 24, 25, 26) and 99-1 handle (Regular).

No. 99-30 CLEAR PLASTIC POUCH **List \$5.40**
Heat sealed plastic snap case with size numbers on pockets for convenient selecting and storing. Contains six Allen type screwdriver blades (99-21, 22, 23, 24, 25 and 26).

PLASTIC VIEW KITS

No. 99SL **List \$6.25**

Contains five Scrulox® screwdriver blades for square recess screws (SL 00, 0, 1, 2, 3), 99-1 handle (Regular).

No. 99PV4 **List \$4.45**

Contains three slotted screwdriver blades (99-811, 99-250, 99-312), 99-1 handle (Regular).

No. 99PV6 **List \$6.25**

Contains three slotted screwdriver blades (99-811, 99-250, 99-312), two Phillips screwdriver blades (99-821, 99-822), 99-1 handle (Regular).

Handles: 99-1 Regular (1 1/8" x 4 1/8") — for all blades, single-end and reversible **1.20**
99-2 Junior (1" x 3 3/8") — for single-end blades only **1.10**
99-3 Stubby (1 1/8" x 2") — for single-end blades only **1.05**
99-4 Tee (1" x 3 3/8") — for single-end blades only **1.60**

Nutdriver Blades: 99-5 (5/32"), 99-6 (3/16"), 99-7 (7/32"), 99-8 (1/4"), 99-9 (9/32"), 99-10 (5/16"), 99-11 (11/32"), 99-12 (3/8") **1.95**
99-14 (7/16"), 99-16 (1/2") **1.30**

Stubby Nutdriver Blades: 99-S8, 99-S10, 99-S12 **.85**

Allen Hex Type Screwdriver Blades: 99-20 (.050"), 99-21 (1/16"), 99-22 (3/64"), 99-23 (3/32"), 99-764 (7/64"), 99-24 (1/8"), 99-964 (9/64"), 99-25 (5/32"), 99-26 (3/16") **.95**

Bristol Multiple-Spline Type Screwdriver Blades: 99-61 (.048", 6-flute), 99-62 (.060", 6-flute), 99-63 (.069", 4-flute), 99-64 (.072", 6-flute), 99-65 (.076", 4-flute), 99-66 (.096", 6-flute), 99-67 (.111", 6-flute), 99-68 (.145", 6-flute), 99-69 (.183", 6-flute) **.95**

Frearson and Clutch Head Reversible Screwdriver Blades:

99-83 Frearson (3/16" and 5/32") **1.75**

99-84 Clutch Head (3/16" G and 5/32" G) **1.75**

Slotted Screwdriver Blades: 99-811 (3/16"), 99-250 (1/4"), 99-312 (5/8") **1.05**

Phillips Screwdriver Blades: 99-821 (#1), 99-822 (#2) **1.05**

Scrulox Screwdriver Blades: 99SL-00 (#00), 99SL-0 (#0), 99SL-1 (#1), 99SL-2 (#2), 99SL-3 (#3) **1.05**

Awl/Scriber: 99-70 (4 1/2" overall length) **1.00**

Reamers: 99-38 (1/8" - 3/8") **2.63**
99-39 (1/4" - 1/2") **3.38**

Extension Blades:
99-X5 (adds 4" reach to single-end blades) **1.55**
99-X10 (adds 7" reach to single-end blades) **1.60**

COMPACT SETS

Series "99" Sets

Each set contains a Series "99" regular handle and various Series "99" interchangeable blades and extension. See-thru plastic case is pocket size, has flat base that permits its use as a bench stand.

No. 99PS-40 ALLEN HEX TYPE SCREWDRIVER SET

Includes nine Allen Hex type screwdriver blades (99-20 thru 99-26), 99-X5 extension blade, 99-1 handle, and see-thru case.

List \$11.88

No. 99PS-42BR BERYLLIUM-COPPER ALLEN HEX TYPE SCREWDRIVER SET

Includes nine beryllium-copper Allen Hex type screwdriver blades (same sizes as 99-20 thru 99-26), handle with brass spring chuck, and see-thru case.

List \$17.25

No. 99PS-41MM METRIC ALLEN HEX TYPE SCREWDRIVER SET

Includes seven metric Allen Hex type blades (mm sizes 1.27, 1.5, 2, 2.5, 3, 4, 5), 99-X5 extension blade, 99-1 handle, and see-thru case.

List \$11.25

No. 99-PS50 NUTDRIVER/SCREWDRIVER SET

Includes seven regular nutdriver blades (99-6 thru 99-12), two slot tip screwdriver blades (99-811 and 99-812), two Phillips screwdriver blades (99-821 and 99-822), 99-X5 extension blade, 99-1 handle, and see-thru case.

List \$14.88

No. 99PS-51MM METRIC NUTDRIVER SET

Includes ten metric nutdriver blades (mm sizes 4, 4.5, 5, 5.5, 6, 7, 8, 9, 10, 11), 99-X5 extension blade, 99-1 handle, and see-thru case.

List \$14.38

No. 99PS-60 BRISTOL MULTIPLE-SPLINE TYPE SCREWDRIVER SET

Includes nine Bristol Multiple-Spline type screwdriver blades (99-61 thru 99-69), 99-X5 extension blade, 99-1 handle, and see-thru case.

List 11.88

No. 150 TOOL HOLSTER

Has tape holder, knife clip, and 5 tool pockets. Durably made of pliable saddle leather with natural cowhide finish. Features comfortable hip-contoured back, hot-waxed stitching, and brass rivets..

List \$6.90

Convertible Nutdriver and Screwdriver Sets

Black plastic torque amplifier handle (1" x 3 1/8") slips over handle of pocket size (3 1/2") nutdrivers and screwdrivers . . . provides large grip, extends reach and increases driving power to that of standard size tools. See-thru plastic case fits pocket, stands upright on bench.

No. PS7 NUTDRIVER/SCREWDRIVER SET

Contains two nutdrivers (1/4" and 5/16"), two slot tip screwdrivers (3/32" and 1/8"), two Phillips screwdrivers (#0 and #1), hollow handle, and case.

List \$6.88

No. PS44 SCRULOX SCREWDRIVER SET

Includes five Scrulox screwdrivers (#1 thru #14), one nutdriver (1/4"), hollow handle, and case.

List \$6.88

No. PS88 SCREWDRIVER SET

Contains five slot tip screwdrivers (3/32", 1/8", 5/32", 3/16", 1/4"), three Phillips screwdrivers (#0, #1, #2), hollow handle, and case.

List \$7.00

No. PS120 NUTDRIVER SET

Contains ten color coded nutdrivers (3/32" thru 3/8"), hollow handle, and case.

List \$9.75

No. PS89 ALLEN HEX TYPE SCREWDRIVER SET

Contains eight Allen hex type screwdrivers (hex sizes .028", .035", .050", 1/16", 5/64", 3/32", 1/8", 1/4"), hollow handle, and case.

List \$7.25

No. HSC-1 INTERCHANEABLE HOLLOW SHAFT NUTDRIVER SET

Contains special thru-drilled handle and eight interchangeable hollow nutdriver shafts in 3/16", 1/4", 5/16", 11/32", 3/8", 7/16", 1/2", 9/16" hex sizes. Screwdriver blade may be run down through center of handle and hollow nutdriver shaft to make combination locknut/slotted screw adjustments.

List \$14.75

No. K22 ELECTRICIAN'S KNIFE

Two blades. One is combination insulation-scraper and screwdriver. Has positive lock when open

List \$3.70

QUALITY PROFESSIONAL TOOLS

COMBINATION-REVERSIBLE BLADE SCREWDRIVERS AND KITS

AISI 6150 chrome vanadium steel blades. Shockproof, breakproof, plastic (UL) handles.
Patented spring holds blades securely. $\frac{1}{16}$ " hex opening doubles as a nutdriver.

33H—5" Curved Nose	6.40

Weller industrial soldering tools

for greater efficiency... lower operating costs and maximum safety

CONTROLLED OUTPUT SOLDERING TOOLS...

Automatically controls output and temperature independent of line voltage.

MODEL WTCPL

MODEL WTCPL. Controlled output low voltage soldering with power unit isolated for protection of sensitive devices. Temperatures of 500°F., 600°F. and 700°F. are predetermined by tip selection. Cord set will not burn. Stand will not heat sink. Built-in on/off switch and pilot light. 60W, 120V, 3 wire cord. Comes with 3/16", 700°F. screwdriver tip. New cool blue color. Also available without built-in on/off switch and pilot light as MODEL WTCP.

MODEL WTCP

MODEL WMCP. Weller's new "MINI-TOOL" for micro-soldering, automatically controls output and temperature with power unit isolated and shielded for protection of sensitive devices. Has fixed temperature, interchangeable tips, low voltage operation, built-in on/off switch and pilot light. Available in 3 temperature ranges; WMCP... 650°F., WMCP-1... 550°F., WMCP-2... 750°F. control 20W, 120V, 50/60 Hz. 3 wire cord. Comes with 1/8" chisel tip. New cool blue color.

MODEL WMCP

MODEL W60. Low cost, portable, line voltage operation. Automatic control of output and temperature 60W, 2 wire cord. Comes with 700°F., 1/4" screwdriver tip. Model W60-3, 3 wire cord set. New cool blue color. For complete station order PH60 stand.

MODEL W60

MODEL W100. Low cost, portable, line voltage operation. Automatic control of output and temperature. 100W, 2 wire cord. Comes with 700°F., 3/8" screwdriver tip. Model W100-3, 3 wire cord set. New cool blue color. For complete station order PH100 stand.

MODEL W100

MODEL W200. Low cost, portable, line voltage operation. Automatic control of output and temperature. 200W, 2 wire cord. Comes with 700°F., 1/2" chisel tip. Model W200-3, 3 wire cord set. New cool blue color.

MODEL W200

UNCONTROLLED SOLDERING TOOLS...

For lowest cost soldering operations not requiring high efficiency tool.

MODEL W30

MODEL W30. Uncontrolled line voltage soldering tool. All stainless steel construction, 30W, 120V, 2 wire cord, with 1/4" screwdriver tip. New cool blue color. Model W30-3, 3 wire cord set.

MODEL W50

MODEL W50. Uncontrolled line voltage soldering tool. All stainless steel construction. 50W, 120V, 2 wire cord, with 3/8" screwdriver tip. New cool blue color. Model W30-3, 3 wire cord set.

SOLDERING TOOLS STANDS...

Have heavy cast iron bases and built-in sponge holder. Design precludes any possible heat sinking of Weller controlled tools. New cool blue color.

MODEL PH60

MODEL PH60. Accommodates Weller Models W30, W60, and any soldering tool with a barrel diameter up to 15/32".

MODEL PH100

MODEL PH100. Accommodates Weller Models W50, W100 and any soldering tool with a barrel diameter up to 19/32".

TIPS AND ACCESSORIES

All Weller Industrial Soldering Tips have unique heavy iron plating with anti-oxidation coating thereby eliminating freezing. No other tip offers these features.

A complete line of Weller Accessories is available to greatly extend the effectiveness of Weller Soldering Tools.

Weller® Dual Heat Soldering Guns

The original and most widely used guns with features that are still unmatched

3 Dual Heat Models

Model 8200—100/140 watts
Model D-440—145/210 watts
Model D-550—240/325 watts

Accessory and replacement tips for Weller Dual Heat Guns

SOLDERING

For gun models 8200 and D-440—Tip 7135N.
 For gun model D-550—Tip 7250N.

SMOOTHING

For gun models D-440 and 8200—Tip 6120.
 For gun model D-550—Tip 6140.

CUTTING

For gun models D-440 and 8200—Tip 6110.
 For gun model D-550—Tip 6130.

Trigger controlled dual heat. Two trigger positions permit instant switching to high or low heat. Low heat prevents damage to heat sensitive components. High heat is there when needed.

Instant heat. Tip reaches full heat a few seconds after trigger is pulled. Heat goes off instantly when trigger is released.

High efficiency tip slips easily into difficult places.

Spotlight illuminates work, eliminates shadows.

Maximum operating comfort. Compact design and perfect balance make precision soldering easy, eliminate operator fatigue.

Guaranteed one year against defects in material and workmanship. UL and CSA approved.

Model GT-7A comes with 700°F.
 $\frac{3}{16}$ " chisel point POWERHEAD
Model GT-6B comes with 600°F.
 $\frac{1}{8}$ " conical point POWERHEAD

New Weller TEMPMATIC®

Temperature Controlled Soldering Tool

Combines all the advantages of a lightweight pencil type iron, a fast heating soldering gun, and tip temperature control.

For light and heavy duty soldering. Ideal for heat-sensitive work such as printed circuit boards, yet it handles heavy soldering jobs with speed.

Weighs only 7 ounces and has comfortable grip to prevent operator fatigue.

Reaches full heat in 8 seconds. Trigger turns heat on and off.

Features Weller's exclusive new **POWERHEAD** which contains Weller's temperature control system. (It's the same system that has been so successful in Weller temperature controlled soldering irons.) The **POWERHEAD** gives maximum component protection in the most delicate work situations and eliminates frequent tip changes and filing. Its point has a special premium plating which vastly extends life. An selector button on the tool makes switching **POWERHEADS** easy.

Weller MARKSMAN Irons

Ruggedly constructed general purpose irons featuring stainless steel barrels, replaceable tips and long reach. Model for model they outperform bigger irons that weigh and cost more. Five models from a small pencil iron to an extra heavy duty iron.

MODEL NO.	WATTAGE/120V	WEIGHT
SP-23*	25	1 1/4 oz.
SP-40	40	2 oz.
SP-80	80	4 oz.
SP-120	120	10 oz.
SP-175	175	16 oz.

*Also available in kit with solder, extra tips, and soldering aid—Model SP23K.

Model W-PS.

Weller Industrial Rated Pencil Iron

Ideal for soldering miniaturized circuit components, this low cost 115 volt iron provides a tip temperature of 860°F with a 25 watt input. High efficiency. Rapid recovery. Lightweight. Interchangeable $\frac{1}{16}$ ", $\frac{3}{32}$ ", $\frac{1}{8}$ " and $\frac{3}{16}$ " screwdriver tips available, premium plated for long life.

SOLDERING PENCILS, IRONS, GUNS, TIPS, HOLDERS AND ACCESSORIES

HOT AIR GUNS & TIPS

Engineered for Highest Industrial Performance

WallBrand pencils and irons are engineered for highest efficiency with handles designed to be cooler, lightweight and perfectly balanced. WH models have triple-life resistance wire wound on pure mica for continuous heavy duty soldering requirements; constant tip temperature with extra fast recovery. 120 volts AC-DC. Other voltages available on request. Wall's own plating facilities produce long-life tips to meet the demanding applications of micro-circuitry, high density packaging, precision work on solid state devices, printed circuits and continuous precision soldering for production line use.

Model	Watt Input	Tip Size	Length W/O Tip	Volts

864 (Comm. Duty)	3/16"	30	120
	3/16"	40	120

864

Trig-R-Heat Soldering Gun—Feather light, 14 oz., no heavy transformer. Reaches hard-to-get-at spots; tip will not deform. Heats and recovers instantly. Rugged, precision-built. Easily changed tip and element assemblies.

214LT

TRIG-R-HEAT SOLDERING GUN SPECIFICATIONS

Model	Tip Size	Max. Watts	Min. Watts	Voltage AC or DC	Weight W/O Cord
214LT	1/4"	400	150	120	14 oz.
212LT	1/2"	500	300	120	24 oz.

TIP AND ELEMENT ASSEMBLY

214TE	1/4"	400	150	120
212TE	1/2"	550	300	120

14DS Desoldering Tool—Keeps solder in a molten state in reservoir, operated with one hand, fits existing Wall 14HD Iron. Replaceable tip, .080 opening. Other sizes by special request.

14DS

SPH

SPH Soldering Pencil Holder for units up to 5/8" diameter shaft—**SIH Soldering Iron Holder** for units up to 1" diameter shaft. Can be mounted on top, in front or below bench. Adjusts to any angle. Bench models include tip cleaning sponge.

DISPENSER PAC

Soldering Tip Dispenser Pac—Iron-plated or copper tips, 1/8" through 3/8", are available in handy tip dispenser pac. Keeps tips individually sealed in color-coded, continuous belting, plastic envelope. Ideally suited for production line station or stock distribution.

Soldering Tips for Pencils and Irons—Three grades: Anniversary: Industrial, highest quality. Copper core, special iron coating. Anti-seize life for rigorous production line demand. WallKlad—Industrial, copper core, iron coating chrome plated. Production line and critical laboratory use. WallBrand—Commercial, copper, nickel plated. All commercial applications. Tip sizes from 1/8" through 7/8". Special tips to specifications designed on request.

WALL MANUFACTURING COMPANY

Industrial Soldering Pencils are built to exceed federal specification W-S-570a as amended. WallBrand soldering products are UL and CSA listed.

XLS pencil iron — Versatile Molded Handle fits 9 elements

New pencil iron featuring element interchangeability and highest performance. Handle fits nine heating elements from 11 to 75 watts. Quickly and easily changed by operator. XLS molded handle is cool, lightweight and made of high impact, soft blue colored polycarbonate. Available with either 2 or 3 wire cord. Wall's full line of regular and long-life iron plated tips are available for the 9 easy-to-change heating elements.

THE I D L Patent Pending NEWEST — Instant Heat Pencil Iron Thermal time delay relay controlled

Heats in seconds. No transformer. Weighs only 3 oz. without cord. When handle button is depressed 180W element heats initially until soldering temperature is reached. Thermal time delay relay then cuts in 40W element automatically. Pencil cannot overheat. Interchangeable plug-in 1/4" tips—no special tools needed for easy changing. Cool, comfortable unbreakable molded plastic handle. I D L pencil is excellent for light to medium diversified jobs.

I D L IRON

Hatchet Irons—New high reserve models that enable user to make more solder connections faster. Reduces operator fatigue, with better quality control and higher production. 1/4" and 3/8" tips available. Unless otherwise specified, irons are equipped with 2-wire HPN cords and WallBrand Tip Style "C".

Model	Tip Size	Watts	Volts
714-60	1/4 in.	60	120
714-75	1/4 in.	75	120
738-80	3/8 in.	80	120
738-100	3/8 in.	100	120

738

2AG, AG Heat Guns—Plug-in type hot air guns from 200 to 600 watts, adaptable to usage requiring up to 1000°F. 2AG Pistol Grip available with trigger (additional cost). Opens air and heat at the same time. AG Handle Grip. One heating element fits both guns. All five tip styles interchangeable. Special tips on request. Three-wire cord assembly. Hundreds of uses—shape, form, weld and seal thermoplastics. Gun includes neoprene air hose, hose fittings, pressure regulator and gauge.

Need custom constant voltage transformers? Acme Electric can design and build to your specs.

Acme Electric's engineering and experience have developed thousands of custom-designed constant voltage transformers for a variety of industrial markets. These areas of production and development include such industries as: data processing, communications, automation, instrumentation,

office copying equipment, medicine, photography, to name but a few. And, each unit has been designed to meet the customer's exact requirements.

Does your equipment or system require a regulated AC voltage for maximum performance? If so, draw on the engineering know-how of Acme Elec-

tric Corporation to solve your problem. Our business is to satisfy the functions of power control, conversion and/or regulation, whatever the industry or application.

ESSEX
Stancor/RBM**OUTPUT TRANSFORMER CHART**

A simplified selection of the proper transformer for use as a replacement in radio receivers or in the construction of audio amplifiers. To use this chart, check the first column for the tube being used, then read across for the applicable operating characteristics and correct Stancor transformer. In most cases, the Stancor part numbers are indicated in order to give a choice of Mounting styles.

a Has 4.5% primary Tap.

b Has 3% and 6% primary Taps.

c Has Tertiary Winding to provide 10% inverse feedback.

OUTPUT TRANSFORMERS

TECHNICAL DATA

ESSEX
 Stancor/RBM

The Constant Voltage Line Sound Distribution Systems have become the most widely accepted systems in use today. They offer the Sound Engineer an easy means of establishing the volume level of each speaker in a system without the use of potentiometers or similar devices. The proven simplicity and versatility of these systems minimize the problem of speaker impedance mismatching thereby insuring high quality sound reproduction and minimum power losses. The use of higher power driving the constant voltage lines also helps to lower power losses over longer distances.

Most of the newer P.A. amplifiers have a designated 25 volt, 70.7 volt or 140 volt outlet on the output transformer, but almost any older amplifier has an impedance tap which may be used for the desired voltage output.

To insure a steady maintenance of the desired line voltage, it is recommended that the amplifier should be *capable* of producing $1\frac{1}{2}$ times the total power of the various speakers connected. Hence, if the sum of the speakers equals 25 watts, the driving amplifier should be *capable* of producing $37\frac{1}{2}$ watts. The power and impedance figures shown here with the formulas are based on the total power actually supplied to the speakers and *not* on the maximum *capability* of the amplifier.

The following table lists various amplifier power outputs with the corresponding impedance tap on the output transformer which will supply these three basic line voltages:

POWER OUTPUT	IMPEDANCE FOR 140 VOLT LINE	IMPEDANCE FOR 70.7 VOLT LINE	IMPEDANCE FOR 25 VOLT LINE
WATTS	OHMS	OHMS	OHMS
5	4,000	1,000	125
10	2,000	500	62.5
15	3,333	333	41.7
20	1,000	250	31.2
25	800	200	25
30	666	166	21
40	500	125	15.6
50	400	100	12.5
60	333	83	10.5
80	250	62.5	7.8
100	200	50	6.3

For power ratings not shown in this table, use the following formula:

$$Z = \frac{E^2}{W}$$

$$Z = \text{Ohms}$$

$$E = \text{Volts}$$

$$W = \text{Watts Output}$$

Impedance
Tap for:

$$140 \text{ volt line} = \frac{20,000}{W}$$

$$70.7 \text{ volt line} = \frac{5,000}{W}$$

$$25 \text{ volt line} = \frac{625}{W}$$

To establish the volume level of the various speakers in the system, it is necessary to know the power output of the amplifier and the power desired at each speaker. To choose the correct line transformers, match the power to be delivered to each speaker with the power tap on the line transformer. Then connect the primaries of the line transformers in parallel to the proper voltage tap on the output transformer of the amplifier. When the sum of the power ratings shown on each line transformer is equal to the power rating of the amplifier, and the speakers are connected to the appropriate secondary taps, the system is correctly matched.

To determine the proper tap on the primary of the line transformer for a given wattage input to the speaker, use the formula:

$$Z = \frac{E^2}{W}$$

EXAMPLE: In a 70.7 volt system, assume that the speaker requires 5 watts. What is the impedance of the tap required to produce this wattage?

$$Z = \frac{E^2}{W} = \frac{70.7 \times 70.7}{5} = \frac{5,000}{5} = 1,000 \text{ Ohms}$$

To determine the wattage input to the speaker when the tap is already connected, use the formula:

$$W = \frac{E^2}{Z}$$

EXAMPLE: In a 70.7 volt system, assume a speaker connected to the 500 Ohm tap of the primary of the line transformer. What wattage is produced by the use of this tap?

$$W = \frac{E^2}{Z} = \frac{70.7 \times 70.7}{500} = \frac{5,000}{500} = 10 \text{ Watts}$$

REMEMBER: Each speaker must have its own line-matching transformer and all of the line-matching transformers are connected in parallel to the proper voltage tap on the output transformer of the amplifier.

A TYPICAL 70.7 VOLT LINE DISTRIBUTION SYSTEM SHOWING THE PROPER STANCOR UNIT

MINIATURE AUDIO TRANSFORMERS

ESSEX

Stancor/RBM

POLYCHROMATRANS With Multiples of 0.1" Grid Spacing for Printed Circuits.

COLOR CODING by application to assure immediate and positive transformer identification.

PROTECTIVE STAND-OFF prevents solder flow-back and maximum lead exit protection.

SPACED LEADS of fatigue resistant gold plated nickel-iron alloy are .020" in diameter, $\frac{1}{16}$ " long and have multiples of 0.1" grid spacing for printed circuit application.

ANGULAR SHAPE allows the utmost utilization of space and stack-in limited area.

ULTRA MINIATURE

These are the smallest iron core audio transformers ever built. They weigh less than 1/10 ounce and are no larger than the transistors they power.

These transformers are designed primarily for transistor audio applications but they can be used wherever low power is involved. Useful range, below 1 mw level. They are constructed of extremely fine wire, wound on molded nylon bobbins, with special nickel alloy steel laminations.

POWER TRANSFORMERS

Stancor's broad line of commercial grade power transformers offers a choice of standard mounting styles. Listings are in ascending order of plate-supply voltage for ease of selection.

All units are designed and built to meet the exacting requirements of EIA for electrical tolerances, dielectric strength, temperature rise and construction. All are insulated with class A materials; (105°C max. operating temperature).

Transformers designed for full-wave C.T. rectification with capacitor input filter may be used with choke input filter allowing an increase in D.C. current of 30%.

Transformers designed for full-wave C.T. rectification with choke input filter may be used with capacitor input filter requiring a decrease in D.C. current of 25%.

CONSULT FACTORY for detailed information concerning electrical rating and/or mechanical characteristics.

a. For use in Voltage Doubler Circuits.

b. For use in Half-Wave Circuits.

† With Copper shorting band to reduce external Magnetic Field.

‡ Plate wdg and rectifier filament wdg Connected to Tube Socket.

• New Part Number.

SELECTING THE CORRECT POWER TRANSFORMER

STEP 1. Check rectifier tube and all other tube filament voltage and current requirements.

STEP 2. Add together total current drawn by:

- Plates and screen grids
- Resistor networks

Select a power transformer which will supply maximum required D.C. voltage at total current before filter.

STEP 3. Check type of rectifier, circuit, filter and load to obtain required secondary A.C. voltage from transformer.

EXAMPLE: Power transformer for typical 10 watt audio amplifier.

Quantity of Tubes	Type Number of Tubes	Filament Voltage	Filament Current
1	5Y3-GT	5.0 V	2.0 A
1	12AX7	6.3 V	0.3 A
2	12AU7	6.3 V	0.3 A (each)
2	6AQ5	6.3 V	0.45 A (each)

Total filament and heater requirements are: { 5.0 V @ 2.0 A
6.3 V @ 1.8 A

Maximum D.C. voltage after filter: 285 volts.

At input capacitor of filter it will be approximately 325 volts D.C.

Current ratings for various amplifier stages (approximate):

12AX7	RC Coupled	2 ma. (total both sections)
12AU7	RC Coupled	10 ma. (total both sections)
6AQ5	(thru output transformer)	74 ma.*
		86 ma.

Tube characteristic data for the 5Y3-GT rectifier tube with capacitor input filter indicates an A.C. voltage requirement of approximately 335 volts R.M.S. per plate.

Selection based on total requirements: PC-8410 or PM-8410 depending on physical mounting style used.

* Includes screen grid current for each tube in the output stage.

† With Copper shorting band to reduce external Magnetic Field. † Plate wdg and rectifier filament wdg Connected to Tube Socket.
* Primary for 117-107 Volts. * New Part Number

ALL SECONDARY A.C. VOLTAGES ±3% ALL PCC AND PSC NUMBERS MAY BE OPERATED AT 50 CYCLES

New Part Number.
 Has Electrostatic Shield.

Insulation Test Voltage: Twice Allowable RMS Working Voltage plus 1000 Volts.
 †Windings May Be Connected in Series or Parallel if Properly Phased.

ALL SECONDARY VOLTAGES $\pm 3\%$ 

SMOOTHING CHOKES: INDUCTANCE TOLERANCE-MINUS 15% PLUS 50% AT 10 VOLTS 60 CYCLES

*MFD Filter Capacitor 1-1000, 2-5000, 3-2000, 4-4000, 5-6000, 6-3000, 7-7500, 8-12000.

Each transformer has the winding arrangement and terminal numbering shown in the schematic diagrams above. The primary winding is connected to terminals 1, 2, 3 & 4. A separate winding is connected to terminals 5, 6 & 7 that may be used in series with the primary to raise or lower the secondary voltage output. A variety of combinations is possible using the taps on both windings, plus the "Aiding" or "Bucking" action of the extra winding.

Designed for 117 V. 50/60 cycle operation; may also be satisfactorily operated at 400 cycles.

The secondary winding of each transformer consists of two identical windings connected to terminals 8 & 9 and to 10 & 11 respectively. Use the tables showing the various output voltages for specific terminal connections as your guide. Many combinations are possible other than those listed in the tables.

All ratings shown are for normal convection air cooled applications. Select only rectifiers capable of handling the output voltages and currents described

FULL-WAVE DOUBLER

Note: Filtering shown permits maximum output ripple voltage of 3% or less.

★Quantity Shown is Total Number used in a given circuit. Rectifiers should be equivalent to Sarks Tarzian numbers shown.

*Surge protection resistors are recommended when capacitor input filters are used. Allow 3.3 ohms per 70 volts R.M.S. applied voltage. Transformer secondary winding D.C. resistance may be used as part or all of the amount required.

GOTHAM

BEYER TRANSFORMERS MINIATURE AUDIO

The BEYER line of miniature audio transformers distributed by GOTHAM represents over 30 years of experience in the field on the part of one of Europe's largest quality microphone manufacturers. It is for this reason that we make only one type of transformer in two sizes: A low level audio transformer suitable for microphones, tape playback heads, etc.

A special winding process permits these transformers to be made in this miniature size while maintaining studio quality frequency response, distortion, and level capability. The coil is wound on a continuous laminated core which means the elimination of the split core with its inherent losses. Result is a semi-toroidal construction with its superior resistance to hum induction.

BEYER transformers are used in professional audio equipment by such outstanding manufacturers as Ampex, Bauer, Collins, Precision Instrument, Rust, and many others. All transformers are made to special order to O.E.M. users' specifications. Samples can be supplied within 2 weeks, production usually within 4 weeks.

FOUR PHYSICAL MOUNTINGS ARE AVAILABLE:

Threaded Stud: The Model TR-45 Commercial Quality and TR-145 Studio Quality units are offered in mu-metal housing with threaded stud supplied with two nuts.

Solder Lug: The Model TR-45L and TR-145L are same as above but have radial lugs each end of housing to permit terminal board or Vector socket mounting. Also available in sub-miniature TR-710 Model (see fig.). Primary and secondary windings brought out opposite ends of mu-metal can.

Plug-in: The Model BV-36 is encapsulation of TR-45 and TR-145 Models shown above in molded plastic housing with 7-pin miniature plug base. Same mu-metal shielding.

Printed Circuit: The Model BV-37 is encapsulation of TR-45 and TR-145 Models shown above in molded plastic housing only 1.09" high with special 7-pin, 8-pin, or 9-pin printed circuit base.

ELECTRICAL CHARACTERISTICS:

Transformers are supplied with any turns ratio from 1:1 to 1:150, tapped and split windings, static shielding, high voltage test, vacuum impregnating or other requirements.

TYPICAL TRANSFORMER SPECIFICATIONS:

Model TR-145/BV35570 (This Model stocked)

Turns ratio	1:15 $\pm 10\%$
Impedance ratio	200/45,000 Ohms nominal
Frequency response	± 0.2 dB 20 - 20,000 cps.
Maximum input level at 1% THD	370 mV at 30 cps.
Primary open circuit inductance (50 cps)	6.0 H
Primary open circuit impedance (50 cps)	1000 Ohms
Primary DC resistance	70 Ohms
Secondary DC resistance	10,000 Ohms
Hum shielding (EIA std.)	> 70 dB.
BASIC PRICE IN QUANTITY OF 1000 UNITS	\$5.58 each

A NEW GENERATION OF FLUTTER METERS AND ANALYZERS

ME 102B FLUTTER METER

PRICE: \$460.00
from stock in NY

- ± 0.01 to 1% flutter range
- $\pm 2\%$ deviation (drift) range
- Measures either 3kHz or 3.15 kHz
- Level threshold relay prevents indication error
- Self contained oscillator
- Self calibrating • Solid state
- Freq. deviation meter (drift)
- Weighted & unweighted measurements
- International standard (CCIR/DIN)
- Oscilloscope outputs
- No level adjustment needed

ME 104 FLUTTER METER

PRICE: \$365.00
from stock in NY

- ± 0.02 to 3% flutter range
- $\pm 4\%$ deviation (drift) range
- Measures at 3.15 kHz only
- Self contained oscillator
- Self calibrating • Solid state
- Freq. deviation meter (drift)
- Weighted & unweighted measurements
- International standard (CCIR/DIN)
- Oscilloscope outputs
- No level adjustment needed

ME 301 WAVE ANALYZER

PRICE: \$780.00
from stock in NY

- Continuous sweep notch filter
- 1 Hz to 330 Hz in 5 ranges
- 40 dB/octave filter slope
- 10% (3 dB points) band width
- Zero loss • Solid state
- Interconnects to ME-102b and ME-104

U-16 IMPEDANCES IN OHMS: 2, 4, 8, 12, 16.
U-500 IMPEDANCES IN OHMS: 50, 125, 200, C.T., 250, 330, 500 C.T.
125 and 500 ohms can be used for 150 and 600 ohms.

FREED TRANSFORMER CO., INC.

MINIATURE TRANSISTOR AUDIO TRANSFORMERS

These high quality miniature transformers are high efficiency audio components featuring hermetic sealing for maximum protection against electrolysis and subsequent corrosion of fine wires caused by moisture penetration. The units are constructed in accordance with MIL-T-27A Specifications. Transistor transformers can also be supplied in an open or encapsulated type of construction.

MINIATURE AUDIO TRANSFORMERS

These high quality, miniature transformers feature hermetically sealing for maximum protection from moisture penetration with subsequent electrolysis and corrosion of fine wires. While primarily intended for non-military equipment, these units are constructed in accordance with MIL-T-27A Specifications.

Frequency response: ± 2DB 30-20,000 CPS * ± 2DB 200-10,000 CPS.

FREED TRANSFORMER CO., INC.

TRANSISTOR SUPPLY TRANSFORMERS TST SERIES

Manufactured and Guaranteed to Specifications MIL-T-27

TST-6— Frequency 57 Hz to 63 Hz — Primary 115 volts
units with * primary 115 and/or 230 volts

TST-4— Frequency 380 Hz to 1000 Hz — Primary 115 volts

D.C. to RMS Conversion Chart

Resistive or Inductive Loads		Capacitive Loads	
Full Wave Center Tapped	Full Wave Bridge	Full Wave Center Tapped	Full Wave Bridge
$E_{RMS} = 2.22 \text{ Edc}$	$E_{RMS} = 1.11 \text{ Edc}$	$E_{RMS} = 1.6 \text{ Edc}$	$E_{RMS} = .8 \text{ Edc}$
$I_{RMS} = .75 \text{ Idc}$	$I_{RMS} = 1.05 \text{ Idc}$	$I_{RMS} = 1.1 \text{ Idc}$	$I_{RMS} = 1.55 \text{ Idc}$

E_{dc} — should include voltage drop across reactor and voltage drop across one diode for F.W.C.T. and voltage drop across two diodes for F.W. Bridge.

TST transformers are listed according to their watt rating P.N. 1 to P.N. 34. Ordering information must include frequency and watt rating.

TST-6 — (P.N. 1 to 34) for 57 Hz — 63 Hz

TST-4 — (P.N. 1 to 34) for 380 Hz — 1000 Hz

TST units can be supplied in commercial type construction (channel or shell type with leads).

PROFESSIONAL GRADE COMPONENTS

This group of components has been designed for use in high fidelity and professional equipment and for public address service. Freed has developed this series of units employing the latest design techniques and the best commercially available materials. Except for units carrying unbalanced direct current the frequency response is ± 1 DB from 30 to 15,000 cps. All units feature excellent performance characteristics with minimum size and weight.

All units are vacuum varnished and then potted in compound to insure long life and trouble free performance.

Professional Grade components are supplied cased. Upon request these units can be supplied open or in shell type construction.

All cased Professional Grade Components supplied with terminals meet "EIA" standards.

Transformers PGA 1 through PGA 10 are supplied in hermetically sealed cases.

U-16 IMPEDANCES IN OHMS:

2, 4, 8, 12, 16

U-500 IMPEDANCES IN OHMS:

50, 125, 200 C.T., 250, 330, 500 C.T., 125 and 500 ohms can be used for 150 and 600 ohms.

*PGA 28, 29 & 30 supplied with terminals, all other units with leads.

A 70 volts level can be obtained the following impedances:

500 ohms — 10 watts +40 DB
330 ohms — 15 watts +42 DB
250 ohms — 20 watts +43 DB
200 ohms — 25 watts +44 DB
125 ohms — 40 watts +46 DB
50 ohms — 100 watts +50 DB

HIGH "Q" REACTORS

QGC—are hermetically sealed, MIL-T-27A, Grade 4, Class R, High Q Reactors for low audio frequency application with an excellent inductance stability with variations of A.C. and D.C. currents, frequencies and temperatures.

SPECIAL REACTORS:

- (1) with a center tap (3) with inductances other than those listed can be supplied.
(2) with a split winding

**Max. Norm. A.C. = V/F ~ √LH } will decrease by 20%.

STANDARD MILITARY TRANSFORMERS

The group comprises audio and power units designed to meet MIL-T-27 A specifications.

The functional characteristics of these transformers were established by the Armed Service Standardization Program. These units are supplied in standard MIL cases.

Transformers meeting MIL-T-27A specifications Grade 1 through 6 with temperature characteristics of Class S, T, or U can be supplied on special order.

Encapsulated units using either Epoxy-Resins or Fosterite can be supplied for Grade 2 and Class U components can be supplied molded in special high temperature Freed resin.

HERMETICALLY SEALED PULSE TRANSFORMERS

Hermetically sealed Pulse Transformers for use in blocking oscillator, low level interstage coupling, and modulator output circuits. These components meet MIL-T-27 A specifications. The pulse transformers are designed for maximum power, efficiency, and optimum pulse performance. Balanced coil structures permit series or parallel connection of windings for turn ratios other than unity. Pulse characteristics, voltages and impedance levels will depend upon the interconnections made.

TOROIDAL INDUCTORS

Using the latest developments in the field of magnetic materials and new impregnation and molding techniques the Freed Transformer Co. makes available to the industry the most extensive line of toroidal inductors.

Freed toroids are available in three types of constructions. Open units coated with a special high temperature extremely low loss compound, hermetically sealed in metal cases or molded in special **Freed Epoxy Resin**. Both hermetically sealed and molded units meet the latest military specification MIL-T-27A (graded 1 or 4 and 2 or 5 respectively.) Freed toroidal inductors are supplied with either molypermalloy or carbonyl iron powder cores

Temperature Stabilization:

The molypermalloy and carbonyl iron powder cores have a temperature coefficient of inductance. Depending on the degree of temperature stabilization the cores have different temperature coefficients. The degree of stabilization is denoted by a two-letter code.

- SF Non-stabilized cores, $\pm 2\frac{1}{2}\%$ inductance variations from -55°C to $+85^{\circ}\text{C}$.
- SN Non-stabilized cores, $\pm 2\%$ inductance variations from -55°C to $+85^{\circ}\text{C}$.
- SE Temperature stabilized cores, $\pm 0.1\%$ to -0.4% inductance variations from -1.5°C to $+54^{\circ}\text{C}$.
- SB Temperature stabilized cores, $\pm 0.1\%$ inductance variations from $+13^{\circ}\text{C}$ to $+35^{\circ}\text{C}$.
- SD Temperature stabilized cores, $\pm 0.1\%$ inductance variations from -1.5°C to $+54^{\circ}\text{C}$.
- SW Temperature stabilized cores, $\pm 0.25\%$ inductance variations from -54°C to $+85^{\circ}\text{C}$.
- SM Temperature stabilized cores, $\pm 0.25\%$ inductance variations from -54°C to $+85^{\circ}\text{C}$.
- SP Temperature stable carbonyl iron cores, $\pm 0.3\%$ inductance variations from -55°C to $+85^{\circ}\text{C}$.

The temperature (stabilization) coefficient of an inductor will depend upon the nominal inductance value, operating frequency and A.C. voltage across the coil. Under some unfavorable working conditions the temperature coefficient of inductance corresponding to a given stability characteristic may be exceeded.

Toroids with special requirements such as tapped toroids, toroidal transformers, molded and cased units with dimensions other than standard sizes and high temperature toroids can be supplied on request. Our engineering and laboratory facilities are available for consultation, research and development.

TI-16	600	16	21	0.13	TI-36	3,950	10	11	0.07
TI-17	1,200	20	29	0.18	TI-37	23.5	10	32	0.20
TI-18	2,600	30	40	0.25	TI-38	100	4	9.5	0.06

*TI-20 through TI-23 have a very low voltage coefficient and inductance will change very little with voltage. Because of high frequency application, the maximum voltage is limited rather by breakdown than by saturation.

FREED TRANSFORMER COMPANY, INC.

FREED TRANSFORMER CO., INC.

MAGNETIC AMPLIFIERS AND SATURABLE TRANSFORMERS

The ever increasing demand for reliability, ruggedness, miniaturization and high performance has made the magnetic amplifier an indispensable component of many military and industrial automatic control and servo systems. Recent advances in materials and techniques permit an even greater utilization of the well-known inherent advantages of magnetic amplifiers such as direct operation from line voltage, no warm-up time, long-life components, ease of signal mixing and hermetic-sealing.

Freed Transformer Co. manufactures an extensive line of magnetic amplifiers ranging from saturable transformers to half-wave type, fast-response servo amplifiers. A line of phase reversible Saturable Transformers DC controlled by vacuum tubes or transistors - Freed MAS type - and designed for 60 Hz or 400 Hz is available upon request. Choice of analog amplifiers assures standardization, lowest possible cost and rapid delivery.

All standard units are designed for continuous operation and will operate in an ambient temperature range of -55°C to $+75^{\circ}\text{C}$.

In addition to standard items, Freed Transformer Co. has extensive facilities for the design and production of special amplifiers, saturable reactors and magnetic components.

ALL ITEMS LISTED ARE AVAILABLE FROM STOCK.

FAST RESPONSE MAGNETIC AMPLIFIERS

The MAF type of fast response magnetic amplifier combines high power gain, ruggedness, and reliability with a maximum 2 cycle response. All MAF units are phase-reversible.

FREED TRANSFORMER CO., INC.

TRANSISTORIZED INVERTERS—TDC LINE

For DC/DC inversion from low voltage DC sources to high voltage DC output. Stock units are available in power capabilities to 45 watts, with input voltages of 6, 12, 24, 28, and 48 volts.

All TDC inverters are hermetically sealed and oil filled. Outputs are filtered with ripple less than .1%. Operating temperatures from -55°C to $+70^{\circ}\text{C}$. They are ruggedly built to withstand shock and vibration.

UNITS AVAILABLE AS STOCK ITEMS:

CAT. #	NOM. VDC INPUT	VDC OUT	MAX 1 OUT MA	CASE SIZE
TDC 6-15-05	6	150	50	
TDC 12-30-15	12	300	150	$2\frac{1}{2} \times 2\frac{1}{2} \times 3\frac{1}{2}$
TDC 12-25-12	12	250	120	$2\frac{1}{2} \times 2\frac{1}{4} \times 3\frac{1}{2}$
TDC 12-30-05	12	300	50	$2 \times 2\frac{1}{4} \times 3\frac{1}{2}$
TDC 12-20-05	12	200	50	$2 \times 2\frac{1}{4} \times 3\frac{1}{2}$
TDC 12-12-12	12	120	120	$2 \times 2\frac{1}{4} \times 3$
TDC 12-2.4-100	12	24	1000	$2\frac{1}{4} \times 2\frac{1}{2} \times 3\frac{1}{2}$
TDC 28-30-15	28	300	150	$2\frac{1}{2} \times 2\frac{1}{4} \times 3\frac{1}{2}$
TDC 28-25-12	28	250	120	$2\frac{1}{2} \times 2\frac{1}{4} \times 3\frac{1}{2}$
TDC 28-30-05	28	300	50	$2 \times 2\frac{1}{4} \times 3\frac{1}{2}$
TDC 28-20-05	28	200	50	$2 \times 2\frac{1}{4} \times 3\frac{1}{2}$
TDC 48-20-15	48	200	150	$2\frac{1}{2} \times 2\frac{1}{4} \times 3\frac{1}{2}$
TDC 48-30-15	48	300	150	$2\frac{1}{2} \times 2\frac{1}{4} \times 3\frac{1}{2}$

DC TO AC TRANSISTOR CONVERTERS—TAC LINE

For conversion from DC sources to 115 volt outputs at 60 Hz at powers ranging from 50 VA to 350 VA.

Output wave form-square wave; Output frequency $-60 \text{ Hz} \pm 1 \text{ Hz}$; Hermetically sealed-oil filled; Maximum operating temperature -70°C .

OPEN CASE

SEALED CASE

- Output Waveform — Square Wave
- Output Frequency — 60 cps (Adjustment Control)
- Frequency Stability $\pm 3\%$
- Hermetically Sealed
- Maximum Ambient Temperature 50°C
- Temperature of Base Mounting Plate must not exceed 70°C
- Output Voltage Variation — Varies directly with input voltage

AVAILABLE TYPES:

CAT. #	NOM. VDC IN	OUTPUT VA	SIZE
TAC 6-50	6	50	$4\frac{1}{8} \times 3\frac{1}{2} \times 4\frac{1}{2}$
TAC 12-50	12	50	$4\frac{1}{8} \times 3\frac{1}{2} \times 4\frac{1}{2}$
TAC 12-90	12	90	$4\frac{1}{8} \times 3\frac{1}{2} \times 4\frac{1}{2}$
TAC 12-175	12	175	$5 \times 4\frac{1}{8} \times 6$
TAC 28-50	28	50	$4\frac{1}{8} \times 3\frac{1}{2} \times 4\frac{1}{2}$
TAC 28-100	28	100	$4\frac{1}{8} \times 3\frac{1}{2} \times 4\frac{1}{2}$
TAC 28-175	28	175	$5 \times 4\frac{1}{8} \times 6$
TAC 28-250	28	250	$5\frac{1}{2} \times 5 \times 6\frac{1}{4}$
TAC 28-350	28	350	$5\frac{1}{2} \times 5 \times 6\frac{1}{4}$

TAC converters are also available with 400 Hz outputs in three models:

TAC 12-100-4	12	100	$4\frac{1}{8} \times 3\frac{1}{2} \times 4\frac{1}{2}$
TAC 28-150-4	28	150	$4\frac{1}{8} \times 3\frac{1}{2} \times 4\frac{1}{2}$
TAC 28-250-4	28	250	$5 \times 4\frac{1}{8} \times 6$

DC TO AC TRANSISTOR CONVERTERS—PTC LINE

A new line of DC/AC converters for operation from a 12 volt D.C. source. Output is square wave, 115 volts RMS at 60 Hz. Regulated to $\pm 2 \text{ Hz}$ over an input voltage range of 10.5 to 13.5 VDC.

Efficiency on all units is 80% min. at full load. Ambient temperature to 55°C .

Available models listed below:

CAT. #	VA OUT	SIZE	MTG.
PTC 12-15	15	$3 \times 2\frac{1}{2} \times 4$	$1\frac{1}{16} \times 1\frac{1}{16}$
PTC 12-50	50	$3\frac{1}{2} \times 3 \times 4\frac{1}{16}$	$2 \times 2\frac{1}{4}$
PTC 12-100	100	$5\frac{1}{8} \times 4 \times 5\frac{1}{4} \text{ HI}$	$3\frac{1}{4} \times 3\frac{1}{8}$
PTC 12-175	175	$7\frac{1}{8} \times 4\frac{1}{16} \times 5\frac{1}{4} \text{ HI}$	$6 \times 3\frac{1}{2}$

PTC 12-15 and PTC 12-50 are supplied with 4-terminal headers for input and output connections.

PTC 12-100 and PTC 12-175 use barrier strip terminals and in addition have an auxiliary output receptacle.

MINIATURIZED SILICON TRANSISTOR PREAMPLIFIER

THE MAT TYPE OF TRANSISTOR PREAMPLIFIER COMBINES LOW POWER CONSUMPTION, HIGH POWER GAIN AND SMALL SIZE AND WEIGHT.

Freed No.	MAT-1-1
Power Supply	115V 400~
Voltage Gain	400
Maximum Output Voltage	10V (RL = 1.5K)
Typical Load	Freed MAF-4 and MAF-5 Magnetic Amplifiers
Input Signal Required for Full Output	50MV
Input Impedance	>10,000 OHMS
Physical Dimensions	$1\frac{1}{4}'' \times 1\frac{1}{8}'' \times 2\frac{1}{8}'' \text{ H}$
Weight	10 oz.

TRANSFER CHARACTERISTIC CURVE

FREED TRANSFORMER CO., INC.

CONSTANT VOLTAGE TRANSFORMERS

The MCV line of constant voltage transformers provides accurate regulation against line and/or load variations, without the use of tubes or moving parts.

TELEMETERING COMPONENTS

A complete line of Band Pass Filters, Low Pass Filters and Discriminators is available for multi-channel telemetering applications. These components cover the frequency range from 400 cps to 70,000 cps. The filters assure exceptional phase linearity, excellent selectivity characteristics and plug-in construction. The Discriminators, either fixed or slug tuned, have exceptional linearity, high amplification, and utmost stability.

TELEMETERING BAND PASS FILTERS

Hermetically sealed to MIL-T-27A and MIL-F-18327

These filters cover the frequencies from 400 c.p.s. to 70,000 c.p.s. Narrow frequency B.P.F. have a band width of $\pm 1\%$ of center frequency and 45 DB (minimum) points $\pm 7\frac{1}{2}\%$ of center frequency of higher or lower adjacent channels. Wide frequency B.P.F. have a band width of $\pm 19\frac{1}{2}\%$ of center frequency and 50 D.B. points at $\pm 15\%$ of center frequencies of higher or lower second adjacent channels.

FREED FILTERS

To MIL-T-27A and MIL-F-18327

Freed Standard Filters are Hermetically Sealed Miniature and Sub-Miniature high performance components designed for both production and laboratory applications in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics. Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters.

The standard filters are available in Low Pass, High Pass and Band Pass Filters.

Low Pass Filters: The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency, 35db or more at 1.5 cut-off frequency and 40db or more at 2 cut-off frequency.

ILP Interstage Low Pass Filter. Characteristic Impedance 10,000 ohms, in and out.

LLP Line Low Pass Filter. Characteristic Impedance 500 to 600 Ω , in and out.

High Pass Filters: The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency, 35db and 40db or more at 0.67 and 0.5 cut-off frequency.

IHP Interstage High Pass Filter. Characteristic Impedance 10,000 ohms, in and out.

LHP Line High Pass Filter. Characteristic Impedance 500 to 600 Ω , in and out.

Band Pass Filters: The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency 40db or more at 0.5 and 2 center frequency.

IBP Interstage Band Pass Filter. Nominal input impedance—10,000 ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 2:1. (Output voltage to source voltage.)

LBP Line Band Pass Filter. Nominal input impedance 500 to 600 ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 9:1. (Output voltage to source voltage.)

Low Pass Filters: The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency, 30db or more at 1.5 cut-off frequency and 40db or more at 2 cut-off frequency.

ILM Interstage Low Pass Filter. Characteristic impedance 10,000 ohms, in and out.

LLM Line Low Pass Filter. Characteristic Impedance 500 to 600 ohms, in and out.

High Pass Filters: The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency, 30db and 40db or more at 0.67 and 0.5 cut-off frequency.

IHM Interstage High Pass Filter. Characteristic Impedance 10,000 ohms, in and out.

LHM Line High Pass Filter. Characteristic Impedance 500 to 600 ohms, in and out.

Band Pass Filters: The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency 35db or more at 0.5 and 2 center frequency.

IBM Interstage Band Pass Filter. Nominal input impedance—10,000 ohms, Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 2:1. (Output voltage to source voltage.)

LBM Line Band Pass Filter. Nominal input impedance 500 to 600 ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 5:1. (Output voltage to source voltage.)

Special filters in all six types are available for any frequency from 200 to 20,000 cycles.

SERIES 1950 NULL "T" FILTERS

The Freed Series 1950 Null T networks consist of two resistance capacitance networks, whose outputs completely cancel each other at the balance frequency. They may be used as rejection networks particularly at low frequencies where LC filters become excessively large and unstable.

Standard models are available for 30, 60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation at the null frequency.

The null frequency is adjusted to a tolerance of $\pm 2\%$.

All Null T Filters are hermetically sealed.

Prices on request.

TELEGRAPH TONE CHANNEL FILTERS To MIL-F-18327

Freed Band Pass Filters are used extensively in multiplex frequency shift transmitting and receiving. All units are built with a standard octal socket.

TRANSMITTING FILTERS Type FR 6RX 22 PBI

FBM Transmitting Filters are built for a 600 ohm in and out characteristic impedance. Filter configuration allows paralleling of channel outputs.

TELEGRAPH TONE CHANNEL FILTERS

HERMETICALLY SEALED TO MIL-T-27A AND MIL-F-18327 SPECIFICATIONS

Freed Band Pass Filters are extensively used in multiplex frequency shift transmitting and receiving. Stock filters cover all narrow and wide band channels. All units are built with a standard octal socket.

FBT Transmitting Filters are built for a 600 ohm in and out characteristic impedance. Filter configuration allows paralleling of channel outputs, 10db adjacent channel crossover attenuation.

FBR Receiving Filters are designed for a characteristic impedance of 600 ohms in and out. Filter configuration permits paralleling of channel inputs, 20db adjacent channel crossover attenuation.

New developments and applications of ultrasonics for industrial cleaning, soldering, welding, and mixing have created a demand for generators and components specifically designed for ultrasonic applications.

Using the latest developments in the field of special magnetic materials the FREED ultrasonic transformers are designed for greatest efficiency and maximum reliability. They feature small size excellent performance and long life under continuous duty operation.

Transformers with an extended frequency range (frequencies up to 2 MC) can be supplied upon request.

COMMERCIAL GRADE COMPONENTS

These components are designed to meet the demand for low-cost replacement parts for commercial electronic equipment. The best commercially available materials have been utilized in the design of these units, to insure reliability and excellent performance characteristics. Vacuum impregnation with a non-hygroscopic varnish to prevent penetration of humidity are employed to give these units long life and trouble-free performance. 230-115 V, 50-60 C.P.S. Stepdown Transformers rated from 25 V A up to 5,000 V A Rating and line booster transformers are included in this series. All units, with only a few exceptions, are uncased or of shell-type construction. Isolation transformers and Stepdown transformers are equipped with line cord and receptacle.

SECTION 5600

VARIABLE TRANSFORMERS

Manual uncased unit—exposed terminals

Manual cased unit—exposed terminals

Manual cased unit—enclosed terminals

The Volt-Pac variable transformer is a control device which provides continuously adjustable output voltage from a fixed line input to vary the voltage applied to a particular electrical load. With Volt-Pac units, output voltage is changed by flux transformation... in the unsaturated range of the magnetic core. The results... low cost, versatility, reliability, simplicity, and no wave form distortion.

Volt-Pac units, for surface or back-of-panel mounting, are designed for operation in ambients of -20C to +40C at full rated load, and under all load conditions have low electrical losses.

* When Overvoltage Connection is used, rated current should not be exceeded. Output kva for Overvoltage Connection is maximum output voltage times rated current.

† When using extended tap connections, operation is for 60 hertz per second only.

‡ Output at Overvoltage Connection is 0-132 volts.

§ When operated on lower input-voltage tap, rated current must be reduced when output voltage exceeds 140 percent of input voltage.

¶ For Line-voltage Connection only—No Over-voltage Connection provided.

■ For 240-volt input, 0-240-volt output, application only.

• For 480-volt input, 0-480-volt output, application only.

∅ 60 hertz only.

△ Time to change output from 0 to 100%. Other times, from 2.5 to 60 sec, are available.

○ When operated on 120-volt input taps, rated current must be reduced when output voltage exceeds 168 volts.

For other footnotes, see opposite page.

Prices subject to change without notice.

PLUG-IN SETS

For laboratory or shop source of adjustable a-c voltage. Provides output voltage of 0-117% of input voltage. Equipped with a line switch and a fuse for overload protection.

Cord is 6 feet long.

GENERAL ELECTRIC

HIGH VOLTAGE TRANSFORMERS

New facilities, including a 53,000 square foot addition, now allows Hipotronics to enlarge upon its transformer capabilities — from making transformers only for its own equipment to offering for sale a complete range of high voltage specialty units.

Hipotronics' modern plant has produced transformers with AC voltages in excess of 500 kv and power ratings in excess of 2000 kva. Quick solutions to special high voltage problems are readily available.

The following is a sample selection of high voltage transformers with suggested applications.

DC OUTPUTS FOR TYPICAL APPLICATIONS

PLUG-IN PRINTED CIRCUIT POWER TRANSFORMERS BY MICROTRAN

- 60 & 400 Hz. — Broad Range of Low Power Ratings.
- Compact Design For Miniaturized Solid State Circuitry.
- Precision Spaced Molded-in Terminals.
- Adaptable For Point to Point Wiring.
- MIL Construction at Commercial Pricing.
- Off-The-Shelf Delivery From Franchised Distributors.
- Constructed Per MIL-T-27 Grade 6—Class R

A new series of plug-in printed circuit transformers designed for use in latest solid state circuitry application such as power supplies, control equipment and instrument applications. Units in this series provide a voltage step down and isolation from power line at relatively low power levels. The 60 Hz series has power ratings ranging from 1.5 VA to 7.5 VA. The 400 Hz series has power ratings ranging from .325 VA to 4 VA. Units are designed for 500 Volt Hi-Pot.

Smaller in size yet designed for increased power ratings to permit optimum equipment miniaturization. Precision spaced plug-in terminals provide fixed mounting centers, usually found only in expensive molded transformers. Units are constructed in accordance with MIL-T-27 Grade 6, class R. Class S available on special order.

Dual secondaries may be parallel connected to obtain twice the current rating of one winding or series connected to give twice the rated voltage of one winding. Series connection also provides a center tap. For example: All transformers having dual 58V secondaries may be connected to obtain 115V to 115V C.T. isolation. Units are available on special order with other ratings, winding configurations, or mountings other than stock items listed herein.

Series PC4300, 4400 and 6500 (Fig. 1) may also be used for point to point wiring by epoxy cementing the transformer with the terminals opposite mounting surface. Series PC6600 and 6700 may also be supplied for point to point wiring on special order as shown in Fig. 3. To order add — FBR to part number, i.e. PC6604-FBR. For quantities 1-49 pcs. add \$10.00 lot set up charge.

SUBMINIATURE AUDIO AND TRANSISTOR TRANSFORMERS—SM AND SMT SERIES

SM-AF (Fig. N): MIL-T-27B-AF modified case; compression sealed ceramic terminals; gray enamel finish. MIL type TF4RX—YY. Size, $\frac{3}{4}$ " x $\frac{3}{4}$ " x $\frac{1}{4}$ " max. with two 4-40NC-2 spade mtg. bolts. Wt., $1\frac{1}{2}$ oz. **SM-H (Fig. K):** Hermetically sealed; high compression glass terminals; gray enamel finish. MIL type TF4RX—YY. Size, $\frac{1}{4}$ " dia. x $\frac{1}{4}$ " h. Weight, 1 oz.

SM-FB (Fig. L): Open frame with channel. With plug-in tab mounted channel or without channel on special order. MIL type TF6RX—ZZ. Size, $\frac{1}{4}$ " x $\frac{1}{4}$ " x $\frac{1}{4}$ ", plus tabs. Wt., 0.750 oz. **SM-M (Fig. O):** Molded, for plug-in PC applications. MIL type TF5RX—ZZ. Size, $\frac{1}{4}$ " x $\frac{1}{4}$ " x $\frac{1}{4}$ " max. Wt., $1\frac{1}{2}$ oz. **SM-CM (Fig. M):** Contour molded on special order; prices on request.

MODEL 400K TRANSISTOR

TRANSFORMER SELECTOR KIT

Set of nine transistor transformer covers impedance range of 150 through 200K ohms, matching most new transistor impedance ratings. Ideal for breadboard circuitry. Sizes range from a $\frac{3}{4}$ " cube to $\frac{3}{4}$ " x $\frac{3}{4}$ " x 1". All are vacuum resin impregnated and have 4" color-coded leads. Includes full design data; nomographs and circuitry for determining correct impedances for Class A and B transistor amplifiers; power versus dbm chart; terminal connection sheet; MIL-T-27B guide; cross reference index; outline drawings for later selection of stock items with same electrical ratings in many other mechanical constructions and reactance chart. Each transformer individually boxed in transparent plastic case.

Microtran Model 400K Transistor Transformer Selector Kit—Net Each. \$29.50

MICROTRAN

MINIATURIZED MILITARY TRANSFORMERS

MINIATURE TRANSISTOR AND AUDIO TRANSFORMERS—M AND MT SERIES

M-M (Fig. O): Molded, for plug-in printed circuit use. Cast epoxy resin provides highest resistance to temperature extremes. MIL Type TF5RX—ZZ (Insert MIL No. from table). Max. Size, $1\frac{1}{2}$ " x $\frac{3}{8}$ " x $\frac{3}{8}$ ". Weight, $1\frac{1}{4}$ oz. **M-AG (Fig. Q):** Enclosed in modified MIL-T-27B AG case with compression sealed ceramic terminals. MIL Type TF4RX—YY. Max. Size, 1 " x 1 " x $1\frac{1}{8}$ ". Weight, $2\frac{3}{4}$ oz. **M-H (Fig. R):** Hermetically sealed with high compression glass terminals, gray enamel finish. Available on special order with .120" holes. MIL Type TF4RX—YY. Size, $1\frac{1}{4}$ " dia. x $1\frac{1}{4}$ " max. Weight, $1\frac{1}{4}$ oz. **M-A (Fig. S):** Aluminum case with 2-56 screws. MIL Type TF3RX—YY. Size, .875" dia. x $1\frac{1}{8}$ ". Weight, 1.25 oz. **M-FB (Fig. L):** Open frame with channel. Available with plug-in tab channel or without channel on special order. MIL Type TF6RX—ZZ. Size, $1\frac{1}{4}$ " x $1\frac{1}{4}$ " x $2\frac{1}{4}$ " max., plus tabs. Weight, 1.13 oz. **M-P (Fig. T):** Octal plug-in type in sealed plastic housing. MIL Type TF6RX—ZZ. Size, $1\frac{1}{2}$ " dia. x $1\frac{1}{8}$ ". Wt., 2 oz. **M90 Shield (Fig. E):** 25 db magnetic shield for Type M-A. Two clearance holes on $1\frac{1}{4}$ " centers. **M-PC (Fig. U):** Open frame PC with terminals molded into bobbin to maintain accurate dimensions for PC board. MIL Type TF6RX—ZZ. Size, $\frac{7}{8}$ " x $1\frac{1}{4}$ " x 1 "; terminals $\frac{3}{16}$ " below bobbin. Wt., 1.2 oz. **M-CM (Fig. M):** Contour molded on special order only; for mtg. on top of chassis. Size, $1\frac{1}{2}$ " x $\frac{3}{8}$ " x $\frac{3}{8}$ ". Prices on request.

DC TO DC CONVERTER TRANSFORMERS—BLOCKING OSCILLATOR TYPE

Laminated series blocking oscillator type. Approximate repetition rate, 400 Hz. All are Fig. L except M8051, Fig. Q. DC output voltage for all but M8073 is given for transformer used in blocking oscillator circuit with single capacitor-input rectifier. DC input current, output current and output voltage of Model M8073 depend on load and bias; frequency varies from 100 to 2800 Hz. Fig. L types are open

frame units meeting MIL designation TF6RX09ZZ; Fig. Q type is enclosed unit meeting MIL designation TF4RX09YY.

MICROTRAN

MINIATURIZED MILITARY TRANSFORMERS

DC TO DC CONVERTER TRANSFORMERS—SWITCHING TYPE
LAMINATED SERIES

Provide improved reliability and efficiency over vibrator and rotary power converters. Approximate repetition rate, 800 Hz. Full wave and CT loads may be simultaneously drawn, but total VA output should not be exceeded for continuous-duty operation. All are Fig. P except M8072 and M8120, Fig. L. Transistors listed are for reference only; user must verify that max. ratings will not be exceeded.

MICROTRAN

MINIATURIZED MILITARY
TOROIDAL INDUCTORS

ULTRA-MINIATURE TOROIDAL INDUCTORS—QE-M SERIES

Affords new application opportunities in high density packaging. Ultra miniaturized with low height design. Exceptionally high "Q" and wide frequency range. Available on special order with $\pm 1\%$ inductance tolerance. Frequency range of QEL Series 1 to 300 kHz; QEM, 3 to 500 kHz. Accuracy, $\pm 2\%$. Molded in epoxy resin with .020" x 2" gold-plated nickel alloy leads. Size, .450" dia. x .285".

MINIATURE TOROIDAL INDUCTORS—QK SERIES

Frequency range of QKL Series, to 10 kHz; QKM Series, 5 to 50 kHz. Accuracy, $\pm 2\%$. **QK-F**: Open frame, microcrystalline wax dipped; 4" #28 plastic leads. Size, $1\frac{1}{4}$ " dia. x $\frac{1}{2}$ ". **QK-H**: Hermetic

with Teflon terminals. Size, $1\frac{1}{4}$ " x $\frac{1}{2}$ " x $1\frac{1}{2}$ ". **QK-M**: Molded in high temperature epoxy resin; silver plated turret lugs. Size, $1\frac{1}{4}$ " dia. x $\frac{1}{2}$ "; #8 clearance hole.

DIRECTRON

Industrial Transformers, Selenium and Silicon Rectifiers, Chokes and Power Supplies

RECTIFIER TRANSFORMERS

Transformers are with 2 — 18 volt center-tapped windings. Connected in series delivers 36 volts as rated. Connected in parallel — delivers 18 volts at twice rated current. (Taps 9, 18, 27, 36 V.)

Primary taps at 100, 105, 110 and 115 volts available on 12 amp, 24 amp, 30 amp and 50 amp transformers. No extra charge.

Hybrids — Power Dividers and Adders

50-201 BD (50Ω)
75-201 BD (75Ω)

50-401 MA (50Ω)
75-401 MA (75Ω)

50 and 75Ω ports; 1:2 and 1:4 division; 1 to 50 MHz bandwidth, 35 dB isolation, 0.25 dB insertion loss, 1.2 VSWR, 0.5° phase and 0.2 dB amplitude balance. 1:8 version available in RA case.

See Page 434 for Coils.

OHMITE variable transformers

Unique for the design innovations they incorporate, Ohmite "OHMITRAN" v.t.® variable transformers include exclusive field-proven features. They offer long, low maintenance operation with excellent regulation at any voltage setting within the rated load plus an output free of waveform distortion. Six frame sizes offer a wide range of electrical ratings to meet most industrial applications. These include three new, compact, low-power models (VT1, VT02, VT3,) which permit a fine choice of six ratings from 1 to 3 amperes.

The VT1, rated 1 ampere, is the smallest commercial variable transformer available.

UL LISTING: A number of VT4, VT8 and VT20 transformers used for 120 volt line operation are underwriters' laboratories listed. See tables, page 26 for details.

POSITIVE CURRENT TRANSFER... achieved with specially designed brushes connected through high conductivity contact arms or pigtailed to a large slip ring which contacts a wide area of the collector ring. The brush contact assembly on the VT1, VT02, and VT3 is instantly replaceable, when necessary, as a result of a slide-on, snap-in design. Brushes of the other models are easily replaced also.

ADJUSTABLE SHAFT: On all Ohmite transformers, except the VT2LN, the shaft may be extended out from either the brush or opposite side as desired. On the VT1, VT02 and VT3, both single and tandem assemblies, this is an exclusive Ohmite feature which affords greater versatility of mounting and application. For example, substitution of a longer shaft or extension of the standard shaft allows actuation of other devices, such as switches or potentiometers without special construction. The shaft is freed simply by loosening set screw in the hub assembly. A double flat on the shaft permits two knob positions.

On the VT4, VT8, and VT20 types, the adjustable shaft feature permits table or panel use. "Ganged" or tandem VT4, VT8 and VT20 units employ a thru-shaft offering the same flexibility. On VT4 and VT8 units, shafts are fixed in the desired position by means of socket head screws located in the hub of each "brush-radiator" plate. The VT20 employs a unique collet-type shaft lock.

INTERCHANGEABLE WITH OTHER POPULAR TYPES: Basic "v.t." units have mounting provisions which match those of virtually all popular transformers

of comparable current rating. Models VT4, VT8 and VT20 mount by means of bolts. Normally 3-hole mounting, single VT4 units can be "4-hole mounted" by means of adapter plate, see page 27. Individual Model VT1, VT2LN, or VT3 units mount by means of a standard 3/8-32 threaded bushing. All tandem assemblies mount by means of bolts or nuts. Knob, and mounting hardware are included with each transformer.

DIRECT READING, TWO SCALE DIAL... calibrated on one side for voltage connection; on the reverse side for line voltage connection. Dials normally included with transformer read clockwise for increasing voltage, counter-clockwise calibration available—see page 27.

WIRING AND CONNECTIONS: Wiring instructions to arrange various modes of operation are enclosed with all OHMITE variable transformers. Terminal panels or adjacent nameplate carry convenient wiring diagram, coded terminals and input and output data. Three way terminals on VT1, VT2LN, VT3 will accept 1/4" push-on connectors, screws and nuts, or conventional soldering.

ROTATION OPTION: On VT4, VT8 and VT20 transformers connected for output voltage, either clockwise or counter-clockwise increase of voltage can be arranged easily by the user. Increasing voltage in either direction can be arranged on all units connected for no-overvoltage output. Dials for counter-clockwise operation are stocked. See "Accessories."

OVERVOLTAGE OPTION: On all transformers with overvoltage feature, overvoltage operation can be arranged on the terminal panel.

NO-OVERVOLTAGE TRANSFORMERS ("N" suffix): Provide considerably more current due to heavier gage winding.

240-VOLT INPUT ("H" suffix): On units which are wound for 240-volt input, a 120 volt input tap is also provided. With the use of this input, the maximum current rating applies up to 120 volts output but beyond this reduces proportionately to approximately 50% at maximum voltage output.

LOW VOLTAGE INPUT ("L" feature): Designed for a maximum input of approximately 40 volts, with high current output.

GROUNDING INPUT & OUTPUT ("C" feature): Units in type F or G cases can be provided with a three-conductor cord and outlet. One conductor is grounded to the case. This feature standard on all cased VT20 units and on all metered units.

Footnotes for Stock Table

- Frequency shown is a minimum — units may be used up to 1000 cps.
- VT8H and VT20H and 240V output for VT8HN and VT20HN. With use of 120V input VT8H, VT8HN, VT20H, VT20HN also have taps for 120V input with 280V output for the max. current rating applies up to 120V output but reduces to approx. 50% at max. output voltage. In the case of tandem units, use of the low voltage inputs would correspondingly derate the current at the higher output voltages.
- Connected at factory for overvoltage output — easily reconnected by user for no-overvoltage output. On VT8G and VT20G, switch selects overvoltage or no-overvoltage.
- User wires for desired output. Dial normally calibrated for overvoltage.
- 2-in-tandem normally wired for series connection; 3-in-tandem for Y connection.

ITEMS APPEARING IN BOLD PRINT ARE POPULAR VALUES AND ARE USUALLY STOCKED BY AUTHORIZED OHMITE DISTRIBUTORS.

⁶ When transformers are series connected, load cannot be grounded.

⁷ Includes knob, dial and mounting hardware.

⁸ May be used at 50 cps if connected for no-overvoltage output.

⁹ Overvoltage connection must not be used.

¹⁰ 240/280 volt cw dial standard except on VT1, VT02 and VT3 tandems where 240/264 volt dial is standard or on VT8H-2, VT8HN-2, VT8H-3, VT20H-2, VT20HN-2, VT20H-3 and VT20HN-3 where 480/560 volt dial is standard. Request other dial if desired — see "Dials" above.

¹¹ Underwriters' Laboratories listed under components program (File Number E10946)

¹² Underwriters' Laboratories listed under apparatus program (File Number E10946).

OHMITE variable transformers

ACCESSORIES — PARTS

ADAPTER PLATE for 4-hole mtg. of VT4 — matches other popular 4-hole mts.; dimensions same as shown for front plate of VT4 tandems, page 25.

MOTOR-DRIVEN ASSEMBLIES

Single or tandem assemblies can be supplied with motor drives, direct from the factory. Either AC or DC motors are available. Standard AC motor drives have traverse speeds of 3-4, 10-12, 40-50, 100-120 seconds. Typical traverse speeds for DC drives are 4, 8, 16, 30 and 45 seconds. Write to the factory for more information.

Solid state electronic dimmers for incandescent lighting

600 WATTS

Replace Any
or 3-Way
switch
made by OHMITE
famous Producer of
Quality Components

CONTINUOUSLY VARIABLE DIMMING by means of silicon symmetrical switch — a modern semiconductor device.

PUSH-PUSH KNOB for ON/OFF at any light setting.

CONSERVES POWER — Draws only the power needed by the circuit at the light level desired.

SCREW TERMINALS for convenient wiring without splicing or wire twisting nuts — eliminates space consuming leads — permits use of dimmer even in shallow boxes.

NO RADIO OR TV INTERFERENCE due to special filter.

GUARANTEED for 1 year against defects in materials and workmanship provided units have been properly installed and operated.

INSTALLATION NOTES

Maximum Ambient — 120°F.

Use only 1 dimmer for each lighting circuit.

Install dimmer with power OFF.

Wiring — Several dimmers may be installed in a common box provided units are derated as follows: two units, 500 watts each; three or more units, 400 watts each.

CONNECTIONS—
SINGLE POLE

CONNECTIONS—
3-WAY

Full Wave Bridge	Choke Input	= to DC amps
Full Wave Bridge	Capacitor Input	1.8 × DC Amps

HIGH & LOW CURRENT CHOKES 0.1 to 1000 AMPS

OPEN FRAME • EPOXY ENCAPSULATED (GRADE 5) • HERMETICALLY SEALED (GRADE 4)

Signal's line of High and Low Current Chokes is the most extensive available. It is designed to complement the selection of High and Low Current Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guar-

anteed at full DC current. All resistance ratings are maximum values.

Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

INDUCTANCE VARIATION WITH DC CURRENT

The curve shown applies to the whole line of chokes. It allows the user to determine the value of inductance which will be obtained at intermediate and overload values of DC current. The values on the curve are stated in generalized coordinates of % inductance versus % DC current.

For example, the CH-100 at 50 amperes (50% DC Current) will have an inductance of 0.75 MHY (150% of rating, the CH-25 at 31 amperes (125% DC current) will have an inductance of 3.5 MHY (70% of rating).

It is not recommended that chokes be used at over 100% of rated current since temperature rise will then be excessive. However, if load current is intermittent, and RMS current is less than maximum rated current, it is permissible.

Special "swinging chokes" can be supplied where the slope of this characteristic is emphasized. Specify minimum inductance required at two current values (usually maximum and minimum current) and we will furnish prompt quotations.

MULTI-VOLT 1 to 54 VOLTS in 1 VOLT STEPS

"MV" LINE

MV (multi-voltage) secondaries may be series connected for any output from 1 to 54 volts, in 1 volt steps, at rated current. This is accomplished by using the small buck-boost secondary.

Part No.	Secondary Amps.	DIMENSIONS					Appr. Wt.

As shown on the schematic diagram dual primaries are provided. This permits parallel connection for 104, 110, or 120 volts or series connection for 208, 214, 220, 230, and 240 volts. Frequency range is 50 to 500 cps.

It is important to note that primary taps may be used to adjust the secondary voltages. Line voltages up to 125V (parallel) or 250V (series) may be used on the lowest primary tap. Nickel plated screw terminals are provided on a heavy phenolic board for easy primary connections

WINDINGS OF HEAVY COPPER STRIP

STRIP-WOUND SECONDARIES

At the heavy current used in this line it becomes practical and desirable to use wide copper strip (as wide as the coil itself) for windings. Besides the obvious advantages of excellent winding space factor, the heat dissipation of the coil is improved. This improvement is due to the fact that the heat generated in the windings has a pure copper path to the coil ends, where it can be dissipated. In conventional windings of many turns per layer this heat flow is impeded by wire insulation and air spaces between turns. Therefore, the use of copper strip windings yields a dramatic reduction in size and weight.

GRAIN-ORIENTED STEEL CORE

These cores permit the use of higher peak flux densities for the same core loss. This results in a lower number of turns required and therefore, a smaller, more compact transformer.

CLASS F INSULATION USED THROUGHOUT

Class F insulation is rated for unlimited life at a total temperature of 155°C (ambient plus temperature rise).

Class A insulation has a maximum temperature rating of 105°C. The "nominal" current ratings given to this series are for a temperature rise of 45°C above 55°C ambient (Class A). Since Class F insulation is used it is permissible to increase these ratings by 40% (700 and 1400 amperes) without reducing the reliability of the transformer. The temperature rise will be 100°C over a 55°C ambient. The only limitation is not the transformer, but the temperature rating of surrounding components which may be affected by the additional heat radiated by the transformer.

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher

conversion efficiency and lighter power line drain of 3 phase systems. Since the principal application of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

INDUSTRIAL GRADE STEP-UP OR STEP-DOWN POWER ISOLATION OR AUTO-TRANSFORMERS

HIGH DEGREE OF VERSATILITY OFFERS MANY POSSIBLE VOLTAGE RATINGS

AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU" and "UP" lines are designed for a maximum of 55°C rise above ambient, for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current, continuous operation.

Heavy 1/4 inch phenolic terminal boards are provided with plated brass screws and flat washers. Connections can be easily made with a nut driver. It is also simple to alter the inter-connections to change transformer ratings.

"DU SERIES" 110/220 Dual Primary To 110/220 Dual Sec.

As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as

208, 214, or 230 volts.

It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is doubled.

Part No.	KVA	Series Secondaries		Parallel Secondaries		Mechanical Dimensions						Mtg. Screw	Appr. Lbs.
		Volts	Max. Amps	Volts	Max. Amps	L (Max.)	W (Max.)	H (Max.)	ML ± 1/32	MW ± 1/16

"UP SERIES" 110/220 Dual Primary To 0/130/135/140 V. Sec.

The "UP" line utilizes the same dual primary as the "DU" line. It has, however, a single secondary rated at 0/130/135/140 volts. This type is quite useful to boost low line

voltages or raise line voltages to compensate for drops in series elements. It also finds application in bridge rectifiers for DC voltage outputs of approximately 115 to 130 volts.

Part No.	KVA	Secondary Volts	Max. Secondary Amps	L (Max.)	W (Max.)	H (Max.)	ML ± 1/32	MW ± 1/16	Mtg. Screw	Appr. Lbs.

SIGNAL TRANSFORMER CO., INC

ENGINEERS • DESIGNERS • MANUFACTURERS

CONSTANT VOLTAGE TRANSFORMERS

FOR USE IN DC POWER SUPPLIES (TYPE CDC)

CDC CONSTANT VOLTAGE TRANSFORMERS

Signal's CDC Regulating Transformers are specifically manufactured for use in DC Power Supplies. They are designed and rated for use with a full wave center-tapped silicon rectifier. CDC transformers are operated in ferro-resonance and are used in conjunction with an AC tuning capacitor (C_r in schematic diagram), which is supplied with the transformer.

In order to construct a regulated power supply the only other parts necessary are two diodes (D_1 and D_2), an electrolytic computer grade capacitor (C_r) and a bleeder resistor (R_b). These are standard shelf items.

The specification chart lists specific outputs available and the recommended auxiliary components. Part numbers are coded in terms of DC outputs, e.g., CDC-15-2 will give an output of 15V DC at 2 amps DC.

Electrical performance is completely specified. The DC voltage is constant to $\pm 1\%$ over the line voltage range of 100 to 130V at 60 HZ. The nominal output is held to $\pm 2\%$. Closer tolerance on nominal output ($\pm 1\%$) can be obtained on special order at slightly higher cost.

Load regulation is specified as the rise in dc voltage output (increase in E_{dc}) from full load to the no load, $\frac{1}{4}$ load, and $\frac{1}{2}$ load points. The filter capacitor (C_r) specified should be used and will yield the values of ripple voltage shown.

A significant protection feature is the fact that the DC short circuit current is limited to a maximum of 2 times rated current (3 times in size "C-6" units). This protects the entire circuit against shorts.

OUTPUT D.C. VOLTS	DC Amps I_{dc}	Part Number	Load Regulation (Rise in DCV from FL)			Ripple Volts (RMS)	Recommended Diodes (D_1 & D_2)		Filter Cap. (C_r)		Bleeder Resistor (R_b)		Style* & Size

* See mechanical dimensions on opposite page.

‡ Bleeder resistor may be eliminated if load current does not fall to zero. DC amp rating may be increased accordingly.

SIGNAL TRANSFORMER CO., INC

ENGINEERS • DESIGNERS • MANUFACTURERS

CONSTANT VOLTAGE TRANSFORMERS

FOR USE IN AC APPLICATIONS (TYPE ACV)

Signal ACV transformers are manufactured for use with AC loads. They are simple and rugged designs and will regulate to within plus or minus 1% for input variations from 95-130V at 60 cps. If regulation of plus or minus ½% or better is desired, special units can be made to your order. ACV transformers will regulate with loads that are not unity power factor.

Full regulation is maintained at any load from about 20% to 100%. Overload current is limited to a maximum of 200% of rated current at short circuit. The 6.4 and 12.8V ratings are ideal for use with tube or lamp loads since the short circuit current rating limits the inrush current to cold filaments. Stabilization of the voltage results in longer filament life.

ACV transformers are "normal" harmonic type with approximately a square wave output.

PART NO.	VOLTS AC	AMPS AC	STYLE & SIZE
6 ACV-6.4	6.4	1	C-6
6 ACV-12.8	12.8	0.5	C-6

B-250	4	5¾	4⅛	3½	3⅝	#10
B-500	5	5¾	5⅛	4⅜	3⅝	#10

ADVANTAGES OF CONSTANT VOLTAGE TRANSFORMERS

REGULATION — output regulated to plus or minus 1% for line voltage variations of 95-130V at 60 cps.

SELF-PROTECTION — against output short circuit. Current limited to a maximum of 2 times rated current.

MECHANICALLY RUGGED — as resistant to mechanical shock as conventional power transformers.

NO MOVING PARTS — no adjustment or maintenance necessary.

SQUARE WAVE OUTPUT — ideal for use in rectifier circuits — little filtering needed.

HIGH DEGREE OF ISOLATION — between input and output circuits — both physical and electrical isolation, electro-static shields not necessary.

RESONATING CAPACITOR — supplied with transformers.

EPOXY IMPREGNATION — minimizes acoustic noise.

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

RECTIFIER TYPE	FILTER TYPE	RMS SECONDARY CURRENT
Full Wave Center-Tap	Choke Input	.7 X DC amps
Full Wave Center-Tap	Capacitor Input	1.2 X DC amps
Full Wave Bridge	Choke Input	= to DC amps
Full Wave Bridge	Capacitor Input	1.8 X DC amps

Signal's PC Transformers are constructed of prime raw materials using Class S insulation and nylon bobbins with PC pins molded directly in the bobbin wall. They are vacuum varnish impregnated and 100% tested for all parameters before shipment.

Primaries are rated at 115 V, 50 to 500 Hz. Dual secondaries provide two outputs, or secondaries may be series or parallel connected. This results in a wide variety of output combinations. Load regulation is limited to a maximum of 20%.

SOLA ELECTRIC

DIVISION OF SOLA BASIC INDUSTRIES

CV Transformers

Constant-voltage Sola transformers provide a stabilized output voltage even though the input voltage varies over a considerable range. Their applications are numerous and varied. CV's are especially ideal for high-accuracy requirements such as in computers and data-processing equipment.

Another advantage in CV transformers is their ability to prolong the life of electronic components by eliminating injurious over- and under-voltages. The Sola transformer's current-limiting factor protects semiconductors and other components from excessive inrush and fault currents.

Write for catalog CV-100 for complete listings including 50 and 400 Hz models.

AUTOMATIC, INSTANTANEOUS VOLTAGE REGULATION FOR A WIDE VARIETY OF ELECTRIC AND ELECTRONIC DEVICES

D — Drawn case; integral capacitor unit; flex leads.

S — Hermetically sealed case; separate capacitor; solder lugs.

E — Exposed core; end bells; separate capacitor; flex leads.

W — Exposed core; end housings; screw-type terminals in outlet box.

Normal Harmonic Type (CVN)

Electronic-Power Types

±1% REGULATION FOR FILAMENT TYPE, ±3% FOR PLATE-FILAMENT TYPE

The electronic-power type of Sola transformer is designed as a component for simple assembly into many kinds of electronic equipment. The filament type (CVF) provides 6.0 or 6.3 volts of output regulated within ± 1% over line variations of ± 15%; the combination plate-and-filament type (CVE) regulates within ± 3%.

D — Drawn case; integral capacitor unit; flex leads.

E — Exposed core; end bells; separate capacitor; flex leads.

for filament service (Type CVF)

SPECIFICATIONS • 60 CYCLE SINGLE PHASE

Voltage Rating Regulated ±1% Output	Input Range	Output Capacity in Amps.	Catalog Number	Approx. Net Price Each to Industrial Users	Approx. Ship. Wt. in Lbs.	Structure Code

		5.0	20-04-116	39.90	23	E

*Voltage values are taken at output of 5Y3GT rectifier for No. 7104 and No. 7106 transformers and at output of 5U4GA-GB for No. 7107. Guaranteed regulation of ±3% on plate voltage output is contingent on the use of Sola-regulated 5.0v filament supply winding for the rectifier tube.

For more information on SOLA CVDC Power Supplies, see page 995, Section 4000.

PULSE TRANSFORMERS

Type 11Z

TRIGATE® PULSE TRANSFORMERS

**FLEXIBLE LEAD AND PRINTED WIRING BOARD DESIGNS
FOR LOW-COST SCR CIRCUIT APPLICATIONS**

- Specifically Designed For Commercial and Industrial SCR Triggering Applications Where Low Cost and Excellent Performance Are Required
- Single-ended Pulse Transformers Are Designed With Leads Especially Intended For Mounting On Printed Wiring Boards; These Units are Self Supporting
- Balanced Pulse Characteristics and Energy Transfer Between Windings
- Minimum Saturation Effect To Allow Operation Where Increased Pulse Widths Are Required
- Fast Pulse Rise Time and Increased Current Capability To Prevent SCR di/dt Failure
- Operating Temperature Range of -10°C to $+70^{\circ}\text{C}$
- For Complete Technical Data, See Latest Issue of Sprague Engineering Bulletin 40003

240 VOLT SINGLE PHASE MODELS WITH CORD & RECEPTACLE

STACO isolated variable autotransformers provide a means for smooth control of an electrically isolated AC voltage output. Uncased models offer isolated, non-isolated voltage doubler, and series connections with proper external hook-up. Cased models feature circuit breaker, switch pilot light, output voltmeter 3-wire grounded cord, plug, and matching receptacles. Cased models available in isolated connection only. Ratings shown are for isolated connections.

Mfr's Type No.	Volts	Output Amps	KVA	Size	Weight (Lbs.)	Price

EJ201V, EJ401V, EJ901V have a 0-140 VAC and 0-120 VDC at full rated current available at isolated banana receptacles.

DELUXE VARIABLE AUTOTRANSFORMERS

STACO offers a selected group of variable autotransformers with new style, broad applications, and a unique combination of practical features. Suitable for use in any industrial application, classroom or laboratory. All units provide continuous voltage control over a wide range, and all are protected against short circuit. Convenient controls provide error-free operation and distortionless adjustment of AC voltage.

E501V, E501VA, E501VAW, E1010V, E1010VA, E1010VAW have isolated AC and DC outputs of 10% of the output current rating of the unit. Outputs are available at isolated banana receptacles.

V = Voltmeter A = Ammeter W = Wattmeter

STACO®

Variable Autotransformers

STACO Variable Autotransformers are precision built to exacting tolerances from the finest materials available.

Staco's new improved design provides long life with negligible maintenance, high efficiency and regulation, greater power to size ratio. Staco designs permit replacement of competitive equipment or previous Staco models without modification.

Models are available in various configurations from 1.75 to 300 amperes output. Choose from panel mounted units, cord and plug types or deluxe fully enclosed portable models, with or without metering. Staco products represent 25 years experience in providing safe and dependable control of power.

Contact your local representative for full details or write the factory for our new Product Guide.

Note 1—SM series are two hole mounting with holes on center line. #4-40 Pem nuts are fastened to the bracket.

Note 2—#6-32 Pem nuts on bracket are standard.

Note 3—#8-32 Pem nuts on bracket are standard.

- All primaries 380-1000 cps
- Dielectric test voltages:
PRIMARYS 1500 Volts RMS
SECONDARIES 1500 Volts RMS
- Epoxy resin used as encapsulant
- Prices subject to change without notice

STERLING TRANSFORMER CORPORATION

transistor transformers

UNIVERSAL DC POWER MODULE TRANSFORMERS

High reliability transformers having a tapped primary and single or dual secondary windings which may be connected F.W. bridge or F.W. center tap so as to obtain a wide range of DC voltages and current ratings.

INPUT PRIMARY 115 volts 50-500 cps

STERLING TRANSFORMER CORP.

hi-Q toroidal inductors

MANUFACTURED TO MIL-T-27A. ALL HERMETICALLY SEALED UNITS (STYLE H) ARE MIL TYPE TF4RX20YY

■ ALL MOLDED UNITS STYLE M ARE MIL TYPE TF5RX20ZZ

■ ALSO TOROIDAL INDUCTORS IN OTHER SIZES AND VALUES AVAILABLE ON SPECIAL ORDER.

■ MOLYBDENUM PERMALLOY POWDER CORES USED IN ALL UNITS.

STYLE F

■ ALL INDUCTORS SHOWN AVAILABLE IN OPEN STYLE F.

QA SERIES

FREQUENCY TO 20KC-ACCURACY $\pm 2\%$

The QA series is designed to optimize small size and high "Q" for miniaturized applications. These units are available on special order with stabilized cores and inductance from 1MH to 4.0H.

AVAILABLE ON SPECIAL ORDER
HERMETICALLY SEALED

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Style F	Style M
QA-1	5MH	2.5	30	4.80	6.30
QA-2	10	5	33	4.80	6.30
QA-3	15	8	34	4.95	6.45
QA-4	20	11.2	36	5.10	6.60
QA-5	30	17	37	5.15	6.80
QA-6	50	28	40	5.30	6.95
QA-7	100	50	42	5.45	7.10
QA-8	150	80	44	5.65	7.30
QA-9	200	120	45	5.75	7.40
QA-10	300	150	46	5.85	7.65
QA-11	500	290	48	5.95	7.95
QA-12	1.00H	530	51	6.80	8.75
QA-13	1.50	825	53	6.95	9.60

MOLDED STYLE M

Encapsulated in Epoxy Resin. Pigtail leads for printed circuit applications.

QB SERIES

FREQUENCY TO 20KC-ACCURACY $\pm 2\%$

The QB series is designed for airborne applications where stable high "Q" is needed with minimized size and weight. Available on special order with stabilized cores and inductance to 7.0H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Style F	Style H	Style M
QB-1	5MH	1.1	38	4.30	7.45	5.80
QB-2	10	2.1	40	4.30	7.45	5.80
QB-3	15	3.3	42	4.30	7.45	5.95
QB-4	20	3.7	43	4.35	7.55	6.05
QB-5	30	5.8	45	4.40	7.70	6.15
QB-6	50	11	47	4.50	7.95	6.25
QB-7	100	22	49	4.65	8.45	6.30
QB-8	150	34	50	4.80	8.60	6.45
QB-9	200	47	52	5.05	9.00	6.70
QB-10	300	60	53	5.15	9.25	6.80
QB-11	500	95	55	5.30	9.45	6.95
QB-12	1.00H	213	57	5.65	9.90	7.45
QB-13	1.50	335	59	6.45	10.40	8.10

MOLDED STYLE M

Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H

Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

STERLING TRANSFORMER CORP.

hi-Q toroidal inductors

QC SERIES

FREQUENCY TO 10KC
ACCURACY $\pm 2\%$

The QC series is designed for high "Q", increased power level & stability. Available on special order with stabilized cores and inductance to 20H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1-9 pcs.		
				Style F	Style H	Style M
QC-1	5MH	0.62	60	4.80	7.80	6.80

MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

QD SERIES

FREQUENCY TO 10KC-ACCURACY $\pm 2\%$

The QD series is designed for very high "Q" in the audio band allowing for application in sharp frequency filters with high power levels and low losses. They are excellent for tuned transformers and oscillators. Available on special order with stabilized cores and inductance to 50H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1-9 pcs.		
				Style F	Style H	Style M
QD-1	20MH	1.0	97	7.80	11.60	9.60

MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

QE SERIES

FREQUENCY TO 15KC
ACCURACY $\pm 2\%$

The QE series is most widely used in low audio frequency applications where high "Q" is essential. They are used where inductance stability over a wide voltage range is required. Available on special order with inductance to 75H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1-9 pcs.		
				Style F	Style H	Style M
QE-1	25MH	0.85	127	11.90	14.85	13.90

DELIVERY

Delivery is often dependent on availability of raw materials. Check with your distributor for delivery information at the time you place your order.

POWERSTAT[®] Variable Transformers now

New epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight*, only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers are designed to deliver continuously adjustable voltage from a-c power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types listed in the charts except the 10B-12, EN116B-EN216B and EN117B-EN217B Series are available with motor drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types having -4, -5, or -6 suffixes which do not offer the 5-second speed. Single types in the 116B-216B, 117B-217B, 126-226 and 136B-236B Series are also offered with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings to 244 kva.

ADJUSTABLE SPEED DRIVES

All motor-driven units in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 Series are available with adjustable speed

drives which permit the output voltage of the transformer to be controlled over the full range of zero to maximum output voltage at speeds ranging from 5 seconds to 200 seconds. All control circuitry is solid-state and adaptable for present speed systems. The Adjustable Speed Control Potentiometer BHP65455-G1 can be remotely located from the variable transformer.

VOLTBOX® A-C POWER SUPPLY

Contains POWERSTAT Variable Transformer, voltmeter, three output receptacles, two 5-WAY Binding Posts, "on-off" switch, line-load meter switch, fuse and six-foot cord-plug. Type UC1MB ratings are 120 volt, single phase 50/60 hertz input and 0-140 volt 10 ampere, 1.4 kva output.

†Also available with open construction. Suffix U when ordering.

§Requires also one paralleling choke type T5000.

§§Requires also one paralleling choke type T6053.

IN SECTIONS 2100, 3500 AND 4000

POWERSTAT® Variable Transformers

NOW WITH POWERKOTE® COILS

*PATENT PENDING

40-VOLT SERIES

Meet high current, low voltage requirements of low voltage power supplies and a wide range of transistor circuit applications. Manually-operated and motor-driven single, 2- and 3-gang single phase types available.

TYPE 10B-40

TYPE 21-40

TYPE LC2106D

TYPE 5MBLC2115E

LINE CORRECTORS

Used to correct line voltage variations to maintain a constant output voltage or to supply a limited range of output voltage from a stable a-c source. Manually operated and motor-driven types available.

OIL-COOLED AND EXPLOSION-PROOF

Oil-cooled units substantially increase ratings above equivalent air-cooled types and provide a measure of safety. Explosion-proof models are Underwriters' Laboratories listed for Class 1, Group D service. Both are manually operated only.

OIL-COOLED
TYPE 0-116BEXPLOSION-PROOF
TYPE X-116

LW136B SERIES

Have three windings. Connections can be made for operation as a source of adjustable low output voltage, a line voltage corrector or a limited range variable transformer. Manually operated and motor-driven, open and enclosed construction types available. Full connections and ratings on request.

TYPE LW136B-3

TYPE LW136BU

HIGH FREQUENCY POWERSTAT® VARIABLE TRANSFORMERS

TYPE 5-1011

TYPE 2HL15UK-3Y

Standard manually-operated types designed to meet applicable military specifications are available for 28, 120, 240 and 480 volt, 400/800 hertz single and three phase operation in ratings from 56 va to 7.3 kva; for 115 volt, 400/800 hertz single phase service with outputs of 0-28 volts, 2.5 or 8 amperes and 0-5 volts, 6 or 12 amperes; for 400/1600 hertz service as limited range variable transformers, low voltage output variable transformers or line correctors.

STATIONARY METERED KNOB POWERSTAT® Variable Transformers

- FOR BACK-OF-PANEL OR GENERAL UTILITY MOUNTING
- ACCURATE VOLTMETER REMAINS STATIONARY INSIDE KNOB RIM. . . DOES NOT TURN WITH THE KNOB
- AVAILABLE IN TYPES TO 4 KVA
- MAXIMUM APPLICATION FLEXIBILITY
- SAVES PANEL SPACE, WIRING AND INSTALLATION COSTS

TYPE VS116B

TYPE VS3PN126

TYPE VS146T

GENERAL UTILITY MOUNTING – Single units (those listed in charts without -2 or -3 suffixes) in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 series are also available with knobs incorporating direct-reading voltmeters. Voltmeters remain stationary as the knob rim is turned, have an accuracy of $\pm 3\%$ of full scale and are insensitive to stray magnetic fields. When ordering, add VS prefix to the type number given in the charts.

BACK-OF-PANEL MOUNTING – Standard cataloged POWERSTAT Variable Transformers in the 21-22 through the 146-246 series designed or adaptable for back-of-panel mounting can be combined with Metered Knob Assemblies. Models for 120 volt service require Metered Knob Assembly VS150 having a 0-150 volt scale and units for 240 volt use require Metered Knob Assembly VS300 having a 0-300 volt scale. Existing models can be retrofitted also.

ENCLOSED LABORATORY POWERSTAT® Variable Transformers

TYPE N10B

TYPE N21

TYPE N116B

TYPE N116BK

Portable, single phase units having grounded NEMA cord-plug assembly, on-off switch, output receptacle, pilot light and fuse. The handle is integrally designed and the panel controls are recessed. A slot is provided at the rear of each unit to accept wall hanger brackets supplied with the assembly. Types N21, N116B, N116BK, N116BL and N116BLK have POWERKOTE Coils.

METERED KNOB types N116BK and N116BLK have metered knobs to conveniently measure load voltage without the necessity of providing a separate voltmeter. The knob is designed so that the voltmeter remains stationary as the knob is turned to vary the voltage, assuring accurate readings and maximum meter visibility.

POWERSTAT DC Motor Speed Controllers

Continuously adjustable speed control of d-c shunt-wound motors from a-c power lines. Full rated torque available at any speed. Instantaneous start, stop and reverse, tubeless transient-protected circuitry. Rated for 120 volt, 60 hertz single phase input. Type MSC16 for motors to $\frac{1}{8}$ hp, type MSC33 to $\frac{1}{2}$ hp and type MSC75 to $\frac{3}{4}$ hp. NEMA frame 1725 rpm, dc motors in $\frac{1}{8}$, $\frac{1}{2}$ and $\frac{3}{4}$ hp also available.

TYPE MSC33

IN SECTIONS 2100, 3500 AND 4000

FLEXIFORMER® Packaged Transformer Primaries

TYPE TP150

When used as a source of a-c voltage, the center opening permits hand-threading the correct number of secondary winding turns to obtain the desired output voltage. When used as a current transformer, the unit winding is shuted by an ammeter which indicates the current flow in a conductor hand-threaded through the center opening. For 50/60 hertz duty.

RATINGS AS A SOURCE OF A-C VOLTAGE

TYPE	NORMAL PRIMARY VOLTS	Hertz	MAXIMUM VA	VOLTS PER SECONDARY TURN	REGULATION AT MAXIMUM OUTPUT
TP150	120	50/60	150	0.3	25%
TP1000	120	50/60	1000	0.75	10%
TP152	240	50/60	150	0.3	25%
TP1020	240	50/60	1000	0.75	10%

RATINGS AS A CURRENT TRANSFORMER

TYPE	INPUT/OUTPUT RATIO	MAXIMUM PRIMARY AMPERES	MAXIMUM SECONDARY AMPERES	ACCURACY AT 60 Hertz
TP150	400/1	400	1.0	1%
TP1000	160/1	800	5.0	1%
TP152	800/1	400	0.5	1%

TODD ELECTRIC high current transformers and chokes are most widely used for high power rectifier and high current A.C. applications. They are built to the highest standards of workmanship. All types are designed for a nominal temperature rise of 45°C at full load and will easily withstand unusual overloads. The regulation is extremely low, varying from 10% on the smallest unit to 1% on the largest.

Four constructional types are available for maximum flexibility for use in either the laboratory, test rigs, OEM equipment, or production.

All Prices and Data Subject to Change Without Notice.

† Includes height of terminals.

TODD ELECTRIC HIGH CURRENT CHOKES are the perfect companion to our High Current Transformers when utilizing inductive filtering in designing a power supply.

INDUCTANCE VARIATION

The inductance realized from any stock High Current Choke will vary from the normal rated values as shown by the graph when subjected to a non-rated current. Due to greater heating loss, steady state current should not be exceeded by more than 30% except for intermittent operation.

TODD ELECTRIC CO., INC.

CONSTANT VOLTAGE TRANSFORMERS — 60 Hz

UNFILTERED HARMONIC TYPE

118 VOLT OUTPUT (CONSTANT)

• 1% AUTOMATIC REGULATION OF OUTPUT WITH LINE VARIATION OF UP TO 15% (95-130V) • RUGGED — NO MOVING PARTS • RESPONDS WITHIN 1½ CYCLES • EFFICIENCY APPROXIMATELY 85-90% • FULLY OPERATIONAL OVER WIDE AMBIENT TEMPERATURE RANGE: -20° TO +40°C • PROVIDES LINE ISOLATION • PROTECTS LOADS FROM HIGH SHORTING CURRENT SINCE OUTPUT IS AUTOMATICALLY LIMITED TO 150% OF RATED VALUE.

TODD ELECTRIC Style **CVH** Constant Voltage Transformers produce a semi-square output voltage wave form containing approximately 20% RMS harmonic content. This wave form will not affect the operation of non-harmonic sensitive loads such as solenoids, relays, filaments, and rectification applications.

JUNCTION BOX WITH
BUILT-IN CONVENIENCE OUTLET

FILTERED SINUSOIDAL TYPE

118 VOLT OUTPUT (CONSTANT)

TODD ELECTRIC STYLE **CVS** CONSTANT VOLTAGE TRANSFORMERS PROVIDE ALL OF THE AUTOMATIC RUGGED — QUICK RESPONSE FEATURES OF THE HARMONIC TYPE **CVH** WITH THE ADDITIONAL FEATURE OF A FULLY FILTERED OUTPUT WAVE FORM WHICH CONTAINS A MAXIMUM HARMONIC CONTENT OF 3%.

TODD ELECTRIC Style **CVS** is recommended for use where the loads are sensitive to the voltage or to the current wave form, such as equipment designed to operate on 120 volt sinusoidal line voltage.

Case A

Case A

Triad J Series offers flexibility enabling your amplifiers to exceed broadcast standards. Although economy in construction has cut costs, these transformers approach and closely approximate performance characteristics found in more costly hermetically sealed parts. Single hole mounting provides for rotation for maximum reduction of hum... alloy shielding gives you 40-60 db hum reduction (60-80 db in Types A-11J & A-12J)... you can obtain wide frequency ranges... flexible leads facilitate ease in mounting... input units are electrostatically and magnetically shielded... light weight and encased in Triad's satin smooth baked gray enamel cases, 1 3/4" diameter, 1 3/4" above chassis... legible circuit diagrams are permanently affixed to every case.

Combined PLATE and FILAMENT Transformers "100" Series

Never have the outstanding features of Triad Combined Plate and Filament Power Transformers been available at such realistic costs. No quality or performance requirement has been overlooked... specify Triad and be certain. Shielding, impregnation, chatter freedom... to Triad's demanding quality control standards.

AUDIO

Triad Replacement Output Transformers furnish a wide range of size and mounting characteristics... specifically engineered for mounting in precise location in chassis. Climatite treated... manufactured to exacting quality standards of more costly types... progressively designed for advanced circuitry and audio tubes... total complete coverage over impedance and wattage ranges... Triad units provide finest response in minimum space... and outlive all others.

CHOPPER INPUT TRANSFORMERS

Triad Chopper Input Transformers provide exceedingly close balance between the two halves of the primary winding... minimum noise in microvolt ranges of input signals is assured with Triad's special core treatment techniques. For demanding transistor and tube applications, Triad's special design capabilities have an outstanding record. For special applications, consult Triad.

TOROIDS

Triad toroids may be ordered with standard leads in strong plastic coating, or epoxy molded encapsulated per Specification MIL-T-27A; TF5RX20Z2. To specify molded toroids with gold-plated fixed terminals, an "A" should be added to the full type number; for example, EM-001A.

CT For Center Tap. †Split secondary.

Sub-miniature Encapsulated TOROIDAL INDUCTORS

Triad sub-miniature toroidal inductors, designed for quick, easy printed-circuit board mounting, are now stocked for immediate delivery in a range of standard ratings from 50 micro-henries to 100 milli-henries. Many uses, especially in airborne telemetering applications incorporating Triad's sub-miniature filters FL-384 through FL-388. Case size of units is 1/8 inch diameter by 1/4 inch high. Providing an optimum combination of high Q and extremely small-size, this series is ideal for printed board, transistor or vacuum tube application.

Triad sub-miniature inductors are toroidally wound on permalloy powdered cores. Encapsulated in high temperature epoxy resin. Veldable or solderable leads of gold plated nickel alloy. Highly resistant to severe acceleration, shock or vibration. Manufactured to MIL-T-27B, Grade 5 Class S (MIL type TF5SX20ZZ).

NOTE: Ma. DC maximum is for approximately 5% drop in inductance. Those figures marked * will give less than 5% inductance drop but should not be exceeded under operating conditions.

Inductance tolerance of EX-P05A through EX-P60A is $\pm 5\%$; EX-001A through EX-400A is $\pm 2\%$.

Prices subject to change without notice. Net prices shown for 1-9 quantity. For 1 to 249 pieces, see your stocking Triad Distributor for quantity discount schedule. For 250 or more pieces, contact your Triad Representatives or call the factory.

SHIELDING

P-1—One nickel alloy high permeability shield — 45db. reduction in pickup.

P-3—Two nickel alloy shields interleaved with one heavy copper shading ring — 70db. reduction in pickup.

P-5—Three nickel alloy shields interleaved with two heavy copper shading rings— 95 db. reduction in pickup.

Prices subject to change without notice. Net prices shown for 1-9 quantity. For 1 to 249 pieces, see your stocking Triad Distributor for quantity discount schedule. For 250 or more pieces, contact your Triad Representative or call the factory.

Contact your local *ELECTRONIC DISTRIBUTOR*
for all your requirements!

You can depend on him for...

NOTES

- Frequency response: ± 2 db, 300 Hz — 250,000 Hz @ 1 MW Ref. level
- Dielectric strength tested @ 200V RMS
- Designed and tested to full MIL-T-27C environmental requirements
- MIL Grade 4, metal-encased, ruggedized
- Lead Material: Gold-plated ribbon-style Kovar, solderable and weldable — MIL-STD 1276A Type K

PACKAGING

Size reduction without loss of performance is achieved by major reduction of air gaps in the magnetic circuit. Core permeability closely approaches the theoretical maximum for material and structure. Materials, dimensions and surface finish are identical with IC Flat Pack standards. Removable support protects terminal alignment prior to final assembly. This insulated support allows testing in conventional jigs.

RELIABILITY

Cylindrical bobbin-winding techniques eliminate corner stress normally found in fine-wire windings of conventional rectangular structures. Lead arrangements and terminations have been designed to maximum reliability under thermal shock and temperature cycling.

FLEXIBILITY

These units are designed to afford maximum flexibility of application. Transformers are 7-terminal types, with center-tapped primaries and split secondaries. When connected in parallel, split-winding secondaries provide 1/4 the impedance and twice the DC current capability as series connections. Inductors in the stock line include both single-winding and split-winding types. Leader may be bent for plug-in PC application.

UTC PAGE T-1

* UTC Trade Mark. All Product Lines or Type Designations are UTC Trade Marks. Specify by Trade Mark to assure UTC high quality and reliability. © 1969 United Transformer Co., Div. of TRW INC.

Manufactured and successfully tested to complete environmental requirements of MIL-T-27C. Most Ruggedized MIL Structure, Grade 4, Metal Encased, MIL types TF4RX13YV, TF4RX16YV. Immediate Delivery From Stock. Full Conformance to MIL Mounting Requirements. Solderable and Weldable Leads, Hermetically Sealed. Straight Pin Terminals. Excellent Resistance. High Efficiency. Low Distortion. Leads are 7/64" x .015 Diameter, 16 Gold plated, and may be either welded or soldered. They are unsoldered and are spaced on a .125" radius circle. In pulse coupling impedance matching applications (when measured with a 30 microsecond input pulse voltage wave), typical values for these transformers are: less than 1% drop, zero overshoot, and less than 10% bawing. Also see UTC page T-3 for other DO-2 family constructions.

U. S. PAT. NO. 2,949,591;
others pending.

For other Magamps see UTC page T-7.

The "MAS" magamps operate on an input of 115 V, 400 Hz with an output of ± 7.5 V DC, 1000 ohm load and have 2 isolated control inputs. These magnetic amplifiers afford a power gain of approximately 30,000. The power input and output are also completely and individually isolated. The "MAS" magamps are manufactured to MIL-T-27C standards. Units are housed in a hermetically sealed steel case with plug-in octal compressed glass terminals. The "MAS" magamps are 3 inches high with a 1/2 inch diameter and weighs approximately 1/2 pound.

The "MAS" magamps have many advantages over other active circuit elements such as tubes, transistors: • Long life and years of maintenance free operation due to magnetic characteristics and solid state elements. • Ruggedness can withstand high shock, vibration, radiation, and moisture. • Reliability — can withstand 10 times overloads and operate into short without damage.

Possible applications include: • Control Amplifier • Photocell • SCR Controls • Strain Gauge Amplifier • Meter Preamps • Thermocouple • Differential Amplifier • Signal mixing, summing, integration • Hydraulic Servo Valve Driver • Servo Motor • Linear Amplifications of Transducer Signals.

PRECISION SCOTT-T REFERENCE TRANSFORMER

NEW SRC-10*

Designed, Manufactured and Successfully
Tested to Complete MIL-T-27C Specifications

Used in the precise conversion of three wire synchro information to equivalent resolver information. Two outputs 90° apart are obtained, which can be utilized in analog and digital computer application or coordinate transformation applications. Mil type TF4SX09AJ.

Special custom built units with other electrical values are available to your requirements

Input 90V 60/400 Hz 3 Phase high impedance

suitable for synchro output.

Output 1) 3V @ .25 MA 2) 3V @ .25 MA 2 Phase Output.

a) Magnitudes of output voltage matched within 0.25%.

b) Phase angle of output voltages is 90° ± .225°.

Suggested Net Each: \$24.00

PIP* SERIES TRANSISTOR PULSE TRANSFORMERS

UTC's PIP series of subminiature transistor type pulse transformers is designed to give a maximum of component density in equipments, their configuration being especially compatible with transistors. The design is based on the UTC DO-T and DI-T series to impart exceptional reliability. PIP-1 through PIP-9 have a ratio of 4:4:1, PIP-10 through PIP-12 have a ratio of 5:3:1. All units are checked and adjusted in a transistor test circuit to give the required pulse width.

TRANSISTOR TRANSFORMERS

Designed, Manufactured and Successfully
Tested to Complete MIL-T-27C Specifications.

TRANSISTOR SUPPLY TRANSFORMERS

Primary 115V. 50/60 Hz (tapped on H-143 thru H-146 for dual secondary voltages). DC ratings are approximate, based on silicon bridge rectifier (except H-141, H-142 also shown F.W.C.T.). Choke input DCV is based on 10% voltage drop in choke. Condenser value, C, is in 1000 mfd. H-141, H-142, H-147 listing under "Secs in parallel" is single winding. All units MIL type TF4RX02.

HERMETIC COMPONENTS

Designed, Manufactured and Successfully
Tested to Complete MIL-T-27C Specifications.

HERMETIC AUDIO UNITS

RC-25 RC-50 FH SM

These extremely compact units are proved to specifications of MIL-T-27B. Response & level ratings: RC-25: Similar to 100ers for case (11/32" x 1/4" x 1/2" h. 1.5 oz.). RC-50: Similar to ultra compact units for case (11/16" x 1/8" x 3/32" h. 8 oz.). SM: Similar to SSO units for case (1/16" x 1/2" x 3/32" h. 0.8 oz.). FH: 2 3/32" x 2 3/32" x 3/16" h. .8 oz.

HERMETIC SEALED POWER and PLATE TRANSFORMERS

H-114, H-115, H-117 have terminals opposite mounting.

Power transformers: primary 115V, 60 Hz suited to 50°-1000 Hz service. Plate transformers: primary 105/115/210/220 volts, 50/60 cycles, 1/4" ratings are choke input. "C" ratings are condenser input. H-80 thru H-197 MIL type TF4RX03, H-110 thru H-117 MIL type TF4RX02. The tapped high voltage winding provides either of two secondary voltages for greatest versatility. The power transformer listings indicate DC voltages and permissible currents for both choke and condenser input filters, as well as for military and industrial applications.

"W" suffix units designed for full wave center tap and full wave bridge application. Center tap of secondary may be disconnected from ground.

MAT* MAGNETIC AMPLIFIERS FOR SERVO MOTOR APPLICATIONS

VACUUM TUBE TYPE

The MAT 1-4 Magnetic Amplifiers are exceptionally stable units designed for the control of 2 phase, 115V., 400 Hz servo motors. They are compact... hermetically sealed... magnetically shielded... and meet MIL-T-27C and MIL-E-5400 Specifications. The output is sinusoidal, amplitude variable, and phase reversible. Control is provided by a dual triode such as 12AU7 operating with a plate voltage of 115 volts, 400 Hz. or higher. The signal to the triode grids can be polarity reversible DC or phase reversible 400 Hz with or without suppressed carrier modulation. These units eliminate DC power requirements as well as temperature sensitive dry disc rectifiers. The high input impedance provides minimum loading on sensing elements and high power gain. Ringing at low load level has been reduced to a minimum through high internal damping factors. The power output figures are conservative... power gain of the Magnetic Structure is approximately 40... response time approximately 7.5 milliseconds. The maximum null voltage is 3 volts RMS. For single phase supply voltage the load capacitor should effect 90° phase shift with motor load... for 3 phase, 30° phase shift.

ULTRASHIELDED POWER-LINE ISOLATION TRANSFORMERS

Simulates battery operation for critical circuits requiring extreme isolation from power line.

Designed to give the ultimate in isolation, for line-powered equipment, which formerly could only be obtained from battery power. The effective capacity coupling between primary and secondary windings is less than 0.1 MMFD.

For this purpose shields are individually terminated to allow maximum flexibility. Input and output terminals are brought out on opposite sides of a special housing in order to maintain the excellent isolation between line and load.

PRECISION MINIATURE WIDE APPLICATION PULSE TRANSFORMERS MANUFACTURED & GUARANTEED TO COMPLETE MIL-T-21038B

UTC miniature, wound core, pulse transformers are individually precision adjusted in standard test circuits to close tolerances. They are high reliability units, hermetically sealed by vacuum molding and suited for service from -70° C. to +130° C. Wound core structure provides excellent temperature stability (un-

like ferrite). Designs are high inductance type to provide minimum of droop and assure true pulse width. H-45 thru H-57 ratio 1:1. H-60 thru H-69 ratio 4:4:1. Others ratio 5:3:1.

Also see pulse units on UTC pages T-1 & T-3.

HI-FI & BROADCASTING COMPONENTS

ULTRACOMPACT* HI-FI AUDIOS

Small light weight, wide range units. Level +15 dbm except where otherwise noted. Top and bottom mounting. Die cast case, 1 1/2" x 1 1/2" x 2" h. Weight, 1/2 lb.

HIPERMALLOY* TRANSFORMERS

Hipermalloy audio and power transformers are specifically designed for portable and compact service. High fidelity though light in weight and dependable. The frequency characteristic of the Hipermalloy audio units is uniform from 30 to 20,000 Hz. They incorporate a Hipermalloy nickel iron core and hum balanced coil structure. The rugged die cast case is of high conductivity alloy finished in grey, arranged for mounting with the terminals either up or down. DC in Primary shown is maximum unbalanced.

PLATE TRANSFORMERS

Primaries for 105, 115, 220, 230 volts; 50/60 Hz. For reduced power, secondary can be cut in half, using 220 v. primary on 110 volts; may be used on 25 to 43 Hz in this case. "W" suffix units designed for full wave center tap and full wave bridge application. Center tap may be disconnected from ground.

MINIATURE, OUNCER, SUBOUNCER & SUB-SUBOUNCER UNITS

SUBOUNCER* & SUB-SUBOUNCER* AUDIO TRANSFORMERS TRANSISTOR & TUBE TYPES HERMETICALLY SEALED

Designed, Manufactured and Successfully Tested to complete MIL-T-27C Specifications.

UTC SSO-#P and SO-#P units are ideal miniaturized components having high efficiency and wide frequency response. Special nickel iron core materials and winding methods provide exceptional performance and reliability.

These units are vacuum molded to MIL Grade 5. They employ 50 mil deeply anchored pin terminals ideally suited for printed circuit and transistor application. Terminals are strong enough to support these light weight units.

The UTC SML-70 is an ultra miniature transformer providing high shielding, extremely low insertion loss with wide band response, 200 Hz to 20 kHz. These units are provided with pin terminals (.025 dia.) strong enough to support the unit and are ideal for printed circuits.

SO-#P UNIT

Dim. $\frac{3}{4} \times 1 \times \frac{3}{4}$ "

AMATEUR & PUBLIC ADDRESS TRANSFORMERS "S" SERIES

DIMENSIONS, SPECIAL SERIES TRANSFORMERS

G-1 thru G-4

G-5 thru G-12

UTC Special Series transformers are specifically designed for amateur and popular-priced PA service. These units are finished in a rich, commercial type medium gray enamel. A recessed terminal strip is provided, permitting above chassis or bread-board wiring in addition to standard chassis type.

PHOTOFLASH TRANSFORMERS STANDARD 982

Can be used for either standard (Anglo type) or trigger (Sylvania type) multiple flash tubes. Circuit details included with transformer.

PF-1 Primary for 115 volts, 50/60 Hz. Secondaries for power supply delivering 2200 volts DC to condenser up to 100 Mfd. Compandor sealed in G-3 (UTC page T-11) case 2 1/2 x 2 3/4 (3 3/4 including flanges) x 2 1/2 inches high. Wt. 2 lbs. Suggested net each: \$10.20

PF-3 Trigger Transformer 15 KV peak. 7/8 O.D.x 3 long. Weight 2 oz. Suggested net each: \$7.20

PF-6

TRANSISTOR TYPE

These are miniaturized light weight units for transistor type photo-flash supply.

PF-5 Primary for 115 volts, 50/60 Hz or for 4 1/2 V. battery switched by PF-6 inverter transformer. Output delivers 400 V. DC when used in voltage doubler circuit to charge photoflash capacitor (typically 40 watt-sec.). G-1 case (UTC page T-11) Suggested net each: \$10.20

PF-6 Inverter transformer transforms 4 1/2 V. DC from battery to input for PF-5 stepup transformer. Ouncer case (UTC page T-11) Suggested net each: \$7.50

PF-7 Trigger transformer. Shorting .25 mfd. capacitor (charged to approx. 225 V. DC) across terminals 1-2 produces 6 KV pulse at terminal 3 for triggering flash tube. 7/8" Dia. x 1 1/8"; Wt. 1/2 oz. Suggested net each: \$4.50

LINE VOLTAGE ADJUSTERS WITH METERS (FIG. H SEE PG. T-11)

The perfect answer to abnormal or fluctuating line voltage. Adjust switch so that meter reads at red line and you know that your equipment is working at correct voltage. These units combine a tapped auto-transformer with a switch and meter in a compact, rugged assembly. The nine-tap switch provides for line voltage of 60 to 140 volts on 115 volt output models and 160 to 240 volts on 230 volt output model. All units are designed for 50/60 Hz service and come complete with 6 foot input cord and plug and outlet receptacle.

Type No.	Primary Volts	Sec. Volts	Watts Ratings	L	W	H	Wgt. Lbs.	Sugg. Net Ea.

SIGNALLING & CONTROL TRANSFORMERS (FIG. H SEE PG. T-11)

Primary 110-220 volts, 50/60 Hz — Secondary 4/8/12/16/20/24 volts

High power transformers suitable for operating relays, sirens horns, gongs, etc. from 115 V. 50/60 Hz line. These units have four secondary terminals providing 4, 8, 12, 16, 20 and 24 volt output. The volt ampere rating is based on the 24 volt secondary tap with corresponding reduction at the lower voltages. Underwriters' approved primary leads are employed, and screw-type binding posts.

**It's so easy to order
from this catalog . . .**

When ordering products shown in this book
or writing for additional information, please
be sure to specify:

- 1. The Year and Edition of This
MASTER.**
- 2. Manufacturer's Catalog Numbers
and Page Numbers.**

This will avoid confusion and expedite delivery.

Thank you!

AUTOMATIC

AMPERITE

REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

AUTOMATIC REGULATION WHAT IT IS

The AMPERITE Ballast-Regulating Tube is an automatic "rheostat" designed to keep the current in a circuit at a definite value, for example, 0.5 amp.

Should the supply voltage increase, the Amperite will automatically increase in resistance enough to take up the increase in supply voltage — keeping the voltage on the load constant. It consists of an iron wire hermetically sealed in a bulb containing hydrogen or helium — the two gases with the highest heat conductivity. Its regulating action is based on the high temperature co-efficient of resistance of the iron wire and the rapid cooling of hydrogen or helium gas.

Being a constant current device, the AMPERITE Ballast-Regulating Tube can be used only to regulate a constant load—fixed wattage. Thermostatic relays can sometimes be included in these regulators to reduce initial surge.

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

MINIATURE

(T)=Threshold Current & Voltage

Characteristic curve of a typical Amperite. Approximate curve of any other Amperite can be obtained by multiplying or dividing the current or voltage scale by any number.

Standard Types of Amperite Ballast Tubes Net \$1.80
Amperite NE70V Neon Lamp Net \$1.80

*T denotes T5½ bulb-7 pin miniature, e.g., 3T4.

**TF denotes T6½ bulb-9 pin miniature, e.g., 3TF4.

Base Wiring: Octal, 7 and 9 pin miniature—prongs 2-7.

AMPERITE NEON LAMP
TYPE NE70V Net \$1.80

GENERAL ADVANTAGES:

- Light, compact • No moving parts • Rugged; will withstand vibration of 10G. minimum
- Hermetically sealed; not affected by altitude or humidity changes • Can be changed as easily as a radio tube • Operates equally well on A.C. or D.C. • Inexpensive

CAPACITIES AVAILABLE

Current values of 60 ma. to 5 amps; threshold voltage 0.4 to 40 V. Maximum dissipation 50w per tube (ST19 bulb). Any number of AMPERITES with the same voltage range can be operated in parallel. AMPERITES should not be used in series.

AGEING

AMPERITE Ballast Tubes may change approximately up to 3% in current if aged for 4 to 8 hours, at maximum voltage. They will change very little thereafter.

LIFE EXPECTANCY

Average life if operated as
recommended 2000 Hours
If operated continuously at maximum voltage 1000 Hours
If operated continuously at 80% maximum voltage 5000 Hours
If filament is operated below glow point 5000 Hours up

In operation, the Amperite filament starts to glow at one point; as the voltage is increased, the glow spreads over the entire filament. Like incandescent lamps, turning Amperite on and off reduces its life, especially if operating near its maximum voltage.

TIME LAG CHARACTERISTICS

Time lag encountered in an Amperite Ballast Tube depends upon the wattage consumed by the ballast and the size of the bulb. Where the wattage is small for the size of the bulb, the action can be made practically instantaneous — less than 1 second. In such cases the bulb will remain at practically ambient temperature. When the wattage is high enough to heat the bulb to a temperature uncomfortable to the hand (160°F) the lag might be as much as several minutes for final readings—but normally reaches within 90% of final readings within a few seconds.

AMPERITE NUMBERING SYSTEM

In general, the AMPERITE number approximately denotes the current—voltage threshold value. For example:

Amperite Number 3-4 3H4 10-7 12-11 12H11
Threshold Current 0.3 0.35 1.0 1.2 1.25
Threshold Voltage 4.0 4.0 7.0 11.0 11.0

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

AUTOMATIC

AMPERITE

REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

AMBIENT EFFECTS

Ambient temperature variation of -50° to $+70^{\circ}$ C will change the current value of an Amperite approximately 2% on regulating portion of curve as shown directly below. Being hermetically sealed the Amperite is not affected by altitude or humidity changes.

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

Amperite Ballast-Type 6-4 current voltage characteristic under ambient conditions of -55° , 24° , and 85° C. The percentage change with ambient is approximately the same with all type Amperite ballasts.

This diagram illustrates far superior regulating characteristics of the Amperite Ballast-Regulating Tube. **STANDARD SIZES** available for various wattage consumption . . . For good regulation, a bulb should not be required to dissipate more than 50% of maximum wattage.

BATTERY CHARGING AND DISCHARGING

Amperite Ballast Tubes are very successfully used for keeping the current constant in charging and discharging batteries. Any number of Amperites of the same voltage range can be placed in parallel to obtain proper current. The current can be kept to $\pm 1\%$. Advise voltage variation and currents desired.

A light, compact, and inexpensive method of obtaining close regulation is to use an Amperite Ballast Tube with an Amperite Neon Lamp — type NE70V. Base octal-base wiring-prongs 2-5. One NE70V is used for all loads up to 100W.

POWER SUPPLIES

We strongly recommend, for any particular application, to fill in and return one of our special problem sheets (ASP 343) and permit us to recommend the most suitable AMPERITE.

POWER SUPPLY	Dry Cells	6 Volts	12 Volts	26 Volts	115 Volts
Supply Variation	2.2-3.0V	5.5-7.5V	11.4-13.8V	22.0-30.0V	105-125V
Desired on Load	1.8-2.0V	3.9-4.1V	6.1- 6.4V	12.4-12.8V	90- 95V
Required on AMPERITE	0.4-1.0V	1.6-3.4V	5.3- 7.4V	9.6-19.2V	15- 30V
Current Variation	.29-.32a	.29-.32a	.29-.32a	.29-.32a	.29-.32a

The above chart shows the maximum load voltage for the given supply to obtain $\pm 2\%$ current regulation on load. Better regulation is obtainable by increasing the voltage across the AMPERITE.

Up to a point, the higher the percentage of the supply voltage taken up by the AMPERITE, the better the regulation.

Radio tube filament loads — have low cold resistance which causes a high initial surge. For such loads we recommend a bleeder of 20 to 50% prox. of load and the corresponding AMPERITE. e.g.

FILAMENT LOAD	USE AMPERITE	TOTAL CURRENT
0.3a	4HTF4	0.45a
0.6a	8-4	0.8a
0.7a	9H4	0.95a

On Radio tube filament loads the bleeder will also improve the regulation.

DUMONT^{E R P}

DUTREX INDUSTRIES, INC.

DUMONT WARRANTY SPECIAL PURPOSE AND INDUSTRIAL TUBES

Warranty Class Subject to Adjustment	Full Adjustment	Pro-rata Adjustment	Adjustment from Date of Shipment
A		3000 hours	1½ years
B		1 year	1½ years
C	50 hours		1½ years
D		2 years	3 years
E	50 hours	1000 hours or 1 year	1½ years
F	1 month		1 year
G	50 hours	500 hours	1½ years
H	1 month	1 year	2 years
I	50 hours		
J		5000 hours	
K	1000 hours or 3 months		1½ years
L		2 years	3 years
M	10,000 hours or 2 years		2½ years
N	1 year		1½ years
O	6 months		
P	3 months		6 months
Q		7500 hours	2 years
R		2000 hours	2 years
S	5% in lieu of defective adjustment		
T	15 days	12 months or 3000 hours	2 years
U	6 months	12 months	1½ years unless tube life exceeds 1000 hours
V	12 months	24 months	2 years unless tube life exceeds 1000 hours
W	50 hours	750 hours	1½ years

To receive credit consideration for tube failure within warranty period, claim must be presented within thirty (30) days after failure of tube.

All in warranty industrial products other than code classification "S" must be accompanied with a tube service report.

WARRANTY AND ADJUSTMENTS

When operated within their specified ratings, Du Mont E. R. P. Power, Transmitting, and Special Purpose tubes are warranted against defects in workmanship and materials. No other warranties are given or may be implied. In no instance will Dutrex Industries, Inc. be liable for consequential damage.

PRICE POLICY

Prices of Du Mont E. R. P. Industrial Electronic tubes are those stated in current published price schedules and special price bulletins as issued by Dutrex Industries, Inc. All prices are subject to change or withdrawal without notice.

This is a partial listing of tube types available from our warehouse. Contact us for your requirements on:

ULTRACOLOR — These tubes are manufactured to all of the essential original equipment specifications; will utilize rare earth or sulfide phosphors, new electron guns, and may or may not utilize used glass and other materials.

MONOCHROME — All materials and parts used in the manufacture of General Electric monochrome picture tubes are new except for the envelope which, prior to re-use, has been inspected and tested to meet our high-quality standards.

GENERAL ELECTRIC

Industrial Receiving and Communication Tubes

GENERAL ELECTRIC

5654

FIVE STAR TUBES

In industrial and communication equipment — critical sockets where there can be no compromise with electronic tube performance — you can depend on the proven reliability of GE Five-Star tubes. Their high reliability is a result of special design features, special manufacturing processes, special tests, and stabilizing periods.

6688A

ENTERTAINMENT TUBES

G. E. offers a full line of entertainment tubes encompassing the fields of radio, TV, and hi-fi. Featured as a portion of this line are 26 types specifically designed for high-fidelity monaural and stereo applications.

5670

6146A

5963

5965A

INDUSTRIAL RECEIVING TUBES

For industrial and military applications involving electronic instrumentation and control, there is a G-E industrial receiving tube specifically designed to meet your particular requirement.

6661

COMPUTER TUBES

Two complete tube lines, Computer and Five-STAR Computer, are designed to meet the specialized needs of the computer industry. Outstanding features include: high perveance, low heater power requirements, controlled cutoff characteristics, and long life.

A₁(1) Single Tube Class A Audio Power Amplifier.A₁(2) Push-Pull Class A Audio Power Amplifier.AB₁(1) Single Tube Class AB₁ Audio Power Amplifier.AB₁(2) Push-Pull Class AB₁ Audio Power Amplifier.

■ Absolute Maximum Rating.

‡ AC (rms) Plate Voltage.

† Applied for short interval (2 seconds, maximum) so as not to damage the tube.

* Approximate rating.

AB₂(2) Push-Pull Class AB₂ Audio Power Amplifier.

B(2) Push-Pull Class B Audio Power Amplifier.

B-P Single Tube Class RF Telephony Service.

CCS Continuous Commercial Service.

CF Coated filament (directly heated).

C-P Single Tube Class C Plate-Modulated Telephony Service.

C-T Single Tube Class C Telegraphy or FM Service.

CU Coated, Indirectly Heated Cathode (unipotential).

ICAS Intermittent Commercial and Amateur Service.

(R) Special ruggedized type for severe mechanical environment.

▲ Design-maximum Ratings

TF Thoriated-Tungsten Filament (directly heated).

Metal types are in boldface type.

σ Miniature types.

ρ Plate-to-Plate.

β Class C Amplifier with separate, rectified, unfiltered single phase, full-wave plate supply.

‡ Design-Center Value.

θ Five-Star type.

ε For Both Sections.

φ Maximum Signal Value with Sine Wave Signal.

♦ Peak Value during 15-microsecond pulse with Duty Factor of 0.0012.

§ Per Section.

ω Self-Rectifying Amplifier — Class C.

α Subminiature type.

‡ Supply Voltage.

τ Triode Connected; Grid No. 2 Tied to Plate.

† Zero Signal rating.

Industrial Receiving and Communication Tubes

GENERAL ELECTRIC

Industrial Receiving and Communication Tubes

GENERAL ELECTRIC

18 VALUE-ANALYZED benefits of GE 5-Star Tubes...

- Controlled inside diameter on bulbs reduces vibrational output and microphonics.
- Highly efficient getter performs throughout tube life and guides flash to avoid inter-element leakage.
- A getter flash shield improves initial leakage characteristics.
- Two double mica spacers, with additional anti-leakage slots, brace internal parts, provide superior inter-element insulation and improve vibration characteristics. 12 or 16 contact points give firmer fit between bulb and mount.
- Short, sturdy cages increase rigidity of tube structure.
- Plate ears are embossed for added strength and improved mica fit.
- U-bolt construction through top and bottom micas firmly secures the cage assembly.
- Smooth grid legs prevent a "sawing" action on the mica, reducing grid vibration and microphonic noise.
- Critical grids are plated with gold or silver to minimize grid emission.
- Passive cathode alloys assure reliability and long life in low-duty cycle circuits where interface tends to develop.
- Outside diameter and density of cathode coating are statistically controlled.
- Low thermo-conductivity cathode tab reduces heat loss.
- Cathaphoretic coating of all heater bends after forming insures complete heater-cathode insulation.
- Folded heater design proved most reliable under shock, vibration and heater cycling conditions. Heater is temperature-controlled to further improve reliability and lengthen life.
- Rhenium-tungsten heater material increases tensile strength, reduces brittleness, and allows larger-diameter heater wire.
- Lead-glass stems help ward off glass electrolysis.
- Pins are annealed to prevent glass strain at socket insertion.
- Stem design minimizes welds—fewer points of possible failure—less change of short-causing particles from weld splash.

FOOTNOTES FOR TRANSMITTING TUBE LISTINGS

A Cathode to grid volts.

A₁(1) Single tube class A audio power amplifier.AB₁(2) Push-pull class AB₁ audio power amplifier.AB₂(2) Push-pull class AB₂ audio power amplifier.

B Referred to grid terminal.

B(2) push-pull class B audio power amplifier.

B-P Single tube class B RF telephone service.

C Driver power output.

C-P Single tube class C plate-modulated telephony service.

C-T Single tube class C telegraphy or FM service.

C-T (Pulsed) Single tube class C RF pulsed oscillator.

CF Coated filament (directly heated).

CV Thoriated tungsten cathode (indirectly heated).

CU Coated indirectly heated cathode (unipotential).

D Useful power output.

C-G-T Single tube class C grid-modulated video service.

PT Pure tungsten filament (directly heated).

TF Thoriated-tungsten filament (directly heated).

Broadcast tube type.

■ Intermittent Commercial and Amateur Service rating.

^a Cathode to grid volts.^b Referred to grid terminal.^c Driver power output.^d Useful power output.

6807	Negative-control, gas type. Super-jumbo bayonet base.	9	2 $\frac{5}{8}$	2.5	21	16	-55 to +70*	1,500	1,500	80	6.4	1,120	-6 @ 1,000
6808	Same as GL-6807 with flexible leads and bracket mount.	9	2 $\frac{5}{8}$	2.5	21	16	-55 to +70*	1,500	1,500	80	6.4	1,120	-6 @ 1,000
6809	Same as GL-6807 with spade lugs for panel mounting.	9	2 $\frac{5}{8}$	2.5	21	16	-55 to +70*	1,500	1,500	80	6.4	1,120	-6 @ 1,000
6858/760	Negative-control, filament type. Four-pin bayonet base. Medium cap.	9 $\frac{1}{2}$	2 $\frac{1}{8}$	2.5	21	12	-40 to +80	1,500	1,500	77	6.4	770	-4 @ 500 -5.5 @ 1,250
6859/760-P	Negative-control, filament type. Bracket-type base for panel mounting. Medium cap.	9 $\frac{1}{2}$	2 $\frac{1}{8}$	2.5	21	12	-40 to +80	1,500	1,500	77	6.4	770	-4 @ 500 -5.5 @ 1,250
7518/710-L	Negative-control, gas and mercury type. Spade lugs for panel mounting. Medium cap.	6 $\frac{1}{4}$	1 $\frac{5}{8}$	2.5	9	15	-40 to +80	1,000	1,250	30	2.5	250	-5 @ 1,000
7725	Negative-control, gas and mercury type. Quick-heating filament. Four-pin bayonet base. Medium cap.	6 $\frac{1}{4}$	1 $\frac{5}{8}$	2.5	9	15	-40 to +80	3,500	3,500	30	2.5	250	-5 @ 1,000 -9 @ 3,500
7726	Same as GL-7725 except spade lugs for panel mounting.	6 $\frac{1}{4}$	1 $\frac{5}{8}$	2.5	9	15	-40 to +80	3,400	3,500	30	2.5	250	-5 @ 1,000 -9 @ 3,500

Miniature types are in bold face.

* Temperature rating expressed in ambient temperature range over which the tube will operate.

Ignitrons

GENERAL  ELECTRIC

Ignitrons are gas-discharge tubes employing a mercury pool as the cathode. The mercury pool cathode provides extremely high emission capability. Initiation of conduction in the ignitron is accomplished by means of a starting electrode called the ignitor. The ignitor is a small rod of highly refractory material which dips into the mercury pool. The passage of ignition current through the ignitor causes a cathode spot to form at the junction of the ignitor and mercury pool. Ionization from the cathode spot spreads throughout the volume of the ignitron and when the anode is positive electrons flow to it. By control of the point in the A-C cycle at which the ignitor is fired the duration of current flow through the ignitron is controlled. The ignitron,

therefore, is ideally suited for high current rectification and control service. The following charts present summarized rating information for General Electric ignitrons. All ratings are based on 25-60 CPS operation. For convenience to the user the ignitron types are grouped by typical application service. Many types are rated for more than one service and therefore appear in two or more rating charts. More detailed ratings are available upon request for all of the G.E. ignitrons listed. The ignitron has long been recognized as a long life, highly reliable device. As the industry's leading ignitron manufacturer General Electric is pleased to present the information contained in this booklet and invites your inquiry for additional application assistance if required.

For above types, warranty is normally K-1000, however warranty information for specific applications will be supplied upon request.

IGNITRON ACCESSORIES

THERMOSTAT KITS

Kit includes thermostat and spring-loaded fastener in a captive assembly for connection to mounting pad located on ignitron water jacket.

Single-pole contacts perform control functions as shown in chart below.

Kit No.	Function	Contacts	Temperature		Termination
			Open (°F)	Close (°F)	
N15272AA	Water control	NO	86	96	36-inch leads with spade terminals
N15273AA	Over-temperature protection	NC	125	105	36-inch leads with spade terminals
N15286AA	Water control	NO	86	96	Terminal block
N15287AA	Over-temperature protection	NC	125	105	Terminal block

COOLING CLAMP

IGNITOR TERMINAL CONNECTING LEADS

Suitable for use with GL-5550, GL-7171 and GL-7703 to accomplish cathode connection and liquid cooling: Cat. No. L 6922259-G5	Insulated leads for connection to 0.250-inch diameter ignitor terminals	Cat. No. N 22006LC	7 $\frac{3}{4}$ inches long
		Cat. No. N 22007LC	13 $\frac{1}{2}$ inches long

QUICK-CHANGE WATER CONNECTORS

Ignitron installation time is reduced through the use of slotted anode and cathode terminals . . . provided as a regular feature on all standard G-E welding ignitrons . . . and the use of the quick-change brass water hose connectors shown in table.

Fitting No.	Description	Use with G-E Ignitron Type
B1HK	Socket	GL-5551-A, GL-5552-A, GL-5822-A, GL-7669, GL-7670, GL-7671, GL-7672, GL-7681, GL-7998, GL-8360, GL-37250, GL-37251, GL-37252, GL-37253
B1K11	Plug	
B2HK	Socket	GL-5553-B, GL-5554, GL-5555, GL-6512, GL-6513, GL-7673, GL-37254, GL-37255
B2K16	Plug	

CONDENSED WARRANTY INFORMATION

G-12—

(Rectifier service only.) Warranted for full replacement within one year of service. Expires 18 months from date of sale to ultimate user or two years from date of shipment by G.E.

H-12—

Warranted for one year with prorated adjustment after 15 days of service. Expires 18 months from date of sale to ultimate user, 12 months from date of initial installation, or 2 years from date of shipment by G.E.

H-24—

Warranted for two years with prorated adjustment after 15 days of service. Expires 36 months from date of sale to ultimate user, 24 months from date of initial installation, or 3 $\frac{1}{2}$ years from date of shipment by G.E.

K-1000—

Warranted for 1000 operations or six months of service with prorated adjustment for the difference between elapsed number of operations and 1000. Expires nine months from date of sale to ultimate user, six months from date of initial installation, or twelve months from date of shipment by G.E.

NOTES

- (1) Peak inverse voltage.
 (2) This is the bogey value at which average characteristics are determined. For some classes of operation a lower value may be recommended.
 (3) These are the highest values listed for any class of CW operation; lower values may be indicated for some classes of CW operation. Refer to complete data sheets for this information.
 (4) Adjusted for $I_b=75$ milliamperes.
 (5) Peak voltage rating for pulse service.
 (6) Pulse service.
 (7) Adjusted for $I_b=70$ milliamperes.

- (8) The frequency listed is one at which significant application data are available or expected, and does not necessarily represent an absolute frequency limit.
 (9) Adjusted for $I_b=10$ milliamperes.
 (10) Adjusted for $I_b=10$ milliamperes; range must be variable from 75 to 200 volts.
 (11) Bypassed resistor (18k) in plate-supply lead.
 (12) With $R_k=910$ and $E_g=+6.0$ volts.
 (13) With $R_k=270$ and $E_g=+6.0$ volts.
 (14) Bypassed resistor (17.5k) in plate-supply lead.
 (15) Plate dissipation of 100 watts is permissible with forced-air cooling.

Special Devices — Photo Conductive Cells

GENERAL  ELECTRIC

Reliable, hermetically sealed, or plastic encapsulated, cadmium sulfide and cadmium selenide photoconductive cells are available in a wide assortment of package sizes and electrical characteristics.

Photocell-lamp combinations consist of a photoconductive cell and an illumination source enclosed in a light tight, metal package available in an assortment of electrical characteristics.

NOTES

- The time required for current through the cell to reach 90% of its steady value upon switching from darkness to a light level of 5 footcandles.
- The time required for current through the cell to decrease to 10% of its steady value upon switching from a light level of 5 footcandles to darkness.
- This dissipation is allowable at ambient temperatures from -40 to +40C. From +40 to +65C, the allowable dissipation decreases linearly, reaching zero at +65C.
- Measures approximately 30 seconds after removal of illumination of two footcandles produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin and at rated cell voltage.
- This dissipation is allowable at ambient temperatures from -40 to +40C. From +40 to +80C, the allowable dissipation decreases linearly, reaching 37 milliwatts at +80C, and going to zero above +80C.

- Measured approximately 20 seconds after removal of illumination of two footcandles produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin; d-c polarizing voltage 12 volts.
- Allowable dissipation may reach 500 milliwatts with external heat-conducting bracket.
- For a maximum of 20 minutes at 12-hour intervals.
- Measured approximately 30 seconds after removal of illumination of one footcandle produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin; d-c polarizing voltage 50 volts.
- This dissipation is allowable at ambient temperatures from -40 to +30C. From +30 to +65C, the allowable dissipation decreases linearly, reaching zero at +65C.

NOTES

- Current of a bogey lamp at rated voltage.
- This dissipation is allowable at ambient temperatures from -40 to +30C. From +30 to +65C, the allowable dissipation decreases linearly, reaching zero at +65C.
- Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 60 volts.

- Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 250 volts.
- Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 200 volts.
- Publication of these data does not obligate the General Electric Company to manufacture a device with these characteristics.

OUTLINE DRAWINGS

Special Devices — Reed Switches

GENERAL ELECTRIC

In a relatively short period of years, the dry reed switch has begun to play an important role in performing the switching function for a wide variety of electronic/electro-mechanical equipment. Major application, now in general use, range from telephone switchgear, appliances, and data processing units to logic circuitry for industrial controls.

The General Electric reed switch capsule consists of a pair of low reluctance, magnetically actuated, flat metal reeds, hermetically sealed in an atmosphere of dry inert gas. The reeds are of equal length and are supported as cantilevers, overlapping at the center of the glass cylinder where they are separated by a small air gap, thus forming a normally open Single Pole, Single Throw (SPST) switch.

NOTES

- (1) All switches use single-pole, single-throw, normally open, Form A contact arrangements. With the exception of type DRV120, which is a vacuum switch, all switches are filled with inert gas at an internal pressure 1/2 atmosphere.
- (2) Some degradation or improvement in performance may be expected at operating conditions other than those specified.
- (3) Sensitivity measured using a 6300 turn coil of #41 wire wound on a 0.8" long bobbin approximately 0.17" in diameter.
- (4) Full load, 25 volts d-c, 60 operations per second at H.V.A.
- (5) Diffused gold contacts with gold-plated leads.
- (6) Rhodium-plated contacts with gold-plated leads.
- (7) Sensitivity measured using a 10,000 turn coil of #39 wire wound on a 2.0" long bobbin approximately 0.25" in diameter.
- (8) Full load, 50 volts d-c, 60 operations per second.
- (9) Diffused gold contacts with both leads tinned.
- (12) Sensitivity measured using a 10,000 turn coil of #36 wire wound on a 1.750" long bobbin approximately 0.330" in diameter.
- (13) Nominal center-to-center of bent leads.
- (14) Diffused gold contacts with both leads tinned and bent on 90° angle.
- (15) Full load, 125 volts d-c, 60 operations per second.
- (16) The voltage rating is a "hold-off" value, and the current rating is a measure of the current the contacts will carry but not switch. Maximum permissible switching currents are to be determined.
- (17) Sensitivity measured using a 5,700 turn coil of #36 wire wound on a 2.0" long bobbin having an oval cross-section of approximately 0.5" x 0.28".
- (18) Rhodium-plated contacts with both leads tinned.

ALPHA WIRE

MIL-W-76B-PLASTIC WIRE TYPE MW-UNCOVERED PLASTIC

DESCRIPTION: Solid or extra flexible stranded tinned copper, color coded medium wall polyvinylchloride insulation. The stranded conductor has an extra tight lay to prevent springing open when stripped.

CHARACTERISTICS: Temperature rating —40°C to +80°C, Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture and fungus.

MIL-W-16878D

TYPE B-UNCOVERED PLASTIC Pre-Bonded Tinned Copper Conductor

DESCRIPTION: Each strand of the conductor is double tinned and then heated, which bonds the individual strands together for easy stripping. Color coded .010" polyvinylchloride insulation. The insulation meets requirements of MIL-W-16878D.

CHARACTERISTICS: Temperature rating —55°C to +105°C, Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

APPLICATION: A pre-bonded conductor is the ideal construction when leads are to be cut and stripped for point to point wiring. The pre-bonded conductor maintains much of the flexibility of an ordinary stranded wire but reduces processing and handling costs on soldering, retwisting of strands after stripping and hand tinning operations. Since the individual strands are bonded, expensive induction heating equipment is unnecessary.

Mil-W-5086A**UNSHIELDED AIRCRAFT WIRE FOR ELECTRICAL SYSTEMS****DESCRIPTION**

MIL-W-5086A — Type I — AN-22 thru AN-12 — Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon, (polyamide) jacket overall.

MIL-W-5086A — Type II — AN-22 thru AN-12 — Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, clear nylon (polyamide) jacket overall.

MIL-W-5086A — Type II — AN-10 thru AN-0000 — Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, flame retardant nylon lacquered nylon braid overall.

CHARACTERISTICS:

Temperature rating: -55°C. to +105°C. Voltage rating: 600 volts. Resists effects of water, oil, aircraft fuels, hydraulic fluid, skydral, ethyleneglycol, alcohol, dilute acids, alkalis, fungus and abrasion.

Flat Ribbon Cable

MULTI-CONDUCTOR — PLASTIC INSULATION
CONDUCTORS PER MIL-W-16878D, Type C

DESCRIPTION: Each conductor stranded tinned copper, color coded .016" polyvinyl-chloride insulation, conductors banded together to form flat ribbon cable.

CHARACTERISTICS: Temperature rating -55°C to $+105^{\circ}\text{C}$. Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

APPLICATIONS: Saves time, weight, and space on circuit connections, interconnecting assemblies and systems, wiring harnesses for racks, sliding drawer and drop panels. Conductors fully color coded and easily separated for neat terminations.

Shielded Microphone Cable

PLASTIC JACKET

DESCRIPTION: 1702-1706: Single conductor, stranded tinned copper, white polyethylene insulation, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

1709-1712: Each conductor stranded tinned copper, color coded polyethylene insulation, cabled with fillers, textile wrap, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

APPLICATIONS: 1702-1706: All high impedance microphones, lapel, ribbon, velocity, crystal contact, hi-fi interconnecting cables.

1709-1712: All low impedance microphones—carbon, condenser, dynamic.

CHARACTERISTICS: Suggested operating temperature: -20°C to $+60^{\circ}\text{C}$.

Low Capacitance Shielded Microphone Cable

CELLULAR FOAM POLYETHYLENE INSULATION — PLASTIC JACKET

DESCRIPTION: Single conductor, stranded tinned copper, white foam polyethylene insulation, braided tinned copper shield, chrome gray polyvinylchloride jacket.

Two conductors, stranded tinned copper, color coded foam polyethylene insulation, 1 white and 1 black, cabled with fillers, textile wrap, braided tinned copper shield, chrome gray polyvinylchloride jacket.

CHARACTERISTICS: Suggested operating temperature: -20°C to $+60^{\circ}\text{C}$. Low loss foam polyethylene provides lower capacitance and attenuation than standard solid polyethylene microphone cables, thereby increasing the effective length of usable cable without loss of signal.

E-Z-Strip Lamp Cord

U.L. APPROVED

DESCRIPTION: Conductors parallel, stranded extra flexible bare copper, rubber or polyvinylchloride jacket overall. Slit in jacket to permit "E-Z" separation.

APPLICATIONS: For line cord on radios, lamps, electric clocks, food mixers and other small instruments and appliances.

CHARACTERISTICS: Suggested operating temperature: -20°C to $+60^{\circ}\text{C}$. Suggested operating voltage: 300 volts.

RUBBER AND NEOPRENE JACKETS

DESCRIPTION: Each conductor stranded tinned copper, color coded rubber insulation, cotton wrap, braided tinned copper shield, cotton wrap, tough black rubber or neoprene jacket overall.

APPLICATIONS: 1248-1449: All high impedance microphone, broadcast and heavy duty studio use, communication and audio systems.

1250-1450/16: All low impedance microphone, broadcast and heavy duty studio use. Can also be used for control circuits, video and audio interconnection cable, and as electronic power cables.

CHARACTERISTICS: Suggested operating temperature: -20°C to $+60^{\circ}\text{C}$.

Rubber jacketed cable suited for standard duty indoor use.

Neoprene jacketed cable suited for heavy duty outdoor use and direct burial. Will resist oil, acid, sunlight, ageing and abrasion.

Shielded Plastic Jacketed Cable

SPIRAL WRAPPED COPPER SHIELD

DESCRIPTION: Each conductor stranded or solid tinned copper, color coded polyvinylchloride insulation, conductors twisted, spiral wrapped copper shield, gray polyvinylchloride jacket overall. **Nominal jacket thickness .020".**

CHARACTERISTICS: Use of spiral shield makes pigtailing off extremely simple and fast. Excellent for production line work. Provides close to 100% shielded coverage for audio and RF frequencies. Suggested operating temperature: 20°C to +60°C.

BRAIDED COPPER SHIELD

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, braided copper shield, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

CHARACTERISTICS: A conventional type of braided shield providing approximately 75% coverage is particularly desirable where flexibility is required. The copper shield allows ease of pigtail soldering. Shield construction provides additional cable strength. Operating temperature: -20°C to +60°C. **Nominal jacket thickness .020".**

APPLICATIONS: For public address and sound systems, ideal for recording studios, amateur radio transmitters, shielded power or electronic circuits, wherever an economical shielded cable is required.

Shielded Audio & Data Cable

INDIVIDUALLY SHIELDED MULTIPLE PAIRS — PLASTIC JACKET

DESCRIPTION:

Each conductor, tinned copper, color coded, high density polyethylene, conductors twisted into pairs. 22 gauge tinned copper drain wire. Mylar-supported aluminum foil shield, aluminum facing inward. Chrome Grey PVC jacket overall.

NEW

CHARACTERISTICS: Mutual conductance between conductors of a pair, 25 pf/ft. Capacitance of a single conductor to shield, 45 pf/ft.

APPLICATIONS: For audio, R.F. and pulse applications requiring superior circuit isolation.

#22 — SOLID

#22 — STRANDED

Shielded Plastic Jacketed Cable

MYLAR SUPPORTED ALUMINUM FOIL SHIELD

DESCRIPTION:

Each conductor stranded tinned copper, color coded polyethylene insulation, conductors cabled, wrapped mylar supported aluminum foil shield, 100% coverage with drain wire laid parallel, aluminum foil facing outward to provide maximum ground, gray pvc jacket overall.

CHARACTERISTICS: Operating temperature: -20°C to +60°C. Operating voltage: 400 volts. Light weight, reduces cable diameter, and provides 100% shield coverage.

RETRACTILE COIL CORDS

POWER CORDS—NEOPRENE JACKET U.L. APPROVED

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Long-lasting service is assured with this quality multi-conductor power cord. Each conductor is stranded copper, with rubber installation, and a rugged weather and oil resistant neoprene jacket overall.

APPLICATION: Used on electric tools, portable drills, soldering wires, electrical appliances, household appliances, etc., to eliminate loose hanging wires and to prevent wires from tangling and twisting.

CHARACTERISTICS: Suggested operating temperature: 20 C to 60 C.

*If all four conductors normally carry current, amp rating is as shown. If one lead is used as a ground, amp rating is the same as 2 and 3 conductor cords.
*A 12" retracted length with a 12" straight lead on each end for easy stripping and termination. Cord extends to approximately 6 feet.

RETRACTILE TEST LEAD WIRE

RETRACTED LENGTH 12"—EXTENDED LENGTH 6 FEET

DESCRIPTION: A high grade quality rubber insulation for maximum flex life extruded over a single conductor of extra flexible tinned copper which gives long life to this retractile test lead wire. Available in a 12" retracted length with a 6" straight lead on each end, the cord extends to approximately 6 feet.

RETRACTILE COIL CORDS

RETRACTILE COMMUNICATION COIL CORDS

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Multi-conductor communication cord manufactured with extra flexible #23 AWG 21 36 tinned soft cadmium copper for maximum flex life. Insulated with rubber for communication circuits of maximum 120 working volts. The overall jacket is a specially compounded cured neoprene jacket giving long life to the retractile cord.

APPLICATION: Used in communication equipment, such as telephone car carriers, mobile radio equipment, ham operations, head sets, citizen band units and radio transmitter to receiver head sets, communication cords eliminate hazards and inconveniences caused by tangled straight cords.

Tinned Copper Tubular Braid To MIL Spec QQ-B-575

DESCRIPTION: A woven tinned copper braid which is manufactured completely round as outlined in Mil Spec QQ-B-575. Each strand of the braid is soft drawn tinned copper wire. The braid is self-supporting and maintains its round configuration. The percentage of shielding coverage is 95% or more when placed over a mandrel of an equivalent diameter to the inside braid diameter.

ALPHLEX® ZIPPER TUBING

DESCRIPTION Alphlex Zipper Tubing is the all purpose modern way to harness, cover and protect cables. Just zip to close — and zip to reopen. If you wish, it may be permanently sealed with PB-200 Special Compound Liquid Sealer. Alphlex Zipper Tubing is strong, flexible, durable, and offers new freedom in design, production and repair.

APPLICATIONS To shield, to harness wire, to custom-cable to any length, to enclose, to encase, to identify (such as cable markers), to protect, to replace worn jackets.

TYPES OF ZIPPER TUBING						
TYPE	MATERIAL	WALL THICKNESS (Inches)	OPER. TEMP.	APPLICATIONS	STOCK COLORS	STANDARD PUT-UPS
ZIP-31	Polyvinylchloride made from MIL-I-631 D, GRADE C Materials	.020	-20° C to 105° C	All Purpose Type	Clear Black Yellow	25' 50' 100' 25' 50' 100' 25' 50' 100'
ZIP-31M	Polyvinylchloride made from MIL-I-631 D, GRADE C Materials	.040	-20° C to 105° C	Heavy Duty Constructions	Clear Black	100' 100'
ZIP-44	Polyvinylchloride made from MIL-I-7444 B Materials	.020	-67° C to 70° C	Extreme Flexibility, Low Temperature & Aircraft Industry	Clear Black	100' 100'
ZIP-50	Polyvinylchloride "sandwich" of aluminum foil laminated between two sheets of polyvinyl	.040	-20° C to 105° C	100% RF shielding	Silver-Grey	100'

Because of small Inside Diameter, these sizes cannot be closed by using the slider. The tracks must be closed by manual pressure.

ZIPPER SPECIFICATIONS FOR ALL TYPES OF ALPHLEX ZIPPER TUBING

Material	Polyvinylchloride	Cold Brittleness	-86° C
Track Thickness (when closed)	.095"	Fungus-proof	will not support fungus
Dielectric Strength, V/mil	759	Flammability	self-extinguishing
Tensile Strength P.S.I.	3810	Lateral Pull Strength (unsealed)	42.7 pounds/inch
Ultimate Elongation	255%	Lateral Pull Strength (permanently sealed)	59.8 pounds/inch
Operating Temperature, Upper Limit	106° C	Standard Colors	Black, Clear, Yellow

Contrasting color combinations of zipper and body are available to order. The zipper portion can be supplied in any of the following colors: Black, Yellow, Clear, Blue, White, Brown, Purple, Red, Orange, Green, Slate.

STANDARD SIZES FOR ALL ZIPPER TUBING

Zipper Tubing Inside Diameter	Approx. Flat Width (From track to track — excluding flap)
1/4"	1 1/4"
3/8"	1 3/4"

Alphlex® Polyvinylchloride Plastic Tubing (PVC-105)

CONFORMS TO MIL-I-631D †

DESCRIPTION: The superior mechanical, thermal, and electrical properties of Alphlex PVC-105, coupled with its economical cost have led to an ever increasing use of this all-purpose insulating material. Another major advantage of Alphlex PVC-105 is its high degree of flexibility, which is maintained even under severe environmental conditions.

Rated for temperatures as high as 105°C, PVC-105 has a high dielectric strength that remains unaffected by increasing temperature throughout its range. PVC-105 maintains a high resistance to the agents of heat, oil, chemical corrosion and fungi with no loss in tensile strength, or flexibility. Other features include an exceptional resistance to abrasion and indefinite shelf life.

Alphlex PVC-105 is compounded with first quality, non-migratory resinous type plasticizers. Carefully selected stabilizers and modifiers added in the manufacturing process, counteract chemical and environmental degradation. Under adverse conditions Alphlex PVC-105 retains its flexibility which permits it to cling to and protect irregular shapes. An unusually simple to handle insulating material, PVC-105 "snakes" well under all environmental conditions.

APPLICATIONS: Designed and manufactured for general electronic, aircraft and electrical applications involving temperatures as high as 105°C. Especially useful to protect wires and cables subject to abrasion or where a flexible tubing with a high degree of resistivity to oil, chemicals or solvents is necessary.

Alphlex® Teflon Extruded Tubing

CONFORMS TO MIL-I-22129B

DESCRIPTION: Alphlex Teflon Tubing is unmatched by any other type of tubing for use in electrical applications at high frequencies and temperatures. Teflon is rated for continuous operation at 250°C, and retains an exceptional toughness and its flexibility throughout its temperature range.

Alphlex Teflon Tubing has the further advantage of a high degree of resistance to flexural fatigue and repetitive stresses; coefficient of friction lower than that of any other known solid; and a dielectric constant and power factor lower than that of any other known solid. This tubing will not crack or become brittle during aging.

Because of its resistance to soldering iron temperature, Alphlex Teflon Tubing will not shrink back during the soldering process. Alphlex Teflon Tubing will not melt and flow as do conventional thermoplastic materials. At high frequencies, its dielectric strength is many times that of other insulating materials.

Alphlex Teflon Tubing is chemically inert, has zero moisture absorption and its insulation resistance properties are unaffected by heat aging or temperature use up to 250°C.

APPLICATIONS: A thin flexible insulation, Alphlex Teflon Tubing permits a miniaturization and compactness of design never before possible. Invaluable in any application where a high heat resistant, flexible, non-flammable, chemical solvent and corrosion-resistant material is required.

Irradiated Polyolefin Tubing

NEW ALL-PURPOSE SHRINKABLE TUBING — FIT-221

- SHRINKS 50% (2:1 RATIO) WITH ONLY 5% LONGITUDINAL SHRINKAGE
- FEWER SIZES COVERING MORE APPLICATIONS
- AVAILABLE TO MEET U.L. SPECIFICATIONS
- MEETS MIL-1-23053A (WEP)
- AMS SPECIFICATIONS 3636A (COLOR), 3637 (CLEAR)

DESCRIPTION: Alphlex FIT-221 Shrinkable Tubing, when heated, forms a tight-mechanical bond, even over irregularly shaped materials. FIT-221 is available in a range of colors and in clear.

FIT-221 is an all-purpose polyolefin extruded tubing that is simple to use and provides a tight mechanical bond. FIT-221 is an irradiated, thermally stable, modified polyolefin base product. FIT-221 Clear may be used so that jacketed, printed components or cable data is clearly visible and inspection of insulated components, cables or terminations is simplified.

The tubing is supplied in an expanded form and easily slips over the object to be covered. When a temperature of approximately 275°F (135°C) is applied, it immediately returns to its predetermined size (approximately one-half smaller) and forms a permanent tight-fitting mechanical bond. FIT-221 Tubing will not cold-flow or melt but retains form stability

throughout its temperature range. No radioactivity exists in or on the material and it will not emit radiation. Longitudinal shrinkage is 5% maximum when completely recovered.

Controlled shrinkage to the correct predetermined size takes place within seven seconds at 225°F to 255°F. Shrinkage will begin at 235°F, but at a somewhat slower rate. When using an oven, temperature may range from 235°F to 300°F. Prolonged exposure to these temperatures will not affect the physical or electrical properties of FIT-221 Shrinkable Tubing. FIT-221 Clear Tubing remains transparent over its entire operating range of -55°C to 135°C.

FLAMMABILITY: Although FIT-221 Clear is a high temperature material, it is flammable and will burn. However, when the tubing is shrunk over non-flammable or flame-resistant components, such as connectors, terminals and wire, the entire assembly will not support combustion.

All Types of FIT Tubing are available from stock and may be cut and/or marked to your specifications.

Irradiated Polyvinylchloride Tubing FIT-105

All Types of FIT Tubing are available from stock and may be cut and/or marked to your specifications.

HIGHLY FLEXIBLE — IDEAL FOR CABLE JACKETING

Conforms to MIL-1-631D, Type F, Form U, Grade C, Class 1, Cat. 1

SHRINKAGE RATIO 2:1 (50% Shrinkage)

DESCRIPTION: Alphalex FIT-105 is an easy-to-use modified polyvinylchloride that provides a snug, extremely flexible insulation.

Because of its flexibility, strength and its ability to shrink 50% on application of heat, FIT-105 is ideally suited for insulating components and cables with a wide variation in shape and diameter.

Because of the 50% expanded diameter of FIT-105 Tubing, it is an extremely useful cable jacketing material. Cable cores may be pulled through FIT-105 Tubing with comparative ease and shrunk down to form a jacket with all the qualities of the finest extruded plastic jackets.

The tubing is supplied in expanded form and in continuous lengths. When a temperature of approximately 347°F (175°C) is applied, Alphalex FIT-105 Tubing immediately returns to its predetermined size (approximately 50% smaller), and forms a permanent, tight-fitting mechanical bond. FIT-105 Tubing will not cold-flow or melt but retains form stability within its temperature range. No radioactivity exists in or on the material and it will not emit radiation. Longitudinal shrinkage is less than 10%.

Controlled shrinkage to the correct predetermined size takes place within seven seconds at 325°F, or above. When using an oven, temperature may range from 325°F to 350°F.

A 105°C - EXTRUDED PLASTIC TUBING**200°C - TEFLON TUBING**

APPROVED FOR 105°C OPERATION...MEETS MIL-1-431D SPECS... A quality plastic Vinyl tubing designed for electronic and electrical insulation work. Has high dielectric strength, extreme flexibility, non-flammability, abrasion resistance, impervious to oil, water, alkalies, alcohol, solvents, etc., high heat stability and resistance to aging. Meets all A.S.T.M. specifications, Mil. Spec. 1 Type F, Form U, Grades A and C, Class 2, Category 11. U. L. Approved.

This Wall-MIL-1-22129C for use in applications for hi. frequencies and hi. temperatures. Rated for continuous operation of 250°C it retains its toughness and flexibility thruout. Will not shrink back during soldering operation. Non-flammable, flexible, inert to all fungus growth.

* New Item † Specify Color

ALL SPOOLS ARE ONE PIECE EXACT LENGTH. (EXCEPT SPOOLS WITH (•) FOOTNOTE)

• Spools may contain more than one piece, minimum length of any one piece is 25 ft.

When priced per M ft. length may vary $\pm 10\%$ from length shown; all other lengths are exact.

§ Cut to Customer's Specified Length subject to available stock lengths—minimum length 25'; 25' to 199', plus 25', minus 0; 200' or over, plus 50', minus 0.

¶ (Vinyl Hook-up Wire) Prices apply to standard stock colors as listed in our current catalog and to non-stock striped colors over stock solid colors in quantities of 10,000' or more. Non-stock striped colors over stock solid colors in quantities of 1000' to 9,999', add pro-rata set-up charge of \$4.50 per color combination. Minimum order 1000' per special stripe combination. Special stripe colors in any quantity will be subject to 2 piece put-up and plus or minus 10% per spool.

BELDEN TODAY

new ideas for moving electrical energy

FOREWORD

The purpose of this catalog is to make the selection, purchase and overall usage of Belden Electronic Wire and Cable products easier for you, the customer.

Many of the products listed in this catalog have enjoyed wide acceptance over the years. Some of the newer items are on the way to earning their own reputations for excellence and reliability in the field. They are the recent products of Belden's product development engineering group which starts with the electrical, physical and thermal needs of the applications. Working from the ground up they design and develop a wire, cable or cord that will meet or exceed these requirements.

INNOVATIONS

Over the years, Belden has pioneered the development of a number of significant design breakthroughs and new engineering techniques which have provided remarkable new products to meet the challenging and ever-changing technology.

Whatever your specialized problems . . . whatever your needs for wire and cable, you can count on Belden's experienced design and engineering talents and resources to help you develop the best solution to your wire and cable application problems.

Belden is constantly reviewing new materials, insulations, compounds and shielding applications to develop products to satisfy customer's needs.

TESTING

Belden's products must meet the highest standards of quality control in the industry. High-performance test equipment can simulate practically every known environmental or electrical condition to assure positive, reliable ratings for the most trouble-free operation under known and predictable conditions. Belden's rigid test program assures consistent product reliability from design through packaging.

MANUFACTURING

Belden designs and builds much of its own specialized manufacturing equipment. To the customer, this means only one thing: scrupulous and uncompromising supervision of the entire manufacturing process that starts with the equipment used to make the product and assures complete, beginning to end, manufacturing integrity.

SALES ENGINEERING

The total experience and capability of Belden's engineering department is available to you at any time to assist in specifying or developing wiring products that can provide the best and most practical solutions to your specific application requirements.

The Beldfoil® ISO-Shield Story

Much of today's miniaturized, high-gain electronic equipment calls for small diameter cables that are lightweight, flexible and has total electrostatic shielding.

Wire braid and serve type shields have a practical range up to 97 percent maximum coverage. While they provide sufficient electrostatic shielding for many applications, they do not furnish the full-coverage shielding required by many high-gain electronic systems.

Beldfoil ISO-Shield provides 100 percent coverage and adds greater effectiveness to all major shielding functions: excluding external signals, confining the transmitted signal and minimizing crosstalk.

Beldfoil ISO-Shield uses a thin layer of aluminum bonded to a polyester film. The aluminum provides the necessary electrostatic shielding while the polyester film adds a bonus insulation and increased mechanical strength. The 100% shielding is accomplished by an

exclusive method of folding back both edges of the tape in such a way as to provide metal-to-metal contact between adjacent wraps, thus providing the same shielding effect as a continuous aluminum tube. As a direct result of using this thin layer of aluminum-polyester shielding, Beldfoil ISO-Shield is lightweight, flexible and small in diameter. Depending on the cable type the polyester film may be used to increase the dielectric strength between the conductors and the shield, or to provide insulation between adjacent shields.

Applications for Beldfoil ISO-Shield range from a single conductor audio and sound cable to complex multi-conductor multi-shield cables. They include cables for data processing systems, telemetering equipment, strain gauge applications, hi-fi systems, instrumentation, TV cameras and receivers, microphones and communications equipment plus many special constructions for both military and commercial use.

cable finder

● INDICATES SOLID CONDUCTORS, ALL OTHERS STRANDED CONDUCTORS

HOW TO USE THE CABLE FINDER CHART

Match the desired "Number of Conductors" column with the required "Conductor Size" to find the applicable Belden Trade Number and its catalog page.

For cables with more than 8 conductors, see Multiple pair and unpaired unshielded cables on page 9 & 11, Multiple pair individually shielded on pages 6, 7 & 8. For cables combining shielded and unshielded conductors, see Special Audio and Communication cables on page 7.

shielded sound and broadcast audio cables

COMMUNICATIONS CABLE

Belden offers a complete line of Communications Cables to provide customers with the best all-around cable for every application requirement. Cables are available in a wide range of sizes, dimensions, shielding constructions and types of insulation. All Communications Cables are designed to protect the desired signal by eliminating or minimizing the interference of hum, noise and crosstalk.

SHIELDING: Because it affords such excellent protection, Beldfoil ISO-Shield is now being specified for many critical applications such as instrumentation systems, tracking station equipment, computer and data processing systems, audio, sound, strain gauge and control cables.

No other type of shield on the market surpasses Beldfoil Shield for full coverage and protection against radiation and penetration at audio and radio frequencies. Beldfoil's unique polyester-aluminum shielding provides 100% coverage.

Braided Copper Shields have high tensile strength and are very effective at audio and radio frequencies in flexing applications. Served Copper Shields usually provide more coverage than Braided Copper Shields; they're also easier to terminate. Both Braided and Served Copper Shields are recommended at audio frequencies.

INSULATIONS: Belden's Communications Cables are available in a variety of insulation materials, each having its own advantages depending upon the size requirements, environmental and electrical conditions dictated by the application.

Vinyl insulation resists flame, most solvents, oil, ozone and sunlight. It has a higher dielectric constant and capacitance than polyethylene. Therefore it is recommended for audio frequency applications. It is easy to strip.

Polyethylene insulation is lightweight and resists ozone. It has a low dielectric constant for low capacitance and provides low electrical loss and is recommended for audio and radio frequency applications. Like vinyl, polyethylene is easy to strip.

Polypropylene insulation provides excellent heat and abrasion resistance. It has a low dielectric constant with equally low capacitance. It is less flexible than polyethylene. Because it has excellent dielectric strength and mechanical ruggedness, polypropylene insulations are widely used for miniaturization applications. Even with low overall diameters, they permit very low loss. Recommended for audio and radio frequencies.

INSTRUMENTATION CABLES

Instrumentation cable provides the vital communications link between sensing devices and read-out equipment. Because of the many and diverse conditions of environment and stress under which instrumentation cables must transmit information — in usable form, without distortion or change — cable characteristics should always be carefully matched with the specific requirements of the particular application.

The scientific, medical and industrial uses of instrumentation cable are vast and ever growing. Some of the common uses for instrumentation cable are such

things as measuring pressure, speed, resistance and temperature.

Belden manufactures a wide variety of precision instrumentation wire using several types of insulating materials for conductors and shields to meet a wide variety of electrical, physical and thermal requirements.

Many Belden Instrumentation Cables are unique in the field and have been engineered for specific application problems.

#22 tinned copper, vinyl insulated, cabled in pairs, each pair and its ground wire under BELDFOIL® aluminum-polyester shield, over-all chrome vinyl jacket. 300 Volts suggested working voltage.

Vinyl insulation is used for ease of stripping and soldering. Recommended for audio frequency applications requiring excellent circuit isolation. Maximum operating temperature 80°C.

Insulation resistance between shields 100 megohms/M'
 Capacitance between adjacent shields 115 mmf/ft
 Voltage breakdown between adjacent shields 1500 volts
 Working voltage between adjacent shields50 volts

Tinned copper conductors, polypropylene insulated, four groups of two conductors with #22 AWG drain wire.

Each group individually BELDFOIL® shielded with polyester tape wrap, chrome vinyl jacket. 105°C Maximum operating temperature.

*Capacitance between conductors.

**Capacitance between 1 conductor and other conductor connected to shield.

•Belden U.S. Patent 3,032,604.

§Minimum length 25'

25' to 199', plus 25', minus 0.
 200' or over, plus 50', minus 0.

†Cabled around common axis request information before planning high and low level circuits in same cable.

○Color code is Western Regional Strain Gauge Committee.

unshielded paired sound cables

MULTIPLE PAIR UNSHIELDED SOUND CABLES

TYPICAL APPLICATIONS: Balanced line sound systems.

Made with 80°C vinyl plastic compounds for high dielectric strength and the best physical properties, such as free stripping, small

diameter, and tear resistance. It also resists the effects of water, sun, oil, grease, and ozone. The conductors are paired with a short-lay twist for conductor balance, providing a quiet circuit, free from cross talk.

microphone and shielded power supply cables

MICROPHONE CABLES

Belden Microphone Cables are designed for flexible service at audio frequencies. They are used not only for microphones, but also for home entertainment equipment, instruments, tape recorders and shielded power supplies.

Shielded single conductor cables are used in high impedance systems, while multiple conductor cables are used in

low impedance applications.

All cables are precision-engineered and manufactured to transmit clear signals and to cancel out hum pick-up and crosstalk interference. They are designed to withstand the flexing and normal abuse of studio, laboratory and home usage.

RUBBER, HYPALON AND NEOPRENE MICROPHONE AND SHIELDED POWER SUPPLY CABLES

	8405	5	20 (26x34)	.015	.035	.275	83	600	—	25	45	250, 500, 1000

Tinned copper, polyethylene insulated, cabled, rayon braid, tinned copper braid shield, chrome vinyl jacket.

RUBBER—HYPALON—NEOPRENE—PLASTIC

See page 13 for conductor color coding

▲See 8421 Page 14 for spiral wrapped shield version of 8401—Recommended for Hi-Fi use.

*Capacitance between conductors.

**Capacitance between 1 conductor and remaining conductors (if any) connected to shield.

PLASTIC CABLES RECOMMENDED FOR: Lower capacitance, lower loss, greater ozone and oil resistance, lighter weight, smaller diameter.

RUBBER CABLES RECOMMENDED FOR: Greater abrasion and impact resistance, and extra limpness so cable will lie flat on stage or studio floor.

NEOPRENE AND HYPALON CABLES RECOMMENDED FOR: Outside use, cold weather applications. Resistant to effects of sun, oil, and ozone.

retractile (coiled) cables and cords

COILED CORDS

Retractable cords keep telephone and microphone cables from tangling and cluttering desk tops, communications consoles and the front seats of motor vehicles. Belden manufactures a full line of high quality retractile coiled cord products for a wide number of applications.

Belden retractile cables and cords are used for telephone equipment; ham and citizen band radios; hand and

desktop microphones; language lab equipment; musical instruments; mobile controls and mobile communications equipment and for a variety of assorted industrial applications.

The specially designed conductors and shields of Belden retractile cords are constructed to withstand rugged use and to minimize replacement frequency.

 Stranded tinned copper rubber insulated with 4" long solderless threaded plastic "phone tip" test prod 3/4" diameter on one end and 1" long solderless threaded plastic "phone tip" test prod 3/4" diameter on the other end. 5 ft. in length retracts to 8 inches. Is recommended for use with multimeters.	8878 With Prods	20 (42x36)	.063	.173	20,000	5,000	1 pair Red and Black	—
	8879 Without Prods	20 (42x36)	.063	.173	20,000	5,000	1 pair Red and Black	—
Tinned copper, rubber insulated, 5 ft. in length retracts to 8 inches.								

‡For intermittent duty only

ⓈU.L. Type rating only: 300V-60°C

*Belden U.S. Patent 3,032,604.

All breakdown voltages and suggested working voltages are AC RMS values.

tv camera cable and 75 ohm video cables

TV CAMERA CABLES

Belden TV Broadcast and Closed Circuit TV Camera Cables assure reliable circuit isolation thereby reducing a-c hum and minimizing crosstalk between circuits. They are made to withstand rugged service and to maintain high conductor insulation resistance regardless of ambient temperature changes.

Major uses for these cables are for controlling, powering and transmitting sound and picture information for monochrome and color TV cameras as well as for remote control, monitor and cue line systems.

Belden TV Camera Cables are engineered to be lightweight, flexible and easy to terminate. They are manufactured and tested in accordance with Belden's own rigid and time-proven quality control standards in order to assure outstanding reliability, performance and service life.

8283-82 CONDUCTOR TV COLOR CAMERA CABLE

Designed to meet the critical electrical and physical requirements necessary for color television broadcast applications.

8280-28 CONDUCTOR TV CAMERA CABLE

4-18 AWG (16x30) tinned copper, vinyl insulated, color coded.
21-22 AWG (7x30) tinned copper, vinyl insulated, cabled in 3 groups of 7, color coded.
3 coaxial cables. Nom. impedance 51 ohms, color coded.

8286-28 CONDUCTOR HYPALON TV CAMERA CABLE

4-18 AWG (16x30) tinned copper, vinyl insulated, color coded.
BELDFOIL aluminum-polyester wrapped shield around 4 conductors with stranded drain wire, polyester tape over this shielded group.
21-22 AWG (7x30) tinned copper vinyl insulated, cabled in 3 groups of 7, color coded, one group of 7 has a BELDFOIL aluminum-polyester wrapped shield overall with a stranded drain wire, polyester tape over this shielded group.

8284-24 CONDUCTOR TV CAMERA CABLE

17-22 AWG (7x30) tinned copper, vinyl insulated, color coded.
3 under BELDFOIL shield with stranded drain wire.
4-16 AWG (26x30) tinned copper, vinyl insulated, color coded.
3 coaxial cables. Nom. impedance 53.5 ohms, color coded.

8282-13 CONDUCTOR TV EYE CABLE

8-22 AWG (7x30) tinned copper vinyl insulated, color coded.
1-22 AWG (7x30) polyethylene insulated conductor.
2-18 AWG (16x30) tinned copper conductor vinyl insulated.
Black and Red.

Minimum length 25'. 25' to 99', plus 25' minus 0. 200' or over, plus 50', minus 0.
DuPont trademark.

75 OHM PRECISION VIDEO CABLE

TYPICAL APPLICATIONS: Video signal transmission in Color and Monochrome TV studios. Provides high quality carrier of video signal with superior picture definition and eliminates problems of periodicity. Cable is manufactured with rigid control of concentricity and all dimensional tolerances.

The black polyethylene jacket is inherently a non-contaminating, non-migratory compound. 100% SWEEP TESTED.

HIGH VOLTAGE CABLES

Belden High Voltage Cables are designed for use by public utilities and laboratories in testing high voltage equipment and apparatus. Through their use, potentially dangerous conditions can be detected both before installation and at intervals during service.

Belden High Voltage Test Cables are engineered to achieve the best possible performance at continual rated voltages. Their special design incorporates the use of

conductive polyethylene over the center conductor, bonded to the polyethylene dielectric material. This provides uniform voltage stress distribution around the center conductor and results in an increased elimination of degradation due to internal corona.

For special cables up to 600 KVDC ratings, please ask for individual quotation.

Conductive polyethylene over inner conductor combined with a copper wire braid over the dielectric provides uniform distribution of voltage stress. Very high-voltage DC cable applied from 200 KVDC to 600 KVDC is available from Belden on special order. Consult Belden Engineering Department for AC or pulse applications.

MILITARY SPECIFICATIONS PERTAINING TO BELDEN HOOK-UP WIRE

Belden's outstanding line of Hook-Up Wire represents a broad selection of quality products that meets the Military Specifications indicated on this and on the following pages.

Basically, from the customer's point of view, Military Specifications can be a helpful guide in determining specific information about cable construction, electrical limits and test data as an aid in comparing and selecting wiring products to meet the needs of specific applications.

The following Military Specifications cover the Belden Hook-Up Wire Products to be found in this catalog:

MIL-W-16878—Wire, Electrical, Insulated, High Temperature. Covers insulated wire for the internal wiring of meters, panels, and electrical and electronic equipment at temperatures ranging from 105°C to 200°C. The many types available in different voltages and thermal ratings are listed on the following pages to meet your individual requirements.

MIL-W-76—Wire and Cable, Hook-Up, Electrical, Insulated. Covers single conductor, plastic-insulated Hook-Up wire for the internal wiring of electrical and electronic equipment. The many types available in different voltages and outer covering are listed on the following pages to meet your individual requirements.

TYPE B—MIL-W-16878—VINYL—600V-105°C

Tinned copper, vinyl insulated.

5 Green	10 Black	15 White/Red	20 White/Orange	25 White/Black/Yellow	30 White/Black/Violet

Manufactured to current Government specifications and subsequent revisions.

First color in stripe combination is body color and second or third colors are stripes. (EXAMPLE: White/Black/Red.)

mil-w-76 vinyl plastic

MIL-W-76

Covers single conductor, plastic-insulated Hook-Up wire for the internal wiring of electrical and electronic equipment. The many types available in different volt-

ages and outer covering are listed on the following pages to meet your individual requirements.

TYPE MW-MIL-W-76-VINYL-1000V-80°C

Tinned copper, vinyl insulated, medium wall. The extruded vinyl insulation is flame and ozone-resistant and is inert to most chemicals, oils, and solvents.

Additional Description

MIL-W-5086A-Type I

AN-22 thru AN-12.

Stranded tinned copper, white vinyl, clear nylon jacket.

MIL-W-5086A-Type II

AN-22 thru AN-12.

Stranded tinned copper, white vinyl insulation, saturated glass braid, clear nylon jacket.

MIL-W-5086A-Type II

AN-12 thru AN-00

Stranded tinned copper, white vinyl insulation, saturated glass braid, nylon braid, nylon lacquer.

MIL-C-7078-TYPE 1-600V-105°C (MIL-W-5086 Type I Conductor Braided Tinned Copper Shield)

°8657, 8658, 8659 Available only in 10' & 50' put-ups.

For additional sizes, see current BRAIDED AND STRANDED COPPER CABLE CATALOG.

teflon wire

Teflon[®] is a fluorinated thermoplastic with outstanding thermal physical and electrical properties. However, because the basic resin and processing costs are relatively high, Teflon is generally restricted to applications requiring its special characteristics.

Belden Teflon wire products are highly recommended for miniature cable applications, because of their superior

thermal and electrical properties. Teflon is especially suitable for internal wiring soldering applications where insulation melt back is a specific problem. Belden Teflon wiring products are outstanding in their resistance to oil, oxidation, heat, sunlight, flame and their ability to remain flexible at low temperatures. They all have excellent resistance to ozone, water, alcohol, gasoline, acids, alkalis, aromatic carbon and solvents.

teflon hook-up wire

TYPE E—MIL-W-16878 TEFLON—600V—200°C

Stock Colors 1 thru 10

Concentrically stranded silver coated copper conductor, extruded TFE Teflon insulated

mil-w-16878-type E shielded teflon cables

DESCRIPTION: Stranded silver coated copper conductors, type E extruded TFE Teflon insulation, color coded, cabled, braided silver plated copper shield, white TFE Teflon tape wrapped jacket.

MIL-SPEC: MIL-W-16878 Type E
TEMPERATURE RATING: -65°C to 200°C
VOLTAGE: 600Volts (RMS)

TYPE E—TEFLON, SHIELDED, TEFLON JACKETED CABLES

*Capacitance Between Conductors. **Capacitance Between One Conductor and Other Conductor Connected to Shield.
Manufactured to Current Government Specifications and Subsequent Revisions.

cords

TWO CONDUCTOR POWER SUPPLY CORDS

PARALLEL LAMP CORDS

MOLDED VINYL PLUG

CONDUCTORS SPLIT 1" STRIPPED
AND TWISTED 5/8"**Information and Application**

For Lamps, Radios, Desk Fans and Small Appliances. Long life plastic resists cracking and aging. Popular lengths and colors. UL Tan Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17106	6	18 (41x34)	.110 x .207	SPT-1 Vinyl	Brown, Gray or Ivory
17109	9	18 (41x34)	.110 x .207	SPT-1 Vinyl	Brown, White
17112	12	18 (41x34)	.110 x .207	SPT-1 Vinyl	Brown, White
17126	6	18 (41x34)	.110 x .213	SP-1 Rubber	Brown
17129	9	18 (41x34)	.110 x .213	SP-1 Rubber	Brown

UL-TYPE SVT VINYL AND SV RUBBER

MOLDED VINYL CORD-HOLDER PLUG

OUTER JACKET STRIPPED 1 1/2"
CONDUCTORS STRIPPED AND TWISTED 5/8"

For Food Mixers, Blenders and Small Appliances. UL Tan Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17205	6	18 (41x34)	.243	SVT Vinyl	Black, Gray
17206	6	18 (41x34)	.245	SV Rubber	Gray

UL-TYPE SJ RUBBER

MOLDED VINYL CORD-HOLDER PLUG

OUTER JACKET STRIPPED 1 1/2"
CONDUCTORS STRIPPED AND TWISTED 5/8"

For Mixers, Blenders, Washing Machines and Appliances using fractional horse power motors that do not require a three conductor grounding cord. UL Tan Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17308	8	18 (16x30)	.298	SJ Rubber	Black
17310	10	18 (16x30)	.298	SJ Rubber	Black
17328	8	16 (26x30)	.323	SJ Rubber	Black
17330	10	16 (26x30)	.323	SJ Rubber	Black

UL-TYPE SVO NEOPRENE (RETRACTILE)

MOLDED VINYL PLUG

OUTER JACKET STRIPPED 1 1/2", CONDUCTORS STRIPPED 1/2" AND TINNED

Retractile (coiled)

CONVENIENCE AND SAFETY. Dangling cords can be messy, troublesome and unsafe. Retractable cords stay neat, allow free movement of the appliance or tool, and prevent accidents. Rubber insulation and neoprene jackets meet UL requirements and retain full retracting memory through thousands of stretching cycles. UL Tan Flag Label.

Trade Number	Retracted Length (in.)	Practical Extended Length (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17249	12	6	18 (41x34)	.270	SVO Neoprene	Black

BUSINESS MACHINE CORDS**UL-TYPE SJT AND SVT VINYL**

MOLDED VINYL CORD-HOLDER PLUG

MOLDED VINYL CONNECTOR WITH DUMMY
CENTER CONTACT

17359 fits Burroughs, Monroe and Victor 10 key Adding machines as well as late Friden models and the Burroughs Sensimatic Bookkeeping Machine and Pentron Tape Recorder (Triumph model). 17260 fits Revere Projectors and many business machines. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17359	10	18 (16x30)	.298	SJT Vinyl	Gray
17260	8	18 (41x34)	.243	SVT Vinyl	Gray

UL-TYPE SJ RUBBER

MOLDED VINYL CORD-HOLDER PLUG

MOLDED RUBBER CONNECTOR

Fits R. C. Allen Adding Machine and Mimeograph models 100 and 92. Fits following 16MM Motion Picture Projectors: All RCA senior models, all Victor Kalart models, Bell and Howell models 185 through 399. Can also be used as an extension cord where a round connector is required. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17370	10	16 (26x30)	.323	SJ Rubber	Black

cords

TWO CONDUCTOR EXTENSION CORDS

VINYL ADAPTER PLUG

PHENOLIC 3-WAY CONNECTOR

Information and Application

UL-TYPE SPT VINYL

ADD-A-LINE

This new idea in convenience adds a 6' extension cord and you still have an outlet to plug in another cord. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
NEW 17178	6	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Ivory

CUBE TAP EXTENSION CORD SETS

MOLDED VINYL PLUG

PHENOLIC 3-WAY CONNECTORS

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17156	6	18 (41x34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17159	9	18 (41x34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17162	12	18 (41x34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17165	15	18 (41x34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory

Manufactured in Brown and Ivory in all popular lengths. The molded three way connector is particularly sturdy and will last long in steady service. UL Blue Flag Label.

UL-TYPE SV AND SJ RUBBER

MOLDED VINYL CORD-HOLDER PLUG

MOLDED VINYL CONNECTOR

Trade Number	Length of Cord (ft.)	AWG Stranding	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17259	9	18 (41x34)	.245	SV Rubber	Gray
17361	10	16 (26x30)	.323	SJ Rubber	Black

The molded plugs and connectors give long service life. The CORD-HOLDER plug provides easier storage. It can also be used as cord shortener. For longer extension cords of this type, see Lawnmower and Vacuum Cleaner cords. UL Blue Flag Label.

UL-TYPE SJ AND S RUBBER

MOLDED PLUG

MOLDED RUBBER CONNECTOR

Trade Number	Length of Cord (ft.)	AWG Stranding	Nom. O.D. (Inches)	UL Type of Cordage	Color
17370	10	16 (26x30)	.323	SJ Rubber	Black
17555	25	16 (65x34)	.401	S Rubber	Black
17556	50	16 (65x34)	.401	S Rubber	Black

For use where a round connector is required. Also used as a power supply cord for some appliances. For longer extensions where a heavier duty type cord is needed for added insulation and abrasion protection use 17555 or 17556. 17370 features cord-holder plug. UL Blue Flag Label.

THREE CONDUCTOR POWER SUPPLY CORDS

UL-TYPE SJ RUBBER, SJT VINYL AND SJO NEOPRENE

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 2" CONDUCTORS STRIPPED AND TWISTED 5/8"

Information and Application

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17406	6	18 (16x30)	.328	SJ Rubber	Black
17405	6	18 (16x30)	.328	SJT Vinyl	Gray
17408	8	18 (16x30)	.328	SJ Rubber	Black
17407	8	18 (16x30)	.328	SJT Vinyl	Gray
17409	8	18 (16x30)	.328	SJO Neoprene	Black
17412	12	18 (41x34)	.328	SJ Rubber	Black
17419	9	16 (65x34)	.353	SJ Rubber	Black
17422	12	16 (65x34)	.353	SJ Rubber	Black
17425	15	16 (65x34)	.353	SJ Rubber	Black

For all tools such as sanders, saws, grinders and polishers requiring grounding. Three conductor Cord now listed by UL as mandatory for drills 1/2" and larger. UL Tan Flag Label.

cords

THREE CONDUCTOR POWER SUPPLY CORDS

UL-TYPE SV RUBBER AND SVT VINYL

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 1½"
CONDUCTORS STRIPPED AND TWISTED ¾"

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17236	6	18 (41x34)	.265	SV Rubber	Black
17238	8	18 (41x34)	.265	SV Rubber	Black
17237	6	18 (41x34)	.253	SVT Vinyl	Gray
17239	8	18 (41x34)	.253	SVT Vinyl	Gray

Three conductor SV and SVT cords now recognized as a UL Standard for some small tools, business machines and instruments which previously required a three conductor SJ Cord. UL Tan Flag Label.

UL TYPE S RUBBER

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 2"
CONDUCTORS STRIPPED AND TWISTED ¾"

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17629	9	14 (41x30)	.558	S Rubber	Black
17635	15	14 (41x30)	.558	S Rubber	Black

For heavy duty power tools and equipment. UL Tan Flag Label.

UL-TYPE SJO NEOPRENE (RETRACTILE)

MOLDED VINYL GROUNDING PLUG OUTER JACKET STRIPPED 1½", CONDUCTORS STRIPPED ½" AND TINNED

Trade Number	Retracted Length (in.)	Practical Extended Length (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17447	12	6	18 (41x34)	.360	SJO Neoprene	Black
17448	12	6	16 (65x34)	.370	SJO Neoprene	Black
17449	24	12	16 (65x34)	.370	SJO Neoprene	Black

Retractile (coiled)

CONVENIENCE AND SAFETY. Dangling cords can be messy, troublesome and unsafe. Retractable cords stay neat, allow free movement of the appliance or tool, and prevent accidents. Rubber insulation and neoprene jackets meet UL requirements and retain full retracting memory through thousands of stretching cycles. UL Tan Flag Label.

THREE CONDUCTOR PROJECTOR AND BUSINESS MACHINE CORD

UL-TYPE SVT VINYL

MOLDED VINYL GROUNDING PLUG

MOLDED VINYL 3-CONTACT
CONNECTOR

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17258	8	18 (41x34)	.253	SVT Vinyl	Gray

Can be used for Revere and Eastman Kodak projectors, Friden, Victor, Hewlett-Packard, Marchant business machines, and DuKane audio equipment. UL Blue Flag Label.

THREE CONDUCTOR EXTENSION CORDS

ADD-A-LINE

ADAPTER PLUG

MOLDED VINYL GROUNDING
CONNECTOR

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17462	8	18 (16x30)	.328	SJT Vinyl	Black

Information and Application

This new idea in convenience adds an 8' extension cord and you still have an outlet to plug in another cord. UL Blue Flag Label.

UL-TYPE SJT AND ST VINYL

MOLDED VINYL GROUNDING PLUG

MOLDED VINYL GROUNDING
CONNECTOR

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17491	25	18 (16x30)	.328	SJT Vinyl	Yellow
17492	50	18 (16x30)	.328	SJT Vinyl	Yellow
17493	100	18 (16x30)	.328	SJT Vinyl	Yellow
17494	25	16 (26x30)	.353	SJT Vinyl	Yellow
17495	50	16 (26x30)	.353	SJT Vinyl	Yellow
17497	100	16 (26x30)	.353	SJT Vinyl	Yellow

17695	50	14 (41x30)	.558	ST Vinyl	Yellow
17697	100	14 (41x30)	.558	ST Vinyl	Yellow

YELLOW CORDAGE stands out against green or brown backgrounds and thus reduces hazard of accidental cutting.

These extension cord sets are for lawnmowers and hedge clippers using three conductor power supply cordage. UL Blue Flag Label.

cords

THREE CONDUCTOR EXTENSION CORDS

UL-TYPE SPT-2 VINYL

MOLDED VINYL GROUNDING PLUG

MOLDED VINYL GROUNDING CONNECTOR

FLAT YELLOW 3 conductor extension cords for most light duty purposes. Particularly popular with the marine trade. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17194	25	16 (65x34)	.152 .360	SPT-2	Yellow

UL-TYPE SJ RUBBER

MOLDED VINYL GROUNDING PLUG

MOLDED VINYL GROUNDING CONNECTOR

Power Supply Cord for business, mailing machines and electrical equipment that have a built in receptacle with blades and grounding pin for cord attachment. These can also be used as extension cords for equipment requiring grounding. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17460	10	18 (16x30)	.328	SJ Rubber	Black
17461	10	16 (26x30)	.353	SJ Rubber	Black

UL-TYPE SJO AND SO NEOPRENE

MOLDED VINYL GROUNDING PLUG

MOLDED VINYL HEAVY DUTY GROUNDING DUPLEX CONNECTOR

These three conductor extension cords are for use with power tools and other appliances requiring grounding. These extension cords with the rugged Belden duplex connectors will give years of safe, reliable service. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color

DURAFOAM®

The outstanding success of Durafoam can be attributed to Durafoam's superior performance over the full spectrum of VHF, UHF and FM channels. The increasing popularity of UHF channels make mandatory the use of a low attenuation cable. Durafoam has been used to improve reception under the most adverse conditions such as moisture, ice, heavy snow, chemical fumes, salt air and other factors that seriously affect most transmission lines.

JACKET SURFACE PRINTED:
COLUMBIA 5790 DURAFOAM VHF - UHF TV TRANSMISSION LINE U. S. PAT. #3,219,752, CANADIAN PAT. #736,090

VHF • UHF • COLOR • FM Transmission Line

Durafoam installs as easily as flat ribbon line, requiring no special stand-off insulators. Columbia's time proven high molecular weight black polyethylene PERMALINE jacket is so durable that we unconditionally guarantee that Durafoam will not deteriorate for a period of 15 years when used under normal atmospheric conditions. Durafoam's patented design of isolating the 2 foam polyethylene dielectric tubes from each other reduces attenuation. All other types of transmission lines available today have a common dielectric surrounding the copper conductors so that both conductors are affected simultaneously by any combination or other factors in the dielectric which cause increased attenuation.

**OVER 100,000,000 FT.
NOW IN USE!**

**U. S. PATENT NUMBER 3,219,752

THRIFTFOAM®

Columbia's answer to a growing need for a quality-built, low cost foam transmission line. THRIFTFOAM will deliver clear, sharp reception under adverse conditions. Features a cellular foam polyethylene inner dielectric, providing lower capacitance and lower attenuation losses. Two stranded copper conductors. Jacket: weather-resistant black polyethylene for durability and line protection. THRIFTFOAM is easy to install... requires no special stand-off insulators or expensive matching transformers and connectors.

CAT. NO. 5740M - 1000' spool • CAT. NO. 5740D - 500' spool • CAT. NO. 5740C - 100' flat pack • CAT. NO. 5740S - 75' flat pack • CAT. NO. 5740L - 50' flat pack

SHIELDED PERMAFOAM®

TV TRANSMISSION LINE
UHF - VHF - COLOR - FM

- A new all-channel transmission line for prevention of line pickup interference especially in areas of high interference.
- Aluminum/Mylar shield for 100% effective coverage.
- Tinned copper ground wire attaches to set.
- High molecular weight PERMALINE® jacket for superior weathering.
- No stand-off insulators or matching transformers necessary... can be taped directly to the antenna mast and led through gutters.
- Copperweld conductors for maximum conductivity and high tensile strength.

CABLE SIZE: .275 x .455 - CAT. NO. 5720M (1000' reel), 5720D (500' spool), 5720C (100' coil*), 5720S (75' coil*), 5720L (50' coil*)

* Have factory-attached terminals plus 2 add'l. terminals. Each packed 12 pieces in a floor display carton.

DURA-COLOR® UHF-VHF 82 Channel RG-59 Type Coaxial Cable

- Lowest loss RG 59U type cable for color TV
- 100% shielding - 100% swept tested
- Black or white jacket
- Uses standard PL259 fittings

Shield is laminated high tensile strength aluminum/Mylar foil totally covering and overlapping a virgin polyethylene core. Four equally spaced tinned copper drain wires are positioned around the shield, providing extra strength and electrical conductivity.

Attenuation (DB loss/100')

VHF 55 MC = 2.0, 200 MC = 3.8

UHF 500 MC = 6.3, 650 MC = 6.9, 800 MC = 8.3

ANTENNA ROTOR CABLES

One outside conductor tinned for polarity. Virgin polyethylene insulation.

A DIVISION OF AVNET, INC.

SUPER-FLEX® COAXIAL CABLES

Finest coaxial cables available – not only because of appearance and flexibility, but because they actually outperform similar cables now on the market. Cables feature high gloss jackets and have foam polyethylene primary insulation to reduce attenuation as much as 25% below regular coaxial cables. Super-Flex cables stay flexible in severe cold. They use standard connectors. Ideal for citizens band and amateur use. Perfect for MATV. Standard stock colors are Black-white-silver and Beige. Other colors to special order with a minimum of 10,000' of a color.

RG 8U Super-Flex

52 Ohm impedance (19/.020 conductor). Cap. 22.1 MMFD per ft. Attenuation 1.50 DB per 100' at 100 MC. Overall size .405. Cat. No. 1198M-1000'. Cat. No. 1198D-500'. Cat. No. 1198C-100'. Cat. No. 1198S-75'. Cat. No. 1198L-50'.

RG 58 A/U Super-Flex

50 Ohm impedance (19/.0068 conductor). Cap. 22.9 MMFD per ft. Attenuation 4.25 DB per 100' at 100 MC. Overall size .195. Cat. No. 1188M-1000'. Cat. No. 1188D-500'. Cat. No. 1188C-100'. Cat. No. 1188S-75'. Cat. No. 1188L-50'.

RG 59/U Super-Flex

73 Ohm impedance (22 solid Copperweld conductor). Cap. 16.6 MMFD per ft. Attenuation 2.95 DB per 100' at 100 MC. Overall size .242. Cat. No. 1135M-1000'. Cat. No. 1135D-500'. Cat. No. 1135C-100'. Cat. No. 1135S-75'. Cat. No. 1135L-50'.

*Flat packs

PERMAFOAM® LOW LOSS COAXIAL CABLES

A foam polyethylene dielectric replaces the conventional solid polyethylene thus providing far lower capacitance and attenuation. Overall jacket is our PERMALINE® high molecular weight polyethylene. This non-contaminating jacket is unaffected by salt air, chemical fumes, damp rot, fungus, acids, alkalis, etc., and is immune to the deteriorating effects of sunlight and other ultra-violet.

DOUBLE SHIELDED COAXIAL CABLE

Low radiation double shielded PERMALINE coaxial cable for MATV and CATV systems. CAT NO. 5027M – RG 11U – Double Shield/Double Jacket Permafoam 1000' spool.

RG 11U SELF-SUPPORTING MESSENGER TYPE

Low loss weatherproof coaxial cable for CATV systems and other applications requiring steel messenger cables for long runs. Eliminates need for stringing separate messenger cables. 3/16" seven strand galv. steel messenger has tensile strength of well over 3000 lbs. . . . cannot rust . . . is protected by the same insulation used on all Columbia PERMAFOAM coaxial cables. Unique cable design allows for easy removal of outer insulation at terminating points. Overall dimensions: width .760", coaxial cable .405", messenger .300". Available cut to length. CAT. NO. 5020 – RG 11U, Conductor 14 Solid, 75 OHMS, 66% V.P., MMF/FT. 16.2.

MICROPHONE/SHIELDED Power Supply and Control Cables

ALL TYPES STRANDED

COLUMBIA EXCLUSIVE FLEXFOAM® MICROPHONE CABLES

Flexfoam Cables offer up to 35% lower capacitance than the best regular microphone cables available today . . . made possible by the use of foamed polyethylene inner dielectric instead of the solid polyethylene normally used. This low capacitance means cable runs can be increased as much as 50% over standard cables. Flexfoam cables are also ideal for Hi-Fi and high quality sound work because of their extremely low attenuation, particularly at the higher audio-frequencies. A special flexible vinyl outer jacket provides flexibility almost as good as rubber plus a big increase in abrasion resistance.

Color: Silver gray.

1322C		.230	30 MMF	100'

FLEXLIFE (Cont'd)

BRAIDED SHIELD HEAVY DUTY 18 Ga.

Heavy duty studio type microphone cable plastic jacketed (black or red) to withstand abrasion and rough usage. Tinned copper conductors and shield. Jute fillers. Approx. size .295. Cap. per ft. 75 MMF. Cat. No. 3302D-500'. Cat. No. 3302C-100'.

SPIRAL SHIELD 2 CONDUCTOR 22 Ga.

Tinned copper shield. Low impedance. Approx. size .230. Cap. per ft. 30 MMF. Cat. No. 1323D-500'. Cat. No. 1323T-250'. Cat. No. 1323C-100'.

LOW-IMPEDANCE NOISE-RESISTANT 2 CONDUCTOR 22 Ga.

Here is a newly designed Microphone Cable that will withstand the severe abuse that has been a problem with microphone cables used in theaters, night clubs, etc. Cable can be handled roughly without danger of copper strands in shield breaking to cause noise. In this new cable a heavy duty spiral tinned copper shield is applied over a primary shield of conductive vinyl. Repeated tests have shown that this will far outlast conventional shielded two conductor microphone cables. Remarkable flexibility is obtained by use of a Columbia Flexlife Silver Gray Jacket that also imparts an excellent appearance. Silver-gray only. Approx. size .235. Cap. per ft. 35 MMF. Cat. No. 1324D-500'. Cat. No. 1324T-250'. Cat. No. 1324C-100'.

RUBBER, VINYL, NEOPRENE

Cables have low loss insulation over extra-flexible copper conductors. Closely woven tinned copper shield is covered with tough wear resistant jacket.

B-105 EXTRUDED PLASTIC TUBING

APPROVED FOR 105°C OPERATION — MEETS MIL-1-631D SPECS — A quality plastic Vinyl tubing designed for electronic and electrical insulation work. Has high dielectric strength, extreme flexibility, non-flammability, abrasion resistance, impervious to oil, water, alkalies, alcohol, solvents, etc., high heat stability and resistance to aging. Meets all A.S.T.M. specifications, Mil. Spec. (Type F, Form U, Grades A and C, Class 2, Category 1).

TABLE OF PHYSICAL & ELECTRICAL PROPERTIES—B-105 TUBING

Tensile Strength—2500 Psi. (Minimum Average)

Flammability—Non-Flammable

Ultimate Elongation—340%

Recommended for Temperatures to—105° C

Cold Bend—40° C

Dielectric Strength .020" Wall—800 V/Mil

Varnish Baking—Good

Water Absorption

Weight Increase (1 Week)—0.1%—Fungi Resistance—Yes

Oil Resistance—Indefinitely flexible when immersed in oil.

Insulation Resistance—over 1,000,000 megohms.

IN STOCK

The Birnbach Line of insulated sleeving and tubing is the basic quality line designed for the rigid performance requirements of the Aircraft, Electrical and Electronic Industries.

Meets or exceeds the required MIL Specifications and ASTM and NEMA standards. We invite your inquiries on special problems and requirements.

B-65 — EXTRUDED PLASTIC TUBING LOW TEMPERATURE — Per MIL-I-7444B to —94° F.

No. B-65 meets Air Force spec. Mil-I-7444 specifically designed for operation at sub-zero temperatures. It is fungus resistant and has excellent dielectric strength.

B-130 — VINYL COATED/FIBERGLASS SLEEVING

Per MIL-I-3190B and NEMA Standards to 130° C.

(ASTM, NEMA Grade B-B-1) MEETS MIL-I-3190 SPECS. — Quality Electronic and Electrical Tubing. It is Class B Insulation that combines the best features of the inorganic fiberglass base sleeving with heat resistant, flexible plastic insulation. The plastic compound provides the highest electrical properties, heat stability (130° C.), flexibility and toughness. Meets performance requirements of specs. MIL-I-3190 A, NEMA VSI, ASTM D 372.

B-1200 — FLEXIBLE FIBERGLASS SLEEVING for Hi-Temperature — applications for 1200° F.

HIGH TEMPERATURE FIBERGLASS SLEEVING — Sleeving of tightly braided 100% fiberglass intended for temperatures as high as 1200° F. It provides maximum mechanical strength consistent with the ultimate in flexibility. It is treated to remove all organic matter as well as keeping the glass braid fray resistant. We can provide special construction to $\frac{1}{8}$ " double wall construction. It can be colored for coding purposes.

Birflon — TEFLON* SPAGHETTI TUBING

TFE EXTRUDED TUBING

T-500 T-500 Tubing is extruded from DuPont Tetrafluoroethylene Resin. Used in electronic and electrical equipment for connection of components. Its flexibility, ease of handling has established it as the best and most popular insulation sheathing. This high temperature Class C insulation does not melt and flow as the conventional thermoplastic materials. Birflon T-500 Teflon has unique electrical, chemical and mechanical properties unmatched by any other type tubing for use in applications requiring high frequencies and high temperatures.

Because of Teflon's continuous service temperature of 250° C., which is more than 100° C. above other materials, the soldering technique is simplified since "Teflon" is not harmed by the hot barrel of the soldering iron — therefore, the assembly of aircraft, missile and electronic communication equipment is greatly speeded up. Thin Wall flexible Teflon Tubing can be processed easily into flexible and rigid printed circuits. As a thin, flexible insulation, it permits miniaturization and compactness of design never before possible.

TABLE OF PROPERTIES

Test	ASTM Method	Result
Tensile Strength, 73°F.	D638-52T	1500-3000 Lb/Sq. In.
Elongation, 73°F.	D638-52T	100-200%

ADDITIONAL ADVANTAGES OF BIRFLON T-500 TEFLON*

- **ELECTRICAL:** Low power factor, low dielectric constant, high volume and surface resistivity, good dielectric strength (500 to 1000 volts/MIL) constant over wide ranges of temperatures and frequencies. Dielectric constant of 2.0 and dissipation factor of 0.0002 are lowest of any solid dielectric.
- **THERMAL:** No change of electrical properties with temperature (25°C. to 250°C.) or frequency (60 CPS to 100 MC). Class C insulation — capable of continuous service at temperatures to 250°C. Has color stability.
- **TOUGHNESS AND FLEXIBILITY:** Has high impact strength. Is tough and flexible over the broad temperature range of -90°C. to 250°C. Service range -320°F. to 500°F.
- **CHEMICAL INERTNESS:** Completely inert to all chemicals and solvents except molten alkali metals and fluorine at elevated temperatures and pressures. Non-corrosive to all metals.
- **MOISTURE ABSORPTION:** Zero moisture absorption. Completely sun and weather resistant.
- **NON-FLAMMABLE** • **LOWEST COEFFICIENT OF FRICTION**
- **FUNGI RESISTANCE:** Inert to all fungi growths.
- **SIZES:** Birflon T-500 Teflon Tubing available in sizes to fit B & S gauge wires. Thin wall available from stock, in sizes No. 32 thru 1 1/4" I.D. Additional sizes and wall thicknesses made to order. Birflon T-500 is made from high molecular weight virgin "Teflon" and meets AMS 3651B, 3653B, 3654, 3655, MIL-C-17B and MIL-I-22129C.

NOTE: When cutting Teflon Tubing, use single edge razor blade for clean unpinched cut.

SK-265 & SK-275 TUBING PROPERTIES CHART

	RATING	TEST
TENSILE STRENGTH	2960 PSI	ASTM D-876-59-T
ULTIMATE ELONGATION	200%	ASTM D-876-59-T
BRITTLINESS TEMPERATURE	-34° C.	ASTM D-746-57-T
SPECIFIC GRAVITY	1.34	MIL-I-631 D, 4, 6, 12
WATER ABSORPTION	0.06% 24 Hours	ASTM D-570-57-T Proc. A
DIELECTRIC STRENGTH	1050 Volts/Mil	ASTM D-149-55-T
VOLUME RESISTIVITY	5.2 x 10 ¹⁴ Ohm-cm	ASTM D-257-58 MIL-I-631 D, 4, 6, 13
FUNGUS RESISTIVITY	0-1	MIL-I-631 D 3, 5, 7 and 4, 6, 16
FLAMMABILITY	Self-Extinguishing	ASTM D-876-60-T MIL-I-631 D, 4, 6, 13
FLEXIBILITY AFTER HEAT AGING 200 Hrs. at 100° C. BEND OVER 1/8" MANDREL	GOOD	
CORROSION ON COPPER, BRASS AND ALUMINUM AFTER 14 DAYS AT 100° C.	EXCELLENT	MIL-I-7444 B

CHEMICAL RESISTANCE CHART

FUEL JP-4 MIL-J-5624	EXCELLENT
AVIATION GASOLINE 100/130	EXCELLENT
HYDRAULIC OIL MIL-O-5606	EXCELLENT
HYDROCHLORIC ACID 35%	EXCELLENT
WATER	EXCELLENT
SODIUM CHLORIDE 5%	EXCELLENT
ALKALIS	EXCELLENT

*NOTE: SK265 PVC tubing is unsuitable in contact with organic solvents.
SK265 PVC tubing has a higher resistance to oils than low density Polyethylene.

All SK-275 available in 4 foot lengths.

STOCK COLORS: BLACK, WHITE, CLEAR

1/2" Thru 1/8"	500'—250'—100'—50'—25'
3/2" Thru 1/4"	250'—100'—50'—25'

Standard Put-up—36" Straight Lengths;

HAG-12 500/750°F Hot Air Gun For PVC Series
HAG-13 750/1000°F Hot Air Gun For TE Series

The quickest and most versatile method for applying heat is the hot air gun noted herein. Also, use of an oven, radiant heat, dipping in hot liquids, or using a soldering iron or the flame of a match.

BIRFLON SHRINK SERIES TE TUBING

HEAT SHRINKABLE TEFLON* TUBING

Is a Class C material modified from polytetrafluoroethylene. The tubing will shrink when heated to 621 F. (It should be heated until it turns semi-transparent, then the heating process immediately stopped. Overheating can cause splitting, therefore trial and error testing is recommended to establish the proper time and temperature for each application.) Correct procedure will result in a snug-fitting insulating wrap possessing hi-heat resistance, superior chemical resistance, and excellent electrical characteristics. The tubing is available in a full range of colors. Stock colors: black, white, natural.

* Dupont Polytetrafluoroethylene

SK621 TEFLON* TUBING
PROPERTIES CHARTTE SERIES
Shrinkable "Teflon"*

DIELECTRIC STRENGTH (20 Mil Wall)	850 Volts/Mil

HEAVY FORMVAR (HF) TYPE T2

Single conductor round bare copper, baked film insulation from a varnish based on a vinyl acetate resin. 105°C.

Has new tough abrasion resisting film. Replaces enamel and fabric insulations for certain applications requiring exceptional abrasion resistance. Stable under heat. High dielectric strength. Infinite resistance to water and moisture. Does not fail after two hours at 105°C. Takes up less winding space.

MIL-W-16878D TEFLON* — HOOK-UP WIRE

MIL-W-16878D — TEFLON† WIRE

Type E—Extruded (600 Volts) —

High Temperature Rating — 90° To + 260°C

Chemically inert, non-flammable, excellent flexibility, easy stripping, high dielectric strength, unaffected by fungus. Exceeds Class H insulation requirements. Unaffected by high or low temperature. Outstanding for its dependability and long life under all operating conditions indoors or outdoors. Teflon permits miniaturization and compactness in electronic designs of sub-miniature components, computers, UHF equip., slip ring assemblies, leads to hermetically sealed and potted components, telemetering equip. and guided missiles. Nom. wall .010". TFE extruded.

DESCRIPTION: Single conductor silver plated copper wire concentrically stranded and insulated with extruded or Teflon insulation.

SHIELDED AND UNSHIELDED TEFLON* CABLES TO MIL-W-16878D

DESCRIPTION: One or more conductors, each conductor silver plated concentrically stranded copper wire, Type E Extruded TFE .010" insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010" TEFLON* fused, double reversed tape jacket overall. Temperature —65°C to +260°C. Voltage rating 600V. Fungus, solvent, moisture, flame, acid, alkali and oil resistant.

PLASTIC HOOK-UP WIRE — MIL-W-16878D — Type B — Nylon Jacket — 600 Volt

Suitable for general purpose wiring for miniature high temperature hook-ups in aircraft, electronic instruments, devices, etc., where excellent resistance to moisture and solvents may be required.

DESCRIPTION: Stranded tinned copper, color coded, .010" polyvinylchloride insulation, clear nylon (polyamide) jacket overall.

CHARACTERISTICS: Temperature rating -55°C to $+115^{\circ}\text{C}$. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

MIL-W-16878D — MULTI-CONDUCTOR CABLE — Type B — Nylon Shielded-Plastic Jacket

DESCRIPTION: Each conductor stranded tinned copper, .010" polyvinylchloride insulation, color coded, clear nylon .003 (polyamide) jacket, conductors cabled, braided tinned copper shield 90% coverage, with polyvinylchloride jacket overall.

CHARACTERISTICS: Temperature rating -55°C to $+105^{\circ}\text{C}$. Voltage rating 600 volts, resistant to acids, alkalis, oil, flame, moisture, fungus, solvents.

AIRCRAFT PLASTIC HOOK-UP WIRE — MIL-W-5086A and MIL-C-7078A (105°C Rating)

No. 7351

DESCRIPTION: MIL-W-5086A—Type I—AN-22 thru AN-12—Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon (polyamide) jacket overall. MIL-W-5086A—Type II—AN-22 thru AN-12—Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, clear nylon (polyamide) jacket overall. MIL-W-5086A—Type III—AN-10 thru AN-00—Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, flame retardant nylon lacquered nylon braid overall. MIL-C-7078A—Type I—Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon jacket, braided tinned copper shield overall, 85% coverage.

CHARACTERISTICS: Temperature rating: -55°C . to $+105^{\circ}\text{C}$. Voltage Rating: 600 volts. Resists effects of water, oil, aircraft fuels, hydraulic fluid, skydral, ethyleneglycol, alcohol, dilute acids, alkalis, fungus and abrasion.

SPECIAL CABLE CONSTRUCTIONS AVAILABLE AT ANY TIME.

SHIELDED BROADCAST AUDIO CABLE

Designed to provide maximum performance on all equipment. Conductors twisted correctly assures quiet, clear operation which eliminates interference and cross talk. Used by Broadcast studios, for P.A. and sound systems, rack wiring, etc.

DESCRIPTION: #938—#22 Solid Tinned Copper Conductor, enameled, heavy cellulose acetate yarn wrap, cotton braid waxed; cabled with #22 AWG solid tinned copper wire laid parallel to twisted pair under tinned copper braid shield; tubed-on Vinyl plastic jacket overall.

#939—#22-7/30 Stranded Tinned Copper, plastic insulation, color coded, twisted, copper braid shield, tubed-on Vinyl plastic jacket overall.

#940—2 Conductors #22 solid plastic insulation, color coded, twisted with #22 AWG solid tinned copper ground wire under tinned copper shield with vinyl plastic jacket overall.

#940/1 same construction as #940 however with tinned copper spiral wrapped shield.

#822 and #824 have solid enameled copper wire, cotton wrap, cotton braid waxed twisted pair, bare copper braid overall.

HOOK-UP AND TEST LEAD WIRES

SUBMINIATURE TEFLON* HOOK-UP WIRE

Per MIL-W-16878D Type ET 250 Volts, 250°C
Thin Wall .006"

This new exceptionally thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in microminiature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D type ET 250 volts, 250°C.

200° C — Birsil Silicone Rubber Hook-Up Lead Wire — 600 Volt

This Birsil Silicone Rubber Hook up lead wire withstands extreme temperature range and flexibility from -104°C. to +400°F. with retention of physical properties and is highly resistant to flex cracking at temperature extremes; fungus resistant; corona resistant; engineered for high-heat and hi-frequency applications; low power factor; acid-alkali-oil resistant; low dielectric constant; insulation approaching mica. Approved by U.L. but consumer must apply for Underwriter's Laboratories approval for individual product. DESCRIPTION—One conductor, tinned copper strands, silicone rubber insulation, glass braid, lacquered. Color: White.

Hi-Voltage and Cathode Ray Cable

Used for 10,000, 20,000, 40,000, 60,000 volt applications as for cathode ray tubes in TV receivers, oscilloscopes and other electronic devices. Has dielectric constant of 2.7 and power factor of .002. Shielded Hi-Voltage type used to shield RF radiation in X-Ray, diathermy, medical equipment, and in transmitters.

DESCRIPTION—One conductor stranded copper tinned rulan (flame retarding type) polyethylene insulation. Available white/red tracer. Temp. Rating: 105°C
Shielded—Same as above with tinned copper braided shield overall.

For portable test equipment; as test leads for instrumentation exceeds the requirements for MIL-I-3930A type JP (PVC). It is superior to synthetic rubber spec MIL-R-6855 Class II Grade 60.

STANDARD PUT-UPS: 100' - 250' - 500' - 1000'

HEAVY DUTY HI-VOLTAGE TYPE

DESCRIPTION:

No. 68—#18—65/36 extra flexible annealed tinned copper; stranded; paper serve; 3/4" special low capacity rubber, wax finish.

Colors: Red, Black.

Used for oscillators, analyzers, TV, therapeutic instruments, etc.; wherever an extremely flexible high voltage lead is indicated.

RETRACTILE HEAVY DUTY AND POWER CORD SETS

RETRACTILE Super Heavy Duty POWER CORDS

**GUARANTEED TO RETRACT FOR
4 YEARS MILITARY INDUSTRIAL.**
AWG SIZES — 12, 14, 16, 3 and
4 COND.

Especially desirable in the maintenance of industrial automation equipment, refrigerated trucks and trailers, mass assembly and production equipment, plane maintenance, control cable for cherry pickers, magnetic cranes, standby power distribution, heavy duty machinery.

Useful whenever and wherever a tougher, more rugged heavy duty power cable is indicated as in foundries, aboard ships, reels on overhead cranes and hoists, tanks, plug-in power for refrigeration and immersion heaters, etc. Usable around salt water, chemicals and many other areas which makes the use of reels undesirable . . . 48" retracted — 25' extended.

**THIS IS A NEW CORD
and should not be confused
with cords of lesser
quality.**

RETRACTILE CORDS

This series of Birnback Coiled Kinkless Retractable Cords are permanently coiled into a spring-like shape without the use of metal springs or elastic bands. They have inherent "Recovery" properties. These Retractable cords extend approximately six times its retracted length, returning to its original shape and length when released. Always as long as you need them and no longer, they will not kink, tangle, trail, knot or dangle on the floor or bench and cause accidents. Useful wherever cords or cables must change length or position.

RETRACTILE TEST LEAD WIRE

Stretch coiled kinkless test lead wire description. 12" coil—stretches to approx. 6 feet. One conductor #20 stranded copper rubber insulation .165 O.D. Coil O.D. $\frac{3}{4}$ ". 6" straight lead on each end.

Cat. No.	Pkg. Std.
64 12" Retracted - Approx. 6' Extended	6
65 24" Retracted - Approx. 12' Extended	6

BIRNBACH MINIATURE RETRACTILE CORD

This small size is suitable where compact equipment is required. 2 ft. retracted, approximately 10 ft. extended Black plastic jacket overall.

Nom. Cond. resistance:
.07 OHMS per linear foot (approx. .6 OHMS per retracted ft.)
Maximum working voltage: 100; current capacity $\frac{1}{2}$ amp.

Cat. No.	Cond.	Size AWG	Strand	Coil O.D.	Cond. O.D.	Std. Pkg.
875/28	2	28	19/40TC	$\frac{1}{2}$ "	.135	10
877/28	4	28	19/40TC	$\frac{1}{2}$ "	.150	10

CONDUCTOR COLOR CODE: 1-Black, 2-White, 3-Red, 4-Green. For 3 conductors, use 4 cond. and cut one dead.

RETRACTILE COILED COMMUNICATION CORD

Multi-conductors stranded communication cord No. 23 AWG. Tinned copper wire neoprene or Geon plastic jacketed. Long lengths can be cut to exact requirement. Adds product reliability. Useful wherever cords must change length or position. Nom. cond. resistance .022 ohms per linear foot, .185 ohms per retracted foot. Maximum working voltage 120 volts. Current carrying capacity 1 ampere.

Also available in retracted lengths of 12", 24" and 48".

RETRACTILE (KINKLESS) COILED SHIELDED COMMUNICATION CORDS

DESCRIPTION: Single and multi-conductor shielded microphone cable neoprene or geon plastic jacketed. This cable remains neat and compact with no danger of tripping or of the wire becoming entangled in equipment. Also suitable for stereo and additional speaker extensions. Shield can be pigtailed for soldering. No. 24 AWG Str. is 41/40 tinned soft cad. copper: No. 23 has 21/36 tinned soft cad. copper. Spiral wrapped tinned soft copper shielding.

Shielding Braid, Insulated Copper Wire, Braiding

UNINSULATED COPPER WIRE

TINNED COPPER SHIELDING

Used for shielding and bonding on aircraft, marine and auto radio wires and cables. Shields speaker leads, lead-ins, amplifier wires. Extremely flexible, slides over wires and cables.

DESCRIPTION:

No. 853 thru 856/7—Composed of extremely flexible fine soft annealed copper tinned wires closely woven, braided and Rolled Flat.

No. 860—Composed of extremely flexible fine soft annealed copper wires closely woven, braided and Rolled Flat.

TUBULAR BRAID PER MIL SPEC. QQ-B-575

Manufactured completely round as noted in MIL Spec. QQ-B-575, this tinned copper shielded braid has self-supporting characteristics which enables it to maintain its round shape. The shielding coverage percentage is 95% or more. This tubular braid is used in military applications where maximum shielding against electrostatic interference is indicated. In addition, it is used as a protective covering against mechanical abrasion and stresses for the wires, cables and other components.

STANDARD SPOOL PUT-UPS: 50' — 100' — 250', 500' — 1000'

*Values based on copper in free air at 65°F.
 Additional constructions and variations made to order. Also available in silver plated copper, bare copper and stainless steel.

SILVER PLATED TUBULAR BRAID AVAILABLE

ELECTRONIC LACING CORD/TAPE

To Meet MIL-T-43435 — COMP-P - Type S — MIL-T-713A - Type P*

FLAT BRAIDED LACING TAPE — NYLON

Flat braided Hi-Tenacity Nylon Fiber impregnated with (MW) microcrystalline fungicidal wax. Engineered to stay flat. Distributes stress evenly over a wide area. Resistant to fungus, flame, abrasion, acids. Will not cut or damage insulation. Has strength, toughness and stability.

TEFLON, DACRON AND G.E. FINISH LACING CORDS AVAILABLE.

HarnessRAP

This new spiral wrapping provides a readily flexible and strong protection for groups of conductors. Because of the facility with which it is applied it is particularly useful for temporary or experimental wiring as well as permanent installations. Leads can be brought out at any point to make a "tailor-made" harness, strong, secure, tight-fitting.

Harnessrap retains its elasticity and can be removed as easily as it is applied, then reused again and again.

Because of its flexibility it is especially useful for harnesses that carry wiring around sharp corners or that are subject to repeated flexing or bending.

MIL-W-76

TYPE MW — VINYL — 1000V — 80C

Tinned copper, vinyl insulated, medium wall. The polyvinylchloride insulation is flame and ozone resistant and is inert to most chemicals, oils, and solvents.

1728	8	20 (26x34)	Same as 1458	Same as 1722	.375	

MULTIPLE PAIR INDIVIDUALLY SHIELDED AUDIO & SOUND CABLE

Standard Spool Put-up: 100 ft., 200 ft., 500 ft., 1000 ft.

Specifications: Tinned copper conductor .013". Semi rigid vinyl insulation. Mylar aluminum shield and tinned copper drain wire, each pair. Overall Gray vinyl jacket.

No.	Type	Size & Stranding	Nominal Jacket Thickness (Inches)	Nominal Diameter (Inches)
5303	3 pair	22 (Solid)	.050	.340
5306	6 pair	22 (Solid)	.057	.435
5309	9 pair	22 (Solid)	.060	.540
5311	11 pair	22 (Solid)	.060	.575
5315	15 pair	22 (Solid)	.065	.660

MULTIPLE PAIR INDIVIDUALLY SHIELDED AUDIO & DATA CABLE

Specifications: Tinned copper .010" polypropylene insulation. Mylar aluminum shield and tinned copper drain wire each pair. Overall gray vinyl jacket.

No.	Type	Size & Stranding	Nominal Jacket Thickness (Inches)	Nominal Diameter (Inches)
5323	3 pair	22 (7x30) overall	.030	.275
5326	6 pair	22 (7x30)	.037	.400
5329	9 pair	22 (7x30)	.040	.440
5331	11 pair	22 (7x30)	.040	.485
5335	15 pair	22 (7x30)	.045	.540
5339	19 pair	22 (7x30)	.055	.620
5347	27 pair	22 (7x30)	.070	.760

COLOR CODING FOR PAIRED INTERCOM CABLES

Identification is simple with Consolidated Intercom Cables because they are all color coded. See chart below.

1 Black paired with Red	10 Red paired with Blue	19 White paired with Blue
2 Black paired with White	11 Red paired with Yellow	20 White paired with Yellow
3 Black paired with Green	12 Red paired with Brown	21 White paired with Brown

TELEPHONE AND COMMUNICATION CABLE

AERIAL & DUCT INSTALLATION — MEETS REA-PE-22

Description: Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-hygroscopic tape wrap, .008" corrugated aluminum shield, black polyethylene jacket overall.

Characteristics: Average mutual capacitance — .083 microfarads/mile. Minimal cross talk.

Applications: A tough, long lasting communication cable that can withstand moisture, ultra-violet and weathering.

#22 AWG — SOLID

DIRECT BURIAL INSTALLATION — MEETS REA-PE-23

Description: Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-hygroscopic tape wrap, polyethylene inner jacket, .005" corrugated copper shield, black polyethylene jacket overall.

Characteristics: Average mutual capacitance — .166 microfarads/mile. Minimal cross talk.

Applications: Impervious to moisture, abrasion resistant, suitable for direct burial.

STANDARD PUT-UP: CUT TO SPECIFICATIONS — MIN. 25 FT. — COLOR CODE — PER IPCA.

TELEMETERING & DATA SHIELDED CONTROL CABLE

STANDARD PUT-UP: CUT TO SPECIFICATION — MIN. 25 FT.

Description: Each conductor bare solid copper, high molecular weight polyethylene insulation, color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008" aluminum shield, black polyethylene jacket overall. Operating voltage 300 volts.

Double jacketed types, (8306-8420 below) same except for additional inner black polyethylene jacket over binder, and .005" copper shield.

Applications: Remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage, pressure, etc., control of multiple circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations.

Double jacketed types have higher dielectric strength and suited for direct burial installations.

CONSOLIDATED**PROTECTA-METAL SPOOLS**

Popular, profitable specialty wire packaged for easy selling in radio-electrical, scientific, specialty and hardware. Wide variety of sizes and insulations.

Keeps stock in perfect order, always saleable.

Supplied on Spools as Shown and in Heavier Weights.

Here is a handy and convenient way to stock small quantities of wire. It prevents wire from matting or tangling.

MAGNET WIRE #2000

The correct wire for practically any application. Magnet wire is indispensable in the manufacture and repair of both radio and audio frequency coils, transformers, chokes, speaker field coils, short wave coils, tuners, transmitters, etc. Also widely used in the construction and repair of motors, generators, dynamos, etc.

Larger Quantities At Same Per Pound List

SPECIAL MAGNET WIRES

In addition to the standard listing shown here, we maintain an extensive stock of all other sizes in round, rectangular and square magnet wire.

RESISTANCE WIRE #2000 ON PROTECTA-METAL SPOOLS

Recommended for electrical heating appliances and other devices where the highest quality in performance is required, whose operating temperatures do not exceed 1850°F. Particularly suited for heavy duty rheostats and controls which require compact resistance.

HIGH VOLTAGE AND ANODE LEAD CABLE

STANDARD SPOOL PUT-UP: 25 FT., 100 FT., 250 FT., 500 FT., 1000 FT.

Flame Retardant Polyethylene Plastic Insulation for high voltage leads to cathode-ray tubes in television receivers, oscilloscopes, power supplies and other uses requiring a high-voltage cable. Special features: minimum surface leakage, corona resistance and high dielectric strength.

No.	Size	Description	Stranding	Inches	Working Volts	Nom. O.D.
4601	20	Extra flexible tinned copper wire; Flame retardant Polyethylene Plastic Insulation; red cellulose acetate yard braid with 2 white tracers; lacquer coating.	7x28	.035	10,000	.136
4611	20	Same as No. 4601 except heavier insulation; solid red braid.	7x28	.065	20,000	.198

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

**DAFLEX 105 PLASTIC TUBING****105°C POLYVINYLCHLORIDE (PVC) MEETS MIL-I-631D SPECS**

Specifically compounded vinyl resins for superior all around performance. UL approved for 105°C, conforms to Spec MIL-I-631D Type F, Form U, Grades A and C, Class 1 and 2, Category 1. Resistant to heat, oil, water, chemical corrosion, fungi and aging. Very hi abrasion resistance. Will retain its flexibility. Suitable for covering and protecting wires and cables. Designed for electrical, electronic and aircraft applications. Non-flammable. Meets ASTM—D876, ASTM—D922.

D105 compounded with non-migratory resin type plasticizers. Retains its flexibility, permitting it to cling and protect irregular shapes. D105 snakes well under practically all conditions.

DAFLON TEFLON® SPAGHETTI TUBING

Daflon 500 and 550 tubing is extruded from Dupont Tetrafluoroethylene resin and is unmatched by any other tubing for use in applications for hi frequencies and hi temperatures. Rated for continuous operation of 250°C it retains its toughness and flexibility thruout. Has high resistance to fatigue and stresses. Will not shrink back during soldering operation. Non-flammable, flexible, it permits miniaturization of design and compactness. Lowest coefficient of friction. Inert to all fungus growth. Conforms to MIL-I-22129C Spec. AMS 3651B, 3653B, 3654, 3655.

DAFLEX VINYL COATED FIBERGLASS TUBING 130°C

MEETS MIL-I-3190B SPECS (ASTM, NEMA GRADE B-B-1)

DAFLEX 130, Class B, Grade B-1 is recommended for continuous temperatures up to 130°C. Constructed to provide a tough, flexible, heat resistant tubing. Made from an inorganic fiberglass base sleeving with heat resistant coating, extremely flexible tough plastic insulation. Will not support combustion. Meets MIL-I-3190B, NEMA VSI ASTM D372. MIL-I-21557.

Hot Air Gun FOR DAFLEX SHRINKABLE TUBING

DABURN No.

HG1—For SH265, SH275, SH290 & SH160 Series
HG2—For SH400 & SH621 Series

A flameless heat source; light in weight; portable and flameless permanent mounting.

An oven, hot liquids, radiant heat, open flame or soldering iron may also be used for all types of shrinkable tubing with excellent results.

HEAT SHRINKABLE TUBING**SHRINKABLE IRRADIATED POLYOLEFIN TUBING**

This series is designed for maximum mechanical strength at stress or points of connection. It is strong and abrasion resistant and is supplied in expanded sizes. It insulates, jackets, splices, encapsulates, weatherproofs components, connectors, cables and irregular shaped objects. When exposed to heat (235°F) the tubing shrinks 50% in diameter, 5% longitudinal contraction. Controlled shrinkage to exact requirement takes place. Meets or exceeds MIL-I-23053A Class 1 and 2. Available with UL approval. AMS 3636, 3637.

Tensile Strength: 1500 PSI Min.	Dielectric Constant: 2.87 Max.
Ultimate Elongation: 200% Min.	Corrosive Resistance: Non-Corrosive
Special Gravity: 1.29 Max.	Resistance to Soldering Iron: Excellent
Low Temp. Flexibility (—54°C): No Cracking	Fuel, Oil, Solvent, Acid, Alkali, Hydraulic Fluid Resistance: Excellent

**DABURN SHRINKABLE POLYVINYLCHLORIDE
ALL PURPOSE**

Shrinkage Ratio: 2:1 (50%)

Flexible, shrinks 50% on heat application, less than 10% longitudinal contraction. Suitable for insulating components and cables in varying shapes and diameters. Has a higher resistance to oils than low density polyethylene. Conforms to MIL-I-631D, Type F, Form V, Grade A and C, Class 1 and 2, Cat. 1. Controlled shrinkage on application of heat to predetermined size takes place at temperatures below 200°F (one minute or less). Meets or exceeds MIL-I-23053A, Grade 5.

HEAT SHRINKABLE TEFLON[†] TUBING**DAFLON SH-400 (FEP)**

Made with Modified TEFLON[†] FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage. FEP TEFLON[†], which has a continuous service temperature of 400°F., will shrink at 300°F. Supplied in natural color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON[†]. Will not burn or support flame, long lengths available. Extruded.

STANDARD PACKAGE: 100 Ft. † DUPONT

Daburn No. HG1 — Heat Gun for SH-265, SH-275, SH-290, SH-160 Series.

DAFLON SHRINK SERIES SH-621**TFE TUBING MIL-I-23053A CLASS 6**

Made of modified TEFLON[†] polytetrafluorethylene will shrink when heated to 621°F. Suitable where hi temp protection is required. Extruded. Will not support combustion, dielectric strength (20 Mil Wall) 850 V/M, low temp. brittle point —66°F, superior chemical resistance.

TUBULAR BRAID PER MIL SPEC QQ-B-575

Tinned copper shielded braid mfd completely round per Mil Spec QQ-B-575. Maintains its round configuration. Shielding coverage is 95% or more. Used in military applications where maximum shielding is required against electrostatic interference. Useful against mechanical abrasion and stresses for cables — as grounding cable.

STANDARD SPOOL PUT-UP: 50 Ft., 100 Ft., 250 Ft.

Larger Spools Available — Advise.

*Values based on copper in free air at 65°F.

Additional constructions and variations made to order. Also available in silver plated copper, bare copper and stainless steel.

TINNED COPPER SHIELDING — FLAT BRAID

Soft annealed tinned copper woven braid, rolled flat at time of manufacture. It is extremely flexible. Used as battery grounding, bonding strap for aircraft, vehicles, marine equipment. Eliminates ignition interference and moving parts. Slides over wire and cables.

**ADDITIONAL CONSTRUCTION AND VARIATIONS
MADE TO ORDER.****HEAT SHRINKABLE NEOPRENE* TUBING**

This unique tubing meets or exceeds MIL-T-23053B specs. Shrinks down to under 33% of its supplied inside diameter. Upon exposure to heat of 160°F — will remain elastomeric — with no cracks (longitudinal shrinkage 50%). Will protect components, solder joints, terminals, fittings, harnessing and jacketing of wires, medical equipment, etc. Resistant to abrasion, flame, chemicals. Suitable electrical and mechanical properties. Has continuous range of -67° to +212°F. Tubing is self extinguishing when flame is removed. Variety of intermediate recovered sizes. Available expanded sizes: 1/2", 1", 1 1/2", 2".

COLOR: Black. Tubing must be stored below 100°F.

PROPERTIES:**ELECTRICAL**

Dielectric Strength: V/M, 400 Min.
Volume Resistivity: OHM/CM, 1×10^{14} Min.

CHEMICAL

Solvent Resistance: Excellent
Corrosion: Good.
Water Absorption: 1.0 Max.
Flammability: Self-Extinguishing in 15 Seconds

PHYSICAL

Elongation: 400% Min.
Temperature Range: -67° to +212°F
Tensile Strength: 1500 PSI Min.
Dielectric Strength: 360 V/M Min.
Heat Resistance: 212°F for 96 Hours — No cracking.
Specific Gravity: 1.40 Max.

HARDNESS

Shore A Durometer: 85 ±5.

HEAT SHOCK

302°F for 4 Hours — No cracking, flowing or dripping.

**SH160 HEAT SHRINKABLE NEOPRENE* TUBING****COLOR: BLACK**

**SUBMINIATURE TEFLON* HOOK-UP WIRE
PER MIL-W-16878D — TYPE ET — 250 VOLTS, 200°C**

Thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in microminiature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D type ET 250 volts, 200°C. Silver plated copper conductor.

DABURN**DABURN ELECTRONICS & CABLE CORP.**

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

NEW CRT HI-VOLT CORONA RESISTANT TEFLON® CABLE®

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet,
approximately 1/3 lower

• Minimum life expectancy: 10,000 hours.

SMALL SIZE:

You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. Insulation used conforms and surpasses MIL-SPEC-W-16878D

AVOID CORONA PROBLEMS:

Corona resistant Teflon construction is specifically designed to retard and prevent corona penetration.

Temperature variations from -60° to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION:

Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon® Insulation.

TEMPERATURE RATING:

-90°C to +250°C.

VOLTAGE RATING:

Based on insulation thickness.

AVAILABLE COLORS:

White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250', 500', 1000'

* DUPONT

FEP TEFLON* CABLE
FEP EXTRUDED JACKET OVER SHIELD

DESCRIPTION: Each conductor silver plated stranded copper wire, Type E extruded TFE .010" insulation. Color coded, cabled, braided silver plated copper shield — 90% coverage, FEP white teflon jacket overall.

TEMPERATURE RATING: -65°C to +200°C.

VOLTAGE RATING: 600 V.

H FILM KAPTON* WIRE**DALITE™****HIGH TEMPERATURE HOOK-UP AND AIRFRAME WIRE**
200°C CONTINUOUS TEMPERATURE RATING (a)

INSULATED WITH DUPONT KAPTON* POLYIMIDE FILM WITH TEFLON* — FEP HEAT SEALED COATING CONFORMS TO MIL-W-81381.

CHARACTERISTICS: Dalite™ insulated wire provides high temperature stability, low temperature flexibility, high radiation resistance, resistance to cold flow, impervious to most chemicals, high dielectric strength, low dielectric constant, smaller diameters and lighter weight than any other comparable wire used for continuous operation up to 200°C. This hook-up wire meets the test requirements of MIL-W-16878 for 300 V, 600 V and 1000 V with smaller wall thicknesses, weight and dimensions.

(a) Temperature based on lowest temperature rating of materials in the insulation — FEP 200°C. Will pass 96 hour heat age tests at 290°C per MIL-W-16878.

DESCRIPTION: Single conductor, silver plated annealed copper conductors, Type H* Polyimide film with Teflon* FEP coating tape wrapped overall.

NEW DABURN HIGH TEMPERATURE LEAD WIRE

Small Diameters and High Temperature performance make an outstanding combination for these unique constructions. Basic wire conforms to MIL-W-3861 spec. shielding per MIL-N-46026A. 600V RMS.

800°F TEMPERATURE RATING

High temperature aircraft and missile lead wire for operation between 500°F and 800°F. Nickel clad copper conductors with glass braided fiber insulation impregnated with silicone varnish. Multiconductor and shielded construction will be manufactured to customer's specifications.

SEMI-RIGID BUSINESS MACHINE WIRE — U.L.**300 VOLT 80°C — STYLE 1061**

Stranded tinned copper, color coded semi-rigid polyvinylchloride insulation. Has Temperature Rating of -10°C to +80°C, 300 volts in electronic computers or business machines only.

DESCRIPTION: One Conductor stranded tinned copper, semi-rigid PVC.

HI-VOLTAGE CABLE

One conductor, stranded copper tinned, rulan — flame retardant — polyethylene insulation, braided tinned copper overall when shielded. Used as hi-voltage leads in electronic equipment to minimize RF radiation in equipment.

DESCRIPTION: One conductor, stranded copper tinned, rulan (flame retarding type) polyethylene insulation. Available white/red tracer. Temp. Rating: 105°C.

Shielded: Same as above with tinned copper braided shield overall. Special construction available to order.

FLAT RIBBON CABLE, TYPES B & C PER MIL-W-16878D**MULTI-CONDUCTOR — POLYVINYLCHLORIDE INSULATION CONDUCTORS****Per MIL-W-16878D — TYPE B — 600 V**

DESCRIPTION: Each conductor stranded tinned copper .010" polyvinylchloride insulation bonded to form flat ribbon cable.

Rated: -55°C to +105°C. **Voltage Rating:** 600 volts. Resists acid, alkalis, flame, moisture, oil, solvents, fungus. Conductors are color coded and separate easily for clean terminations. Saves space, time on circuit and interconnecting assemblies, wiring harnesses, sliding drawers and drop assemblies.

TELEPHONE CABLE

(Meets REA-PE-22)

**EXCHANGE AREA — COMMUNICATION CABLE
AERIAL, DUCT AND CONDUIT INSTALLATION**

DESCRIPTION: Color coded polyethylene insulation over each bare copper conductor. Conductors are paired. Pairs are cabled with non-hygroscopic tape wrap, corrugated aluminum shield, .008" thick and black polyethylene jacket overall.

Minimal cross talk .083 microfarads/mile — average mutual capacitance, 1 KC. This is a tough, long lasting cable — withstands weathering, ultra-violet and weathering.

PLASTIC SPEAKER CABLE CLEAR AND COLORED INSULATION**DESCRIPTION:** Conductors are parallel, stranded bare copper, color coded and clear polyvinylchloride insulation. Conductors separate quickly when split apart. Suitable for hi-fi speaker cable, miniature juke-box speaker connection, rear auto speaker extension cable. Clear insulation blends with any interior.

TEMPERATURE RATING: -20°C to +60°C. OPER. VOLTAGE: 300V

PLASTIC WIRE TIES

Useful for temporary or permanent installation. Can be adapted for immediate bundling or harnessing. Vinyl insulated. Has .016" steel gauge, wire reinforcement, 3/32" wide, 30 lb. test.

TEMPERATURE: -20°F to +90°C.

DABURN Cat. No.	Standard Package
603	100', 500', 1000'

COLORS: White, Blue, Red, Green, Yellow.

DABURN PUSH BUTTON WIRE TIES

Push button wire ties for harnessing wire. 4 1/2" in length, each tie is adjustable to 30 different diameters. Made of strong polyethylene, it is inert chemically and heat resistant. Breaking strength 45 to 95 lbs. After the tie is placed in hole for anchoring, wires can be replaced or added by loosening tie and pulling tight again. Designed to fit .250" to .265" hole in a .031" to .140" thick panel. Material conforms to Spec. LP590. Temp. to +200°F

DABURN Cat. No.	(Specify Color)	Standard Package
601-4	Red, Blue, Yellow	100, 1000

**DABURN NYLON
PUSH BUTTON WIRE TIES**

Same description as No. 601-4. Temp. to 300°F.

5 1/2" long. Made of tough Nylon. Higher temperature range than Polyethylene.

DABURN Cat. No.	Color	Standard Package
601-5	Clear	100, 1000

DABURN COMPONENT CLIPS

Hold and insulate, electrical and electronic components, accessories — spare parts. Holds firmly and still permits fast and easy insertion. Convenient for fastening clips and retainers for transistors, batteries, fuses, capacitors, resistors, lamps, etc. These Daburn clips are made of black vinyl (polyvinylchloride). Has high dielectric strength. Can be mounted with screws, rivets or other fastening means.

MATERIAL: Rigid Vinyl.

TEMPERATURE RANGE: -20° to +165°F.

STANDARD PACKAGE: 100, 1000.

NYLON CABLE CLAMPS**MADE OF DU PONT "ZYTEL" 101 NYLON RESIN**

Meets MIL-P-26093A and MIL-P-17091A Amend. 2. Light and tough these nylon cable clamps are used as a clamp, strain relief, clip hanger, fastener or strap. Smooth non-abrasive surfaces, rounded edges will not cause shorts or grounds in cable. Insoluble in solvents, gasoline, oils, hydraulic fluids, alcohol, acids, alkalis. Temperature range — 60°F to +300°F. Does not support combustion. Inside matte finish. Prevents slippage and is self aligning. Snaps on cable. Meets MIL-P-26093A specs, fungus resistant.

NYLON TENSION CLIPS

Holds cable-wire-tubing-pipe-panels-many and varied uses. Made of nylon, they are insulating, non-corrosive and weather resistant. Easily fastened, easily removed. Strong and elastic.

ELECTROVERT INC.

WIRE/CABLE HARNESSING,
PVC WIRING DUCT

COMPONENTS DIVISION

CABLE TIES

- SELF LOCKING HEAD
- INFINITELY ADJUSTABLE
- HAND OR TOOL APPLIED
- MEETS MIL-S-23190, MS-17821, MS-18034

Meets MIL standards MS-17821, MS-18034 and MIL-S-23190. Superior locking system permits application either by hand or tool. When used with tool, universally applicable with all approved tools. Neat and permanent, four sizes, infinitely adjustable within given range, fit all bundles $\frac{1}{8}$ " thru $\frac{3}{4}$ " dia. Molded of virgin nylon; lightweight; abrasion resistant high tensile strength, exceptional dielectric properties and resilience; minimum absorption rate; resistant to common solvents, alkalis, dilute acids, oils and grease.

Standard carton of 500, standard package of 100. Sizes may be combined for quantity prices.

Also available in a complete range of colors and ultra-resistant for outdoor applications at 10% additional.

ADJUSTABLE P-CLIPS

- REDUCES INVENTORY
- TENSION CONTROL
- SIMPLIFIES CHANGES IN BUNDLE MAKE-UP

Designed with adjustable feature to accommodate a wide range of bundle diameters. Ratchet teeth provide positive locking action to prevent slipping even under conditions of vibration and shock. Virgin nylon construction provides lightweight, abrasion resistance, high tensile strength, exceptional dielectric properties, resilience and minimum absorption rate with chemical resistance to common solvents, alkalis, dilute acids, oils and grease.

TENSILE STRENGTH: 11,000 psi. MELTING POINT: 482-500°F self-extinguishing. ENDURANCE LIMIT: 3000 psi; no failures to 2,000,000 cycles.

ELECTRO-DUCT PVC WIRING DUCT

- HIGH IMPACT PVC
- INTERLOCKING CHANNEL AND SNAP-ON COVER
- TEMPORARY ADHESIVE MOUNTING
- SNAP-OFF TYPE PLASTIC FINGERS

High-impact vinyl duct won't peel, chip or crack; resists oils, grease, salt solution, most dilute acids, fungus. Non-flammable and warp-proof. High dielectric; will withstand temperatures of approx. 150°F. Easily cut and installed with any hand or power cutting tool for butt or mitered joints. Open slot design. Snap-on, non-slip cover eliminates vibration slippage. Temporary adhesive mounting permits drilling and lining up mounting holes easily. Surface indentations on inside of channel provide positive starting point for drilling and prevents drill-bit slippage, scored snap-off type plastic fingers permit slot enlargement for lead-offs to accommodate any size wire and/or wire bundles. Choice of gray or white. CSA Approved. As listed, items include channel and cover. Standard length, 6 ft.

Electrovert No.	Nominal W & H	Std. Ctn.*	Net per ft.*		
			Under 200'	200' to 900'	1,000' to 1,999'

3030A	3" x 3"	24	1.30	1.05	1.00

*Catalog number and price includes complete unit of channel and cover. For gray add suffix letter "G"; for white add suffix letter "W" to Cat. No.

**Also sold in broken cartons.

CRADLECLIP

- VERSATILE HARNESSING SYSTEM
- FAST & SIMPLE: ONLY 5 SECONDS PER FIXING POINT
- ON-THE-SPOT WIRING CHANGES WITHOUT REPLACEMENT OR TOOLS

The only system of its kind for both supported and unsupported wiring. Consists of two pieces: Binders and clips for unsupported wiring; cradles and clips for supported. When used for supported wiring, cradles may be secured to panels by conventional bolt and nut, speed drives or drive-rivets. Also available with captive nut for preassembly of harness prior to mounting from rear of panel. Binders and cradles are nylon; clips are neoprene. Secure design will withstand vibration without damage to wire insulation. Standard color is black. Available in colors.

SLIP-ON Z MARKERS

For single wire or cable before terminal attached or connection is made. One-piece, sleeve type expandable to fit a given wire diameter range and grip firmly. Positive "non-slip-grip" is a result of unique accordion pleat design of the marker and ability to expand up to 350% of its original size. The accordion pleat expands to slip on the cable and retracts to hold firm in position. It is made of flexible, durable PVC (MIL-I-631C) to comply with military, civil, and trade association specifications (JIC, MIL-E-5400, MIL-E-4158A, MIL-E-16400). Specify letter (A-Z); numeral (0-9), or electrical symbol desired when ordering. Minimum order is one package of 50 of any letter or numeral. Also available in feed-out reels of 500, in colors and multiple markings.

*Same as AWG PVC insulated wire.

SPIROBAND SPIRAL-WRAPPING

Spiral wrapping for flexible electric harnesses and cable. Unusual flexibility and elasticity make it ideal for temporary and experimental as well as permanent applications. It permits lead-off or additions of wire at any point. Handles easily, without special tools or skills. Provides excellent abrasion resistance, protection, and insulation to wire bundle. Available in a variety of materials — natural, ultra-violet resistant, and fire retardant polyethylene; nylon and teflon for high temperature applications (nylon to 250°F; teflon to 500°F).

CLIP-ON C MARKERS

A clip-on type marker specifically designed for application either before or after terminal connection has been made. May be removed for re-coding without breaking terminal connection. Quick, easy to apply, requiring no tools. Rigid PVC material. For single wire or cable. Same size fits a given range cable diameter. Specify letter (A-Z), numeral (0-9) or electrical symbol desired when ordering. Minimum order is one package of 50 of any letter or numeral.

STRAP-ON S MARKERS

For identification of large cables, bundles of wire, busbars, tubing, etc. with 1/2" O.D. or greater. There is no limit to the diameter that can be identified with this system. Consists of a flat rigid PVC marking tab, 3/8"x3/8", and a PVC-covered aluminum strap. To apply, marking tab is placed on cable, strap inserted in slots, and then cut to size and crimp strap ends. Markings: Letters A-Z, numerals 0-9, symbols.

Type-S Markers — Specify marking. Net Pkg. of 50 _____ \$ 1.65
Wire Strap — Net per 165 ft. coil _____ 18.85

STRAPPING AND STUDS

- TWO SINGLE COMPONENTS
- LOWEST COST

High grade PVC Strapping with holes conveniently spaced for securing with nylon studs. Easiest, fastest, and most economical method of securing or grouping unsupported bundles of wires or cables; suitable for all types, any form or diameter. Extremely strong and applicable within a temperature range of -26° to +146°F. Standard in black; colors available. In two size widths.

GROMMET STRIP WITH SNIP-N-FIT FEATURE

Versatile, economical grommet strip designed to replace pre-formed grommets, and provide excellent insulation and abrasion protection wherever a peripheral opening exists.

Advantage of one strip only application to round, square, rectangular or oval openings. No adhesive or special tools required. Versatile, economical. Comes in six sizes for all gauges from 20 gauge to 1/4" thick. Standard natural polyethylene with high dielectric strength provides excellent insulation. Moisture-proof, non-staining, non-toxic, grease and oil proof at ordinary temperatures.

ICO/RALLY

A DIVISION OF RALLY INDUSTRIES

RALLY RAP—Spirally Cut Tubing

CAT. NO.	SWP	Polyethylene—general purpose—Sizes $\frac{1}{8}$ " to 1" for bundle sizes $\frac{1}{2}$ " to 8". Black for outdoor use.
	SWN	Nylon—top mechanical strength—Sizes $\frac{1}{8}$ " to 1".
	SWR	Flame Retardant (Rulan)—self extinguishing—Sizes $\frac{1}{8}$ " to $\frac{1}{2}$ ".
	SWT	Teflon—High temperature—Sizes $\frac{1}{8}$ " to 1" for bundle sizes $\frac{1}{2}$ " to 6".

HEATRAX®—Heat Shrinkable Tubing

CAT. NO.	HIX	Irradiated Polyolefin—Shrink ratio 2 to 1—general purpose—Sizes $\frac{3}{4}$ " to 4"—Conforms to MIL-I-23053
	HRX	Semi-Rigid Irradiated Polyolefin—Shrink ratio 2 to 1—strain relief applications—Sizes $\frac{3}{4}$ " to $\frac{1}{2}$ "—Color coded by size. Conforms to MIL-I-23053
	HXC	Irradiated Flexible Vinyl—Shrink ratio 2 to 1—irradiation enhances flexibility and crack resistance—Sizes $\frac{3}{4}$ " to 2"—Conforms to MIL-I-23053
	HVX	Flexible Vinyl—low cost—Shrink ratio 2 to 1—Sizes $\frac{1}{16}$ " to 2". Available in color and clear. Conforms to MIL-I-23053
	HTX	Thin Wall Teflon—Shrink ratio $1\frac{1}{2}$ to 1—Sizes AWG 30 to 0—Conforms to MIL-I-23053
	HSX	Standard Wall Teflon—Shrink ratio $1\frac{1}{2}$ to 1—Sizes AWG 24 to 0—Conforms to MIL-I-23053
	HFX	Fractional Sizes Teflon—Shrink ratio 4 to 1—Sizes $\frac{3}{4}$ " to $1\frac{1}{4}$ "—Conforms to MIL-I-23053
	HKX	Kynar—Shrink ratio 2 to 1—Sizes $\frac{1}{8}$ " to 1" clear. Extremely tough, cut-through and abrasion resistance.
	HCS	Vinyl—Shrinkable outside, sticky meltable inside. Adheres to form waterproof seal. Sizes $\frac{1}{4}$ ", $\frac{1}{2}$ ", $\frac{3}{4}$ ". Color—black.
	HIM	Polyolefin—Sizes from $\frac{1}{8}$ " to 1"—Shrinkable outside, meltable inside. Does not adhere but forms tight mechanical seal. Color-coded by size.

INSULATE-HARNESS-PROTECT!

COMPLETE ELECTRO-PLASTIC MATERIALS
AND WIRING DEVICES FROM A SINGLE SOURCE

VINYL, FIBERGLASS & TEFLON TUBING

CAT. NO.	SLV-105	Vinyl, Temperature to 105°C. Class A—Sizes AWG 24 to 2 $\frac{1}{2}$ "—Conforms to MIL-I-631D, Grade C, Class 1 & 2.
	SLV-40	Vinyl, Low Temperature down to -65°C—Sizes AWG 24 to 2 $\frac{1}{2}$ "—Conforms to MIL-I-7444B; MIL-I-22076.
	SLV-130	Fiberglass High Temperature to 130°C Class B, Grade B—Sizes AWG 24 to 1"—Conforms to MIL-I-3190B; NEMA-VS1.
	SLV-1200	Fiberglass High Temperature to 650°C, Class C—Sizes AWG 24 to 1"—Conforms to NEMA-VS1.
	STT	Teflon Thin Wall—Sizes AWG 30 to 0—Conforms to AMS 3651B, 3655; MIL-I-22129B.
	STS	Teflon Standard Wall—Sizes AWG 24 to 0—Conforms to AMS 3651B, 3653; MIL-I-22129B.
	STL	Teflon (Extra Thin) Lightweight—Sizes AWG 28 to 0—Conforms to AMS 3651B, 3654.
	TTF	Teflon (Heavy Wall) fractional sizes—Conforms to MIL-I-22129B, AMS-3651B.

ZIPPER TUBING

CAT. NO.	Z63	General Purpose Vinyl—Temperature to 105°C—Conforms to MIL-I-631D, Class C.
	Z74	Low Temperature, Flexible Vinyl for applications down to -70°C. Conforms to MIL-I-7444B.
	ZHN	Nylon with aluminum foil. Excellent RFI shielding—Conforms to MIL-C-20696, Type I, Class 2, MIL-A-148A.

LACING TAPE & CORD

CAT. NO.	LTN	Flat Braided Nylon—Widths .250", .125", .090", .062", .045". Conforms to MIL-T-43435, Type I; MIL-T-713A, Type P.
	LTD	Flat Braided Dacron—Width .090"; Conforms to MIL-T-43435, Type II; MIL-T-713A, Type D.
	LTT	Flat Braided Teflon Tape—Width .090"—Conforms to MIL-T-43435, Type III; MIL-T-713A, Type PTFE.
	LCN	Round Twisted Nylon Cord—Diameter .050", .035", .030". Conforms to MIL-T-713C, Type P.
	LCL	Round Twisted Linen Cord—Diameter .035"—Conforms to MIL-T-713C, Type N.
	LCV	Round Vinyl Cord—Diameter .065"; material Virgin PVC, Type A.

CABLE CLAMPS

CAT. NO.	CLE	Ethyl Cellulose—General Purpose—Sizes $\frac{1}{8}$ " to $1\frac{1}{2}$ "—Conforms to 7-21-44 Army-Navy Aeronautical AN742.
	CLN	Nylon—Temperature to 135°C, Sizes $\frac{1}{8}$ " to $1\frac{1}{2}$ "—Conforms to MIL-P-17091A & B, P-20693, C-2165 and MS-39014.
	CLT	Teflon—High temperature to 260°C, Sizes $\frac{1}{8}$ " to $1\frac{1}{4}$ ".

GROMSTRIP®—Continuous Extruded Grommet

CAT. NO.	GSP	Polyethylene for general application, sizes for thicknesses #24 gauge to $\frac{1}{2}$ ".
	GSN	Nylon for excessive abrasion, sizes for thicknesses #24 gauge to $\frac{1}{2}$ ".

GROMMETS

GV	Vinyl for general application—Sizes for edge protection of holes from $\frac{1}{8}$ " to $1\frac{1}{16}$ " diameter. Black and White.
----	---

CABLE TIES

CAT. NO.	CTN	Self-locking virgin Nylon, no metal parts. Conforms to MS-17821, MS-18034 and MIL-S-23190. Apply by hand or any standard assembly tool.

Multiple Conductor Control Cables

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cables. Conductors are of tinned copper strand with $\frac{1}{64}$ " vinyl primary insulation for use up to 105°C per MIL-W-16878D Type Ct. Insulated for 1000 volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per MIL-STD. 122.

All conductors are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black polyvinyl-chloride thermoplastic, meeting specification MIL-I-631 Class F, or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene jackets at added cost.)*

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

*(Standard put-up for Neoprene jacketed cable is 250 ft.)

† Insulated Conductors are also UL approved under UL type 1007 AWM, and are CSA approved as type TR 64.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.
Insulation Leakage Res.:	200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to -55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to -20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at -40°C, or for continuous flexing service to -55°C, specify our neoprene sheath, in lieu of plastic sheath.

MULTI-CONDUCTOR STOCK CABLES

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

DIGITAL DATA TRANSMISSION CABLES

THE D-200 SERIES CABLES ARE MULTIPLE-PAIR FLEXIBLE CABLES DESIGNED FOR TRANSMISSION OF DIGITAL PULSE SIGNALS BETWEEN A COMPUTER AND ITS PERIPHERAL EQUIPMENT.

These cables are specifically designed for use with TTL, ECL, DTL or RTL logic systems. They feature signal pairs with a uniform high surge impedance, low delay, low capacitance and attenuation.

The cables may be directly driven by I.C.s' in either balanced or single-ended systems. The compact cable dimensions allow convenient connector installation and tight installation bends.

All cables have an overall shield and black vinyl outer sheath.

The D-200 series cables are designed to be used in either balanced or single-ended systems without the need for individual shields on each pair. By omitting the shields, the surge impedance is kept high yet the cable size is small. The cable geometry, pair and layer lay lengths, rotation directions, and the insulation materials and sizes have been carefully designed for low cross-talk and exact surge impedance.

All cable lengths are factory-tested for surge impedance accuracy using time-domain reflectometry techniques; and are certified to meet the impedance tolerances specified.

STANDARD DATA CABLE CONSTRUCTIONS

SHIPMENT!**

National Wire and Cable Corporation maintains one of the largest and most complete stocks of electronic and aircraft wire and cable in the nation. Total footage of floor stocks exceeds 50 million feet!

Your immediate source for "MIL and Jan-Spec" wires, coaxial cables and vinyl sleeving.

Special color coded, shielded and jacketed combinations of hook-up wire and multi-conductor cables can be made to your specifications and delivered promptly without delay.

U. L. APPROVED

COMPUTER GRADE

Miniature SIGNAL & CONTROL CABLES

National Wire & Cable Corp. manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C. per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. APPROVED STYLE 2343 COMPUTER CABLE; rated 300 volt, 80°C. (Higher temp. ratings apply for any non-U.L. service.)

Standard Putups: 500 & 1000 ft. No-deposit reels.

*Denotes U.L. Style 2344.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 5000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft at 1. kc, depending on gauge and position.
Insulation Leakage:	200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.
Sheath Leakage:	10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.
Temperature Range:	Suitable for continuous use from -40°C. to +105°C. (U.L. Service limited to +80°C.)
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to -20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at -40°C.

MULTI-CONDUCTOR STOCK CABLES SINGLES Cond: 22, 24 are 7 strand; 20 AWG is 19 strand

NATIONAL WIRE & CABLE CORP.

MANHATTAN ELECTRIC CABLE CORPORATION

Brooklyn, New York

Atlanta, Georgia

Los Angeles, California

Burlingame, California

Independence, Ohio

The nation's leading supplier of electric wire and cable, from Service and Distribution Centers throughout the United States, continues its program of expansion with the formation of an Electronic Division.

The company was founded in 1929, under the direction of Sidney Cannold, a pioneer in the concept of supplying from stock diversified types of electric wire and cable.

Under the direction of Dan Cannold, the concept of Local Service & Distribution Centers supplying regional requirements was established so that today Manhattan Electric Cable has seven regional warehouses occupying approximately a half million square feet of facilities.

All requirements for wire and cable are sold through recognized wholesalers and distributors. These Local Service Centers can provide 24 hour delivery to all points in the continental United States.

Since the 1940's, Manhattan Electric Cable continued to expand its product line and services until it carried the largest and most diversified stock of quality wire available in the United States, as it continues to do today.

The product line listed in this catalog represents an expansion into the electronic wire and cable market. This product category concentrates primarily on Communications, Instrumentation and Control applications and has been designated the CIC-Product Line of Manhattan Cable, the Electronic Division.

All products listed in this catalog will be available from stock and will be serviced by the regional warehouses and sales offices listed below:

- Brooklyn, New York
- Atlanta, Georgia
- Los Angeles, California
- Burlingame, California
- Independence, Ohio
- Houston, Texas
- St. Louis, Missouri

Inasmuch as electronic wire and cable is a constantly developing marketing area, new products and items will supplement this catalog as they are innovated and the demand pattern established.

Manhattan Electric Cable is a specialist in wire and cable covering all phases of industry. We specialize in wire and cable; wire and cable is our only business.

Manhattan - the vital link to distribution of wire and cable.

Houston, Texas

St. Louis, Missouri

MANHATTAN

CIC-R

Rubber Jacketed Control Cable Shielded and Unshielded

APPLICATIONS: Flexible inside control cable for instruments, automatic equipment, relaying devices, control circuits, microphones, audio, and broadcast studio use.

CONDUCTOR: No. 20-26/34 tinned copper
INSULATION: .020" Color coded rubber
CABLING: Conductor cabled with fillers when necessary, mylar wrap.
SHIELD: Braided tinned copper, mylar wrap over shield.

JACKET: .035" BLACK HEAVY DUTY RUBBER
SUGGESTED WORKING VOLTAGE: 600 Volts RMS
STANDARD PUT-UP: 500 ft. and 1000 ft.

MANHATTAN

CIC-MSO

Neoprene Jacketed Control Cable 600 Volts

APPLICATIONS: Designed for heavy duty use in relay control, power and signal transmission, lighting, motor and turbine control, telemetering, switching control of automatic electronic and electrical equipment, substation operations, traffic control and fire alarm control. Neoprene has exceptional flexibility, mechanical strength and suited for either indoor or outdoor installation.

CONDUCTOR: Stranded bare copper-minimum strands*
INSULATION: Color coded rubber per National Electric Code standards

CABLING: Cabled with fillers when necessary, separator over conductors

JACKET: RUGGED BLACK NEOPRENE

VOLTAGE TEMPERATURE RATING: 600 Volts - 60°C

STANDARD PUT-UP: Cut to requirements.

CIC-PT

Control Cable-600Volts-90°C

GENERAL PURPOSE—PLASTIC JACKET IPCEA

APPLICATIONS: Small diameter control cable used in process control equipment, remote sub-station operations, signalling and indicating devices, measurement and recording equipment, telemetering and switchgear operating.

CONDUCTOR: Flexible stranded copper
INSULATION: Polyethylene insulation with PVC jacket over primary insulation, color code IPCEA
CABLING: Conductors cabled with fillers when necessary, mylar tape over core
JACKET:- BLACK PVC PLASTIC
VOLTAGE RATING: 600 Volts
TEMPERATURE RATING: 90°C
SPECIFICATION: IPCEA-NEMA S 61-402
STANDARD PUT-UP: Cut to requirements.

Multi-Conductor Control Cable

SHIELDED PLASTIC JACKET - PER MIL-W-16878D

APPLICATIONS: Shielded interconnecting and instrumentation cable for electronic equipment, sensing and recording devices, telemetering data transmission, remote control of instruments requiring electrostatic and R.F.I. shielding.

CONDUCTOR: Stranded tinned copper
INSULATION: Either .010" or .016" 105°C PVC with or without nylon, MIL-W-16878D color coded per method 1, IPCEA
CABLING: Conductors cabled with filler when necessary for roundness and maximum flexibility, clear mylar wrap over core
SHIELD: Braided tinned copper shield 90% coverage
JACKET: SMOOTH CHROME GRAY 105°C PVC PER MIL-W-16878D
VOLTAGE & TEMPERATURE RATINGS:- 1000 Volts RMS 105°C
STANDARD PUT-UP: Cut to requirements

GS4H — Manual \$40.00 ea. net. Heavy Duty — installs all Standard and Heavy STA-STRAP Ties.

PANDUIT CORP.

SAXTON PRODUCTS INC. is a Complete Source for all Types of Industrial, Commercial and Military Wire and Cable. Listed here are only a few of the Product Groups which Saxton regularly carries in Stock. Many more Stock types are available and countless types can be made to order.

SMALL OR LARGE QUANTITIES PROMPTLY HANDLED

COAXIAL CABLE

COMMERCIAL TYPES AND MIL TYPES

SAXTON CAN supply all types of RG/U Cable. This includes 50 ohm, 75 ohm and 93 ohm with solid polyethylene dielectric and foam polyethylene dielectric for general purpose, television and military application.

OPEN WIRE TRANSMISSION LINE

SAXTON SUPPLIES all types of low loss air dielectric open wire transmission line made with copperweld wire or solid copper wire. 300 ohm, 450 ohm, 475 ohm transmission lines are available with 7/16" spacing, 1" spacing, and 2" spacing using 12 gauge, 14 gauge, 16 gauge and 18 gauge conductors.

HIGH VOLTAGE WIRE

FLAME-RETARDANT RULAN INSULATION

SAXTON MANUFACTURES all types of High Voltage Wire including shielded and unshielded types with 18 and 20 gauge conductors.

MIL-C-3432 SPECIAL CABLES

SAXTON OFFERS all types of MIL-C-3432 Cable in all gauges and number of conductors.

TEFLON MIL-W-16878D

SAXTON OFFERS a complete selection of Teflon Wire made to military specifications. This includes gauges from 14 through 30 with Type E, Type EE.

UNINSULATED COPPERWELD

40% COPPERWELD CONDUCTOR NON-STRETCH
HARD-DRAWN

SAXTON HAS uninsulated copperweld wire in all gauges from No. 6 to No. 18.

Saxton

PRODUCTS, INC.

MULTI-CONDUCTOR JACKETED CABLE

SAXTON MANUFACTURES all types of multi-conductor cable. Both solid and stranded conductors are available in 18, 20 and 22 gauge. Stock items include cables of from two conductors through 12 conductors.

MULTI-CONDUCTOR SHIELDED JACKETED CABLE

SAXTON CAN supply 1, 2, 3, or 4 conductor cable with solid or stranded conductors from 16 gauge thru 24 gauge with either a spiral wrapped shield aluminum foil or a braided shield.

UNSHIELDED AUDIO CABLE

SAXTON OFFERS multi-conductor unshielded unjacketed Audio Cable with solid or stranded conductors from 16 gauge thru 22 gauge.

AUDIO CABLE

SAXTON MANUFACTURES all types of Audio Cable with solid conductors or stranded conductors running from 12 thru 22 gauge. The selection includes 2 conductor shielded, 3 conductor wherein 2 conductors are shielded and one is not and four conductor wherein two conductors are shielded and two are not.

MICROPHONE CABLE

SAXTON MANUFACTURES all types of low capacity microphone cable. Gauges run from 20 through 26 with 1 through 6 conductors. The choice of shields include braided, spiral wrap and aluminum foil.

INTERCOM CABLE

SAXTON PROVIDES all types of Intercom Cable from 1 pair through 51 pairs with 22 gauge solid or stranded conductors.

UNINSULATED TINNED COPPER

SAXTON SUPPLIES solid and stranded uninsulated tinned bare copper wire in all gauges from 12 through 20.

PLASTIC HOOK-UP WIRE

SAXTON MANUFACTURES all types of Plastic Hook-Up Wire with either solid or stranded conductors from 14 gauge to 22 gauge.

SHIELDED PLASTIC HOOK-UP WIRE

SAXTON MANUFACTURES all types of Shielded Plastic Hook-Up Wire with either solid or stranded conductors from 14 gauge to 22 gauge.

TEST LEAD WIRE

SAXTON PROVIDES all types of Test Lead Wire with 18 gauge and 20 gauge conductors in voltage breakdown ratings from 5,000 volts to 22,000 volts.
